Army Service Corps—Head Quarters, Winchester House, St. James's Square, S.W.

The *Standard* correspondent at Cairo telegraphs :—"The Egyptian Government has accepted General Wood's scheme for the reorganisation of the Egyptian Army, and only a few minor details now remain for settlement. Four out of eight of the infantry battalions will be officered by Englishmen. The remaining four will have native officers. The artillery will have an English commander, and each battery will be under Englishmen. The cavalry will be commanded by an English officer. The infantry battalions officered by Englishmen will, as far as possible, be stationed conjointly with equal forces under native command. It is hoped that the inevitable emulation will produce a good effect. Each English officer on his appointment must have a fair knowledge of French, and must be prepared to pass an examination in colloquial Arabic after six months, and a second examination in colloquial and written Arabic in twelve months."

The Vienna *Presse* states that the Emperor of Austria has sanctioned the retirement of the Duke of Teck from service in the Austrian Army, in which he holds the rank of major.

Amusements.

At Her Majesty's Theatre an elaborate fairy extravaganza, called "The Yellow Dwarf," originally intended for the Pandora, in Liecester Square, still awaiting completion, has been produced, at a considerable cost, but with the serious disadvantage of insufficient rehearsals. It is now more conveniently recast in the form of four acts, and the scenic effects, which are for the most part very brilliant, are far better developed. The great attraction of this novelty is undoubtedly to be identified with the clever performance of two singularly well-trained, young elephants. The other notable features are a dance of dolls, several ballets showing rich combinations of colour, and Mr. W. Telbin's elaborate transformation scene, called "The Realms of Gold." Madame Olga Morini sings artistically as the Princess, the Yellow Dwarf has a clever representative in Master Ross, Miss Emma Chambers throws great animation into the character of Hymen, the Brothers Huline are highly diverting as comic courtiers, and Miss Marie Lindon is sufficiently youthful and pleasing as the King of the Gold Mines. A serious error has been made in assigning to Mr. Alfred G. Vance the part of the envious Queen; and, indeed, the repulsive assumption of female characters by music-hall male vocalists is this year a most discreditable violation of good-taste at several of the pantomime-producing theatres.

At the Royal Aquarium, Westminster, is now being exhibited, under the name of "Krao," a curious little creature, about eight years old, claimed by Mr. Farini to represent the missing link between the human race and the monkey tribe. The child is the offspring of a small family of hairy people said to exist in Central Asia, and was brought from Laos by Mr. Carl Bock, the well-known traveller. This diminutive being, entirely covered with hair, has picked up a few words of English, and appears to be docile and intelligent.

At Piccadilly Hall, on Wednesday, Mr. Francis M. Uffner introduced for the first time in this country Colonel Chang Yu Sing, who has attained in his 35th year the height of 8 ft. 6 in. He is a native of Pekin. A singular contrast is afforded by a vivacious dwarf, born in Nova Scotia, and only 19 in. high at the age of 15. "General Tiny Mite" is boldly proclaimed by the exhibitor the smallest man in the world.

The unattractive nature of the performances at the recently opened Novelty Theatre in Great Queen Street, Long Acre, was speedily indicated by a rapidly diminishing attendance, and the house has now closed, somewhat suddenly.

The Olympic will be reopened this evening, Saturday, when Miss Geneviève Ward, after an absence of two years in America and the provinces, will reappear in London as Stephanie in "Forget-me-Not," which will then be represented for the 719th time.

At Toole's Theatre there will be next week a change in the programme. "Girls and Boys," having been played for sixty nights, will be withdrawn, and Mr. Toole will resume his popular character of Caleb Plummer, in a revival of "Dot," dramatised by Mr. Dion Boucicault from Charles Dickens's Christmas story of "The Cricket on the Hearth."

Reviews.

Moltke and Gambetta. By Captain G. Ratzenhofer, Austrian General Staff. (R. von Waldheim, Vienna, 1882.)—This book could not have appeared at a more opportune moment. One of the chief actors in the great drama enacted in France during 1870-71, although he has far exceeded the span accorded to man of three score and ten, is still amongst the living. His principal opponent, however, has just been struck down in the prime of life, and France is now mourning the loss of one upon whom her hopes for the future rested in a great measure. The title of the work before us might lead one to suppose that it principally centred round those two men; but in reality it is a criticism of the campaign which proved so disastrous to France. The book is written by an author who does not belong to either nation, and will, therefore, be looked upon by both sides as impartial. To our thinking, the writer's description of the operations will be as indispensable to the historian who proposes to give a true account of a war which decided the fate of two powerful nations, as the great work of the German General Staff and the official French account. In fact, no complete history of the campaign could be written without it.

The Royal Navy List. Edited by Col. F. Lean.—This compilation has much to recommend it. It is based on the principle of Hart's *Army List.* It, moreover, offers to the public a novelty of considerable value—that is, memoirs of the war, and meritorious services of Naval officers. It continues to meet with the unanimous approval of the Admiralty and of the services, while its accuracy is as noteworthy as its character is exhaustive.

Egyptian, Syrian, and North-African Handbook, by Rev. Anton Tien (W. H. Allen and Co.), makes its appearance just at the right time. Numbers of British officers are now busy preparing to pass their examinations in Arabic, both colloquial and written. By all such, the value of M. Tien's handbook can scarcely be over-rated.

The most attractive paper in *Blackwood* for this month is Lady Martin's study of "Imogen," a part which she acted, with striking success, in the palmy days before Shakespeare was voted a bore. Mrs. Oliphant proves still further her wonderful literary power. She has written on almost every subject, and yet her force is not impaired. "The Ladies Lindores," a most charming tale, surpasses very many of her previous works, and most probably, when completed, will be regarded by many as her best. The instalment for January is written with great dramatic power, and never flags in interest even for a moment.

The *Nineteenth Century* for January can scarcely be called up to the average, but nevertheless, there are a few articles of very high merit indeed. Messrs. Fowler and Baker advocate with considerable force the construction of a sweetwater ship canal through Egypt, the cost of which, including the completion of the barrage of the Nile, might be calculated at twelve millions sterling, while the return would be 300,000 acres of desert land which might be brought under immediate cultivation. "The Origin of the National Party in Egypt," by Mr. John Ninet, is quite worth perusal.

Colburn's Magazine.—This magazine has now accomplished a period of existence exceeding half a century. It has at length been forced to meet the wishes of its friends by accepting a shilling, instead of half-a-crown, for the valuable information it will purvey. In the number for the New Year will be found several papers of considerable merit, not the least interesting of which is the editor's "New Year's Preface." It is a carefully-prepared document, and one which evidences the determination of its management to popularise *Colburn's Magazine* in its new form, and invite new classes to become its readers.

The *Argosy* opens the New Year with several pleasant tales. When weighing its value, readers should remember that it only costs sixpence.

Ward and Lock's "Self-Culture for All" is good in every respect. How so much information can be given for such a low price is, of course, an affair of the proprietors, not of the public, who have only to improve their minds by reading it.

The *Sporting Mirror*, for January, contains memoirs and portraits of Lord Harris, the leader of many forlorn hopes at cricket; the late Mr. Henry Saville, Francis J. Wood, and the coming cuist, William Peel, who is daily exercising the minds of the champion and the ex-champions with anxiety as to when he will be prepared to compete with any of them on equal terms.

EGYPTIAN LETTERS.

Medinet-el-Fayoum, December 15, 1882.

MY last letter ended with an account of what I saw at the outset of a stroll, the morning after my arrival in the Fayoum, through the lanes of the capital of that flourishing region; but I could not end it, because the mail was leaving. Thomas! it is just as well, for I was working myself into a state of disagreeable excitement. "What," quoth I to my friends, pointing to a man seated outside a shade, at the entrance to the lane leading to the Bazaar, "what is that Arab doing there with the scales?" "Oh, he is looking after the *octroi*." "What! an *octroi* here?" "Certainly! There was one established some years ago for every large town. The proceeds do not go to the town, however, but are paid into the Caisse as taxes. Articles of food, animals, &c., are all taxed." Just at that moment, a tired, wayworn-looking, elderly woman came up, with a sack of chopped straw on her back. She stopped opposite the scales, dropped her weary load on it, and then watched the Arab anxiously, as he slid the weight along the arm. He said something, and the woman put her hand inside the ragged, dark-blue cotton robe, which was her only covering, and drawing forth a small bag, slowly and sadly counted out thirteen paras,—copper coins, of which forty go to a piastre, which is worth about 2½d., or the fifth of a shilling. It was not much, certainly, but the value of the whole sack was only a piastre and some paras! The tax paid by the miserable creature amounted to 25 per cent. of the sum she would receive for the straw if she sold it in the market. And yet I was told that it was quite fair and proper that this enormous tax should be levied on an article of food, every straw of which had in some way or other borne its share of taxation. "Why," said one, "the thirteen paras will, after all, be paid by the purchaser," as if that were a conclusive answer to any objection. But suppose the woman could not find any one to purchase her sack of straw? [Lord, what a cry ought to go up from this land to Heaven! No wonder the people are, as Rifaat, one of the accused rebels, wrote in his defence—which was not read—"*affamés de justice.*"] How long will they hunger for it? Later on I heard of another illustration of this *octroi* law, which deserves notice. When the burseem, or clover, is fit, the rich drive their horses and cattle into the fields, and let them graze freely for the space of some weeks tethered up, driving them to their stables and folds at night. The poorer people, however, cannot afford to do so, but go out to the fields and purchase burseem, which they, mostly women, carry on their backs into the town, and each of these poor people pays an *octroi* tax on the load, which the rich escape. That is only one of the many phases of the manner in which this very wretched and abject population is ground down to the dust. At every turn I heard the same tale. Even the water of the Nile is served out under a system of bribery and corruption. Those who know the country best are the most hopeless of any improvement, as long as Egyptians are employed in the administration. What is the remedy? These intelligent gentlemen say, "You must rule Egypt as India was ruled. Begin with European officials, and gradually educate the people in the ways of honesty, till they can furnish officials to administer the affairs of the country under proper superintendence." There are, I believe, fifteen Mudiriehs in Egypt, but out of as many Mudirs nine or ten are Turks or Circassians, the rest are Egyptians. The very honourable and capable Mudir of the Fayoum, Mourad, is, indeed, a Circassian; but it cannot be said, I fear, that all his brother-officials deserve the same epithet, and under the eyes of the most clever and conscientious Mudir, there are practices going on outside the Court which, in effect, place justice—or judgment—in the scales, as if on sale in the market. *Homo homine lupus*, indeed! Why, the Egyptian is to his fellow-man a devouring, insatiable lion. It is hard to get at the truth in most places, but in Egypt it lies at the bottom of the deepest well, and on the top of the well there is a pyramid of cunning and obstruction which baffles any but the most acute and persevering investigation. Century on century, for thousands of years, has the edifice been growing. It will be an Imperial task to level it to the dust. There is a conspiracy among the people themselves to perpetuate the burthens under which they suffer. They do not believe in justice, and they do their best to baffle it. The night after our arrival, a young man was found dying outside a field of dourra, near the town. He had been shot in the head and was conscious, but he refused to say more ere he died than that four men had set upon him; and he declared—falsely, as the Mudir believed—that he did not know his assailants. It was considered the most natural thing in the world that he should not "peach." Formerly, and lately, when the bastinado and the thumb-screw were in use, prisoners and witnesses were alike subjected to punishment and torture to extract the truth from them. "Now," said an official, "that we cannot inflict punishment, except for proved offences, it will be almost impossible to procure evidence at all." Now, when philosophical and foolish Radicals and others talk of establishing constitutional practice, and government, and institutions in Egypt, they may well be asked where they are to find the machinery to work them? However, I am wandering from the Fayoum all over the land of Egypt. The bazaar of Medinet is very like what the worst parts of the old Mooskee of Cairo was, before it was so ruthlessly improved. There are Greek groceries and liquor shops and cafés, and there is even a restaurant, at which travellers can be accommodated with lodgings. Out of the crowd of camels, asses, buffaloes, oxen, children, Bedouins, Arabs, and Fellaheen in the narrow main street, we turned into the court leading to the offices of the Administration of the Cadastral Survey, and found ourselves at once amid maps and plans, books, papers, theodolites, and a staff of Europeans and Arabs, busy with their pens and pencils. The Cadastre was established several years ago. The direction has been changed several times, and each change was accompanied by an alteration of system; but now it may be hoped that the work will go bravely on, and that in some twenty or twenty-five years the Cadastral Survey may be finished. It will cost a large sum, but the utility of such a work cannot be questioned. With a purer Administration there must be a great improvement in the state of the holders and tenants, when every man's boundaries are accurately determined, and the value of it established for legal and governmental purposes. This, I believe, was another of the works of the exiled Ismail Pasha. The Fayoum was heavily exploited by Arabi. He deposed Murad, and sent a Mudir of the National party to take his place, and men, camels, horses, and provisions were largely requisitioned, and sent to Lower Egypt, for the war. I was informed, by credible authorities on the spot, that on the Saturday afternoon after Tel-el-Kebir, which was fought on Wednesday morning, there were scores of men in Medinet who had walked or run the whole of the 120 miles between the battlefield and the Fayoum on foot! I dare say there were many of them then in the town, as we went down the street; and judging from the expression of some faces as the Giaours passed, they were not grateful for the exercise they took on the occasion. Though the ruins of Crocodilopolis are not a mile away, and Medinet can boast a respectable antiquity, the only interesting remains of the past seen are in the tumble-down Mosque of Kait Bey, which contains many columns of marble from the more ancient *débris* of Arsinoe. The Bahe Yusuf, washing the walls of dirty houses, the water-wheels, the fishing-traps, and the factory chimneys, are not very attractive, and the inhabitants, in spite of their dabbling in the muddy stream, appear to be intensely dirty, with an unusual number of monoptics among them. Indeed, I think three eyes, to four persons would be a large average, as there are many people totally blind. There is a brisk retail trade in chewing sugar-cane, but little sugar is made. How any livelihood is to be gained by selling the cane for chewing, I do not understand. Still more wonderful is the mystery of life which clings round the decrepit people of all sexes, who sit on the ground in front of wicker-work trays, on which are piled a small handful of dates, six or seven figs, and a couple of oranges for all stock-in-trade; and, again, to the ancients, who sell water out of leather bags, or who keep watch and ward over some few dirty-looking pats of curd in brown, earthen dishes. Verily, they must be content with small profits; and the returns cannot be very quick, either. When we got back to our quarters, we found a Dominican friar, in full costume, waiting to see us, in order to get a word said for a Bedouin chief, whose name you may have seen in the *Times*. This Bedouin and his cousin rescued a great number of Europeans and Christians from the mob at Zagazig, took them to their village tents, entertained them for many days, and finally obtained from Arabi a special train to carry them to Ismailia. There were nuns and Dominicans among them, and one friar was instant on the merits of the good work; but the Bedouin chiefs had been warm partizans of Arabi, and our friend was undergoing imprisonment in Zagazig, though his cousin had been set free. The friar could not see that acts of charity could not excuse rebellion in the eyes of any Government. However, the Bedoun will be out before the year is, and there will be a general gaol delivery anon, thanks to the action of our Government in their behalf. How very much more tolerant these Mahometans are, after all, than some good Christians we wot of nearer home! What would the parishioners of the Reverend Father Murphy, of your parish, do with a gentleman in a turban and long gown, of Oriental complexion and garmenting, who should appear, what time they were going home, with their mouths full of prayers, after mass, and who set to work denouncing their rites and faith? We know how they treated the reverend missionary who attempted to persuade them that the Pope was not the Pope, but something worse! For years the Christian Missionary has been working without let or hindrance till lately among these Egyptian Arabs, and if the latter knew but all, and were aware of how Christian sects persecute the Jews and each other, they might ask their monitors some unpleasant questions. It is not easy to ascertain what was the religious belief of the mass of the people of Egypt at the time of the Arab conquest. You know, Tom, or if you don't, you ought, that the Delta was pretty well Christianised about 200 years after Christ, and that the Schoolmen of Alexandria, when they were not undergoing persecution from the Roman Emperors, were engaged in persecuting each other, *con spirito ebrio*, for centuries; how the formal declaration by Theodosius of Christianity as the faith of the Roman Empire was celebrated by open war against the Arians and the Pagans alike; how Theophilus exterminated the Anthropomorphists, and how, after some three centuries of the most bloody and cruel contrivances, the Persians came down on Monophysites and Duophysites, and all the rest, Eutychians, Arians, Homousioiites, Athanasians, alike; and how, a few years later, the redoubtable Amar appeared on the stage, and persuaded many Copts to become Moslim, as their descendants are to this day. But we do not know much, I think, of the religion of the bulk of the people up country. There are reasons for thinking there were many Egyptians in a state of heathenesse and survivors of the old Pagans still extant at the time of the Arab conquest. Anyway it is certain they had left off building temples. I am going to say what will make you perhaps have a poor idea of your brother's intelligence, Tom, but it is true. I cannot at all understand why people should become so excited about Lake Mœris. I am debased enough to have no theory about it; but I have sense enough to reject with decision the theory that the ruins at Biamoo are the remains of Pyramids which were seen by Herodotus in the Lake. These Kursi Farun, or "Pharaoh's chairs," are remarkable blocks of oolite, and how they were put up and how they were deranged is beyond my conjecture; but I am glad to tell you that there is a blazing inscription on one of the slabs, in red paint, recording how the son of the Autocrat of All the Russias lately visited the place, with his Consul, in modern Greek. I am entirely infidel also as to the ruins of the Labyrinth, the learned Lepsius and Brugsch notwithstanding. I don't believe the heaps of rubbish, pierced with open tunnels and mounds of pottery, can represent what Herodotus terms "one of the wonders of the world, greater than the Pyramids," or I must conclude the Father of History had a pretty trick of fibbing. The account quoted in my book from Strabo cannot be made to fit the ruins anyway, and it does not mention the Pyramid of Hawarah, close at hand to this supposed Labyrinth, at all. I made excursions to that Pyramid and to the ruins at Biamoo; but of all the weird and ghastly places I saw in this part of Egypt, none is to be compared with the solemn and awful region outside Medinet, which was once, people say, covered with the streets of the great city of Crocodilopolis (Arsinoe). It is a vast, undulating surface of ruined houses and walls,—an ocean of bricks, tiles, earthenware, with islands and mountains of similar *débris*, rising to the height of 60 feet and more; such mounds of broken pottery as might be made if countless generations of men had spent all their lives in breaking every piece of earthenware they could find, and piling it up here. In some places where excavations have been made, you can see houses built on the top of the soil which has accumulated over the roofs of others, and you are appalled at the thought that no one can form the least idea of the fate of the city, and that its real history, the annals of a place which must have been a busy mart of commerce, the centre of life and ambition for hundreds of thousands of people, are a sealed book to us. I dare say you will see a good deal of interesting matter about the Fayoum from Mr. Mackenzie Wallace in the *Times* presently, as he came to Medinet to-day after I did, and had with him as a friendly guide and interpreter Daninos Bey, whose knowledge as an Egyptologue, acquired when he was in the Louvre *ad hoc*, is only equalled by his acquaintance with the manners and customs of the modern Egyptians, whose language he speaks to perfection. I hope he will give the world as well an account of the dinner *à la Turque* at which we assisted in the Mudir's house, as I am not inclined to inflict on you a longer letter. As to the Fayoum *per se*, I end as I began. When you come out here, I shall not take you there, unless you have tents and camels, as Abram had, and a good dragoman and a store of good things, and set out to live on the shore of the Birket-el-Keroun.

Cairo, December 26, 1882.

To enable an Egyptian to live, he must have water, as well as air. Respectable Whigs were wont to give at their banquets, as one of their charter toasts, "The Liberty of the Press. It is as the air we breathe. If we have it not, we die." They have retired from the assertion of the principle, as well as that of liberty of speech. But your Egyptian only desires water in one form—he likes it in a river, or a canal, or a glass—he loathes it in drops. Pleasure and pain, according to the learned author of "The Consolations of Philosophy," are relative terms. So, I presume, are heat and cold, wetness and dryness, &c.; but I assure you that a shower of rain in Egypt, at any time of year, is a very positive evil, *per se*, without one redeeming consequence, as far as I can see or hear of, and that what so many nations and countries would give their eyes for at certain seasons of the year is at any time an unmitigated nuisance, and much to be deprecated, along the Valley of the Nile. It is not expected—it is not wanted—it is a disagreeable phenomenon; neither the cattle, nor the stranger, nor the people are prepared for it, far less the houses, the house-tops, and the indigènes and indigent. Although the thermometer was not below 50 deg., the weather seemed raw and cold. Here "relative" comes in,—December 24 would have passed with you for a disagreeable June day. It was quite bad enough here to spoil the Christmas festivities for the troops at Helwan, when Brigadier and Mrs. Arbuthnot, Colonel Coghill, and Colonel Campbell, and the Royal Artillery officers had made preparations for a really happy day for the 19th

Hussars, the 7th Dragoon Guards, and the Royal Horse Artillery troop, who are out there under canvas. The murky sky which had hung over Cairo all the previous Friday and Saturday began to distil some gentle showers on Saturday night, and on Sunday there were muddy streets which would do credit to London itself after a thaw. The showers became drizzling rain anon, and though there were breaks in the drift at times, the weather did not mend, and the Sloughs of Despond deepened and spread. Christmas Day opened on the world here without a ray of hope, and it was resolved to postpone the dinners and sports till the 26th, on the chance of brightness and light. I fear me the provisions of bouquets and flowers which were made to garnish the tables in the great tents must be renewed. Just fancy, Tom! You and I remember Christmas Day, 1854, when we were fighting for the "Unspeakable One," before Sebastopol! Fancy a Christmas dinner of roast beef and plum pudding, &c., and each soldier furnished with a snowy napkin, within the folds of which lay a fragrant rose! All due to short service, I suppose? The Episcopal Church in Cairo is always very full now on Sundays. On the 24th, Dean Butcher had the assistance of the Rev. George Smith (of Rorke's Drift), and preached to a large congregation. The ladies of his flock had decorated the interior very prettily with palm branches and bouquets. The seats were filled from end to end, for the British officer is summoning his belongings, and wife and child have answered to the call from all the ends of the earth. Upon them on Christmas Day came an unpleasant visitation. The roof of the sacred edifice has been under repair, and the work was not finished when the rain began to fall, so in the course of the service, on December 25, the better sorts of bonnets on the right-hand side of the church were presently observed to be in much agitation. From time to time the fair owners flitted from their seats, and settled down in the serried lines of the congregation at the other and drier side of the building, and big drops were heard to patter on the pavement and on the leather cushions. But for all that, there was no secession, and the Dean preached to crowded benches. In the midst of Christmas visits which engaged the British community after service, there was a rumour that the decree by which the rebel Arabi and his fellows were deprived of titles, rank, and honours, and struck off the list of the Army of Egypt, was to be promulgated to the prisoners in the presence of the newly-raised Egyptian battalions in the barracks of Kasr-en-Nil, now occupied by the 42nd Highlanders and 74th (Highland Light Infantry); but the secret was not made known to many outsiders. The day was ill-selected, perhaps, from a Christian point of view, for such an act of vengeance or justice, however well deserved; but it was, I suppose, fixed by the Khedive's Government, and not by us. The barracks of Kasr-en-Nil consist of an enormous pile of buildings on the right bank of the river, close to the extremity of the magnificent bridge which spans it. It consists of two squares, communicating with each other by vaulted passages, each surrounded by the barracks, which are four storeys high, each storey with an external corridor and verandah. From the gateway, at the end of the Cairo road, the carriage drive passes through an avenue of storehouses, and passing out into the first square, the visitor sees in front of him, on the west, the river wall; on his right (north), the Palace of Kasr-en-Nil, the favourite residence of Said Pasha; and on his left, the southern face of the barrack square. The Palace is now occupied by the officers of the Black Watch and of the 74th, whose hospitable messes are established in the splendid saloons where Khedive Ismail held his State when he welcomed crowned heads or foreign Princes to his capital. The walls are covered with the most costly damasked silks, and the chairs, fauteuils, &c., are too fine to sit upon without covers. Immense glass chandeliers hang from the ceilings, and the sides of the rooms are bright with large mirrors. Ugly iron nails stick out, to show where curtains once hung, and from the specimens of the latter which remain, it may be inferred that the whole suite was furnished with much magnificence. In one of these saloons the Khedive was wont to sit, surrounded by his Court, when he was expecting distinguished visitors. In the court outside were his gorgeous carriages, his coachmen, piqueurs, and lackeys, in liveries imitating and rivalling the fashion of the Tuileries under the Third Empire; his char-à-bancs, pecherons, and Imperial postillions; his resplendent bodyguard *à cheval;* and his handsomely equipped battalions, in their snow-white uniforms. There is a branch railway from the Cairo terminus running right into the barrack-square by the palace steps, and as Ismail sat talking with his courtiers in all their bravery —perhaps of some it might be added knavery—from time to time, the electric telegraph informed him how the approaching visitor was speeding on his way. It was thus I saw him on the occasion of one of the Prince of Wales's visits, and as I looked round the Court now, and contrasted the scene still fresh in my memory with that now before me, I was overwhelmed with trite reflections on the vanity of human greatness. Colonel Straghan, of the 74th, on horseback, in full uniform, represented the gay cavaliers of the Ismailian era. Highlanders on sentry-go paced up and down before the officers' quarters, and the soldiers of the regiments who had nothing to do were smoking and talking in the balconies. My companion, Mr. Portal, and myself, were directed by Colonel Straghan to one of the entrances to the barracks on the south face, and mounting the staircase, we turned to the left, and gained the balcony looking out on the inner square. Here a strange spectacle presented itself. On two sides of the square, columns of Egyptian infantry were formed up under arms, with their pioneers, bands, and colours. The pioneers, in huge bearskins with silver plaques in front, white-leather aprons, tunics, trowsers, and gaiters, might have passed as bronzed veterans of the Old Napoleon. The battalion on the right, with its back to the river, was composed exclusively of non-commissioned officers, with yellow chevrons on the sleeves of their tunics, white tunics, pantaloons, gaiters, and gloves. Finer-looking men could not have been seen. Facing them was another battalion clad in the same way—all, of course, officers and men, wearing the fez. Their Remington rifle-barrels and sword bayonets were faultlessly bright, and there was not a speck on their white clothing. All that was wanted was a little sunshine, perhaps sweetness and light. In the space between the two battalions some Staff officers, Zohrab Bey, &c., sauntered about, most of the regimental officers presenting in physique and bearing a marked antithesis to their men. They wore blue uniforms, with the insignia of rank marked by lines of gold, and gold and silver braid on their sleeves. Major Hutton and a few Staff officers on horseback were stationed by a clump of trees in the square; and a few civilians of different nationalities, Sir A. Colvin, Mr. Noel Moone, &c., were grouped in the centre. In the balcony on the north side of the square, surveying the scene below, were Sir A. Alison, Lady Alison, and his daughters, Sir G. Graham, Lady A. Kennedy, Major-General Dormer, and a crowd of ladies, and of officers in uniform. All the other balconies were crowded with our soldiers, who watched the Egyptian troops with professional interest. Towards the west, the eye caught a sight of the houses of Gizeh; on the opposite side of the river, the date palms on the road to the Pyramids, and the tapering yards of the Nile boats; on the north, south, and east, rose the balconied storeys of the great caserne. The time fixed for the parade was 2.30 p.m., but it was past 3 p.m. before a stir in the courtyard outside announced that the rebels had arrived. The bugler sounded, and the troops fixed bayonets,—very well and smartly done. An elderly, white-faced, bearded man, with the stripes of a Pasha, the Under-Secretary of War, Fakri, on foot, surrounded by his staff, took his place between the two columns. Again the bugles sounded, and the regimental officers, advancing, formed up on three sides of a square. In a minute or two more there emerged from the gateway into the court, followed by an escort of mounted troopers, the six condemned men, on foot, dressed in civilian attire,—some in great-coats and overcoats, some with wrappers round their throats; none of them, indeed, with any care, or any regard to appearance of neatness; some, indeed, but poorly turned out, in black trousers and worn boots. They walked slowly forward, and formed a line facing Fakri and his staff. Every eye was, of course, turned first on Arabi. He was the second man on the left of the row—a head above his comrades. I was very near him, and watched his face narrowly, but I could not detect in it a trace of emotion, except once—of which, anon. His ungloved hands were clasped in front, and there was a slight tremour of the fingers. He evinced no curiosity to see what was around him, but kept his eyes fixed on Fakri and the officers of the Staff in front of him. I shall not attempt to describe the impressions made upon me by the others, because such appreciations may be misleading. You remember what conflicting accounts the Correspondents gave of Arabi's appearance when he appeared to plead guilty. I must say I liked the look and bearing of Abddelal, and that another very prominent chief, whom I shall not name, seemed to me a very *chétif*, evil-minded, looking personage. They all looked sad and worn, one miserably ill (Mr. Lillyvick's observations respecting the French prisoners-of-war he saw in the hulks came to my mind, as I looked at them); but there was no movement of hand or foot, as they listened to the terrible words of the decree. Fakri Pasha, unrolling a paper, read out the sentence, by which Méhémet Thewfik, acting on the advice of the Council of Ministers, declared them deprived of their titles, dignities, and rank, and erased for ever from the rolls of the Egyptian Army. They had been previously deprived of all their estates and property. This present decree, signed by Cherif and Omar Laitfi, which was framed on December 14, completes their military punishment. The sentence of exile is another act of grace. When the Pasha had finished reading the paper, he waved his sword; an officer outside the square gave a word of command, the drums beat, the troops presented arms. In unison there went forth from the ranks, in three great waves of sound, in Arabic, "Long live the Khedive!" Then, and then only, did Arabi look away towards the line of white-coated, brown-faced soldiery; a smile curled on his lip, he unclasped his hands for a moment, shrugged his shoulders slightly, and clasped his fingers together again. I did not notice the others, but I am told Fehmy gave a stamp with his foot, and Mahmoud Samy scowled angrily. In a minute more they were marching out under the gateway, in single file, to their carriages, followed by the troopers. The English soldiers up in the balconies burst into loud cheering as the Egyptian bands struck up, and the two columns, about 1,200 strong, I think, marched off out of the court towards their quarters over the bridge. Some said our men cheered Arabi! I cannot say why they cheered. The prisoners went back to their gaol; the spectators descended to their carriages, and drove off to complete their rounds of Christmas calls. You need not be afraid of my inflicting on you any speculations about the guilt or innocence of Arabi, ex-Pasha; but you know well enough, my dear Tom, the rubbish which has been shot out in print and by word of mouth respecting the movement he headed is utterly worthless. "A mere military insurrection!" Of course it was. But will my friends tell me how most of the great revolutions and changes in the world were caused, in old or in new days? What did our ancestors do when Harold fell at Hastings? Did the British peasant take any great interest in the movement at Runnymede? What was the Restoration? What was the Indian Mutiny? No! I beg pardon, I will not go on; but I cannot help saying I feel sure that our posterity will rejoice that Arabi was not hanged,—though I know how many of us now desire his death. Passion is seldom logical. I see the Cairo correspondent of the leading journal, whose interests are probably of the Alexandrian-colonist order, seeking to explain and justify the intense bloodthirstiness of "the European Colony" of Alexandria," asks his readers to suppose "that a Fenian outbreak has destroyed all London west of Regent, Street, caused the death of 1,200 of the principal inhabitants (!), left 20,000 more to live on the charity of the remainder!" That is pretty liberal as to figures and propositions, at all events! But there is in the two cases no parallel at all. There might be some sort of argument founded on the reverse of what occurred at Alexandria. Suppose that a Fenian colony, established in London, had arrogated to itself the right of establishing an *imperium in imperio;* had declared itself exempt from the operations of the law of England or from local taxation, snapped its fingers at the Lord Mayor and Corporation, waged an active religious propaganda, erected nunneries and monasteries all over the place, and finally, invoking the aid of the Fenian Republic, the United States, &c., to deal with domestic troubles complicated by claims of Fenian Bondholders, had secured the assistance of a war flotilla in the Thames to enforce its demands for the expulsion of the native English leaders of a military or other movement. Would it not be very likely that the people of London would feel rather angry with the Fenians if a Fenian shot or stabbed a cabby? Would it not be very likely to lead to a riot, in which 49 Fenians and more might be killed and 71 wounded? (The medical report gives 49 as the total number of dead in all the hospitals; and there were, moreover, 71 wounded, of whom 26 were Fenians (Europeans) and and 35 were Egyptians (Londoners). Where the the "1,200" came from, I cannot imagine.) Well, then, the Fenian flotilla bombards London, because the Cockneys (Arabs) are fortifying the city), and drives the Cockneys out of their own town. The shells do some damage, the retreating Cockneys fire the Fenian quarter, and then the Fenians, landing, restore their brethren, who thereupon are exceedingly angry because they are prevented hanging all the leading citizens who took up arms against them. That is more of a parallel, Mr. Correspondent. Sir Evelyn Wood is very busy indeed with his Army, and Baker Pasha, who works with him admirably, is engaged on his Gendarmerie, of whom nearly 800 horse and 400 foot paraded before the Khedive at Abdine on Friday morning, and presented a very creditable appearance. They were Egyptians under Egyptian officers, and I dare say we had seen the faces and backs of a good many of them last autumn. The foot were solid, well-set up men, and wheeled into line and marched as well as any infantry need do. The cavalry were mounted on ill-groomed horses, and were badly equipped; but they were really better than could have been expected, considering the time which has elapsed since they were formed. I wish you would prevent your friends from sending in useless applications for either Gendarmerie or Army. The lists are full. Preference will be given to candidates who speak Arabic; French is quite indispensable. Whatever else France may have failed to do in Egypt, she has stamped her language on every sheet of official paper in every Department. The Budget must be prepared in French, so must the Army Estimates, the Gendarmerie and Police organisations, the railway business, the Cadastre, law, &c., all in French and Arabic. Indeed, one French administrator wished to suppress the Arab Bureau!

At 7.30 a.m., on Thursday, December 21, a special train left Cairo for Tel-el-Kebir with a party, among whom were Lord and Lady Dufferin and Lady H. Blackwood, Sir A. and Lady and Miss Alison, Sir E. Malet, Mr. and the Hon. Mrs. Fitzgerald, Colonel Grenfell, Dr. Russell, Major Hutton, Military Secretary; Major Ardagh, Major Chermside, Capt. Sandwith, Mr. Bland, Mr. Nicholson, the Misses Colvin, Mr. Cartwright, Lord and Lady A. Kennedy, Lieutenant Kennedy, and Mr. Portal, and arrived at the station of the battle-ground about 10.45. Here on the Canal they found Messrs. Cooks' dahabeah, the Estelle, prepared for their reception by M. Rostovitz, the representative of the firm. Mr. Woodville, who had been making sketches for his picture at

Kassassin, and had ridden along the route of the Army, accompanied by Mr. Villiers, was also on board, much gratified with the results of his visit to the scene. After having had tea, coffee, &c., on the deck, which was covered in with awnings and flags, the Ambassador's party mounted some horses which had been brought down in the train from Cairo, others asses, provided beforehand by Messrs. Cook, and set out by the line of rail for the lines, which are about two miles distant from the station. It was the first time Sir Archibald Alison had seen the field since the morning of September 13. Sir E. Hamley, coming up from the outer entrenchments, found Alison, he says, on foot, with his men inside. It was interesting to more than one of the party to see if the Commander-in-Chief could indicate the place where he saw Sir Edward for the first time that morning. The battle-field is now as a floor swept and garnished. There is scarcely a trace of the fight, except at the lines of trenches and batteries, where the paper covers of the cartridges are strewn about, some broken musket-stocks and tin water-canteens, rags, and bits of cloth, a Krupp shell or two, broken earthenware, and baskets in which the men had their provisions. The copper shells of the cartridges, which were lying in thousands along the trench, showing the intensity of the fire, had been removed, and only a few comparatively were to be seen on the ground. They and the thousands of cartridges in packets, shells, and wooden boxes for ammunition, have been collected and carried off by the Egyptian Government. The copper cases can, of course, be recapped and loaded. The excursionists, led by Lady Dufferin, on an indefatigable and high-paced donkey, first examined the south extremity of the lines, at the Canal and railway, under the guidance of Major Ardagh, and then slowly rode northwards, scattered in small detachments. What is called the advanced redoubt was too interesting an object to be neglected, though it is a mile nearly to the east of the trenches, of which it seemed, to the reconnoitrers' eyes, to be part, when surveyed before the attack. If any one doubts the existence of "luck" in Lord Wolseley's fortunes, let him take a look at this redoubt, and at the position it occupies, and judge what would have occurred had Alison's Brigade hustled up against it in the darkness, instead of passing it unperceived by the enemy, and in ignorance of it themselves. The work is protected in front by a deep rifle-trench running all round it, which was no doubt filled with men. The battery itself, nearly closed at the gorge, has a high profile, with a deep trench in front, and a steep face to the parapet, which is pierced with embrasures for ten guns; and the work is so placed as to cover the dip in the ground towards the lines in the rear, and to sweep the plateau in front, which at that point could not be well searched out by the batteries behind in the main lines. One thing is certain. The advance would have been checked, the flow of the wave would have been broken, had the Highland Brigade, as it might well have done, blundered up against the work, or had the Egyptians perceived and opened fire on them. And then the whole Egyptian line would have been aroused! The guns in the batteries in the lines, which were laid for 800 yards, would have opened. The musketry from the rifles, which were sighted for 800 yards, would have swept the columns, and the whole plan of attack would have been frustrated. One may well say, with a lady of the party, "It is too dreadful to think of what the results might have been!" The fire from the much weaker work in the lines behind was so severe, that the 74th recoiled before it, and fell into confusion. Sir E. Hamley holds that there was no surprise, but he surely does not mean to say that the Egyptians knew our troops were close at hand when they broke in upon them, or that their officers were in their places with their men? It is well ascertained that it was not so. The senior officers generally were asleep in their tents. The camels were in their enclosure, the horses tethered up. Not a soul dreamt of a night attack; some of the soldiers were lighting their fires for coffee; officers were found dead in the camp, killed in the act of putting on their clothes. None of these and of similar incidents could have occurred, had the attack been expected at the moment it was delivered. It must, anyway, be admitted that the influence of a severe fright, nearly a mile in front of the lines, between the left of our advancing line and the Egyptian redoubt, would have been portentous. It might have been disastrous, and must certainly have caused great slaughter, for the delay in the advance would have brought daylight to bear on our position, and revealed the whole of the force on the desert, within easy range of some fifty pieces of artillery. How fortunate the redoubt was not made out to be what it was! In that case, the General must have had to deal with it, for he never could calculate on such a piece of good-fortune as to be able to slip by it in the dark. "Some men there be who ope their mouths, and straightway roasted ortolans do enter them." Well, let the nation cherish such men, when it has them, for good-luck is a gift of the Gods, and one of the most precious, to boot. Returning from the "extinct volcano," which only burst into fire when it was too late, as if to salute the victor, with feelings of profound thankfulness, the visitors turned west to the lines again, and rode slowly along them, halting and dismounting at the batteries and examining the position. To some people, a battle-field is but a place where a battle was fought. To others, it is a scene of all that is terrible and momentous, the grandest or most disastrous episode in the life of a man or of a nation. There were probably few, if any, "little Wilhelmines" among the party; but it may be supposed that the diplomatist, the General, the soldier, the civilian viewed the spot with different eyes. There is little now to shock any sense, and the wanderings of the party did not extend to the only two or three ghastly objects which are still to be seen, partially buried in the sand. The sun was hot,—the heat considerable, and it is a long three hours' work to "do" the lines thoroughly; but the ladies of the party endured to the end, and listened, and looked, and searched for relics, with admirable constancy and tenacity of purpose. Their success in the main must have been deplored by those stronger vessels which were selected to bear back Krupp shells, musket-stocks, grape-shot, and cartridges to the dahabeah. At 2.30, the advanced guard, headed by Lady Dufferin, came out from the desert, and dismounted at Messrs. Cook's dahabeah, where shade and refreshments awaited them, and at a quarter past 4 o'clock the special train started from Tel-el-Kebir, and bore them back to Cairo, which was reached at 7.15, after a day in which there was not a single hitch.

THE NAVY IN 1882.

As the Old Year went out and the New Year came in, the service was still talking of the gallant manner in which Capt. Brownrigg, of the London, had met his death off the Island of Pemba; of the explosion of xerotine siccative on board the Triumph, in the Pacific, whereby three men lost their lives, and several others were injured; and of the break-up of the Detached Squadron at Hong Kong. Lord Clanwilliam had been relieved in the command of the squadron by Rear-Admiral Sir Frederick Sullivan, and the Bacchante, commanded by Capt. Lord Charles Scott, with Princes Albert Victor and George of Wales on board, had been ordered home through the Suez Canal, and had left Hong Kong on Dec. 31. There was nothing further of importance to chronicle in January, 1882. The "policy of surrender," which had been adopted by the Gladstone Cabinet since its accession to office in 1880, gave not the slightest hope that the service would be called upon to defend any British interests during the year. Nevertheless, prior to the opening of Parliament, there was much talk about the state and condition of the Navy. Lord Henry Lennox delivered a lecture on this subject at Portsea, on Jan. 11, which attracted much attention. He then pointed out that, although we had 236 guns afloat, weighing 4,702 tons, or an average of 15·6 tons per gun, the French had 164 guns afloat, weighing 4,630 tons, or an average of 28·5 tons per gun; and that, whereas the French ships averaged a speed of 14 knots, the mean speed of the English vessels did not exceed 13·4 knots. The Admiralty attempted to refute these statistics in Parliament on Thursday, April 20, through Mr. Trevelyan, the Under-Secretary of the Admiralty, in a series of misleading statements. But instead of disproving the assertions of Lord Henry Lennox, the figures brought forward by the Admiralty only went to confirm them, conclusively proving, as they did, that, whereas the average weight of ordnance per gun in the French Navy was 16 tons, in the English it was only 13 tons. We have spared no pains in the past in our endeavour to, at all times, place clearly before the public the real state and condition of our Fleet, and we shall redouble our efforts in the future to secure for the country the adoption of a shipbuilding policy sufficient to meet all the varied requirements of the British Empire. Our endeavours in this direction have been so far successful, that the Admiralty have abandoned their previous intention of constructing monster armourclads, like the Inflexible, and, according to Sir Thomas Brassey, have determined to build ships of smaller size, of which three can be constructed at the same cost as two Inflexibles. This, so far, is a step gained in the right direction during the past year. More fast cruisers are required than we possess, and these will have to be constructed, and a Naval mobilisation scheme drawn up, whereby, at a moment's notice, squadrons of fast cruisers can be despatched to guard our ocean highways. For these ships, it will be necessary to have crews in constant readiness. These will have to be maintained in barracks at our principal seaports. The Engineering Staff will have to be increased. During the past year, the agitation of the Engineer officers led to the appointment of a Committee to consider their grievances, and a circular, based upon the report of the committee, is anxiously looked forward to by this branch of the Navy. In March last, Mr. George Rendell, late managing partner of the great Elswick ordnance firm and ship-builders, Sir William Armstrong and Co., joined the Admiralty as Junior Naval Lord, to enable the Board to at all times have the benefit of the opinion of a practical engineer at its councils. Mr. Rendell and Mr. Barnaby have been much abroad during the year, Mr. Barnaby visiting the French Dockyards, and attending the Spezia gunnery experiments with Mr. Rendell. At the same time, the popular Naval Secretary of the Admiralty had to vacate his post, the ill-health of Vice-Admiral Robert Hall necessitating his relinquishing an appointment he had for so long filled with such great benefit to the Navy. The Admiralty determined, very unwisely, to make the appointment a civil one for the future, and gave it to Mr. Hamilton, Accountant-General of the Navy. But the grave turn given to Irish affairs by the murders of Lord Frederick Cavendish and Mr. Burke necessitated the Government selecting men of energy to manage Irish affairs. Mr. Trevelyan and Mr. Hamilton were ordered to Dublin, and Mr. E. N. Swainson, Assistant-Secretary and Principal Clerk of the Admiralty, was directed by Lord Northbrook to assume the duties of the office. Within half-an-hour of receiving the order he had issued instructions to the Government printer to have his name printed on all official documents, when Admiral Hall again appeared at the Admiralty, sufficiently recovered, in his own opinion, to return to duty. The gallant Admiral, however, once more broke down in harness. He never recovered. His death was sudden, unexpected, and deeply regretted throughout the service. Captain Tryon then succeeded to the Naval Secretaryship of the Admiralty, as Acting Secretary during the absence of Mr. Hamilton in Ireland, but it is very generally hoped throughout the service that he will retain the post, and that the Admiralty will abandon all idea of making it a civil appointment. The death of Sir William Palliser, in February, deprived the world of a man who had rendered to the science of artillery great and valuable services. During the year but little advance was made in this country in the matter of ordnance. True, breech-loaders were adopted in principle, and 6-in. new pattern guns, on the modified French system, were supplied to the Swiftsure, on board which ship an accident happened by which one man was killed and three were wounded the first time the new guns were used. But that is all. Perhaps the authorities have been waiting for the final results of the Italian experiments with the new 100-ton Armstrong breech-loader at Spezia, already reported in these columns. In machine-guns much more has been done than in heavy ordnance. The Gatling Gun Company have produced a new feed, which they appear to consider of great importance. The Admiralty, on the other hand, have decided not to purchase any more Gatlings, and have declined to adopt the Hotchkiss revolving cannon,—the only guns of this description in the service being the two guns purchased in 1881 for experimental purposes. The Gardner guns, also, have failed to give satisfaction. It will be remembered that the Report of the defunct Committee on Machine-guns tied the hands of the Admiralty, and placed the Navy at the mercy of the War Office in regard to the supply of small-bore or rifle-calibre machine-guns. At the time we strenuously opposed the views of the Committee, and demonstrated them to be fallacious. Nevertheless, the War Office ordered a considerable number of these guns, of which 70 were to be delivered by March, 1882. But not one of these five-barrel Gardner guns was delivered up to August last, when the War Office very wisely cancelled part of the order, and have had to make arrangements to complete the remainder of the guns at the Government Small-Arms Factory at Enfield. The few Gardner guns which have actually been issued to the Navy have not given satisfactory results, their great weight reminding our Blue-jackets of the unwieldy Gatlings. The mode of mounting the Gardners has also been condemned, and those in use in the Navy are in future to be fitted in a similar manner to the service Nordenfelt guns. These latter had an opportunity of demonstrating their powers during the bombardment of Alexandria and otherwise during the Egyptian War. The good service they then rendered has greatly increased their popularity in the service. At the bombardment, and on the "ironclad train," these guns were under the enemy's fire, and themselves discharged many thousand rounds, without hitch or damage to the guns. The past year has also shown that the Nordenfelt system is capable of nearly unlimited expansion. Rifled calibre guns of from one to twelve barrels were fired at Portsmouth to test the new service mountings. Several thousand rounds were then fired without a hitch, at all angles of elevation and depression. The 10-barrel Nordenfelt, served by one man, fired 3,000 rounds in 3 min. 3 sec. The gun weighs but 2 cwt. The lightest gun, the one-barrel, weighing 13 lb., fired at the rate of 180 shots per minute, the other guns giving proportionate results. In July, the experiments with the Nordenfelt shell-firing guns, of heavier calibre, were concluded. The shell of the 1¼-in. gun penetrated 2¼ in. of iron at a distance of 300 yards. This gun was fired by a seaman gunner of the Excellent, with remarkable accuracy, and at the rate of from 12 to 16 shots per minute, while aiming deliberately at the target, changing from one target to another after each round. The same man fired 29 shots in a minute when taking less deliberate aim, but with exceedingly good results, nevertheless. We have recently described all these guns so fully, that we need now only add that a Nordenfelt gun, of 2¼ in. calibre, throwing a shell weighing 6 lb., has been made for the Ordnance Committee, and will most probably be tried very shortly. But we have overrun our log, and must now go back to the month of March, when the Navy Estimates made their appearance. These presented a novel feature, commented upon at the time in these columns. The net sum asked for was £10,483,901, as compared with £10,945,919 for the previous year; or a decrease of £462,018, so adjusted as to leave an actual decrease of £221,130. The form, too, in which the estimates appeared was novel. The receipts from stores sold by the Admiralty were for the first time applied to the benefit of the Navy, instead of being returned to the Exchequer. This has given the Admiralty an additional £672,008 to play with,—and it has been spent on increasing the strength of the Fleet. The increase in the shipbuilding vote, as we explained at the time, was £231,214, secured by retrenchments in other votes. The Admiralty programme included the completion of 15,502 tons in our dockyards and 4,640 tons in private establishments. On March 18, H.R.I.H. the Duchess of Edinburgh christened and launched the Majestic at Pembroke, naming the ship after her Royal sailor husband, the Edinburgh; and at Portsmouth, on March 21, was launched the Colossus, a vessel in many respects similar to the Inflexible, while in construction the Edinburgh is similar to the Ajax. These, together with the Collingwood, armour-clad, and the Arethusa and Phaeton, swift steam cruisers, are the principal additions which have been made to the Fleet during the year. We must also note the complete failure of the Polyphemus. The vacillating policy of a feeble Government brought about at this time a truly alarming state of affairs on the banks of the Nile. The *Army and Navy Gazette* has often raised its voice in warning and remonstrance against the violent, yet weak policy of England in regard to Egypt. That policy was violent when it overthrew Ismail Pasha, and feeble when it revived the power of the Sultan, to compass its own ends. The Anglo-French Control was organised, and became an Egyptian institution. Soon, most offices of profit under the Egyptian Government were monopolised by foreigners. The Army went without pay,—was starved. The officers, headed by Arabi, struck work. The National Party made Arabi its leader. The Khedive was forced at last to make him Minister of War, and the Sultan to decorate the Minister. Things went from bad to worse. Admiral Sir Beauchamp Seymour, Commander-in-Chief in the Mediterranean, with his flag flying on board the Invincible, accompanied by the Bittern and Falcon, anchored in the inner harbour of Alexandria on May 20. A conference was convened at Constantinople. Orders were sent to India to prepare a contingent of troops, and hold transports in readiness, for Egypt. The "Jingo Policy," condemned so vehemently in 1878, was resorted to in 1882 by Mr. Gladstone. But with this difference, that foreign nations, in 1878, knew that Lord Beaconsfield meant fighting in defence of British rights, and acceded to his terms; while, in 1882, no foreign Government believed that Mr. Gladstone meant fighting. The whole world believed that this outward and visible display of force was mere bluster, convinced that the English Ministry considered "force no remedy" where the aspirations of rising nationalities for freedom brought them into conflict with constituted authority. Nevertheless, the year which had begun without prospects for the Navy was destined to prove one of great moment in its annals. Six armourclads lay off Alexandria by June 3. The Channel Squadron, under Vice-Admiral William M. Dowell, C.B., was ordered to rendezvous at Plymouth, and proceed for the second time that year to the Mediterranean; while the Reserve Squadron, under Rear-Admiral H.R.H. the Duke of Edinburgh, was ordered to assemble at Portland on June 14. The Sultan was commissioned, and was added to the Channel Squadron, which at that time consisted of the Minotaur, Agincourt, Achilles, Northumberland, and Salamis. The Reserve Squadron comprised the Hercules, Lord Warden, Defence, Penelope, Warrior, Hector, Repulse, Valiant, and Lively. But these preparations in no manner intimidated the Egyptians, who commenced strengthening their forts, constructing earthworks, and mounting heavy guns around the shores of Alexandria Harbour, right under the guns of our ships. War preparations were then set on foot in this country, and in India. Rear-Admiral Sir William Hewett, V.C., was ordered to Suez, with all his available ships. The Orion was hurriedly commissioned and sent to strengthen Sir Beauchamp Seymour's hands. The Inconstant, Carysfort, and Tourmaline, of the Detached Squadron, were ordered to Alexandria. On June 17 we noted the fact that "the ships and their complements with Sir Beauchamp Seymour, at and off Alexandria, are as follows:—Monarch, 515 men; Invincible, 450; Alexandra, 671; Téméraire, 534; Superb, 620; Inflexible, 349; Condor, 100; Bittern, 90; Beacon, 75; Cygnet, 59; and Helicon, 73; making in all a force of 3,536 officers and men, all told. Of this number, perhaps, one-third are available for landing, after providing for all purposes on board ship. The Admiral's hand can be strengthened by the addition of the Minotaur, 709 men; Sultan, 400; Achilles, 705; Agincourt, 705; and Northumberland, 706; these ships almost doubling the force now immediately available, their complements amounting to 3,225 officers and men. There are also one or two other vessels in the Mediterranean which could be utilised, while the Reserve Squadron is not far off from the debateable land." We never dreamt, at that time, that, within a lunar month, a Ministry of which Messrs. Gladstone, Bright, and Chamberlain formed part would have ordered the bombardment of Alexandria, on the failure of the Conference, sitting at Constantinople, to come to an arrangement with the Porte in regard to Egyptian matters. On June 11, the massacre of the Europeans took place, under the guns of the then Allied English and French squadrons, the latter under Admiral Cora. The massacre was brought about solely by the presence of the Fleet in the harbour of Alexandria. This incited the natives to violence, and made them the willing tools of unscrupulous politicians. Under the eyes of the Allied Admirals of France and England, the Arabs entered and pillaged the European quarter of the town, killing, or attempting to kill, all whom they fell in with. The British uniform was not even respected by the Arab mob. Mr. Pitworth, engineer of the Superb, was murdered, and Alfred Herne and George Strackett, of the Helicon, shared the same fate. Many officers had narrow escapes, among others, Lord Charles Beresford, who lived to thoroughly well avenge those who fell that day. But nothing was done to at once restore order in Egypt. France got frightened, and withdrew her support, leaving England to advance or retire, as she liked. Mr. Gladstone took a month considering which of three things he should do. He at last decided to fight, but not to go to war. He invited the Sultan of Turkey to co-operate with England in a military promenade through Egypt. But he objected to Turkish troops landing in Egypt. Fifty-eight merchant steamers of the Austral type were chartered by the Transport Department of the Admiralty, and under the superintendence of Capt. Brownlow, C.B., two-thirds of an English army corps was embarked, but not until after the bombardment of Alexandria by the British Fleet, on Tuesday, July 11, had led to the destruction of the whole town by the infuriated mob and convicts let loose by Arabi. It appears that it was the Khedive who ordered the Egyptian forts to reply to the fire of the English ships. We will not attempt to follow the incidents in detail which led up to the ultimatum addressed by Sir Beauchamp Seymour to Arabi, as they are fresh in the memory of our readers. Suffice it to say that the Government embarked in a war which might have led to a rupture with France, Russia, and Turkey, whose combined fleets would soon have swept the seas of British merchantmen. More than half the British naval force in commission abroad was concentrated in Egyptian waters. Of reserve ships, we had but the following. We quote from our columns at the time:—"It would appear that, after deducting from the list those ships that, in the opinion of the Admiralty, are not likely to be worth repair, we have in reserve at the home ports, or fitting out after launching, 20 ironclads,—Bellerophon, Audacious,* Shannon, Conqueror, Agamemnon, Ajax, Devastation, Dreadnought, Hotspur,* Rupert, Colossus, Neptune, Edinburgh, and Triumph* (on passage home), and the six coast-defence turret-ships; two unarmoured frigates, Shah* and Raleigh*; one steam cruiser, Mercury; four large corvettes, Active, Volage, Rover, and Bacchante* (on passage home); 12 other corvettes, Modeste,* Opal, Sapphire,* Turquoise, Canada, Conquest, Constance, Cordelia,* Juno, Druid,* Garnet,* and the Emerald* (on passage home); nine sloops, Heroine, Hyacinth, Satellite, Osprey,* Penguin,* Pelican,* Wild Swan,* Egeria,* and Cormorant* (on passage home); armour-plated gunboat, Waterwitch; 15 gun-vessels, Linnet, Avon, Cracker,* Frolic, Elk,* Boxer,* Growler,* Hart,* Hornet,* Lynx,* Pert,* Teazer,* Thistle,* Ready,* and Rocket* (these two last on passage home); also some 40 gunboats, half of which are only available for coast defence. The ships marked with an asterisk are in want of considerable repair. We can hardly consider this reserve force worthy of the first maritime Power in the world, with numerous colonies and a vast commerce to protect; neither can it be considered adequate to cope with a combined navy of, say, France and Italy." On Tuesday, July 11, the exact position of our ships when the bombardment commenced was as follows:—The Alexandra, Sultan, and Superb, in line about 2,000 yards W. ½ N. of Ennostos Light; the Inflexible in the Corvette Pass, about 4,000 yards off the Meks Fort; the Téméraire in the Central Pass, 3,500 yards from Meks Fort; the Penelope, Invincible, and Monarch about 1,000 yards from the Meks Fort. These armourclads were supported by the Beacon, Bittern, Condor, Cygnet, and Decoy. The Inflexible opened fire on Fort Ras-el-Tin with her 81-ton guns. The fire was returned. Then the bombardment was taken up by the other ships, and the action became general. In a few hours, the fire of the Egyptian forts was silenced, but not as soon as had been expected by Sir Beauchamp Seymour. We do not know whether this unexpected resistance was the cause of Sir Beauchamp Seymour's decision not to land the seamen and Marines of the Fleet until the Egyptians had evacuated the town, but if it was, we can only point to the fact that the delay in landing a force at Alexandria was the cause of the destruction of that town; while the bold conduct of Rear-Admiral Sir William Hewett, V.C., in the Red Sea, saved Suez from a similar fate. The Admiralty were prompt in rewarding the principal officers who took part in the bombardment, much to the disgust of such commanders as Lord Charles Beresford, of the Condor, who was thus deprived of any further participation in the war. The seamanlike manner in which this officer and Com. Ryder, of the Cygnet, handled their small craft under the fire of the enemy's guns has since been a constant theme in the Navy, and earned for these officers well-merited promotion. It was on the Navy, too, that fell the task of taking possession of the burning ruins of Alexandria, after the pillage of the town by the retreating Egyptian troops. During the anxious time that followed, and prior to the arrival of troops, the seamen and Marines of the Fleet, under Capt. John Fisher, Com. Lord Charles Beresford, and Major Philips, R.M.L.I., rendered good and valuable services in Alexandria. The Channel Squadron was the first reinforcement to arrive, and brought with it the Mediterranean garrisons. Then came Sir Garnet Wolseley and the Army, while the Indian Contingent landed at Suez, under Gen. Macpherson. The Suez Canal, notwithstanding the protests of Monsieur de Lesseps, was seized by the preconcerted action of the Naval forces at Suez and Port Said, under the direction respectively of Rear-Admirals Sir William Hewett, V.C., and Hoskins. "England seizes the Suez Canal, 1882," will, in future, form an historical landmark. While these stirring events were going on in Egypt, where England had at one and the same time concentrated ships of the Mediterranean, Channel, East Indies, and Detached Squadrons, with their respective Admirals, viz., Sir Beauchamp Seymour, William Montagu Dowell, Sir William Hewett, V.C., Sir Frederick Sullivan, and Anthony Hiley Hoskins, who had vacated his seat at the Admiralty Board, and had been replaced thereat by Sir Frederick Richards, A.D.C., the late Hydrographer, nothing of importance occurred on any Naval station except the Home. Here one Naval scandal after another was brought to light. The loss of many hundreds of pounds' worth of gold-leaf and other stores from Portsmouth Dockyard was followed by the Dasher case. Then the case of Oliver Jew, ship's steward of the Cambridge, resulting in his being sentenced to eighteen months' imprisonment and dismissal from the service, was followed by the trial of Leggett, ship's steward of the Lord Warden, for having paid 140 men one shilling each, instead of altering his books and their papers, in which the men had been charged two pounds of tobacco, instead of the one pound issued. Leggatt was dismissed the service—a sentence, we hold, out of all proportion to the offence, and one the Admiralty would do well to revise. Then came the Clyde scandal, in which the Jackal was implicated. The loss of the Phœnix, in September, on Prince Edward's Island, led to Com. Hubert H. Grenfell being dismissed his ship, the court considering that sufficient care had not been exercised in the navigation of the ship entrusted to his command. Many changes have also taken place in the superior commands of the Navy during the year 1882. Consequent upon the retirement of Admirals A. Cumming and Sir William Loring, in accordance with the age regulations of the service, Vice-Admirals Sir Beauchamp Seymour and Sir Reginald Macdonald were promoted to the rank of Admiral, and, at the same time, Rear-Admirals W. Gore-Jones and the Hon. Henry Carr Glyn became Vice-Admirals, and Capts. Sir Michael Culme Seymour, Bart., and Sir Frederick Richards, were advanced to flag rank. Vice-Admiral Edward Bridges Rice relieved Sir Reginald Macdonald in the Command-in-Chief at the Nore, and Admiral Ryder has been relieved in the command of Portsmouth by Admiral Sir Geoffrey Phipps Hornby, whose appointment as President of the Royal Naval College has been conferred upon Vice-Admiral Luard. On the North American and West Indies station, Vice-Admiral Sir John Commerell, V.C., has succeeded Vice-Admiral Sir Francis Leopold M'Clintock; and Rear-Admiral Sir Anthony Hiley Hoskins, K.C.B., has succeeded to the command of the Naval Reserves, vacated by Rear-Admiral H.R.H. the Duke of Edinburgh, on the expiration of his period of service, the Duke of Edinburgh being promoted to the rank of Vice-Admiral, in consideration of his distinguished services to the country, and his most able report on the state and condition of the Naval Reserve while in command of that force; and Rear-Admiral J. D. M'Crea has succeeded Vice-Admiral the Hon. F. A. C. Foley as Admiral-Superintendent at Portsmouth, where the Mayor and Corporation passed a unanimous vote of thanks to the gallant Admiral on his vacating a command during the tenure of which he had so endeared himself to all the inhabitants of Portsmouth. Death has also robbed the service of many a veteran, that of the following naval officers having, amongst others, been reported to the Admiralty during the past year:—Admirals Sir William Clifford, Bart., G. H. P. White, John T. Coffin, J. A. Duntze, Montague, Lowe, and McHardy; Vice-Admirals Robert Hall (the late Secretary of the Admiralty), C. R. Johnston, Nolloth, F.R.S., and E. D'O. D'A. Aplin; Rear-Admiral Samuel H. Henderson; Capts. Stephens, of the Thetis, and Hope, of the Champion, and Com. Wyatt Rawson, mortally wounded at Tel-el-Kebir, together with Major Strong and Capt. Wardell, killed; Mr. Edward Newman, the much esteemed Chief Engineer of Portsmouth Dockyard, also died at his post; Admiral Pothueu, of the French Navy, Admiral Count Lütke, of the Russian Navy, and Admiral Barroso, of the Brazilian Navy, officers so celebrated that the record would be incomplete without their names, also joined the majority. The gallant conduct of the Royal Marines in Egypt has been a theme of world-wide conversation. The Royal Marine Artillery battalion, under Lieutenant-Colonel Tuson, and the Light Infantry battalion, under Lieutenant-Colonel Howard Jones, behaved with unexcelled steadiness and bravery in every action of the Egyptian Campaign. They first attracted attention at Alexandria, during the memorable reconnaissance of Arabi's lines. So highly were these troops spoken of, that H.R.H. the Duke of Connaught applied to have them specially attached to his Brigade of Guards. At Tel-el-Kebir, however, they were in the fighting line, and behaved most gallantly, as they ever have. In recognition of the distinguished services of the corps, her Majesty the Queen has been pleased to appoint Vice-Admiral H.R.H. the Duke of Edinburgh to be Honorary Colonel of the Marines. During nearly the whole year, the Marines have had a battalion stationed in Ireland, maintaining order in that distressful country. Here, too, they have acquitted themselves to the entire satisfaction of the authorities. In conclusion, it is impossible to speak too highly of the work done during the past year by the Navy and by the Royal Marines. We wish we could say as much for the Admiralty. The publicity given to the formation of a Secret Intelligence Department has made "My Lords" the laughing-stock of Europe. Their preparing to arm merchant steamers has disgusted the Navy. Their intention to encourage anonymous letters being sent to them has withdrawn from the Admiralty the respect of all honourable and right-minded men; and their withholding the award of honours and rewards justly won by the Navy for its services in Egypt, while conferring a G.C.B.-ship on both Sir Astley Cooper Key and Sir William Mends, has implanted the belief in most minds that the right thing for an officer now-a-days to do is, to feather his own nest. Then, again, the reduction of Greenwich Hospital School to procure funds to establish a Seamen and Marines' Widows' Pension Fund is a step in the wrong direction. It is taking away with one hand, to give with the other. A widow now has the right to send her boys to Greenwich Hospital School. In future, to avoid losing her pension and compassionate allowance, she won't remarry; but she will take unto herself a man, and will live with him, and have children by him, and the allowance meant for the children of the man who died in the service of his country will go to support the paramour and his illegitimate offspring. Much as we should like to find matter worthy of praise in the past administration of the Navy by the Admiralty, we can find none worth recording in this yearly summary. The Navy has deserved more at the hands of its rulers than it has received. This has been admitted even by so high an authority as the Duke of Cambridge, who paid a most graceful compliment to the Navy in the House of Lords, when both Houses of Parliament passed a vote of thanks to the Forces engaged in Egypt. The able manner in which Admiral Sir Beauchamp Seymour conducted the whole of the Naval operations during the war richly merited the distinguished honour conferred upon him by his Sovereign in his elevation to the House of Peers, under the style and title of "Baron Alcester."

Obituary.

Com. George Pew died on Thursday last at his residence in Old Cavendish Street, aged 88. This officer entered the Navy in March, 1809, served as a midshipman in the Surprise, under Sir Thomas Cochrane, and in 1813 assisted at the capture of the American privateer Decatur. Was present at the attacks on Washington and Baltimore, and throughout the operations on the coast of Georgia. He served as master's mate of the Beelzebub, at the bombardment of Algiers, in 1816, and was promoted to the rank of lieut. for services rendered during the action (medal and clasp for Algiers). He retired with the rank of commander in 1864, and in 1874 was promoted to that rank under the Order in Council of Jan. 30, 1816.

Tuesday's Gazette.

ARMY.

WAR OFFICE, PALL MALL, January 2, 1883.

Royal Engineers—Col. C. B. F. Penny (late Bombay), has retired upon a pension and extra gratuity with the hon. rank of Major-Gen. (Dec. 31, 1882). The under-mentioned Lieutenants to be Captains, under the provisions of Article 7 (b), of the Royal Warrant of March 11, 1882 (all dated Jan. 4, 1883):—P. Cardew, L. Darwin, M. W. Skinner, W. T. Shone, W. H. White, J. M. T. Badgley, H. W. Duperier, F. W. Bennet, A. Heathcote, A. Hildebrand, R. Thompson, E. J. T. Ross of Bladensburg, S. McM. Maycock, E. J. Dewing, and H. H. Kitchener.

Staff—Col. Sir W. O. Lanyon, K.C.M.G., C.B., 2nd West India Regt., to be an Assist.-Adjt. and Qrmr.-Gen., vice Col. Hon. E. G. Curzon, half-pay, whose period of Staff service has expired (Jan. 1).

MILITIA.

WAR OFFICE, PALL MALL, January 2, 1883.

INFANTRY.

3rd Battalion, the Queen's (Royal West Surrey Regiment)—Lieut. F. B. Spencer resigns his commission.

4th Battalion, the Royal Warwickshire Regiment—The Hon. Ulick James Graham Raymond Colborne to be Lieut.

3rd Battalion, the Royal Fusiliers (City of London Regiment)—Morice John Sheridan, gent., to be Lieut.

4th Battalion, the Devonshire Regiment—William Charles Marmaduke Woodcock, gent., to be Lieut.

4th Battalion, the Prince Albert's (Somersetshire Light Infantry)—Henry Norris Glynn Hinde, gent., to be Lieut.

3rd Battalion, the East Yorkshire Regiment—James William Laurence, gent., to be Lieut.

4th Battalion, the Bedfordshire Regiment—Severin Jephson Flower, gent., to be Lieut.

3rd Battalion, the Inniskilling Fusiliers—Arthur Henry Battye, gent., to be Lieut.

5th Battalion, the Royal Inniskilling Fusiliers—Capt. C. F. H. Spencer, 2nd Batn., to be Adjt., in succession to Major J. E. Wetherall, whose term of service in that appointment has expired (Dec. 21, 1882).

4th Battalion, the Worcestershire Regiment—Henry Rodolph Davies, gent., to be Lieut.

4th Battalion, the East Surrey Regiment—Edward Alexander Jackson, gent., to be Lieut.

4th Battalion, the Duke of Wellington's (West Riding Regiment)—Edward Feetham Coates, gent., to be Lieut.

4th Battalion, the Duke of Cambridge's Own—Frederick Bowyer Bowyer-Lane, Esq., late Capt., half-pay, 53rd Foot, to be Major.

7th Battalion, the King's Royal Rifle Corps—James Edward Aikin, gent., to be Lieut.

3rd Battalion, the Duke of Edinburgh's (Wiltshire Regiment)—Leonard Holmes-a'Court, gent., to be Lieut.

3rd Battalion, the Prince of Wales's (North Staffordshire Regiment)—Col. E. R., Lord Hatherton, C.B., resigns his commission; E. R., Lord Hatherton, C.B., late Col., to be Hon. Col. of the Batn.

4th Battalion, the Prince of Wales's (North Staffordshire Regiment)—Capt. T. Currie, 1st Batn., to be Adjt., in succession to Capt. J. P. Miller, who has resigned that appointment (Dec. 14, 1882).

3rd Battalion, the Gordon Highlanders—Major and Hon. Lieut.-Col. J. Turner to be Lieut.-Col.

5th Battalion, Princess Victoria's (Royal Irish Fusiliers)—Lieut. C. P. M. Weatherley resigns his commission.

6th Battalion, the Connaught Rangers—Sydney Arthur Carden, gent., to be Lieut.

3rd Battalion, Princess Louise's (Argyll and Sutherland Highlanders)—Capt. J. Russell resigns his commission.

(Where not otherwise specified, the foregoing commissions and announcements bear date January 3, and the current year must be understood.)

YEOMANRY CAVALRY.

WAR OFFICE, PALL MALL, January 2, 1882.

Warwickshire—Capt. Hugh de Grey, Earl of Yarmouth, is granted the hon. rank of Major (Jan. 3).

MILITIA MEDICAL DEPARTMENT.

Surg.-Major W. D. Murphy, 4th Brigade, South Irish Division, Royal Artillery, resigns his commission; also is permitted to retain his rank, and to wear the prescribed uniform on his retirement (Jan. 3).

VOLUNTEERS.

WAR OFFICE, PALL MALL, January 2, 1883.

ARTILLERY.

1st Caithness—Lieut. F. B. Elmslie, R.A., to have the rank of Capt. whilst serving as Adjt. in the corps (June 15, 1882).

1st Cinque Ports—Lieut. B. H. H. Birchill resigns his commission

3rd Middlesex—Capt. P. Ashcroft resigns his commission; also permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement. Lieuts. G. E. Joseph to be Capt.; W. B. Sadgrove resigns his commission.

1st Norfolk—R. Andrew Fuller, gent., to be Lieut. (Dec. 18, 1882).

2nd West Riding of Yorkshire—Lieut.-Col. E. Ripley resigns his commission.

RIFLE.

1st Aberdeenshire—Capt. and Hon. Major G. D. Rutherford resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

4th Aberdeenshire—Lieut. J. S. Low resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

1st Volunteer Battalion, Princess Charlotte of Wales's (Berkshire Regiment)—Lieut. S. Martin-Leake resigns his commission.

2nd Bucks—Lieut. F. E. Churchill resigns his commission.

1st Cumberland—Arthur Penrhyn Keys-Wells, gent., to be Lieut.

2nd Essex—Charles Wing Gray, gent., to be Lieut. (supernumerary).

2nd Forfar—Lieut. J. Jack resigns his commission.

3rd Forfar (Dundee Highland)—Lieut. C. Batchelor to be Capt.

2nd Glamorgan—Richard Thomas Phillips, gent., to be Qrmr.

6th Lancashire—Lieut. W. P. Hartshorn resigns his commission.

15th Lancashire—Lieut. H. T. Cox to be Capt.

1st Leicestershire—Lieut. E. L. Clare resigns his commission.

1st Lincolnshire—Lieut. W. G. Smyth resigns his commission.

2nd London—Capt. W. T. Raymond resigns his commission.

3rd Middlesex—Lieut. J. S. Lee to be Capt.

4th Middlesex (West London)—Major F. B. Bowyer-Lane resigns his commission.

7th Middlesex (London Scottish)—Eustace James Anthony Balfour, gent., to be Lieut. (supernumerary).

15th Middlesex (the Customs and Docks)—Lieut.-Col. C. H. Wigram resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement; Henry Wilkinson Arnaud, gent., to be Lieut. (supernumerary).

19th Middlesex (St. Giles's and St. George's, Bloomsbury)—Lieut. E. F. Coates resigns his commission.

20th Middlesex (Artists')—Capt. B. A. Paice resigns his commission.

21st Middlesex (Finsbury)—Lieut. C. E. Gwinnell to be Capt.

5th Staffordshire—Lieut. C. E. R. Isherwood resigns his commission.

4th Surrey—Capt. L. Austwick resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

1st Warwickshire (Birmingham)—Lieut. W. Tonks resigns his commission. The resignation of the commission held by Lieut. H. Symonds, notified in the *London Gazette* of Nov. 24, 1882, is cancelled.

1st Westmoreland—Charles Edward Francklin, gent., to be Lieut.

4th West Riding of Yorkshire—Lieut. J. B. Kershaw to be Capt.

MEMORANDUM.

Hon. Major G. H. Greaves, late Adjt. 18th Lancashire (Liverpool Irish) Rifle Volunteer Corps, has been permitted to commute his retired allowance (Dec. 11, 1882.)

(Where not otherwise specified, the foregoing commissions and announcements bear date January 3, and the current year must be understood.)

INDIA OFFICE, January 1, 1883.

The Queen has been graciously pleased to nominate and appoint Surg.-Major J. E. T. Aitchison, M.D., Indian Medical Department, Bengal; Major O. Probyn, Bombay Invalid Establishment, Superintendent of Police, Commandant of the Khandeish Bheel Corps; Capt. C. Clerk, Madras Army (retired), Tutor to his Highness the Nizam of Hyderabad; and Surg.-Major G. Bidie, M.B., Indian Medical Department, Madras, Superintendent of Central Museum at Madras, to be Companions of the Order of the Indian Empire.

STATIONS OF HER MAJESTY'S SHIPS IN COMMISSION.

[WITH THE DATES AND PORTS OF COMMISSION.]

Name.	Guns.	Men.	Class.	Commanding Officer.	When and Where Commissioned.	Station.
Achilles	16	706	S. armoured ship	Capt. George D. Morant	Re. Sept. 1, 1880—Devonport	Channel Squadron

Official regulations have been issued which will doubtless have the effect of discouraging the commutation of pensions. It has been determined that pensions of less than £80 per annum shall not be partially commuted, and that no partial commutation of a pension shall be extended to more than two-thirds of it, or to such less proportion of it as shall leave an annuity of not less than £80.

Major Allan Cunningham, R.E., and Capt. P. A. MacMahon, R.A., were elected members of the London Mathematical Society on Dec. 14.

The *Volunteer Service Review* says:—"From a little practical experience, though on a small scale, of the value of the territorial system as a means of identifying particular regiments, we have come to the conclusion that the game of fifteen is child's-play in comparison to it. Nothing under a triple reference to the *Army List* is of any use. Ensconced in an office arm-chair, and with an *Army List* handy, after much time and many expletives, we have solved the problem as to which is the 1st or 2nd Batn. Royal Irish Regiment, as distinguished from the Royal Irish Fusiliers, and the exact difference between the battalions of the Royal Highlanders and the Highland Light Infantry; but how the Post-office officials and the Commissariat settle these things in their heads is a dark and unfathomable mystery. The numerical distinctions must be restored, and at once. That the present exasperating system has endured so long speaks volumes for the patience and discipline of the Army."

"Sapo Carbonis Detergens" is a physician's name for a remedy prescribed for the past quarter of a century for every variety of skin disease. The public have also adopted the same, as a preventive of small-pox, scarlet fever, and measles. Purchasers should see that the Latin brand is on every tablet, and Wright's Coal Tar Soap on each wrapper, without which none is genuine.

NAVAL NOTES.

An important change is about to be carried out in the Navy, by which torpedoes, ground-mines, and outrigger-torpedoes, instead of being, as they now are, classified as War-Department stores, will be considered as Naval stores, and drawn from the dockyards. Explosive materials, however, will remain under the control of the War Department.

The *Portsmouth Times* hears that it is certainly more than probable that Rear-Admiral F. Herbert will in March succeed to the Queenstown command, but that the statement that the Directorship of Naval Ordnance will be conferred upon Capt. Codrington, of the Excellent, is quite premature. The latter officer possesses every qualification for that responsible post, and his selection would give general satisfaction, but no definite arrangements have yet been made for transferring him to Whitehall.

The Albanian shepherd who was wounded by Capt. Grenfell during the attack on Com. Selby, at Artaki, in February last, having since died, and the British Embassy having contested the right of the Ottoman tribunals to try Capt. Grenfell owing to his commanding the vessel attached to the service of the Embassy, the Porte has informed Mr. Wyndham, the British Chargé d'Affaires, of its intention to proceed against Capt. Grenfell before the English Courts.

A court of inquiry has been held at Portsmouth into the conduct of a party of seamen and Marines who were sent from the flagship at Portsmouth to assist in discharging the cargo of the Persian Monarch—not the Lusitania transport, as has been incorrectly stated. The men broke into the spirit room and, helping themselves to various beverages, became helplessly drunk. Several of them have been sentenced to 42 days' imprisonment. A ship's corporal has been disrated and some petty officers have been severely reprimanded.

Mrs. Brooke, wife of Capt. A. T. Brooke, R.N., expired on Dec. 29 at Clarendon Villas, Stoke, after a few days' illness, from diphtheria. The lady, who was quite young, only went to Devonport recently, on her husband being appointed to command the Himalaya, which position Capt. Brooke, owing to his wife's illness, has had to temporarily relinquish. Great sympathy is felt for Capt. Brooke in his sad bereavement.

Recent events in the Royal Navy have, says the *Manchester Guardian*, determined the Admiralty to put the pay departments, as well as the issue or purchase of stores, upon an entirely new footing. It is intended that for the future the officer commanding any vessel on commission shall have no more to do with the pecuniary or material affairs of the ship than has the commanding officer of a regiment; and that, like the Army Pay Department, the naval paymasters and storekeepers shall be entirely separate from the control of the captains, except so far as the general discipline of the ship is concerned.

A party of about 20 men of the Chatham Division, Royal Marines, proceeded to Dublin on Tuesday, for employment as police, in conjunction with the Dublin detective force. Several detachments of men, in all numbering about 100, have been placed under orders to join some of the guardships for duty.

Messrs. Hogg and Robinson, Admiralty shipping agents, have made arrangements, with the sanction of the Lords Commissioners of the Admiralty, to forward private parcels to officers and others, serving in her Majesty's Army and Navy in Egypt. For the Army—to the Commissary-General, British Forces, Alexandria; for the Navy—to the Senior British Naval Officer, Alexandria. Jewellery and other valuables to be specially declared, and special rates will be given, according to the value. The value and contents of all packages are required for Custom-house purposes. It is very necessary that all packages should be properly packed and addressed. All charges must be paid before the packages can be forwarded for shipment. Packages will be received at the agents' offices, 101 Leadenhall Street, E.C., where all further particulars can be obtained.

We are informed by the Admiralty that they have received a telegram from Capt. Stephenson, of the Carysfort, dated Suez, Dec. 28, 1882, reporting that he had "returned from Nakhl, leaving Col. Warren there. Nine principal culprits captured out of 21. Wives and relatives of remaining important ones as hostages. Murderers of Professor Palmer and Capt. Gill taken. Sufficient evidence and culprits collected to decide as to trial. Bedouins quiet since Shedide's arrival in desert, and assisting to bring in those implicated."

At the last examination for admission to the Royal Military Academy, Woolwich, Mr. Henry Joseph Crofton, son of the well-known professor of mathematics at that academy, passed direct from the Royal Naval School, New Cross, on his first trial, ninth out of 50 successful candidates. He was the only candidate sent up from the school on this occasion.

Headaches and Disordered Stomach.—"After suffering for nearly two-and-a-half years from severe headache and disordered stomach, and after trying almost everything, and spending much money without finding any benefit, I was recommended to try your Fruit Salt. Before I had finished one bottle, I found it doing me a great deal of good, and now I am restored to my usual health. Others I know that have tried it have not enjoyed such good health for years.—Yours truly, Robert Humphreys, Post Office, Barrasford." CAUTION.—Legal rights are protected in every civilised country. Examine each bottle, and see the Capsule is marked "Eno's Fruit Salt." Without it, you have been imposed upon by worthless imitations. Sold by all Chemists, price 2s 9d and 4s 6d. Directions in Sixteen Languages,—How to Prevent Disease. Prepared only at Eno's Fruit Salt Works, Hatcham, London, S.E., by J. C. Eno's Patent.

It is certain the Queen's Physician, Dr. Fairbank, has written strongly recommending Lentilla, or Tonic Daily Food. It cures indigestion, heartburn, constipation, liver and stomach complaints, &c., besides having such wondrous nourishing properties. Makes soup, puddings, porridge, biscuits, custards, &c. Tins, 1 lb., 1s 6d; ½ lb., 10d. Barrels, 28 lb., 30s; 14 lb., 16s. Of all Chemists.—Proprietor, H. J. Deacon, Beckenham, Kent.

Printed and Published for the Proprietors, at the Office, No. 16 Wellington Street, Strand, London.—Saturday, January 6, 1883. Letters on business and Remittances should be made to Mr. Richard James Wood.

MR. RICHARD JAMES WOOD,

AT THE OFFICE, 16 WELLINGTON STREET, STRAND, *and* NOT *to the* EDITOR *of the* ARMY AND NAVY GAZETTE.

The subscription to the paper is 7s. per quarter, or 28s. per annum, PAYABLE IN ADVANCE, *inclusive of postage to any part of the United Kingdom.*

To India, £1 12s. 6d. per annum.

The ARMY AND NAVY GAZETTE *can be obtained in Paris of our Agent, Mr. J. W. S. NEAL, English Stationer, 248 Rue de Rivoli, to whom Advertisements and Orders for the Paper may be sent.*

A SHORT paragraph in the *Standard* of the 25th of last September informed us that "Her Majesty has been pleased to approve of the word 'Dettingen' being borne on the colours of the two Regiments of Life Guards, and also of the Royal Horse Guards, in consideration of the battle fought at that place in June, 1743." And on October 26, a further announcement appeared that, "The Queen has authorised that 'Dettingen,' the name of the engagement in which the Foot Guards took part, and which, up to the present time, has not been written on their regimental colours, shall now be added thereto." In the former paragraph, the word "colours" appearing instead of "standards," shows that its writer knows little about military terms; and in the latter, Dettingen being called "the engagement," &c., displays a depth of ignorance of military history which would be incredible, if it were not proved. These mistakes, however, and the equivocal and incorrect expressions used, do not cast any suspicion on the genuineness of the information; but rather, judging by the style of recent official announcements, confirm its authenticity. There is no reason to doubt that if those paragraphs had passed unnoticed and uncontroverted, "Dettingen" would have been granted to the Household Cavalry and the Foot Guards, and to them only. In a series of articles in this paper, the gross mistakes made about this battle were thoroughly exposed, and, presumably in consequence of that exposure, the November *Army List* appeared without the insertion of those spurious honours. In the meantime, some kind of inquiry would seem to have been made, for in the *Army List* for last month "Dettingen" appears credited not only to the regiments the claims of which we clearly disproved, but also to all those which we named, in an article on November 4, as having fought and suffered in the battle. An effort has been made to found a claim for the Life Guards to "Dettingen" on the presence of certain other corps in that battle, but the following explanatory remarks will show how groundless such a claim really is. When Dettingen was fought, the Household Cavalry consisted of the 1st and 2nd Troops of Horse Guards, the lineal predecessors of the present 1st and 2nd Life Guards; the 3rd Troop of Horse Guards, which was disbanded in 1746; the 4th (Scotch) Troop of Horse Guards, which was also disbanded in 1746; and the 1st and 2nd Troops of Horse Grenadier Guards (the latter a Scotch corps), which were disbanded in 1788. These six "Troops," as they were then called, were quite distinct corps, having separate establishments, and differences in uniform. Each of them had a Colonel; the Troops of Horse Guards had each two Lieutenant-Colonels and two Majors, and the troops of Horse Grenadiers each a Lieutenant-Colonel and a Major. The Royal Regiment of Horse Guards (the Blues) were not then called Household Cavalry. The 3rd and 4th Troops of Horse Guards, and the 2nd (Scotch) Troop of Horse Grenadiers, served at Dettingen and Fontenoy, but the other three corps remained in England. After the latter battle, the 3rd and 4th Troops returned to England, and were disbanded on December 25, 1746. We are told that 25 men, from these perhaps, were added to the 1st Troop, and the same number to the 2nd. In June, 1788, a complete reorganisation of the Household Cavalry took place; the two Troops of Horse Grenadier Guards were disbanded, and the 1st and 2nd Troops of Horse Guards were constituted the 1st and 2nd Regiments of Life Guards. The composition of the new regiments was very different from that of the late "Troops" of Guards, and on the re-formation a large number of men were pensioned and otherwise provided for, and the horses and some of the men that had belonged to the disbanded Horse Grenadiers joined the Life Guards. The claims of the present regiments to Dettingen may, then, be briefly stated thus:—1. About 50 men, some of whom *may* have served at Dettingen, in other corps, joined the 1st and 2nd Troops of Horse Guards in 1746. 2. Some men and many horses, that had belonged to a corps that had been engaged at Dettingen 45 years before, joined the Life Guards when they were newly constituted in 1788. If such hypothetical claims be recognised, what claims, however slender or visionary, can be rejected? Going only a little step further, the Life Guards might ask for Tangier, because, though they sent no men to contribute to the defence of that beleaguered possession, they supplied a number of horses and saddles for the Tangier Horse, now the Royal Dragoons! The made-up Cavalry regiments and the "scratch" battalions of Infantry that served in the late Egyptian Campaign would have just as strong—or weak—claims to the honours of the many regiments which furnished the contingents that enabled them to take the field. It may well be asked, Why was Dettingen, which was an escape rather than a decisive victory, selected for commemoration, while so many battles which have no painful associations remain unrecorded? The march of the Allied Army up the Maine was strategically a mistake, which nearly caused the destruction of that army. At Dettingen, the Allies fell into a trap, and they succeeded in fighting their way out of it only because the mistakes made by the French were more numerous and inexcusable than their own. A fatality seems to attend this confused and still confusing battle. The result of a series of errors on both sides, it was begun without forethought, continued in confusion, and ended without adequate result. The "demon of muddle" seems to cling to it still.

THE question of the compulsory removal of Purchase Colonels from the Army, under the Warrant of June 25, 1881, has now been before us for some time,—since March, 1881, when the late Secretary of State for War first propounded in Parliament his scheme for the removal of officers, under new clauses of age and non-employment. This was a very plausible scheme, in theory, and if it had been applied to officers who entered the Army after the Abolition of Purchase, under the new conditions, it would have stood its trial on its own merits; but, unfortunately, it was at once applied to all officers, Purchase and non-Purchase, and to those who entered after 1870. Of course, it dislocated the Military machine of Promotion and Retirement completely, and introduced great discontent and heart-burning amongst the older officers, who became immediately offended by it. Indeed, there is little use in disguising facts, as it is well known that every Colonel who has been compulsorily removed and deprived of his profession and means of living, has remonstrated most strongly against the application of these Rules. It seems perfectly clear that the Colonels either purchased commissions or had purchase rights, and that no complete alteration of their terms of service should have been applied to them, without either the return of their purchase-money, or a compensation equivalent to it. The Purchase Officers entered the Army under Purchase rules and regulations, and should not have been turned out of the service on to the Retired List without fair compensation, according to rank, and according to whether they had or had not actually purchased commissions. Herein lies the whole mistake made by the Army reformers, an attempt to avoid the main question, Compensation. We think an error has also been committed in sending every officer before the Army Purchase Commission, to discuss and quarrel over grievances and claims which the Army Purchase Commissioners have no power or authority to settle. Soldiers only understand simple rules regarding money questions, and they look with suspicion upon the attorney method of dealing with individual cases. Now, we hear of some Colonels fighting the Secretary of State for War and the Army Purchase Commissioners tooth and nail, for the assertion of their Purchase rights. Some have received additions to their pensions in pounds and shillings; but, notwithstanding this minute accuracy of algebraical calculations, every one of the decisions has been contested and remonstrated against, because the Commissioners have no power to consider the whole question, and the grievances resulting therefrom; and the "net loss" calculation for promotion is, in many cases, a minor question. Major-General Bray, C.B., has printed a circular setting forth his claims. We are averse to bringing forward individual cases, but that of General Bray seems to us a test case, and will prove, doubtless, whether the Government have or have not a legal or equitable right to remove officers who have purchased commissions, on the introduction of new rules, without the return of the purchase-money, or any compensation. We hear that General Bray's claims were submitted to the Secretary of State for War, on his removal from the Army; that he was referred to the Army Purchase Commissioners for settlement, when it appeared that the Commissioners had no power to enter into any question, except loss of promotion to rank of Major-General. It will be observed that this is a very minor point. General Bray really remonstrates, as others did, against the post-Purchase changes in the terms of his service, and demanded the return of his purchase-money, on the plea that the Government had not fulfilled the terms of the conditions under which he bought his commissions. The non-fulfilment of these terms has cost the removed officers a good deal of money, and they now demand the return of their purchase-money. When it was found that the Army Purchase Commissioners had no power to enter into the cases submitted to them, an independent court of arbitration was asked for, to decide the contested points between the removed officers and the Government. Thus far, the Secretary of State for War has not assented to this proposal of arbitration. An independent arbitration would, undoubtedly, remove the present grievances of the removed officers, as the Royal Commission did in 1871. And it seems to be a pity that so reasonable a suggestion is not adopted, for the purpose of finally setting at rest the Purchase question.

SINCE the month of July, 1877, Sir William Jervois has been administering the affairs of South Australia; and so ably has he presided over that important colony, that he has been offered by the Colonial Office the government of New Zealand, in succession to Sir Arthur Gordon. The selection was, doubtless, made in recognition of services rendered under novel circumstances. The Australians, however, entertain as profound a sense of the administrative capacity of Sir William as the Cabinet of Mr. Gladstone. The good people of Victoria are, therefore, desirous of securing Sir William for their future Governor, in the room of the Marquis of Normanby, who, according to the formulary of the Colonial Office, "is to go elsewhere." The *Argus*, the leading paper of Melbourne, contends that Victoria is the proper field for continuing the work begun by Sir William, and points to the "inadvisability of Australasia losing at the present moment the services of the authority upon whose recommendations all the Colonies are reorganising their defences." No doubt, General Jervois's presence in Victoria will at once put a stop to any attempt to trifle, for political or other purposes, with the system of protection of which he may be regarded as the parent. Some little while ago, when he went to Melbourne, his competency to deal with the matter was accepted without hesitation, and those who had the opportunity of discussing with him the means necessary for adoption, soon found that he was a military administrator of a high order. "Keeping pace with the times," observes the *Argus*, "Sir William Jervois has already revised his scheme in part. For instance, the improvement in the penetrative power of the guns of the day has enabled him to substitute a shore battery at one point for a channel fort, and the south channel fort has been cut down, with a view of spending the money thus saved upon the aggressive torpedo. Improvements should not stay here, and by having Sir William Jervois on the spot to consider the plans in which he necessarily takes a professional pride, we obtain a guarantee that those will be made. We are establishing a new system with the Forces also, and it would be a great thing were the new Imperial officers able to consult with an authority whose word is respected by all." These words, moderately put, deserve the temperate deference of the Home Government, for they have been uttered by men who understand what they are talking about. Years must slip away before all the recommendations of Sir William Jervois can be carried out; but that he should be the constant supervisor on the spot is absolutely necessary. There is no colony in which Sir William Jervois would serve the State more effectively than in Victoria, if needs be that he must leave South Australia, for there is no dependency of the Crown where the presence is more urgently required of a Governor who would be, at the same time, a civil and military adviser.

The Queen has been pleased, on the recommendation of the Lords Commissioners of the Admiralty, to allow Lieutenants John Casement, Herbert Swire, George E. B. Bairnsfather, and Surgeon John Price, who were permitted to accept employment in the steamship *Hope*, under the command of Sir Allen Young, to search in the Arctic Regions for the missing yacht *Eira*, belonging to Mr. Leigh Smith, to count the time thus served as full sea service, in consideration of the work done being to some extent national, and so recognised by a grant of public money in aid of the enterprise.

Why should an opinion prevail that H.R.H. the Duke of Edinburgh could not be appointed Colonel-in-Chief of the Marines without also being gazetted a General officer? Is it forgotten that some years ago Colonels-Commandant of the Corps were Captains in the Navy?

An Order in Council, bearing date November 30, deals with the pay and position of Royal Naval Engineers. The Engineers' List is to be reduced to 650. Chief Engine-room Artificers to be increased in number until, with Engineers, a total of 800 has been reached. Chief Inspectors of Machinery Afloat to be limited to five in number, Inspectors to seven, and Chief Engineers to 220. The new rates of pay and half-pay do not affect Chief Engineers, and take effect from April 1, 1882. The full pay for Chief Inspectors of Machinery is now to be £1 15s. a day, an increase of 3s.; Inspectors, £1 10s., an increase of 2s.; and Engineers of nine years' seniority, 12s., an increase of 1s. per day. The Order also gives an extra allowance of 4s. a day to the Chief Engineer in charge of the machinery of such an exceptional ship as the *Hecla* or the *Polyphemus*, though under 3,000 indicated horse-power. Another alteration abolishes the allowance which has been paid to Engineer officers required to mess in the ward-room, with the exception of those who may be considered to belong to the gun-room. The change is doubtless due to the abolition of the independent mess of the Engineers.

A general gunnery course for officers on half-pay’ Commanders and upwards, will be commenced on board the *Excellent*, whenever five officers are ready to join. Officers desirous of joining this course should apply to the Secretary of the Admiralty, stating at the same time whether they desire accommodation at the College.

Captain George H. Parkin has been retired, under the Age Clause of the Regulations, on January 3; while, by a curious stroke of good-luck, Captain Theodore M. Jones has been advanced to flag-rank, to make up the complement of Rear-Admirals to the establishment of thirty-five. The good-service pension vacant by the retirement of Captain Parkin has been awarded to Captain Samuel P. Townsend.

Next year a Bulgarian cadet will be attached to each Russian man-of-war sent abroad, to promote the formation of a body of ocean-trained naval officers for Bulgaria. Bulgaria has no ocean-going war vessels as yet, and only a small flotilla of gunboats and tugboats, which Russia presented her with when she withdrew the Russian naval brigade from the Danube, at the close of the Turkish war. Russia, however, is anxious that Bulgaria should possess a small Navy in the Black Sea, where it would serve as an auxiliary to her own; and as soon as a body of Bulgarian officers has been trained in the Russian Fleet, this project will doubtless be realised.

The Russian Minister of Marine has issued an order that for the future no Admiral or Commodore is to hold a command afloat more than two years running, except under special circumstances. This will put an end to the system by which Admirals were allowed sometimes to hold appointments afloat for 15 or 20 years in succession, to the impediment of promotion and injury of other officers, who were disabled thereby from acquiring a training in high commands. The command of the Mediterranean squadron, for instance, was held for 13 years running by Admiral Butadoff; while Admiral Cremer recently resigned the command of the Baltic Fleet, after seven successive years' service afloat.

A new type of gunboat is being introduced into the German Navy. The original "Flotten-Gründungs-Plan" provided for 13 armour-clad gunboats of the *Wespe* class, having a displacement of 1,100 tons, 700 indicated horse-power, one 12-in. breech-loading Krupp, in barbette tower, protected by 8 in. of armour; and a speed, of 9 to 10 knots. Eleven of these vessels have been launched in the last five years. Two more have to be constructed. But the success obtained by Messrs. Mitchell and Co. with their light cruisers has induced the German Admiralty to alter the designs of these two boats. The 8-in. armour will be discarded and 2½-in. compound deck-plates. The displacement has been reduced to 870 tons, and the engine-power increased to 1,500 horses, which, it is expected, will procure a speed of between 15 and 16 knots. Both gunboats will be built to ram, and will be fitted to launch torpedoes.

The Russian Government are about to construct a powerful armour-clad at the Government Dockyard at St. Petersburg. This ship is to be named the *Moskwa*. The plans of the hull and engines have been completed, but it has been decided to leave the question of what ordnance she shall carry open as long as possible, so that the latest improvement may be introduced. It is, however, probable that the guns will be mounted *en barbette* in a central tower, protected from vertical fire by an armoured bridge.

We are in a position to contradict the reports which have been circulated of late to the effect that the German Government had adopted a certain form of magazine or repeating rifle for its Naval and Military forces. This is not the case. Trials with such arms have certainly been made in Prussia, as has been the case in France, Spain, and Russia; but the only system with which experiments have been made on a large scale is the Loewe, which has the advantage of being readily adjustable to the Mauser rifle, the arm at present in use in the German services. It was never intended to replace the Mauser rifle by a repeater; but it was thought that in certain cases, where, for instance, schnellfeuer was necessary, a magazine containing eight or ten cartridges, which could be quickly adjusted to the stock of the Mauser, would be very serviceable. The Loewe system fulfils these conditions, to a certain extent. It is very compact, easily filled, takes up little space, and could be quickly adjusted to the rifle before the trigger-guard. A company of a Guard regiment has been supplied with this magazine, and with careful management it was found to answer very well; but the Mauser does not eject the expended cartridges (which is done by slapping the left side of the breech, the rifle being held side-ways), and therefore the cartridges were continually getting foul. A clause in the official report says:—"The gradual emptying of the magazine greatly interferes with a correct aim." The manner in which the Loewe magazine is fitted to the Mauser is very simple. A slot is cut in the slide of the breech-block, through which the cartridge enters when the bolt is withdrawn. When the bolt is pushed forward to close the breech, the cartridge is pushed into the chamber.

The changes in the Navy during the present year should be numerous. The foreign service of twenty-one vessels expires during the next twelve months, and there are yet ten vessels, whose term of foreign service expired last year, to be relieved. How will the Admiralty manage to perform the task? They have neither the ships nor the men; hence, they must perforce break faith with the ships' companies now serving abroad. But does such conduct render the Navy popular among seamen? These say, "My Lords have us fast in their clutches just now, and know we dare not even murmur while under the pendant; hence, they do what they please with us. It is our own fault; we have given them the chance. Blest if we will again, though! Wait until we are once clear of the service!" There are few Naval officers who have not heard such remarks made by the men of late. Indeed, we receive letters every day, from all parts of the world, begging of us to remind the Admiralty that "our time is up, and it is a shame to keep us out longer." We do not publish these letters, because we have no space for them, and prefer acting upon the suggestions they contain in another manner. It really appears as if the Admiralty were wilfully endeavouring to destroy the popularity gained by the service from 1874 to 1880. We now append a gentle reminder for their Lordships, in the form of the following list of ships on foreign stations which will have completed their three years' commission in 1883:—The Fantôme, West Indies, and Eclipse, East Indies, in January; the Antelope, Mediterranean, in February; Woodlark, East Indies, in March; Flying Fish, China, and Iris, Mediterranean, in April; Foam, West Indies, in June; Miranda, Australia, in July; Condor, Mediterranean, Cleopatra, China, Kingfisher, Pacific, in August; Carysfort, Mediterranean, Rambler, Brazil, Tourmaline, East Indies, in September; Superb, Mediterranean, Zephyr, China, in October; Flamingo, West Indies, in November; and Champion, China, in December. The Alexandra (Mediterranean), Curaçoa (China), Albatross (China), and Pegasus (China), whose three years' commission expires also in 1883 (Pegasus in 1882), will be recommissioned on their respective stations in March. The men-of-war whose three years' commission on foreign stations expired in 1882, and whose reliefs have not been despatched from home, are the Beacon, Pioneer, Dido, Sheldrake, Moorhen, Firefly, Cygnet, Philomel, Comus, and Dryad. The Stork and Cockchafer will relieve the Sheldrake and Moorhen in China; the Beacon, Cygnet, and perhaps Dryad, will be recommissioned at Malta. We hear the Dryad is in such a bad state, however, that it is not unlikely she will be ordered home.

Captain William Arthur, C.B., and Captain James E. Erskine, Commodore on the Australian station, have been selected to fill the posts of Naval A.D.C. to the Queen vacated by Captains Ralph Cator and Walter C. Carpenter, on their promotion to Flag rank.

The Captain's Good-service Pension vacant by the promotion to Flag rank of Captain Theodore Morton Jones on the 31st ult., has been awarded to Captain William Elrington Gordon, of the *Vernon*, torpedo school.

The advancement of the three Senior Post Captains to Flag rank has enabled the Admiralty to promote three Commanders, five Lieutenants, and nine Sub-Lieutenants, from December 31. The selection made by the Admiralty is a curious one; and calculated to revive the old saw, "Promotion cometh neither from the east nor from the west, but from My Lords of the Admiralty." Thus, Commander Boardman, of the *Salamis*, who has undoubtedly earned his promotion in Egypt, is 43rd on the List of Commanders; Commander Day, of the *Pegasus*, 48th; and Commander Hall, of the well-advertised Admiralty Secret Intelligence Department, quite recently formed, 62nd. But the vagary of the Admiralty is still more pronounced in the selections made by "My Lords" from the Lieutenants' List. The promotion of Lieutenant Robilliard, of the *Crocodile*, standing 17th on the List, is followed by that of Lieutenant Wingfield, of the *Wasp*, who is 46th from the top. The Admiralty then steeplechase over twenty-two officers, to select Lieutenant Sisson, of the *Firebrand*, the 68th on the List. Another leap is then made over a "baker's dozen" of men, and Lieutenant Burt, of the *Northumberland*, 82nd on the list, is the recipient of the Admiralty New Year's gift. But what a gulf separates this officer from the next one promoted! The Admiralty pass over no less than 192 officers to promote Lieutenant Maconochie, of the *Cambridge*, who stands 193rd on the list of Lieutenants of the Royal Navy. The selection of Sub-Lieutenants has not been so erratic. But we would ask, why is Mr. Moggridge promoted, and Mr. Bird passed over? Both did so well in Egypt that they were specially complimented by Captain Fitzroy, in October last, when that officer inspected the *Coquette*. The claims of the Senior Lieutenants of the Mediterranean Squadron who were passed over on November 18 have also been ignored. No wonder that it is openly asserted in the Navy that greater vagary, in this matter of promotion, never existed at the Admiralty. And the Navy is right; for why were the two senior lieutenants of the Mediterranean Fleet, who have done good service in Egypt, again passed over, to promote their juniors, who have no war claims upon the Admiralty?

We understand that the Admiralty have it in contemplation to make further promotions, especially from the Sub-Lieutenants' List, early next month, when it is to be hoped that seniority, and not selection, will obtain. But what has become of the "Egyptian Gazette"?

The following is a list of the names and displacement of the French ironclads on the stocks at the close of 1882:—Admiral Baudin, 11,380 tons; Formidable, 11,440; Hoche, 9,856; Marceau, 9,856; Magenta II., 10,350; Neptune, 10,350; Charles Martel, 10,350; Brennus, about 10,500 tons; Bayard, 5,880; Duguesclin, 5,870; Indomptable, 7,180; Requin, 7,180; Caiman, 7,240; Furieux, 5,700. The following ironclad gunboats have also been laid down:—1st class: Acheron, 2,000 tons; Cocyte, 2,000; Phlégethon, 2,000; Styx, 2,000. 2nd class: Flamme, 1,045 tons; Fusée, 1,045; Grénade, 1,045; X, 1,045. Total number of French ironclads on the stocks, 22; total displacement, 135,306 tons.

British ironclads on the stocks at the close of 1882:—Benbow, 10,160 tons; Camperdown, 10,160; Howe, 9,300; Rodney, 9,300; Impériéuse, 7,400; Warspite, 7,400. Total number of British ironclads on the stocks, 6; total displacement, 53,720 tons.

During the past year, two French and three British ironclads were launched, viz.:—French: Foudroyant, 9,639 tons; Vauban, 5,869. British: Collingwood, 9,158; Edinburgh, 9,150; Colossus, 9,150.

The Russian Government are said to have ordered 500 bronze "fish" torpedoes of Messrs. Schwarzkopf, Berlin.

Several torpedo-boats built for the Chinese Government by the "Vulcan" Company, Stettin, were lately taken out into the Haff to undergo speed trials. The speeds obtained averaged about 14·5 knots per hour, which was considered satisfactory; but the boats were found to be unseaworthy in a high degree, as several of them were in danger of being swamped, though the Haff is only an inland lake.

In view of the great additions made to the Italian Navy within the last few years, the Austrian Government have decided to build a very powerful ironclad which is to be more than a match for any one of the largest Italian ironclads. The new vessel is to be laid down at Pola early this year, and the dockyard officials hope that Parliament will vote a sufficient sum to enable them to complete her within three years.

Commander Kingscote, of the *Sultan*, has been forced to resign his appointment, owing to the death of his father entailing upon him the necessity of at once returning home to prove the will, of which he is executor, and administer his father's estate. There is, therefore, a vacancy at the disposal of the Admiralty, which could not be better filled than by the senior Lieutenant of the ship. We hope the Admiralty will not forget the claims of Lieutenant Lionel de Sausmarez. This officer was the first to receive the decoration of the "Albert Medal" from the Queen, for gallantry in saving life at sea. He has served a commission in the *London* as senior Lieutenant, when for three years he was actively engaged in the suppression of the slave-trade. He was for three years senior Lieutenant of the *Malabar*, and was then appointed to the *Sultan*. He was the second senior Lieutenant of the Fleet at the bombardment of Alexandria, was landed two days afterwards, and was placed in charge of the main gate leading to the Palace and the Ras-el-Tin battery, where he remained until reinforcements were landed. The Commander of the *Sultan* was promoted, as well as several Lieutenants in other ships junior to Lieutenant de Sausmarez, and we really think the time has come for the Admiralty to remember his many claims to advancement.

The Russian mercantile marine in the Caspian is developing so rapidly, that the Admiralty has cancelled an order it recently sanctioned for the construction of two powerful transports for that sea. The expansion of the Marine is due to the opening-up of the Baku petroleum region, thanks to which 20 large steamers and 100 schooners have been placed on the Caspian within the last few years. One firm alone has expended £324,000 on the purchase of steamers in Sweden, nine of which are already in use on the Caspian, and the remaining three are being completed at Stockholm, for service at Baku next year. The 12 steamers are all of the same design, steel built, 250 feet long, 28 feet broad, and 11 feet deep, and steam at 9 or 10 knots an hour. Their cost apiece is £27,000. As each vessel could carry about 1,000 men at a trip, the entire fleet could convey 12,000 troops across the Caspian at a time. Considering that the run from Baku to Krasnovodsk occupies only 24 hours, this fleet alone should be able to ferry the largest army and its supplies from the Caucasus to Central Asia. But in excess of this fleet there are a number of other steamers, belonging to other firms, which would render the enterprise still more feasible. This development of the Caspian marine is a circumstance that ought to be carefully studied by our authorities, for now the railway from Poti to Baku is finished, Russia is able to send troops from Odessa to Kizil Arvat—or from Russia proper to the Perso-Turcoman frontier—in four days. The Caspian marine is significant from this point of view, as establishing extensive and rapid means of transport between the Transcaucasian and Transcaspian railways.

General Sir F. W. Hamilton has written a voluminous history of the Grenadier Guards, a work involving much patient research and a vast expenditure of time. Is there no officer serving in the Life Guards, or who has retired from one of the regiments, with sufficient zeal and ability to follow the example of Sir F. Hamilton and others, even at a distance? Cannon's "Historical Record of the Life Guards" is a very meagre and inaccurate narrative, containing little more than the mention of endless reviews and inspections; and something better is much needed.

In an article lately contributed, and apparently "communicated," to the *Bombay Gazette*, this journal has been attacked on account of some remarks which we felt it our duty to make regarding the Administration of Aden. In not very polite terms, the statement made by us that the temperature at Aden does not often rise above 90° was flatly contradicted. The object of our remarks was to show up the faulty administration of the settlement, not to give thermometrical statistics. If, as our Indian critic asserts, the heat at Aden is greater than that stated by us, there is all the stronger reason for carrying out the necessary improvements which we indicated, and all the greater blame is due to the Bombay Government for having hitherto failed to do so. But our facts were correct. Turning to p. 5 of Captain Hunter's "Statistical Account of Aden"—the authority which the *Bombay Gazette* commends to our notice—we find that in 1875 the thermometer only rose above 90° during three months in the year, May, June, and September, and then only occasionally. The maximum reading for the year was 93°, which was registered in June and September, when the *mean* temperature for those months was 89·5 and 89 respectively. The highest recorded *mean* temperature for any month during the three years 1873, 1874, 1875 (for which Captain Hunter gives statistics), was 89·5. The maximum temperature registered during the same period never exceeded 95 deg., which figure appears to have been reached once only, viz., in June, 1874. These facts bear out our previous statement that the thermometer at Aden seldom rises above 90 deg., even during the hot months, and we now ask the *Bombay Gazette* upon what authority it contradicts us, and upon what authority it states that "the actual maximum shade temperature is always over 100 degs." We did not before and we do not now deny, that in the "Crater," where the bulk of the troops are foolishly and culpably stationed, when a single company of infantry and half a battery of artillery would suffice as a garrison, the heat is much greater. Our article was written to emphasise the fact, not to conceal it. Our further remarks, made chiefly in the interest of the European troops, appear to have given offence in high quarters. We admit that our language, founded on representations made to us, was outspoken. The occasion seemed to warrant it. Whatever the Government of Bombay may think, it is our opinion that the long-suffering inhabitants of Aden, and the half-stifled troops, will hardly deem our strictures too severe. Moreover, the Government of Bombay does not seem, as a rule, to mind hard words. It must be accustomed to them by this time. Almost simultaneously with the publication of our article there appeared in the newspapers a despatch from Lord Ripon, censuring the Government of Bombay for obstructing his educational policy, in terms which convey about as severe and well-deserved a rebuke as has probably ever been addressed by a Governor-General of India to a provincial administration. Our remarks were directed against the Bombay Government, which is chiefly responsible for the present state of Aden, and not against the local authorities, who, we are glad to hear, have plenty of "energy and enterprise." At the same time, English officers charged with the government of a British possession cannot entirely escape blame by shifting responsibility from themselves to their superiors. Where there is a will, there is a way. If the local authorities at Aden really possess the energy and enterprise which are claimed for them, they need not wait to act till they are driven to defend themselves by criticism in the Press. We are told that money is wanted, but the Government of India is not yet bankrupt. If improvements are really necessary, and this is generally admitted to be the case, even the apathy and indifference of the Bombay Government can be surmounted by representations and suggestions, and, above all, by prompt action locally initiated. The new Governor is said to be a man of great capacity and energy. It is to be hoped that he may shortly provide a field for his "enterprising" subordinates. Until this is done, although we are quite ready to give the Aden officials credit for good intentions, we cannot withdraw or modify our former strictures in any particular, and we can only repeat and emphasise, what we said before, that the present condition of Aden is a discredit to British rule.

The officers of the Pay Department were conspicuous by their absence from last Friday week's *Gazette*, which announced promotions to various regimental officers and to one of the Ordnance Store Department, for services in connection with the recent campaign in Egypt. Since commenting upon the treatment of the Department some six weeks ago, it has come to our knowledge that, in addition to the report made by the senior officer in Egypt to the General officer commanding prior to the distribution of honours and rewards, at least one other report detailing the duties and conduct of the officers of the Department during the Campaign, and naming some for their ability and zeal, has been received by the authorities at home. Therefore, no excuse can be made that the War Office are unacquainted with the names of those deserving of honours. Though late in the day, we trust the new Secretary of State for War will inaugurate his reign by according justice to a Department the members of which naturally feel most keenly the omission of all but their Chief in Egypt from the "Honours" *Gazette*, of November 17, 1882.

It is well known that nothing "succeeds like success." A certain branch in Pall Mall, notwithstanding the well-known tact, ability, and watchfulness of the Ordnance Officers at Head-quarters, have succeeded in reducing the servants' allowance of the officers of the Royal Engineers, which they have enjoyed from 1819, by sixpence a day, to the extreme annoyance and disgust of that corps, generally increased by the fact that the Deputy-Adjutant-General, Sir John Stokes, R.E., has strongly protested against this extraordinary raid. The victory, however, may possibly be counterbalanced by some decrease of zeal on the part of its victims; but it has no doubt acted as a spur to some of the enormously-paid permanent fixtures in Pall Mall, to try their hands in the levelling-down system upon the British officer.

We believe we are correct in stating that a Captain of the 31st Regiment—now called the Surrey Regiment, because it never had any historical connection with Surrey—has been completely broken down, his health seriously injured, and his career possibly destroyed, by the new examination for the rank of Major, and the consequent strain on the brain for several months in trying to work up subjects for the pass examinations. When an officer of forty years of ago, who was for some years adjutant of his regiment and an excellent soldier in all respects, is so seriously injured by the new fad of measuring a soldier by book-knowledge, it is high time that the new Secretary of State for War should look into the case himself, and introduce fresh rules to prevent officers over thirty years of age being treated like schoolboys. The Commander-in-Chief might, perhaps, make some useful recommendations on this subject, and restrain the reforming ardour of kriegs-spiel and book soldiers within reasonable limits.

Consequent on the blunders of Mr. Gladstone, the trumpet of coming broil is being again pretty loudly blown in Zululand. Being granted its portion of magnanimity, the restoration of Cetewayo is, nevertheless, proving that the Zulus do not quite understand the largeheartedness of the views generously and humanely guiding the English Cabinet. Dabuka, Mnyamana, Ishingwayo, Hainbo, and even John Dunn have had to accept the humiliations of titular reduction, but they are chafing under the indignity. During the absence of Cetewayo, they were chiefs; on his restoration, they shrink into simple headmen. Noisily and vigorously they talk of war, and scornfully they characterise the tergiversation of England. The powerful chief Usibepu flatly refuses to abdicate. Sir Garnet Wolseley, he declares, made an agreement with him, in the name of the English people. He has kept his agreement, and the English people, he vows, shall keep theirs. He will build no kraal for Cetewayo. So matters stand in Zululand, while Cetewayo, escorted by British cavalry, is advancing out of the borders of Natal in regal guise. Are we to have another South-African campaign, with its effusion of gallant blood, its lavish expenditure of money, and its usual quotient of shameful disasters? Backwards and forwards, from the Gold Coast to the Cape of Good Hope, the blazing torch of battle is being perpetually tossed; and, if this sporadic fever of squabbling must be continued, the time has surely arrived when the old policy supervising our African colonies needs reconsideration.

An official account of the part played in the Egyptian Campaign by the Indian Division under Sir Herbert Macpherson is being compiled by the Indian Intelligence Department.

Lieutenant-Colonel Tulloch, C.B., 69th Regiment, does not return to his appointment as Deputy-Assistant-Adjutant and Quartermaster-General at Portsmouth, on his return home from active service in Egypt. The appointment is to be retained by Captain R. Auld, 5th Fusiliers. Some seem to imagine that Colonel Tulloch has been intentionally left in the cold. This, however, is not the case. His five years in the appointment at Portsmouth expired on September 1, and he retired in the ordinary course. He remains as a supernumerary Major in his regiment, and will be promoted a substantive Lieutenant-Colonel when Colonel Fitzgerald retires shortly from age, but his services in Egypt are so fully recognised that we may expect to see him returning to the Staff before long, as his claims are admitted.

Like most Liberals, Sir Charles Dilke has the happy knack of arrogating to himself the virtuous perspicuity of detecting a vast deal of shamefulness in the retention of flogging in the British Army. His freedom from obscurity or ambiguity in placing before his constituents at Chelsea the horrors of inflicting personal chastisment on our soldiers, savours of that spirit of self-gratulation and self-satisfaction so peculiarly captivating in the bearing of irresponsible Radical subscribers to opinionated Radical Clubs. Sir Charles Dilke is sensible enough to know that no member of the Conservative party, or, indeed, any party, in or out of Parliament, desired to keep in vogue the degrading use of the lash in the ranks of our gallant troops; and when any objection was raised against the extinction of the punishment, the whole tone of the opposing argument rested on the necessity of making good a counter-balancing remedy, before the evil, humiliating as every tongue confessed it to be, was swept away. To take a leap in the dark may suit the political purposes of a statesman of Sir Charles Dilke's subversise turn of mind; but in the government of men, it is discreet not to demolish a safeguard, though unsightly, before you are prepared with a better piece of workmanship to fill up the ugly gap.

In the very interesting autobiography of the late Sir Archibald Alison just published, one finds how, when quite a young man, the present commander of our forces in Egypt showed himself to be that careful speaker and writer which, combined with his military knowledge and abilities, causes him now to be looked upon as a thoroughly good man all round, and one of the most reliable and safest of our Generals. The "Lothian Society" gave him a dinner on his return from the Crimea, and he made, in returning thanks for his health, a speech which, though short, gave a vivid picture of the life and danger in the trenches. Sir Colin Campbell read this speech in one of the newspapers, and afterwards said that it was that speech which determined him, when the time came, to make young Alison his military secretary in India. Sir Colin in later years said that "one of the greatest misfortunes which ever happened to him in life was his military secretary's receiving the severe wound which obliged him to return home from Cawnpore." On his return, a public banquet was given to Lieutenant-Colonel Alison, at Glasgow, and the late Sir Maxwell Stirling, of Keir, whose genius and literary taste rendered his opinion of peculiar value, wrote in very high terms of Colonel Alison's speech, "as the very best, and in the best taste, of any I ever heard on such an occasion." It was impossible for any one to make a more becoming speech. Disclaiming any merit in himself, he ascribed at the outset the honour which had been conferred upon him to the wish of their kind friends to indemnify his parents for the anxiety they had suffered on his own and his brother's account, and to their desire to do honour to Sir Colin Campbell and the Army in India. Passing then to the events of the campaign, he gave a graphic narrative of them, which excited general interest, not only in the company to whom it was addressed, but in those to whom it became known through the public Press. It first opened the eyes of the public as to the great merits of Sir Colin Campbell's campaign, and the extraordinary difficulties with which he had to contend in conducting it. Shortly after this, Colonel Alison's health being impaired, he employed his enforced leisure in writing a narrative of the Indian Mutiny, published in *Blackwood* in October, 1858, which effectually quashed the clamour against Sir Colin Campbell's generalship.

The illness and death of M. Gambetta has interfered with the proceedings of the Parliamentary Committee for the reorganisation of the French Army, a committee of which the deceased politician was chairman. In the meantime, the questions under consideration are being freely discussed in print. A M. Edouard Thiers, an ex-officer of Engineers, who played a considerable part in the successful defence of Belfort during the Franco-German War, has written a volume called, "La Puissance de l'Armée par la Réduction du Service." As Germany now counts 43 million inhabitants and is prolific, and as France counts only 38 millions and remains stationary, or nearly so, as regards population, it is clearly difficult for the latter country to place as many troops in the field as the former. M. Thiers recommends extending the compulsory system, and making a number of persons at present exempted, such as theological students, the eldest sons of orphans, the sons of widows, liable to service. This might be termed the diluting system, for the larger the annual contingent becomes, the more must you reduce the term of service. M. Thiers meets this objection by proposing that military service should really commence at school, so that a lad of twenty on joining a regiment would require very little instruction to make him a soldier, and even a non-commissioned officer. He argues that two years in the ranks would be quite sufficient, under his system.

A Soldiers' Club has been established in Cairo, in a large building next to and south of Shepheard's Hotel. The object of this club is to afford soldiers comfortable rooms where they may read papers, play games, smoke, and procure coffee and refreshments. In order to induce men who would otherwise frequent some of the numerous grog-shops in the city to use in preference the Soldiers' Club, the sale of beer and spirits (in separate rooms) will not be prohibited, as the object is to establish a house where soldiers can enjoy themselves without restrictions, and in a club managed by themselves. The club will be self-supporting, and will require no subscriptions beyond a donation to start it; if the canteen funds will admit of the expenditure, a sum not exceeding £10 from regiments. The president of the club is Major-General Hon. J. C. Dormer, Chief of Staff; secretary, Lieutenant-Colonel H. St. Leger, Cameron Highlanders. The entire management will be in the hands of the following managing committee:—Serjeant-Major Parker, R.A.; Colour-Serjeant Helkin, 1st Royal Sussex Regiment; and Serjeant-Instructor of Musketry Foster, 1st Gordon Highlanders. Serjeant Campion, 1st Royal Highlanders, will act as steward and caretaker, and will be responsible for the maintenance of discipline and order. The club was to be opened on Christmas Day.

The Indian papers received by the last mail announce that an order is about to be issued which will create some sensation, not in the Indian Army alone, but among Imperial officers also. In future, we are told, officers will be appointed to the command of native regiments "on probation." The general impression seems to be that this new rule will not be of lasting benefit.

We hear from Egypt that the telegram from the *Standard* which had been received there announcing Lord Wolseley's intention of bringing forward a supplemental list of names for honours and promotions had caused a pleasureable excitement among the neglected ones. A correspondent writes:—"There were some curious and inexplicable omissions. That is, if twenty letters of the alphabet were to be decorated and honoured, we want to know, you know, why the other six were left out? Some odd things, too, have happened,—*ex gr.*, Captain Barrington Foot, R.A., who came out with the Head-quarters Staff to Alexandria, and was busy there till the other day, was recommended for certain decorations, which he duly received from the Khedive, and then he was told that he was not to wear them! "'Tis strange, 'tis passing strange! 'Tis pitiful, 'tis wondrous pitiful!"—and yet there must be some glimmerings of sense in the Dougal creatures who manage these things."

The report by the Board of Visitors on the Royal Military College at Sandhurst for the year 1882 is an interesting and on the whole a gratifying document. One announcement is, however, the reverse of satisfactory to many young men and their parents. The competition for admission to Sandhurst is already terribly severe, but it is being made still more so by the reduction of the number of admissions, owing to the large number of supernumerary officers who have to be absorbed. It might be thought that this would be only a temporary measure, but such is not the case, for by the latest organisation the number of regimental officers has been permanently reduced. The conduct, health, and work of the cadets are stated to have given satisfaction. With regard to study, the Board call attention to the fact that in 1880 they recommended that at the periodical entrance examinations additional marks should be allotted for geometrical drawing to candidates for admission, and also that increased facilities should be afforded cadets for the study of modern languages. The Board state that no result has ensued. As far as we can judge from the study table appended, the phrase "increased facilities," as regards foreign languages, appears to be somewhat meaningless, for foreign languages are not taught at all. The new method of instruction in military topography suggested by a recent War-Office Committee, has been adopted with satisfactory results. The Board make what we cannot but think a good suggestion, viz., that at the entrance examination the obligatory subject of mathematics should include algebra as far as simple equations. As regards the manner in which the time of the cadets is occupied, we learn that the cadets are instructed in military topography, tactics, military administration, military laws, fortification, riding, gymnastics, infantry drill, gun drill, and sword exercise, and that with short intervals they are, except on Wednesday, which is a half-holiday, kept pretty well at work from 6.30 a.m., when reveillé sounds, till 7 p.m. Breakfast is at 8 a.m, luncheon at 2 p.m., dinner at 7.30 p.m., and lights out at 11 p.m. A short table gives an interesting analysis of the parentage of the 257 cadets on July 5, 1882. It is a noteworthy fact that there was not one single son of a peer or baronet, and only two sons of M.P.'s. This fact shows rather that the sons of persons bearing hereditary titles, or having seats in the House of Commons, have ceased to be as military in their tastes as were their forefathers, or else that, being indolent, they enter the Army through that comparatively easy passage, the Militia. Of the remaining 255 cadets, 124 are the sons of officers of the Army, officers of the Navy only sending 7. The Church contributes 21, the legal profession 10, the Indian Civil Service 14, the medical profession 5, and private gentlemen, merchants, and bankers 74.

THE GATLING GUN.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—Having very recently seen a photograph of the new style of feed for the Gatling guns, to the back of which is appended a short statement of the same, I venture to send you a few remarks on this latest Gatling invention. First, it is stated that "this new feed enables the Gatling gun to be fired at all degrees of elevation and depression," and "that this can be done by no other machine-gun." This is, I think, an exceedingly broad assertion, which must be taken *cum grano salis*, until practical proof has been afforded that neither the Nordenfelt nor the Gardner can effect the same. Considering how perfectly the Nordenfelt guns have been adapted for firing at 30° of elevation and depression, and with my practical knowledge of them, I venture to assert that the Nordenfelt gun will easily maintain its present superiority over the Gatling, even in any "high-angle fire" which may be considered requisite. The Gatling Gun Company, again, state that, "With this new feed there is no possible chance for the cartridges to jam." Now, I have had some considerable experience with the Gatling guns, and the principal cause of their repeated jamming has been, in my opinion, due to the fact of the cartridges in the Gatling guns falling on a rapidly-revolving surface, whereby they are exceedingly liable to be thrown out of place, and consequently nipped in the action; therefore, I fail to see how the new improvement now proposed, or any other in the Gatling feeds, will obviate the fault of the Gatling guns, that their cartridges fall through one and the same aperture into a revolving mechanism. Then, judging from the photograph, the shape of this new Gatling feed seems most inconvenient for packing in the limbers, and would not be easily carried on the gun-axles. But this new feeding arrangement, which, in the usual style of our American cousins, is modestly called "beyond all comparison the most important improvement ever made in machine-guns," only deals with one point of the many in the Gatling gun which requires to be improved; for instance, its excessive weight and great complexity still remain, as well as the fatal fault of not firing volleys, but only rapid, single shots. In conclusion, I can but trust that our new Director of Naval Ordnance will set his face against any attempt to reintroduce the Gatlings, or to prolong their existence as English naval machine-guns. Any so-called Gatling improvements are, at best, but new patches on old garments.—I am, &c.,

GUNNERY LIEUTENANT, R.N.

WHO CAPTURED THE GUNS?

TO THE EDITOR OF "THE ARMY AND NAVY GAZETTE."

Sir,—Will you allow me, as a civilian, to bring before the public a matter of an individual and general character which a service man, no matter how strong his feeling on the subject may be, would be unable to do, for reasons which will be understood by the majority of your readers? As a near relative of the late Capt. Wardell, R.M.L.I., I have watched with deep interest everything that has been published relating to the late campaign in Egypt, and am at a loss to understand how it is that no mention has been made in the public despatches of the undoubted share Capt. Wardell had in the capture of the two Krupp guns in the second action at Kassassin, and for which the Royal Marine Battalion got so much *kudos*. These guns, I see by the *Standard* of the 18th inst., have arrived in England, and her Majesty has graciously consented to accept them from the hands of the corps. That Wardell was mainly instrumental in taking of guns is well known through private correspondence, and is acknowledged by every member of the battalion with whom he served. Why this has not also been acknowledged in official quarters is not for me to say; but, as a lover of justice, it seems to me wrong that, because a man has fallen in the service of his Queen and country, his share in gallant deeds should be overlooked, while those who survive receive the praise and rewards. I append an extract from Capt. Wardell's journal, which can be vouched by many officers of distinction. One commanding officer, writing home as to the taking of these guns, says it was "through the clever management of poor Wardell." Again, while on the subject of justice, is it fair or right that Capt. Wardell's widow should only be receiving a pension of £80 per annum, when the widow of an officer of the same rank in any Line regiment, who may have fallen by his side, receives £100? Nor does the inequality of reward end here, for, as I am informed, the allowance per annum for the children of him through whose gallantry the above-mentioned guns fell into our hands (the youngest of which children was born the same day his father died at the head of his men before the trenches of Tel-el-Kebir), is £2 per head less than in the case of the children of a Linesman. Is this the way in which the gallant corps, of which the country has lately heard so much, is rewarded for the unfailing good qualities which have brought it into such prominence?—I am, &c.,

DILLON R. L. LOWE.

[Extract from Capt. Wardell's Journal.]

"Saturday, Sept. 9. . . . . . Lying down some time. Artillery duel going on over our heads. Advanced, and at last got within range of infantry and guns, and opened fire. Frampton then called to me, and pointed out that just over hill in front guns were blazing at us; so I got my nearest half-company and dashed for hill. Halted at foot, and crept up and found ourselves in beautiful distance of two guns blazing away. I opened fire at once as hot as I could, and a section of the next company coming up under a lieutenant, I ordered him to wheel to right and open fire on infantry who might try to enfilade us. Our fire was so hot that in a short time right-about went the Egyptians, leaving their two guns behind. Frampton jumped on his pony, and dashed to the front to claim the guns for us. I advanced with my half-company, but finding Coffin (captain of company in rear) had come up, and was making for guns too, I wheeled my company to left, and advanced against two guns blazing at our field battery behind us. I put a few shots at 900 to 1,000 yards, and the two guns limbered up and retired. . . . . Col. Jones told me I had done well with my company. Major Scott said I was to be mentioned. . . . . . [Then follows an account of the guns being claimed by others, rage of brother-officers, explanation by same to major, and matter referred to colonel.] Don't know what upshot of it will be."

INVESTITURE BY THE KHEDIVE.

H.H. the Khedive held a levée at the Abdeen Palace, Cairo, on the 18th ult., when he decorated the officers now in Egypt, who distinguished themselves during the recent campaign, and who had been recommended to the attention of his Highness. The ceremony was quite private. Major Hutton introduced the superior officers to his Highness, fifteen in number, with whom his Highness shook hands and took coffee and cigarettes, and to whom he presented the decorations and diplomas of the Order which had been awarded to them. The other recipients of the honour were afterwards introduced. The following is a complete list of the officers who were decorated, all of whom, with the exception of two, who were unavoidably prevented from being present, received the decora- from H.H. the Khedive's own hands:—

Royal Horse Artillery.—Lieut. C. S. Parsons, 5th class Medjidieh.

7th Dragoon Guards.—Lieut.-Col. C. Campbell, 3rd class Medjidieh; Capt. J. H. Banks, 4th class Medjidieh.

19th Hussars.—Lieut.-Col. K. Coghill, 3rd class Medjidieh; Major J. C. Hanford Flood, 4th class Medjidieh.

Royal Artillery.—Lieut.-Col. U. Ward, 3rd class Medjidieh; Major Macdonnel, 3rd class Medjidieh; Capts. R. Allsop and H. Knight, 4th class Medjidieh; Lieut. H. Murray Dunlop, 5th class Medjidieh.

Royal Engineers.—Lieut.-Col. B. Blood, 4th class Osmanieh; Major E. Wood, 4th class Medjidieh.

2nd Battalion, 18th Royal Irish.—Major G. W. N. Rogers, 4th class Osmanieh; Capt. H. J. Daubeny, 4th class Medjidieh.

38th South Staffordshire.—Lieut.-Col. P. H. Eyre and Major J. Alexander, 4th class Osmanieh; Lieut. and Adjt. A. G. Chesney, 5th class Medjidieh.

42nd Royal Highlanders.—Lieut.-Col. W. Green, Major R. K. Bayley, and Major A. F. Kidston, 4th class Osmanieh.

46th Duke of Cornwall's Light Infantry.—Lieut.-Col. John, 4th class Osmanieh; Lieut. G. H. Ashby, 5th class Medjidieh.

50th West Kent Regiment.—Capt. E. H. Carr, 4th class Medjidieh; Lieut. G. W. Maunsell, 5th class Medjidieh.

3rd Battalion, 60th King's Royal Rifles.—Col. C. Ashburnham, C.B., 3rd class Medjidieh; Lieut.-Col. W. L. K. Ogilvy, Lieut.-Col. C. P. Cramer, and Major E. L. Fraser, 4th class Osmanieh.

74th Highland Light Infantry.—Lieut.-Col. A. Strachan, 3rd class Medjidieh; Lieut.-Col. R. Leigh and Major C. T. Wallace, 4th class Osmanieh; Capt. C. W. Carey, 4th class Medjidieh.

75th Gordon Highlanders.—Lieut.-Col. D. Hammill, 3rd class Medjidieh; Major J. E. Boyes, 4th class Osmanieh; Lieuts. Burney and A. G. Pirie, 5th class Medjidieh.

79th Cameron Highlanders.—Lieut.-Col. J. M. Leith, 3rd class Medjidieh; Lieut.-Col. W. H. McCausland, 4th class Osmanieh; Major J. M. Hunt, 4th class Medjidieh; Lieut. A. G. Blackburn, 5th class Medjidieh.

Commissariat and Transport Staff.—Assist.-Comies.-Gen. E. C. Saunder, H. S. E. Reeves, and N. R. Taylor, 3rd class Medjidieh; Deputy-Assist.-Comies.-Gen. R. A. Nugent, G. V. Hamilton, and S. J. Lea, 4th class Medjidieh.

Army Medical Department.—Deputy-Surg.-Gen. Manley, 3rd class Osmanieh; Brigdr.-Surgs. O. Barnett and E. G. McDowell, 3rd class Medjidieh.

Ordnance Staff Corps.—Deputy-Assist.-Comies.-Gen. of Ordnance J. Stevens and E. G. Skinner, 4th class Medjidieh.

NOTES FROM ALDERSHOT.

(FROM AN OCCASIONAL CORRESPONDENT.)

That the reaction had set in pretty severely at the Camp very soon after Christmas Day was plainly observable last week. Decorations upon which many hours of labour had been spent were taken down in as many minutes, and with holly and mistletoe, for which there had been such demand but a short time before, consigned to the common dust-heap. Empty casks and bottles not a few, and all signs of the late "festivities," were speedily put out of sight, and most of the huts and barrack-rooms had resumed their every-day appearance by Saturday. The 103rd Royal Dublin Fusiliers will leave the Camp for Portsmouth on Tuesday next, and embark in H.M.S. Tamar, for conveyance to Gibraltar. The Principal Medical Officer medically inspected the regiment on Wednesday last. It was notified officially here on Monday that H.R.H. the Field-Marshal Commanding-in-Chief had approved of Colonel C. M. Clarke, C.B., Assistant-Adjutant and Quartermaster-General, being transferred from Portsmouth to Aldershot, and that he had taken up his duties from that date. Colonel the Hon. E. Curzon is struck off the strength of the Division from the same date. The next Veterinary Class for Officers will assemble at the Veterinary School on the 15th inst. Officers wishing to join should send their names to the Assistant-Adjutant-General at once. Captain A. H. Des Barres, R.M.L.I., has joined here, to undergo a course of instruction in gymnastics, for the purpose of qualifying as a Superintendent of Gymnasia. I visited the North Camp on Monday last, to see what progress had really been made in rebuilding, and found that most of the old wooden huts on the west side of A and B Lines have been removed, and nine buildings, each of one story, capable of accommodating in all about 500 men, erected; also two additional small buildings, and what appears to be a serjeants' mess, in course of erection. This is all that has been done towards the reconstruction of the Camp during the past year. The buildings are mainly of red brick, and have sufficient accommodation each for at least 50 men, containing a barrack-room at each end, with offices between. Each building costs about £800, and it is the intention, I believe, to make provision in the Estimates annually for a slow progression in this matter. Were it not for the "alarms and excursions" of past years, upon which such enormous sums have been spent, Aldershot might have been completely rebuilt by this time. There certainly would have been something to look at for the money. Of the £6,000,000 voted in 1878 to assist in carrying out our little game of brag with Russia, Aldershot has something to show, in the shape of stable accommodation near the lines of each infantry regiment for regimental transport. These stables were run up in no time, workmen having been employed night and day on them. It is only a question of money. Could those who rule the destinies of the nation be but satisfied for a little while with the glory and glamour of the past year, and really interest themselves in Aldershot reconstruction, there would be rejoicing in all the borders of the Camp, and by the time the Army of Occupation returned from the banks of the Nile to those of the Basingstoke Canal, they would find Aldershot so agreeably metamorphosed as almost to reconcile them to the loss of their luxurious quarters in the gorgeous palaces of the Khedive. Fresh instructions have recently been issued concerning the playing of war games, which will be carried on during the remainder of the winter on the Model in the Garrison Instructors' Hut, South Camp. The games will be played on Wednesday and Thursday of each week, commencing at 10 a.m. The details for the games will be published every Saturday in the Divisional Orders, a regiment being named to furnish the majority of the players, officers of other arms being also detailed to join in the game. The corps named will furnish two field officers as commanders, two officers as umpires, and four as players. The senior officer present to act as chief umpire. Undress uniform, without swords, will be worn. The scheme to be played will be forwarded direct by the garrison instructor to the officers detailed as commanders two days beforehand. Officers of the division are invited to attend as spectators, and commanding officers are requested to encourage such attendance as much as possible. A report of each game played to be forwarded to the Assistant-Adjutant-General of the Division by the Garrison Instructor. Two games were played during the week. On Wednesday, Royal Artillery, eight officers; Cavalry and 1st Brigade, two each. On Thursday, 3rd Hussars, eight officers; Artillery and 2nd Brigade, two each. Major-General Sir F. Fitz-Wygram, Bart., was present at the game on Wednesday. Lieutenant-Colonel Prior, 1st Royal Scots, Garrison Instructor, South Camp, vacates that appointment on Monday next, and is succeeded by Major E. Gunter, 59th Regiment. A Board of Examination, consisting of three field officers and a Garrison Instructor, assembled in the South Camp on Tuesday last, to examine the following officers as to their fitness for promotion, in accordance with Queen's Regulations, Sec. IV., Para. 28, subject, (*c*) to (*e*):—Major Hemming, 5th Dragoon Guards; Major Egerton, 39th Regiment; Captains Locke, 1-15th Regiment; Prior, 100th Regiment; Cooper, 103rd Regiment; Coghlan, 28th Regiment; Brown, H Battery, Royal Horse Artillery; Lieutenants Hanham, Montgomery, and Fanshawe, Royal Artillery; and Proby, 103rd Regiment. The Garrison Instruction Class, which first assembled in September last, having now been broken up, a new class will shortly be formed. Returns of all officers who have passed in subjects (*a*) and (*b*), Q.R., and who are desirous of attending the next Garrison Class, have been called for by the A.A.G., to be rendered by the 15th inst. Deputy-Surgeon-General J. Ekin, M.B., C.B., Surgeon-Major Ferguson, and Surgeon Bourke have been ordered to Aldershot for duty. Lieutenant H. A. D. Curtis, R.A., has been ordered to Aldershot. Lieutenant H. J. Foster, R.E., will embark for Gibraltar next week. Captain J. C. Dalton, R.A., has been ordered to Aldershot, to be attached to the Cavalry Brigade for a short period, under Staff College Regulations.

The *Times of India* says:—"A proposal is at present under the consideration of the Government of India, in view of a reduction in the number of colours and shades of facings-cloth of the Native Army. It has been suggested that all Royal Infantry regiments should have blue, except the 2nd Goorkhas and Guide Corps, which should have scarlet; that all Goorkhas and regiments dressed in green should retain their present facings; and that all regiments other than the above wearing red uniform should have green facings; those wearing drab being allowed to select either red or chocolate facings. By this arrangement, the number of shades of colour of facings would be reduced within the following limits, viz., blue to be worn by all Royal Infantry regiments; red by the 2nd Goorkhas, Guide Corps, Deolee Irregular Force, Erinpoora Force, and all regiments in drab uniform which may select it; black by the 3rd, 4th, and 5th Goorkhas, and 42nd, 43rd, and 44th N.I.; white by the 1st Goorkhas; green by the R.A. regiments (except Royal regiments) wearing red uniform; and chocolate by all regiments (except Royals), wearing drab uniform, which may select it. The object in view in these changes is to obviate the use of delicate and perishable colours; and it is not improbable that the above suggestions will be adopted in principle throughout the Native Armies of the three Presidencies."

The Army.

7th Dragoon Guards. The horses are improving at Helwan, but there is a good deal of jaundice among the men. A large tent, capable of holding 400 men, has been obtained for the Christmas dinner by Col. Campbell and his officers.

3rd Hussars. Lieut. Curzon is progressing favourably, the wound he received the other day whilst shooting at Watermouth Castle not being of a nature to cause alarm.

19th Hussars. Officers, men, and horses are better by last accounts from Egypt, and the regiment is in good order.

20th Hussars. Lieut.-Col. Chenevix Trench has accepted the Military Attachéship at St. Petersburg, vacant by the resignation of Col. T. Gonne, half-pay, late 17th Lancers, and will shortly take up his duty in the Russian capital. He will retire upon half-pay from command of the regiment, being succeeded by Lieut.-Col. Mangles, Major Onslow becoming second lieut.-col.

ROYAL ARTILLERY.

With the last day of the old year passed away quietly one of the oldest soldiers of the British Army, Gen. Sir George Brooke, K.C.B., Col. Comdt. (late Bengal). He was admitted to Woolwich in 1806, and obtained his commission at the close of 1807. Arrived in India in 1808, at the age of 16, he joined the regiment at Calcutta, and was sent at once up country, on outpost duty, to Korkerutty, in charge of two guns. He was present at the operations in Bundelcund during 1808-1809, and served with the force above the Ghauts. At the commencement of the Nepaul Campaign, in 1815, when he joined the force of Gen. Ochterlony, he was present at the attack and surrender of the fortress on Nallaghur heights; at the surrender of Joongoonoo and Terraghur; and at the attack on Rumgbur and the fortified position of the Malonee Range. He was then appointed to the rocket troop in the attack and surrender of Fort Hattras, in 1816. In 1825 he took an active part in the siege of Bhurtpoor, when he was blown up and wounded by a shot from the enemy which exploded all the store and killed more than 100 soldiers, he and one other alone escaping with life. In 1826 he got his troop of Horse Artillery. He was through the Sutlej Campaign, which commenced in 1845, when he was appointed Brigadier of Horse Artillery, and was present at the battles of Moodkee and Ferozeshuhur, at which he commanded the whole of the Artillery, and afterwards at Sobraon. He served in the Punjaub Campaign, 1848-1849, at the battles of Ramnuggar, Chillianwala, and Goojerat. He afterwards commanded the Brigade at Meerut, in conjunction with the command of the Artillery in chief of the Bengal Presidency. He had five medals and 13 clasps. He was made C.B. in 1846, and K.C.B. in 1867.

"A Mounted Gunner" writes from India:—"One of the many lessons of the Egyptian campaign has taught us is the value of pack artillery in the plains, as well as in the hills. The mountain battery, from its easy mobility, was, I believe, the only battery that marched intact into Cairo, and was able to enter the entrenchments of Tel-el-Kebir, without delay or danger of guns upsetting up the incline. Would it not, therefore, be as well for the Government, when they are considering what they shall do with the number of mules left on their hands at the close of the campaign, to suggest the raising of one or two mountain batteries in England for service out of India. We have mountain batteries for Indian service, but not for Continental or Colonial purposes. The present jointed gun is as powerful as the light Horse-Artillery gun, and might be made from a 400-lb. into a 4-cwt. gun, capable of throwing a 9-lb. shell, by increasing the gun weight carried by each gun made from 201 lb. to 224 lb.. Any gun made could carry this. A mountain battery is far less expensive to maintain than a field battery, and over difficult ground far easier to transport, and offers less mark to an enemy than any wheeled artillery."

The *World* pays the following tribute of respect to the memory of the late Col. Goodenough, whose untimely death we announced last week:—"He was a general favourite, and full of *bonhomie*. He was best known, of course, in connection with the Lyric Club, which he not only founded, but managed, at the comfortable club-house he arranged for its members in Belgrave Road. The Lyric Club was virtually an improved 'Bohemia,' and supplied a want much felt in London, especially on Sunday evenings, by unfortunate bachelors, and, for that matter, spinsters, without any family associations in town. Col. Goodenough not only appreciated good singing in others, but himself sang very well. He came of a Northumberland family, and on one occasion organised a first-rate concert at Alnwick, all the male singers being officers of the Royal Artillery, and he made a first-rate *impresaria*. In his day he was a most devoted admirer of Titiens, and on her death got M. Brucciani to execute a remarkably fine bust of her in marble, which statue latterly adorned the salon of the Lyric Club."

ROYAL ENGINEERS.

The Secretary of State for War has appointed Col. R. N. Dawson-Scott, half-pay R.E., as Deputy Director of Works for Barracks at the War Office, vice Col. P. Ravenhill, C.B., who has been appointed commanding Royal Engineer at Gibraltar.

Grenadier Guards. Two tablets, bearing the following inscriptions, have recently been placed in All Saints' Church, Cairo, to the memory of soldiers who died during the recent campaign. North side:—"Sacred to the memory of Serjts. J. Crow, aged 32 years, H. Saunders, 29 years, C. Trebble, 25 years; Ptes. J. Mayor, 25 years, C. Ellis, 24 years; and Pioneer-Serjt. F. Arkell, 32 years, who died during the campaign in Egypt, 1882; also, of Serjt. H. Sperring, 24 years, drowned at Ismailia, and Pte. C. Parker, 24 years, drowned at Ramleh, both during the above campaign. 'Thy will be done.'" This tablet is placed as a mark of respect to the memory of those above by the officers, non-commissioned officers, and privates of the 2nd Batn. Coldstream Guards. South side:—"Placed by their comrades, 2nd Batn., Grenadier Guards, to the glory of God, in memory of Colour-Serjt. John Holmes, killed in action at Tel-el-Kebir; Ptes. William Bruford, Thomas Taylor, William Mason, died at Ismailia, and William Bridges and Walter Prime, died at Alexandria; Lance-Corpls. John Southall and Arthur Bennett; Pte. Thomas Callaghan, died at Cairo. 1882."

Coldstream Guards. The serjeants of the 2nd Batn. celebrated the New Year by the customary dinner, which was held on Thursday evening at Chelsea Barracks. Serjt.-Major Bustard presided, and during the evening Col. Wigram and several other officers honoured the company with their presence.

Scots Guards. The annual dinner of the serjeants of the 1st Batn. was held on Wednesday evening, at Wellington Barracks, Serjt.-Major Peter Smith in the chair, the company numbering over 100. A most enjoyable evening was spent, and it was evident that the hospitality which the 2nd Batn. extended to the 1st, on its return from Egypt, had not been forgotten; nor also the memory of those who had succumbed to disease.

42nd Highlanders (Black Watch). Col. Macpherson was entertained at a farewell dinner at Rasr-el-Nil by the regiment on Dec. 13, and left Cairo on Dec. 15, on his way back to England. He deserves a Highland welcome.

ROYAL MARINES.

Should the system of promotion which now obtains in the Royal Artillery and Royal Engineers, and which the Admiralty are intending as far as possible to apply to the Royal Marines, be shortly approved for that corps—viz., "that captains with 21 years' service shall receive their brevet majorities, and majors with 28 years' service their brevet lieutenant-colonelcies"—the following officers will be the first to receive the benefit of the new regulations, viz.:—Artillery: Major Heaslop, to brevet lieut.-col., and 13 captains, down to Capt. F. Roberts, inclusive, to brevet majors. Of the Light Infantry, four majors, down to Major A. H. Pascoe, inclusive, to brevet lieut.-cols.; and on Feb. 4, Capts. Cyril Frampton and C. H. Scafe to brevet majors.

At the recent examination at Portsmouth of the officers of the Royal Marine Light Infantry who had attended the Class for Military Instruction, 10 officers passed the required test and two failed. The latter will be allowed to go through another course and chance of qualifying, failing which they will be removed from the List, in accordance with present regulations.

Lieuts. A. H. Cox, C. P. P. P. Rogers, F. W. B. Roe, H. W. L. Holman, J. M. Ransom, C. V. F. Townshend, F. A. Robertson, E. F. David, and R. M. Bryne, of the Royal Marines, have passed as Military Instructors.

75th Gordon Highlanders. The *Egyptian Gazette* says:—"H.H. the Khedive gave special instructions for the decorations which have been awarded to Lieut. A. G. Pirie, Gordon Highlanders, and Lieut. A. G. Blackburn, Cameron Highlanders, to be prepared and forwarded to the English military authorities here at once, with a particular request that these two gallant young officers, who so greatly distinguished themselves at Tel-el-Kebir, and who are now lying in the hospital at Malta suffering from the very dangerous wounds they met with on that occasion, might receive them at the earliest possible opportunity. The thoughtful consideration evinced by H.H. the Khedive in this and similar instances, has not failed to show the Army of Occupation how deeply his Highness feels the sacrifices that have been made by officers and men on his behalf."

79th Cameron Highlanders. See 75th Highlanders.

82nd South Lancashire Regiment. Lieut. Chapman has resigned the adjutancy, and is succeeded by Lieut. Hall.

84th York and Lancaster Regiment. The promotion of Capt. Peckett to a brevet majority for field-service in Egypt is a well-deserved acknowledgment of the claims of a very deserving officer. Major Peckett is about the oldest captain now upon half-pay, and has been passed over by nearly all those who have been promoted to majorities since July 1, 1881. It is difficult to understand why he should have been overlooked when the general issue of honours took place, but it is satisfactory to know that justice has at length been done.

87th Royal Irish Fusiliers. In promoting Major Cox to a brevet lieutenant-colonelcy for his services in Egypt, the military authorities have recognised the claims of a good soldier, and have at the same time given satisfaction to the regiment. A sad occurrence took place at Aldershot on Saturday. Serjt. O'Neil committed suicide, by shooting himself through the head. No reason is assigned for the act. He had had 16 years' service. His character had been exceptionally good. Lately returned from Egypt, he had since been the assistant-warder at the North Camp Prison, where he had fulfilled his duties up to the time of his death. About 7 o'clock on Saturday morning he went from his quarters to the military prison, only a short distance off. Shortly before noon he returned to his room, and sent a comrade, who happened to be in the room, on a message to the serjeants' mess. During the absence of this man, O'Neil loaded his rifle, which he placed to his mouth, and blew his brains out.

103rd Royal Dublin Fusiliers. The head-quarters and service companies will leave Aldershot on Thursday next, and proceed by rail to Portsmouth, there to embark in H.M.S. Himalaya for conveyance to Gibraltar.

The Auxiliary Forces.

MILITIA.

Royal Munster Fusiliers. The remains of Lieut. E. H. L. Helyar, 3rd Batn. (South Cork Militia), were removed from the Military Hospital at Stoke on the 29th ult., and conveyed to the London and South-Western terminus at Devonport, *en route* for Sutton Bingham. The deceased officer, who was only 20 years of age, was the youngest son of the Rev. J. E. Helyar, rector of Sutton Bingham, Dorset. He received his commission as lieut., Aug. 17, 1881, went to Raglan Barracks about a month since, and was attached to the 82nd Regiment for 28 days' instruction. The deceased was out on the previous Saturday, when he complained of a sore throat. On Sunday and Monday he grew rapidly worse, and at 6 p.m. on Tuesday expired in great agony from diphtheria. The respect in which deceased was held will be gathered from the following orders issued by Col. Walters, commanding the South Lancashire Regiment:—"It is with extreme regret that the commanding officer announces to the battalion the death of Lieut. E. Helyar, 3rd Batn. Royal Munster Fusiliers, which occurred in this barracks at 6 p.m. on Dec. 26, 1882. The commanding officer feels assured that all ranks of the battalion join with him in the warm and sincere sympathy that he feels for the bereaved family of that promising young officer, and the terrible suddenness of the blow which has fallen on them merits the most heartfelt expression of condolence. The battalion will parade for the purpose of attending the funeral at 12.30 p.m. to-morrow, the firing party to be composed of 1 serjt., 1 corpl., 1 drummer, and 40 men of F Company, under the command of Lieut. Gilpin.—Dec. 28, 1882."

"An Ex-Militiaman" writes:—"At the last examination in tactics for officers of the Auxiliary Forces, only four Militia officers presented themselves. I think this is accounted for by the fact that they seldom reside near their brigade depôts, when their regiments are not out for their annual training. An officer in my late regiment—one in the North of Scotland—residing near a large garrison town in the South of England, applied to be examined there this month, but has been told he must go to his brigade depôt, a journey of over a thousand miles, and an absence from home of some days, in the depth of winter. Can men of position and means be expected to take an interest in a service in which no consideration is shown to reasonable requests?"

VOLUNTEERS.

London Rifle Brigade. The necessary consent having been obtained, it is proposed to form a company to consist of "old boys" of the schools of the Middle-class Schools Corporation, Cowper Street, City Road. A committee, consisting of the head master, Mr. R. Wormell, D.Sc., M.A., and Messrs. E. Holbrook, W. J. Burton, V. R. Eardley, S. Walker, and Percy Varley, has been formed, by whom the names of intending members will be received.

19th Middlesex (Bloomsbury) Rifles. The new drill-hall and club-house which it is the good-fortune of this regiment now to possess in Chenies Street, Bedford Square, will be opened on Saturday evening next, by Major-Gen. Higginson, commanding the Home District, when the prizes won during the past year will be distributed.

The returns of the strength of the Volunteer Force for the year ending Oct. 31 last have now been received and made up at the War Office, and show a slight diminution from the figures of the previous twelvemonth, though larger than any other year since the commencement of the movement. The present enrolled strength of all ranks and arms is 207,346, or 962 fewer than in 1881; while the efficients are 199,523, against 200,162, and the non-efficients 7,823, against 8,146. Thus the per-centage of efficiency to enrolled Volunteers has risen from 9·608 to the highly creditable figure of 96·22. Although there is this small falling of 639 men in the efficient strength, it is satisfactory to find that the "proficients" who have secured the extra capitation grant are increased by 212, viz., 142 officers and 70 serjeants, their totals now being 5,746, officers and 11,945 serjeants, while in 1881 they were 5,604 and 11,875 respectively. In the attendance at the annual official inspections there is also an improvement, no fewer than 175,878 of all ranks, or 84·82 per cent. of the entire enrolled strength, having passed that ordeal, this being, like the per-centage of efficients, the best on record.

The following is a list of the "all-efficient" Volunteer corps for the past year, as shown by the returns:—Artillery—1st Berwickshire, 1st Cumberland, 7th Lancashire, and 1st Sussex. Engineers—1st Lancashire. Rifles—1st Bucks, 5th Devon, 2nd Essex, 1st Lancashire, 6th Lancashire, 8th Lancashire, 17th Lancashire, 17th Middlesex, 18th Middlesex, 2nd Monmouth, 1st Warwick, and 2nd Warwick. Those returning one non-efficient each are the 1st Lincoln Light Horse, 1st Lanark Artillery, and the following Rifle battalions:—1st Aberdeen, 4th Kent, 14th Lancashire, 18th Lancashire, 20th Middlesex, 24th Middlesex, 1st Notts, 3rd Stafford, 2nd Surrey, and 7th West York—29 corps, with only 12 men who have not conformed to Government requirements! In a previous impression we gave a list of the corps who had 1,000 and more efficients. We now append those which return the largest number of non-efficients. First is the 2nd Cambridge (University) Rifles, with 147; 2nd Hants Rifles, 134; 1st Surrey Artillery, 106; 1st Midlothian Rifles, 105; 5th Durham, 2nd Northumberland, and 2nd Renfrew Rifles, 94 each; 14th Middlesex Rifles (Inns of Courts), 90; 3rd Lancashire Artillery, 88; 2nd Devon Artillery and 3rd Glamorgan Rifles, 85 each; London Rifle Brigade, 82; 2nd Edinburgh Rifles, 76; 1st West York Rifles, 75; 5th Lanark Rifles, 74; 2nd East York and 2nd Midlothian Rifles, 72 each. Though the figures have not yet been finally checked, it is stated that the enrolled strength of all arms of the force for the official year ending October 31, was 207,346, or 962 less than in 1881; the efficients 199,523, or 639 less. The proficient officers and serjeants have, however, increased from 17,479 to 17,691.

The County Palatine makes a good return for the past year. It has on its rolls 5,915 Artillery, 1,169 Engineers, and 18,556 Rifles, or at total of 25,640. This is actually only an increase of 9, but the efficients go up 95,—from 24,795 to 24,890; and the proficients 53—viz., 2,014, as against 1,961.

The six corps of Artillery, two of Engineers, and 13 of Rifles—the East, North, and West Ridings—have 13,964 on the rolls, as against 14,217; efficients, 12,977, as against 13,525; and proficients, 1,181, as compared with 1,145.

It appears from the "progress return" of the London Brigade, Royal Naval Artillery Volunteers, issued on the 1st inst., that the enrolled strength is 434, including 80 for the Brighton and 77 for the Hastings batteries. Of this number, 146 are trained men and 132 efficients, leaving the non-efficiency return at the somewhat large margin of 155; 114 recruits have joined during the year. Leading Gunner J. W. Frost, of the Brighton corps, is the best shot in the brigade, and 1st-class Petty Officer Davies, No. 4 Baty., best shot in the London corps. The results of the heavy-gun practice at Plumstead show that the number of rounds fired (range, 1,500 yards, 6 feet square target) was 108, of which 12 were direct hits. Gunner Coe, having made two direct hits, is the best shot in the London corps. Sir Henry Peek's Challenge Prize for heavy gun-drill was won by No. 2 Battery.

Friday's Gazette.

ARMY.

INDIA OFFICE, January 5, 1883.

The following appointments have been made to the Personal Staff in India:—Capt. V. A. Schalch, Bengal S.C., to be Aide-de-Camp to the Lieut.-Governor of Bengal (April 24, 1882); Lieut. H. St. L. 3rd Volunteer Battalion, the Prince Albert's (Somersetshire Light Infantry)—William Edward Hillier, gent., to be Lieut. (supernumerary).

(Where not otherwise stated, the foregoing commissions and announcements bear date January 6, and the current year must be understood.)

The *Daily News* Naples correspondent writes:—"The Armstrong cannon made for the Italian man-of-war Italia cost 360,000 francs, while the corresponding gun to be made by Krupp will cost 800,000 francs. This enormous difference is partly explained by the different modes of manufacture, and partly by the fact that the steel bore of the Krupp cannon will be all in one piece, while in the Armstrong cannon it is in two pieces, a form which has been proved does not in the least weaken the gun. The Italia will be furnished with three other guns like the one just tried at Spezia, but rather more powerful, the result of recent improvements."

The Navy.

ADMIRALTY, December 30, 1882.

In accordance with the provisions of her Majesty's Order in Council of August 5, 1875, the under-mentioned promotions have been made, with seniority of December 31, 1882:—Captains Ralph Peter Cator, the Hon. Walter Cecil Carpenter, and Theodore Morton Jones to be Rear-Admirals in her Majesty's Fleet.

Consequent on the above, the following promotions have taken place on the Retired List from the same date:—Captains William Henry Fenwick, the Hon. Maurice Horatio Nelson, George John Malcolm, William Cox Chapman, and the Hon. Armar Lowry Corry to be Rear-Admirals on the Retired List.

The following promotions have also taken place on the Active List, with seniority of December 31, 1882:—

Commanders Frederick Ross Boardman, Edward FitzGerald Day, and William Henry Hall to be Captains in her Majesty's Fleet.

Lieutenants Henry John Robilliard, Edward John Wingfield, James Joseph Lawson Sisson, Edmund Wigley Burt, and Robert Blair Maconochie to be Commanders in her Majesty's Fleet.

Sub-Lieutenants Robert Grant Fraser, John Francis Shapland Sargeaunt, Arthur Lindsay Hughes-Hughes, Frederick Harston Eagles, Walter Oudney Thurburn, Benjamin Whitehouse, Arthur Yerbury Moggridge, Hugh Cotesworth, and Henry Grant Monckton to be Lieutenants in her Majesty's Fleet.

In accordance with the provisions of her Majesty's Order in Council of February 22, 1870, Lieutenant Arthur Lingham has been placed on the Retired List of his rank from the 14th instant.

ADMIRALTY, January 1, 1883.

In accordance with the provisions of her Majesty's Order in Council of February 22, 1870, Paymaster Edward Robert Chamberlain has been placed on the Retired List from this date, with permission to assume the rank and title of Paymaster-in-Chief.

ADMIRALTY, January 1, 1883.

Captains William Arthur, C.B., and James Elphinstone Erskine have been appointed Naval Aides-de-Camp to her Majesty from December 31, 1882, in the place of Captains Ralph Peter Cator and the Hon. Walter Cecil Carpenter, promoted to Flag Rank.

Royal Marine Light Infantry.—Major Thomas Palmer Norton has been placed upon the Retired List (December 31, 1882).

ADMIRALTY, January 2, 1883.

In accordance with the provisions of her Majesty's Order in Council of February 22, 1870, Paymaster Alfred Whitehouse has been placed on the Retired List from this date, with permission to assume the rank and title of Paymaster-in-Chief.

ADMIRALTY, January 4, 1883.

In accordance with the provisions of her Majesty's Order in Council of July 21, 1876, Commander Edward Hughes Brodrick Hartwell, having attained fifteen years' seniority as Commander on the 1st instant, has been authorised to assume the rank and title of Retired Captain from the same date.

In accordance with the provisions of her Majesty's Order in Council of February 22, 1870, Captain George Henry Parkin has been placed on the Retired List of his rank from the 3rd instant.

APPOINTMENTS.

Captains—John Ommanney Hopkins, late Private Secretary to the First Lord of the Admiralty, to be Captain Superintendent of Sheerness Dockyard, vice Theodore Morton Jones; William Robert Kennedy, to the Lord Warden, vice Ralph Peter Cator.

Commander—Henry B. Lang, to the Philomel, recommissioned.

Staff Commanders—John Johnson, to the Northampton, vice Pearse; Wm. H. James, to the Asia, additional, vice Johnson.

Ajax is being brought forward for immediate commission at Chatham.

Audacious, Capt. R. E. Tracey, flagship of Vice-Admiral G. O. Willes, C.B., the Commander-in-Chief in China, was at Singapore on Dec. 20. The Iron Duke was refitting, prior to departure for England; since learnt by telegraph left Singapore for home on Dec. 20. The Curaçoa was at Kobé on Nov. 19, and was to leave for Yokohama five days after that date. The Daring was at Yokohama on Nov. 19, and would leave there for Kobé on Dec. 5. The Moorhen was at Kobé on Nov. 19, and was to leave for Yokohama about Dec. 10. The Zephyr left Tientsin about Nov. 15 for Chefoo. The Cleopatra and the Sheldrake were at Shanghai on Nov. 23, and were to remain. The Swift was to leave Hankow for Shanghai on Nov. 24, then proceeding to Hong Kong, calling at the coast ports. The Albatross left Shanghai on Nov. 19 for Hong Kong, calling at the coast ports. The Kestrel was at Amoy on Nov. 23; was to leave for Foochow on Nov. 25, and would then return to Hong Kong. The Encounter and the Vigilant were at Hong Kong, refitting. The Champion was at Hong Kong, refitting, and afterwards would proceed to Singapore, to take up the duties of senior officer of the Straits Settlements. The Lily was at Hong Kong, and would remain. The Foxhound left Hong Kong on Nov. 23 for Sulu, Sandakan, and Borneo. The Fly left Singapore on Nov. 18 for Hong Kong, to refit. The Pegasus was at Singapore on Nov. 19, and would remain for service in the Straits of Malacca at present; when relieved by the Champion, would proceed to Hong Kong. The Magpie, surveying vessel, was at Nagasaki on Nov. 9, surveying near Fusan, Corea. The Flying Fish, surveying vessel, was at Nagasaki on Nov. 9, surveying approaches of Salee River, Corea.

Briton, Capt. Andrew J. Kennedy, left Bonny on Nov. 24 for Cape Coast Castle.

Carysfort, Capt. St. John Garforth, has, together with the Beacon and Condor, been ordered to Malta, to refit and make good defects.

Cockchafer, Lieut.-Com. Henry W. Hill, was commissioned on Wednesday with a complement of 60 officers and men, for the China station.

Comus, Capt. James East, left San Francisco on Jan. 4 for Payata.

Crocodile, Capt. Henry Hand, left Portsmouth on Tuesday for Bombay, *viâ* Queenstown.

Daphne is being brought forward for immediate commission at Devonport.

Dart, Lieut. and Com. W. U. Moore, arrived at Simon's Town, Cape of Good Hope, on Wednesday last, and was to sail on Jan. 8.

Dido, Capt. C. E. Domvile, left Jamaica on Jan. 4.

Euphrates, Capt. C. S. Cardale, left Suez on Monday for Bombay.

Euryalus, Capt. Hastings, C.B., flagship of Rear-Admiral Sir William Hewett, V.C., would leave Bombay for Goa, Trincomalee, and Calcutta about Dec. 23. The Tourmaline left Aden on Dec. 6, for Bombay; she would remain at Bombay till the return of the Euryalus to that port from Calcutta. Eclipse left Bombay on Dec. 14 for Trincomalee, to complete with provisions and stores; she will accompany the Euryalus to Calcutta. Dryad was at Trincomalee, to be ready for sea on Dec. 17; she will accompany the Euryalus to Calcutta. The Philomel, proceeding to the Persian Gulf, to take the place of the Arab as senior officer's ship of the division, arrived at Karachi on Dec. 11. Woodlark was at Bushire. Arab was at Karachi on Dec. 11, she would leave on Dec. 14 for Bombay, to refit and give leave. Ranger was at Rangoon and in neighbourhood; she will accompany the Euryalus to Calcutta. Harrier arrived at Zanzibar from Seychelles on Oct. 22; she left on Nov. 10 for Comoro Islands; Undine was at Mozambique, cruising for the suppression of the slave trade. Osprey remains at Aden, was senior officer of the Gulf of Aden and Red Sea division of the station; she was at Aden on Dec. 21. Dragon was at Malta, recommissioning, and preparing for service on the East Indies Station.

Fantôme, Com. W. C. Karslake, was at Antigua on Dec. 11.

Firebrand, Com. J. J. L. Sisson, was at Jamaica on Dec. 11.

Flamingo, Com. Reginald Custance, had been ordered to proceed to Bermuda on Dec. 11.

Flirt, Com. R. F. Hammick, left Fernando Po on Nov. 4, and arrived off the entrance to the Bonny River next day. The Pioneer was lying off the entrance to the river. Matters on shore were found to be so serious, that the Flirt went at once in chase of the Briton, and came up with her at Quetta, 240 miles from the Niger, to which the Briton at once returned. On the morning of the 12th, having taken on board Lieut. Pigott and a boat's crew from the Briton, the Flirt ascended the Wari (a branch), 120 miles up the Niger, and, being fired on by the natives, shelled some villages, and burnt them afterwards, having landed a party for the purpose. The natives got a fleet of canoes together during the night, and came down the river to attack the ship, but were dispersed by the Flirt's machine guns and some shells and rockets. The natives followed the banks down stream and fired on the Flirt at close range, striking her sides and ventilators with their bullets, but no casualty occurred, beyond Lieut. Pigott receiving a slight wound in his thigh; a bullet also went through his helmet, and one of the men had his forehead grazed. Lieut. Festing does not appear to have been wounded, as previously reported, unless a second attack has been made by these two ships on the natives.

Foam, Lieut. and Com. Julian A. Baker, was at Jamaica on Dec. 11.

Grappler, Lieut. and Com. H. G. Gough, left Gibraltar for Oran on Jan. 4, having on board Lord Napier of Magdala. Will proceed to Cadiz from Jan. 8 to 12.

Griffon, Com. R. W. Davies, was at Jamaica on Dec. 11, and would proceed to Bermuda to be docked.

Hecate was unable to leave Devonport for the Thames on Dec. 29, owing to rough weather.

Hecla, Capt. A. K. Wilson, left Malta on Dec. 30 for Corfu.

Hibernia, Com. Sir Francis Blackwood, Bart., flagship of Rear-Admiral William Graham, C.B., Admiral Superintendent of Malta Dockyard. The following information respecting the Mediterranean Fleet has been received at the Admiralty from the senior officer at Malta up to the 25th ult.:—The Inflexible, Iris, Cygnet, and Cruiser were with the Commander-in-Chief, in the Helicon, at Corfu; mails to Corfu. The Sultan, Temeraire, Alexandra, and Hecla were at Malta. The Bittern left Malta on Dec. 23 for Corfu, and the Hecla was to leave for the same destination on Dec. 29; mails to Corfu. The Monarch was on passage to Port Said, to relieve the Invincible, which would proceed to Malta on being relieved. The Condor was at Port Said. The Beacon was at Ismailia. The Carysfort and the Decoy were at Suez; the former ship has since been ordered to Malta. The Orion, Falcon, and Coquette were at Alexandria; the Antelope and Dragon at Malta, the Cockatrice at Constantinople, and the Grappler at Gibraltar.

Himalaya, Capt. H. St. L. B. Palliser, left Portsmouth on Dec. 29, for Queenstown, Malta, Alexandria, Hong Kong, and Singapore, with draughts of various regiments, new crews for the Albatross and Pegasus, and supernumeraries. The Himalaya will return to England with troops and the relieved crews of the ships named.

Humber, Com. Cæsar H. Hawkins, arrived at Corfu on Dec. 27.

Invincible, Capt. R. H. M. Molyneux, C.B., arrived at Malta from Port Said on Dec. 31.

Nelson, Comdre. James E. Erskine, A.D.C., has ordered the Espiègle to proceed to the Western Islands, upon a retributive mission in connection with the murder of Mr. Littleton Back. Capt. Bridge has also been instructed to inquire into certain serious charges preferred against Mr. Webb, master of the trading vessel Pride of Logan, for firing at the natives.

Northampton, Capt. N. F. Digby, flagship of Vice-Admiral Sir E. Commerel, V.C., Commander-in-Chief on the North America and West Indies Station, was at St. Lucia on Wednesday last. The Urgent will leave Bermuda shortly for Jamaica, with the Dido. The hired transport Nepaul arrived at Portsmouth on Thursday. She brings to England Vice-Admiral Sir Leopold M'Clintock, lately commanding the West India and North American station, Lady M'Clintock, and family, and the paid-off officers and crews of the Northampton and Tenedos, the former of which was commissioned at Chatham on Sept. 25, 1879, and the latter at Devonport on March 25, 1878. Thirty-nine distressed British seamen belonging to the Bolivar, transport, were also on board. The Nepaul has been rechartered by the Government, and is appointed to sail on the 20th for the Mediterranean, with a new crew for the Alexandra.

Opal, attached to the Chatham Steam Reserve, is being brought forward for immediate commission.

Ruby, recently returned from Suez and put out of commission, has been placed in the basin, and is attached to the Chatham Steam Reserve.

Starling, Lieut.-Com. A. Izat, was at Cape Coast Castle on Dec. 4, having returned from Fernando Po on Nov. 28. Was to leave there on Dec. 5 for St. Paul de Loanda.

Stork, Lieut. and Com. Arthur Blennerhasset, was commissioned at Sheerness on Wednesday, for the China station.

Sultan, Capt. Walter H. Grubbe, K.C.B., having received orders to rejoin the Channel Squadron at Gibraltar in February. Is at Malta, repairing defects.

Thalia, Capt. J. W. Brackenbury, which has been fitted for troop service, will leave next week for Hong Kong, taking out new crews for the Victor Emanuel and Curaçoa.

Tyne, Com. B. E. Cochrane, left Chatham on Dec. 31, after having undergone repairs, to resume transport and troop duties.

Wrangler, Lieut. C. Arbuthnot, was at Cape Coast Castle on Dec. 4, and was about to proceed to Accra, Pram Pram, and Jellah Coffee, returning by Dec. 9; and on the arrival of the Bullfrog in the Bights, would proceed to Sierra Leone and Gambia.

"Time Tries all Things."—Of the numerous preparations announced for promoting the growth of the hair few survive, even in name beyond a limited period, whilst Rowland's Macassar Oil, with an unparalleled reputation of more than 80 years, is still considered by the public to be the best and safest preserver and beautifier of the hair ever yet produced. They who prefer it can now have the oil of a golden colour, without in any way losing its beneficial effects. Sold everywhere. Sizes, 3s 6d, 7s, 10s 6d, and 21s.

Memorial Brasses.—Messrs. John Hardman and Co., who pay special attention to Military Brasses, have lately executed for her Majesty the Queen several important works for St. George's Chapel, Windsor. Designs are prepared for approval, with estimate of cost. —Offices, 13 King William Street, Charing Cross.

ROYAL CAMBRIDGE ASYLUM for SOLDIERS' WIDOWS, KINGSTON-ON-THAMES.
Supported by Voluntary Contributions.
LADY-PRESIDENT.
H.R.H. the DUCHESS of CAMBRIDGE.
PRESIDENT.
H.R.H. the DUKE of CAMBRIDGE, K.G.
CHAIRMAN OF COMMITTEE.
General H.S.H. Prince EDWARD of SAXE-WEIMAR, K.C.B.
OFFICE—40 CHARING CROSS, S.W.

This Asylum was opened in February, 1854, to provide a home for the widows of non-commissioned officers and privates of the Army of not less than 50 years of age.

There are 65 widows in the Asylum.

Each widow has a furnished room, and receives seven shillings weekly, besides a monthly allowance of two shillings and sixpence for coals.

The House is capable of containing 70 widows, and the Committee appeal to the public for funds to enable them to admit the additional number, the present subscriptions being insufficient.

The funded income of the charity yields only £830, with an additional £50 from the Princess Mary's Fund for Nurses, to meet an estimated expenditure of £3,000 per annum.

An annual subscription of half-a-guinea, or a donation of five guineas, entitles to one vote at each election, with the right of nominating a candidate.

J. A. STEWART, Colonel, Secretary.

EGYPTIAN WAR FUND,
FOR THE
RELIEF OF THE FAMILIES OF THE KILLED, AND THE SOLDIERS, SAILORS, AND MARINES WOUNDED AND DISABLED, IN THE EGYPTIAN CAMPAIGN.

UNDER THE PATRONAGE OF HER MOST GRACIOUS MAJESTY THE QUEEN.

Subscriptions to the Fund can be forwarded to Messrs. Cox and Co., Craig's Court, Charing Cross, S.W.; or Lady Jane Taylor, 16 Eaton Place, S.W.

All properly certified claims addressed to the HON. SECRETARY, EGYPTIAN WAR FUND, New Buildings, Little Park Street, Queen Anne's Gate, S.W., will receive immediate attention.

MESS EXPENDITURE.

ON account of orders recently issued on the above subject, Messrs. PELLATT and CO. (formerly APSLEY PELLATT and CO.), Falcon Glass Works and China Manufacturers (the original firm established 1759, by the father of the late Apsley Pellatt, Esq., M.P.), have decided to supply Messes on their wholesale trade terms, which prices are considerably below those usually paid. This branch, which has been the leading speciality of their Manufactures for upwards of 150 years, receives the same personal superintendence and attention as heretofore, and has on its books upwards of 100 Officers' Messes, from whom testimonials may be seen.—All communications must be sent to their only Show Rooms and Offices, PELLATT and CO., 17 St. Bride Street, Ludgate Circus, E.C.

HOTCHKISS AND CO.,
21 RUE ROYALE, PARIS;
AND
49 PARLIAMENT STREET, LONDON.
MANUFACTURERS of HOTCHKISS' PATENT
REVOLVING CANNON,
SINGLE-BARREL RAPID-FIRING GUNS,
MOUNTAIN and YACHT GUNS, AMMUNITION,
&c.

Army & Navy Gazette.

LONDON, SATURDAY, JANUARY 6, 1883.

BY the tone of the speech of Sir Thomas Brassey, it is evident that the necessity of creating a Cruiser Fleet to protect commerce has at last commanded the serious attention of the Admiralty, and we are informed that a number of sixteen-knot ships will shortly be, or now are, in course of construction. When it is borne in mind that this question has for many years been discussed in some of the leading magazines, it is inexplicable why a class, on whose efficiency our existence depends, should still be in embryo. Let us hope that the Constructive Department will not, as they have too often essayed, attempt to combine very great speed with formidable batteries. The effort can only end in one way,—absolute failure. We remember the flourish of trumpets which heralded the laying of the keels of the assumed 20-knot corvettes of the *Comus* class, a flourish in which one of the leading mechanical journals bore a conspicuous part. The reply to this may be found in our columns, and also in the October number of *Fraser* for 1876; and let those who are interested in the subject refer to its pages, and compare what was there predicted with what has been actually accomplished. It is unfortunate for the Navy in general, and still more so for the country, that the knowledge, science, and experience of officers who are not high on the social rung are lost, notwithstanding the recent statement of the First Lord of the Admiralty that legitimate aspirations should meet with encouragement. Let his Lordship or any member of the Board point out in what manner any junior has had this extended to him, while the crude ideas of rank have been adopted without measure. The last of these is the alleged conversion of merchant steamers into effective men-of-war. This is a scheme which those, whose experience and professional knowledge of these steamers entitle to a hearing, pronounce impossible. The reasons are not far to seek. Without exception, the boilers and machinery are far above the water-line, and the accidents to steamers of this particular class, as well as her Majesty's ships, distinctly prove that the bursting of a high-pressed boiler is fatal to human life. In no instance do private firms fit their magnificent ships with longitudinal bulkheads, a precaution on which the safety of the Navy of the future in a very great measure depends. Indeed, it is a fact only too well known and admitted, that the transverse bulkheads too often fail, under the pressure due to the filling of a single compartment. Again, in no instance are the decks reasonably clear of houses, steam winches, or cranes, so that much time would necessarily be expended in the attempted conversion; effective conversion is out of the question. Much stress has been laid on the fact that in experiments against the bunkers of the *Oberon*, the coal resisted the impact of shell fairly well. Admit, for argument's sake, that when full, such is the case, which is admitting a great deal, we then have the main discharge pipes and bilge pumps exposed to impact by shot or collision? And what is of more importance still in prolonged cruises—and to be effective they must be so—the working bunkers must ultimately give out, and the coal armour, be drawn on. The upholders of conversion maintain that when war breaks out, the cruisers of Russia, Germany, and France will consist of similar vessels, with inferior speed. Possibly so; but if the names of those intended for the service were published, we could reply to that assertion in the language of confidence and authority. This, however, is not of paramount importance, since the bulk of that wonderful carrying trade which is exciting the envy, the wonder, and the admiration of the world, is carried on in steamers of ordinary speed, and high-classed sailing ships of unusually large tonnage. Many of the latter now turn out more than 3,000 tons of wheat, and it is not difficult to foresee the havoc which a few daring seamen, in their improvised cruisers, could make in our Grain Fleets. If England were now to engage in a maritime contest against an active enemy, the packed population of these Islands would be reduced to straits that no man living can foresee; and still we hear it solemnly reiterated, wherever the wine cup is emptying, that England, in the days when her Naval greatness was founded, never rested her supremacy on such a foundation as she now does. Perhaps it is well that only a few thoughtful men foresee the danger which, whatever may be said to the contrary, is looming in the distance, if it is not already on the horizon. Let those who are responsible for the safety of the country take heed that the storm does not come over it unawares, and find us without a Fleet of Cruisers capable of holding our own on the ocean.

The report comes to us from a Cairo correspondent that Sir Evelyn Wood's pay is fixed at £4,000 a year. The army he will command is to consist of 6,000 men. Stone Pasha, the United States' General, who was chief of the army up to the time of its dissolution, received about £2,000 a year for commanding 18,000 men. Now, no one will grudge Sir E. Wood a very handsome allowance, but it will scarcely be just to be generous with other people's money. Baker Pasha's pay, when he was about to be named Sirdar, was fixed at £2,400 a year. After all, the report may be untrue. If it be true, England ought to pay the difference. Egyptians are shaking their heads over the story.

It would seem that the position of Major-General Sir Evelyn Wood and the English officers with the Egyptian Army will be similar to those with the Hyderabad Contingent, which for some years has been officered, as well as commanded, by English officers on full pay.

Although the Duke of Connaught is still looking forward to visiting India, he will not, we believe, leave England until after the next drill season at Aldershot. His Royal Highness, as at present arranged, will resume his Brigade command at that station in April, and will, it is expected, continue to do duty at the Camp until his departure for India, which may now be regarded as decided upon.

Lieutenant-General Sir R. C. H. Taylor, K.,C.B. took up the appointment of Governor of the Royal Military College, Sandhurst, on January 1, vice General W. C. E. Napier. The appointment is made for seven years. The pay is £2,500 a year, inclusive of half-pay as Honorary Colonel of a regiment.

It is rumoured at Woolwich that considerable change is contemplated in connection with the Royal Regiment of Artillery, which, if carried out, will be likely to affect the "Royal Horse," both as regards organisation and dress.

Service in Egypt is not very popular, if we are to judge from the desire of the Reservists and of others to leave the country. There were three parties of the Black Watch, Highland Light Infantry, and 3rd Battalion, 60th Rifles, sent off from Cairo on December 15, and there were not half-a-dozen who elected to take on,—only one in the 42nd, out of 60 men.

The news that the Army of Occupation was not to occupy Egypt for any lengthened period has been received with joyous incredulity at Cairo. It is thought to be too good to be true. It would be difficult to state why the country is not regarded with favour by the troops, but the fact is not to be gainsaid,—it is so

Major-General Conolly, C.B., has been at the hotel at Helwan for some days, and has derived great benefit from the change. Sir A. Horsford is expected at Cairo, and it is probable that both these gallant officers and old friends will go up the Nile to the Second Cataract in one of Messrs. Cook's steamers, which is advertised to start on January 2.—(Cairo Letter, December 20.)

Colonel C. M. Clarke, C.B., half-pay, late 57th Regiment, who succeeded Colonel the Hon. J. C. Dormer in the office of Assistant-Adjutant-General for the Southern District, left Portsmouth on Saturday, to take up a similar appointment at Aldershot. He was succeeded on Wednesday by Colonel Sir W. Owen Lanyon, C.B., K.C.M.G., 2nd West India Regiment.

We wonder if it is part of the new system to divide an infantry battalion between Malta and Jamaica, as has now been for some time the case with the Royal Scots. Barbadoes must surely by now have recovered its salubrity, for the wing detained at Malta to proceed thither, but the demands of Egypt and Ireland are perhaps sufficient to account for the paucity of troops in our foreign possessions.

The *St. James's Gazette* says the Indian Government, not content with the arrangements of the War Office, are offering fifty rupees per man for soldiers whose time of service with the colours has expired to remain a further period of two years in India. We wonder if this will be put down as another striking success of the short-service system, or as tending to the rapid increase of the Reserve.

We are pleased to notice that Lieutenant Campbell-Copeland, of the Royal Scots, who was promoted in July last, after eleven years' probation in the ranks of the 73rd Regiment, is still continuing his labours in the region of military literature. In addition to "The Colour-Serjeant's Pocket-book" and "The Colour-Serjeant's Ledger," Lieutenant Campbell-Copeland before his promotion submitted memoranda "On Routine Work in Divisional Branches of the Quarter-master-General's Department in India," "On the Formation of Garrison Classes for Senior Non-Commissioned Officers," and "On the Accommodation in India Special Troop Trains," all of which received favourable consideration. He is the compiler of a series of "Service Catechisms," to be issued monthly. He is also editing a book of "Military Anecdotes, Essays, and Traditions," for the admission of contributions from regimental officers and others who may care to indulge in literature; whilst an edition of "Modern Military Maxims" will, we believe, be issued in due course by the same author, who during his spare moments is busy with "Reminiscences" of his somewhat protracted experience in the ranks. Men like Lieutenant Campbell-Copeland deserve encouragement, for they must have their hearts in the profession.

The question of the supply of medical officers of the British service to meet the requirements of the station-hospital system in India is reported to have been under the consideration of Government, who have decided upon maintaining an establishment of five officers per 1,000 of British troops. According to this calculation, the number of officers to be allotted to the Bombay Presidency will be 50, inclusive of a reserve of one per 1,000 troops. The allotment for Madras will have a similar basis *pro ratâ*. After deducting those medical officers under orders to return to England during the present trooping season, there will be four officers in excess of the new establishment in Bombay; while in Bengal there will be a deficiency of 40. With a view, therefore, to an adjustment of these numbers, orders have been issued for the interchange and transfer of officers in excess in the other Presidencies to Bengal, and *vice versâ*, as may be necessary hereafter. These transfers will, it is believed, be effected, from time to time, under arrangements to be made by the Surgeon-General of her Majesty's Forces in India, in communication with the Surgeons-General of Madras and Bombay.

We believe that Major-General Hawley, who is hit by the age clause, will be allowed to remain on the Staff of the Horse Guards, to complete his five years' service as Deputy-Adjutant-General.

Baker Pasha, we understand, has offered the appointment of Chief of the Staff of the Egyptian Army of the Soudan to Lieutenant-Colonel J. W. Hozier, late of the Scots Greys; but it is not known whether Colonel Hozier would care to accept the employment.

Colonel C. B. Knowles, C.B., half-pay, late Hampshire Regiment, who was selected to succeed Colonel R. R. Gillespie, C.B., half-pay, late Durham Light Infantry, as Assistant-Adjutant and Quartermaster-General of the York District, on that officer's departure for Egypt, is to retain the appointment for the usual period of five years, and will not vacate it to make way for Colonel Gillespie again, as is the case with most of the other officers selected for Staff employment on the departure of the Egyptian Field Force.

Nothing is known as to the date of Lord Napier's return from Gibraltar, but it is believed that his Lordship will be absent from England until March.

No regiments are to be brought home this winter from India, in addition to the 1st Battalion Manchester Regiment (63rd) and 1st Battalion Seaforth Highlanders (72rd), which have arrived from Egypt; and no corps will proceed to that country besides the 1st Battalion Derbyshire Regiment (95th), and 2nd Battalion Manchester Regiment (96th), which have lately been conveyed to that country from Egypt.

There is one subject which urgently requires the attention of the new Secretary of State for War, for, in these days of youthful non-commissioned officers, the evil is making itself much felt, and is tending, in many ways, to injure the efficiency of the service. We refer to the delay that takes place in filling up vacancies among regimental officers. Directly a vacancy occurs either by death or retirement, the next *Gazette* should contain the name of the officer appointed to succeed. This could easily be provided for, by the Horse Guards keeping a list of officers for promotion, as well as having candidates in excess of vacancies ready to undergo examination for entrance into the Army. What would be thought of a large employer of labour in private life losing a number of his factory hands, and remaining months before they were replaced, yet this is what Government do in every regiment in the service? Vacancies among the officers are not filled, the work is thrown very unjustly on other officers, leading to much discontent, and in some cases great personal hardship.

Another subject which requires early attention is the necessity of increasing the per-centage of horses allowed to be cast annually. Every cavalry regiment on home service has a number of horses which are useless, either from age or disease, and are merely retained from year to year, because the Inspector-General of Cavalry, having already cast other horses which are worse, cannot exceed the limit allowed by the regulations. This is in reality very false economy, as these horses usually do little or no work; yet they have to be fed and groomed, and Government obtains no corresponding advantage for the outlay. At the present moment, we have no hesitation in saying that there are thirty horses in every cavalry regiment on home service which should be cast forthwith. The advantage of casting at an earlier age and in greater numbers is, that not only should we have efficient regiments, with all horses in the ranks after breaking, but the prices realised for the cast horses, which are even now very satisfactory, would be even more remunerative.

The decision of the Government not to fill up the Surveyor-Generalship of the Ordnance for the present is due to the fact that before the new Estimates are presented to Parliament, Lord Hartington intends to institute inquiries as to the present administration of the department presided over by the Surveyor-General, with a view to the carrying-out, if necessary, of certain important changes.

We are in a position to confirm the announcement that it is the intention of the Khedive to issue a Bronze Star to commemorate the services of the British troops in the late Campaign in Egypt. The star is being manufactured in England, from the designs of M. Fabricius, and, it is hoped, will be ready in the course of a few months.

THE LIFE GUARDS AND DETTINGEN.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—With reference to your remark in the last edition of the *Army and Navy Gazette* on my letter of the 24th ult. —that I had "written under a misapprehension," and that "there was no connection of any kind between them"— (*i.e.*, the troops of Life or Horse Guards, as they were called indiscriminately) "and the present Life Guards"— I would beg to refer you, and such of your readers who may take an interest in the subject, to the Royal Warrant of June 8, 1788, ordering the two then existing troops to be formed into regiments of Life Guards, under their respective colonels, the Marquis of Lothian and Lord Amherst. "Beatson's Political Index," published in 1806 (a work the accuracy of which is universally recognised), gives, on pp. 178-9, a list of the succession of colonels of these troops or regiments, from the reign of Charles II. to that of George III. The precedence of the Life Guards (which they hold this day) to all other Horse is dated Sept. 12, 1666. The following are indisputable facts:— (1), That two troops of Life Guards played a most distinguished part in the Battle of Dettingen; (2), that these troops were subsequently, on Dec. 25, 1746, embodied into the other two troops (the officers of the former being placed *en seconde* into the latter); (3), that these two troops were "re-formed" into the present two regiments of Life Guards, under their own colonels, on June 8, 1788. I have now, I trust, finally disposed of the charge against the Life Guards of claiming or accepting honours which are not their due. If they have any right to inscribe "Waterloo" on their standards, they certainly have an equal right to that of "Dettingen."—I am, &c.,

KEITH FRASER,
Colonel, Half-pay.

Jan. 4, 1883.

THE NEW EQUIPMENT OF THE ARMY.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—Taking, as I do, a great interest in the question of Military equipment, I should like to bring to the notice of the War Office that the set of accoutrements now being issued, in accordance with the recommendation of the Equipment Committee, are generally regarded as a complete failure. You may remember that at the time the Committee sat at Aldershot, I wrote to you, pointing out how shamefully the Committee was acting with regard to Surgeon-Major Oliver. It was generally considered at that time that the new equipment would have to be condemned, and it has turned out just as everybody expected. Having myself worn the Oliver equipment whilst my regiment was wearing it on trial, and knowing how excellent that equipment is in every detail, I determined the other day to test these new accoutrements, also in order to ascertain whether the complaints of the men were well-founded. I can unhesitatingly assert that a more miserable idea could not be devised for punishing poor Thomas Atkins, and causing him pain. I tried to walk with the new equipment on my back, and I found the task impossible. The whole plan on which the accoutrements are constructed is bad. But I would ask, why should the War Office have been a party to such a miserable scandal? Personally, I know why these Oliver accoutrements were condemned. I consider that a more disgraceful proceeding never was countenanced even by our War Office, bad as the reputation of that Department is. It so happens that I know nothing whatever of Dr. Oliver. I know this, though, —that my regiment wore the Oliver accoutrements on trial for months, that not a single fault could be found with them, and that our commanding officer reported upon them in the most favourable terms. They were as far superior to those now being issued as the Martini-Henry rifle is to the old muzzle-loader. And yet they are condemned, and an inferior equipment is provided, simply because it would not altogether suit the books of certain persons to have the magazine accoutrements adopted, in face of certain well-known facts. So much for our military administration, which successive War Ministers pride themselves on considering the acme of perfection, but which, in my opinion, is just about as bad as it well could be.—I am, &c.,

A FIELD-OFFICER, WHO SPEAKS FROM EXPERIENCE.

AMERICAN AND ENGLISH MEN-OF-WAR.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—I see in the *A. & N.G.* of Oct. 7 you mention that you are sorry to read in the *Japan Gazette* that a feeling the reverse of friendly exists between the officers of the English and American squadrons on the China station. I should be much obliged if you would contradict it, as it is not true. I have never seen officers and men of two different services get on better together than the English and American on this station. The reason why the Champion did not cheer the Swatara was that it was against the Admiral's orders.—I am, &c.,

Hong Kong, November 23, 1882. ENCOUNTER.

[It affords us much pleasure in being able, by publishing the above letter, to contradict the discreditable imputations of the *Japan Gazette*.—ED. *A. & N.G.*]

MILITIA PATRONAGE.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—If the new Secretary of State for War adopts the policy advocated by "Ex-Linesman," he will soon find recruiting for the Militia a matter of extreme difficulty. I write entirely as an outsider, but as a country parson I have some knowledge as to the reasons why men enlist into the Militia, and what it is that makes them take an interest in their work and gives them that *esprit de corps* without which no regiment can be efficient. I am far from thinking that there ought to be no old soldiers, provided that they belong to the county, among the officers; but I am sure that the present element of country gentlemen ought not to be got rid of. Many Militia captains never have been, and never will be, "ex-Linesman," but they are the backbone of the Militia. The men know them, and see them all the year round. They like serving under the young squire, or the squire's son. Such officers bring into their work an energy and a freshness which are not unnaturally wanting in an old Linesman, and they are always on the look-out for recruits. I am quite sure that such officers will never be obtained, if they are told that they will never get their majorities, or even their companies. I believe that many ex-Linesmen will agree with me.—I am, &c.,

J. S. B.

ARMY NOTES.

A correspondent writes:—"I rejoice to see that you refer from time to time to the proposed practice of wearing medals in evening dress. I only wish a General Order were issued to enforce everywhere the directions just given by the Governor of Guernsey, that officers should invariably appear in mess uniform in the evening."

The *Irish Times* has the following:—"The present distribution of the small but efficient army which does duty in all quarters of the globe, and is always supposed 'to be ready to go anywhere and do anything,' is at the beginning of the new year a matter in which the public may be expected to take some interest, especially as the last half-year has witnessed the spectacle of a large force despatched with remarkable promptitude to Egypt, where a considerable portion of it still remains as an army of occupation, and it is still deemed necessary to maintain in Ireland an abnormal number of troops,—some 29 battalions, besides a proportionate force of artillery, cavalry, engineers, &c. The force in Ireland has been higher than this during the past two years, but is still greatly disproportionate to that which it has been found necessary to keep here for the 20 years ranging from 1861 to 1880, as the following figures, showing officers, non-commissioned officers, and men, prove:—

	Officers.	Men.
1861	1,029	23,996
1862	998	21,069
1863	1,095	20,302
1864	1,079	20,121
1865	1,074	20,017
1866	1,269	22,969
1867	1,209	22,537
1868	1,095	20,462
1869	1,133	20,345
1870	1,278	23,546
1871	1,216	26,437
1872	1,197	26,014
1873	1,121	24,390
1874	996	21,537
1875	1,002	22,539
1876	996	21,756
1877	963	21,751
1878	894	23,074
1879	791	17,893
1880	869	19,715

The Hallidie Patent Cable Tramways Corporation, Limited, has been formed for granting licenses on royalties, leasing, working, and constructing tramways in the United Kingdom, on Hallidie's Patent Cable System. The capital is £1,000,000. The company has acquired the whole of the patents taken out by Mr. Hallidie for the United Kingdom, with right to all his improvements thereon.

THROAT IRRITATION.—Soreness and dryness, tickling and irritation, inducing cough and affecting the voice. For these symptoms use Epps's Glycerine Jujubes. In contact with the glands at the moment they are excited by the act of sucking, the Glycerine in these agreeable confections becomes actively healing. Sold only in boxes, 7½d, tins, 1s 1½d, labelled "JAMES EPPS and Co., Homœopathic Chemists, London." A letter received:—"Gentlemen,—It may, perhaps, interest you to know that, after an extended trial, I have found your Glycerine Jujubes of considerable benefit (with or without medical treatment) in almost all forms of throat disease. They soften and clear the voice.—Yours faithfully, GORDON HOLMES, M.D., Senior Physician to the Municipal Throat and Ear Infirmary."

ARMY AND NAVY CO-OPERATIVE MEMBERS ARE SUPPLIED AT

BENETFINK & CO'.S

J. AND W. TOLLEY'S

EXPRESS RIFLES.

·360 bore DOUBLE EXPRESS...	£20
·450, ·500, and ·577 bore DOUBLE EXPRESS	£25
If fitted with Tolley's Patent "Giant-Grip" Action, specially designed to prevent the SLIGHTEST MOVEMENT at the moment of discharge. The strongest action extant ...	£28

An inspection of above invited.

The shooting of our Rifles is under the personal supervision of a member of the Firm, and is not deputed to any subordinate, AS IS USUAL IN MOST CASES. By this means we are enabled to guarantee to our customers Rifles with a figure of merit that cannot be beaten.

[Extracts.]

From Capt. J. E. B., 45th Regiment: "I yesterday fired with the rifle without raising the back sight from 25 to 200 yards, and almost every shot struck its fellow, with the other barrel."

B. W. W., Assam, India:—"I must certainly give you credit for the splendid weapon that you have built me."

Capt. F. W. M., Mysore:—"I have never had a rifle (and I have had all kinds) which has given me such satisfaction."

Lieut.-Col. W. A., 22nd Regiment:—"The Express Rifle gives me perfect satisfaction."

Lieut. C. W. D., 92nd Highlanders:—"I have fired with it, and find it very accurate and well balanced."

C. F. SHOT GUNS, Hammer or Hammerless, £13 13s, £15 15s, £17 17s £20, £25, and £30.

We are constantly receiving a supply of above from our manufactory in Birmingham, at our London address, where one of the principals can at any time be seen.

THE PARASCHO CIGARETTES.

THE PARASCHO CIGARETTES are now being made from the New Crop of Yenijeh Tobacco, and will be found to possess in perfection the peculiar and delicate aroma for which these Cigarettes have become so famous. The Parascho Cigarettes are made only from the finest Yenijeh (Turkey) Tobacco, and are rolled in the best paper procurable, free from Nitre, and made specially for the Parascho Cigarettes. The Parascho Cigarettes will be found different from and superior to all others. The Parascho Cigarettes are pronounced by connoisseurs to be "the only Cigarettes worth smoking."

The Parascho Cigarettes are supplied to the leading members of Fashionable Society, Clubs, and Messes.

The Parascho Cigarettes are made in eight different sizes, and are put up in boxes, each containing 50, 100, and 250 Cigarettes. The Parascho Cigarettes may also be had in sample boxes, containing 24 Cigarettes (accompanied by a detailed price List), on receipt of 2s 6d in stamps, or postal order.

THE VERSMANN'S

PATENT

GERMAN MOSS LITTER.

This Litter is specially prepared from a moss-peat found in Germany, and introduced into this country by the Patentee, Dr. VERSMANN, Ph.D. After a most severe and extensive trial in public and private stables, cowsheds, and kennels, it is pronounced by the highest practical and scientific authorities to be the best and cheapest litter known.

ITS ADVANTAGES ARE:

1. Cheapness, it being not more than one-half the cost of straw.
2. Absorptiveness, as absorbing all the urine, and rendering drains and flushing of stables unnecessary.
3. Prevention of decomposition and generation of bad odours.
4. Affording an excellent soft and elastic bed, particularly agreeable and beneficial to the feet and limbs of horses.
5. Horses do not eat it as they do straw litter. therefore they do not require to be racked up or muzzled to prevent indigestion or broken wind.
6. It is easily managed in the stable, and does not soil or stain horses.
7. It has a wonderful influence on the growth of the hoofs and in maintaining the feet in health.
8. It is extremely portable, being compressed into bales weighing each about 3 cwt., ¾ cwt. to 1 cwt. being sufficient to litter a horse for a month or six weeks.
9. It is not inflammable, and therefore offers but little danger from fire.
10. It is essentially a sanitary litter.
11. The manure is much more valuable than tha of straw, and occupies considerably less space.

It will be found of immense advantage Veterinary Infirmaries, in Stud Farms, Dairies, Kennels, &c.

Address —
The Versmann's Moss Litter Company
LIMITED.
63 QUEEN VICTORIA STREET, LONDON, E.C.

CAUTION.—Proceedings will be taken against persons infringing the Company's patent.

The Hon. JOHN WILLIAM PLUNKETT, 15 Park Square, N.W.; and Dunstall Priory, near Sevenoaks, Kent.

RICHARD LOVELAND LOVELAND, Esq., Barrister-at-Law, Director of the Royal Farmers and General Fire and Life Insurance Company, 4 Hare Court, Temple, E.C.

CHARLES KEMP DYER, Esq., J.P., Director of the Banbury and Cheltenham Direct Railway Company, Lloyd's, E.C.; and St. Albans, Herts.

MEMBERS OF THE CONSTRUCTION COMMITTEE.

EDWARD HEGLEY BYAS, Esq., Director of the Steep Grade Tramways Company, Limited (Highgate Hill), Belsize Park, N.W.

JOSEPH BROWNE MARTIN, Esq., Director of the Bridgewater Railway Company, Victoria Mansions, Victoria Street, S.W.

JOSEPH COLEN WAKEFIELD, Esq., J.P., Chairman of the Vale of Clyde Tramways Company, 18 Bread Street, E.C., London, Manchester, and Glasgow.

By the Articles of Association, each Director has to subscribe for and hold 100 Shares, representing £1,000 of the Capital of the Company, as his Qualification.

SOLICITORS.—Messrs. FOWLER, CHRISTIE, and CO., Victoria Mansions, Victoria Street, Westminster, S.W.
STANDING COUNSEL.—THEODORE ASTON, Esq., Q.C., 11 New Square, W.C.; EDMUND MACRORY, Esq., 7 Fig Tree Court, E.C.
ENGINEER-IN-CHIEF.—JAMES CLEMINSON, Esq., Mem. Inst. C.E., and Mem. Inst. M.E., 7 Westminster Chambers, Victoria Street, S.W.
BANKERS.—The CAPITAL and COUNTIES BANK, Limited, 39 Threadneedle Street, E.C., and Branches.
SURVEYORS.—Messrs. FREDERICK CLARK and CO., 4 Agar Street, Strand, W.C.
BROKERS.—Messrs. A. RICARDO and CO., 11 Angel Court, Throgmorton Street, E.C.
AUDITORS.—Messrs. TURQUAND, YOUNGS, and CO., 41 Coleman Street, E.C.; HENRY BALL, Esq., 149 Palmerston Buildings, E.C.
SECRETARY.—HENRY WILLIAM SHAW, Esq.
OFFICES.—VICTORIA MANSIONS, VICTORIA STREET, WESTMINSTER, S.W.

ABRIDGED PROSPECTUS.

THE HALLIDIE PATENT CABLE TRAMWAYS CORPORATION, Limited, is formed to introduce into this country the highly successful Cable Tramway System, patented by Mr. Andrew Smith Hallidie, of San Francisco, which, in the opinion of the Directors, is calculated to effect as great an improvement in the mode of propelling Tramway Cars, as the introduction of Railways effected over the ordinary horse conveyances then in use.

The Company has acquired the whole of the Patents taken out by Mr. Hallidie for the United Kingdom, with right to all his improvements thereon. The great success that has been attained by every Tramway that has adopted the Cable System can hardly fail to ensure its general application in England, and to entirely do away with the costly mode of propelling Tramway Cars by horses.

Unlike most inventions, whether for economising labour or cost of production, which usually have to be worked for a lengthened period after acquisition by a Company, before they can be pronounced a commercial success, the Cable System has been proved by several years' actual working on a large and commercial scale in San Francisco, with the following unusually profitable results, as vouched by Mr. Hallidie, President of the Clay Street Hill Line:—

California Street Line, San Francisco, earning about 14 per cent. on capital. Amount paid up per share, £16; price quoted, £22.

Sutter Street Line, San Francisco, earning nearly 30 per cent. on capital. £4 16s paid up per share; selling at £17.

Geary Street Line, San Francisco, earning about 30 per cent. Paid up per share, £7 10s; selling at £19.

Clay Street Hill Line, San Francisco, earns 20 per cent. on capital invested. Further extensions about to be made.

Chicago City Tramway Co., Chicago. Although only a small portion of the line has been changed from Horse to Cable Traction, the shares have already risen over 25 per cent. in value.

The business to be undertaken by The Hallidie Patent Cable Tramways Corporation, Limited, is fourfold:—

1st. The granting of licences for the use of the Patents acquired by this Company on payment of Royalties by the Companies using the system, either by a fixed sum per mile, a percentage on the savings effected in the working expenses, a division of the receipts after a minimum payment to the Shareholders, or otherwise.

2nd. The construction of the Lines so licensed where the Companies desire this Company to undertake such construction.

3rd. The working of tramways at a percentage of the gross receipts.

4th. The leasing of Lines owned by Companies or Corporations on guaranteed fixed Dividends or otherwise.

From each of these sources a very substantial return on the Capital of the Company is anticipated, but combined, as from the nature of the business they must necessarily be, the Directors venture to think the Dividends to Investors will not be exceeded by those of the most successful Industrial Companies.

The first Company that has entered into arrangements for using the System in England is the Steep Grade Highgate Hill Tramways Company, Limited, the benefit of which contract is acquired by this Corporation.

The Steep Grade Company when issuing their Share Capital had necessarily to give an extended publicity to the merits of the Cable system, and the result was that the Capital was very much more than applied for, and a great number of applications had to be refused, and the deposits returned, thus giving evidence of the readiness with which the public are prepared to welcome this system.

Already, in addition to the Licence granted to the Steep Grade Tramways Company, Limited, for their Lines, negotiations with a variety of Companies desirous of adopting the system are proceeding, and when the great merits of the Cable system are stated it will not excite surprise that Tramway Companies should desire to avail themselves of the advantages it affords; amongst others may be mentioned:—

The Birkdale and Southport Tramway Company, for licensing, converting their present and constructing the remainder of their authorised Lines. The Halifax and District Tramways Company, for licensing their Lines, to make which application is being made this Session of Parliament, with the sanction of the Corporation of Halifax. The Corporation of Huddersfield are also in communication with the Directors, with a view to negociations for the conversion to the Hallidie System, and leasing of the Tramways constructed and owned by them. The Lea Bridge, Leyton, and Walthamstow Tramways Company, for licensing, converting, and working their system. The Greenwich and Millwall Subway Company for licensing the use of the system on the line of Tramway to be laid in the Subway. The Spen Valley, Dewsbury, and District Tramways Company, for licensing the lines they are appying for in the present Session of Parliament. And several others, including Tramway Companies in Scotland.

The following is a brief summary of the various advantages of the Cable system, which are further referred to in the accompanying Appendix, and to which particular attention is invited.

They are:—

The very great saving in the cost of working as compared with the horse system. This is illustrated by the fact that the average cost for working the three leading Metropolitan Lines is over 76 per cent. of the gross receipts, whereas the cost of working by the Cable system is estimated not to exceed 38 per cent., being a saving of 50 per cent. of the present working expenses.

The saving by the Cable System on these Metropolitan Lines is therefore estimated at £38 for every £100 gross receipts.

As a practical illustration of the above statement, the gross receipts for twelve months ending June, 1882, of the three following Lines, is given as extracted from their Balance Sheets, viz.:—

The North Metropolitan Tramway ...	£297,422
The London Tramway	212,194
The London Street Tramway	69,393
Total gross receipts	£579,009

On the estimated basis of working on the Hallidie System, a saving of 38 per cent. on the above receipts would have resulted had the above Lines been worked by that System, and they would thus have yielded £220,023 extra profit, which after allowing for interest on the Capital necessary for the conversion of these Lines and the payment of Royalties to this Corporation, would have left a sum sufficient to have doubled the dividends declared, as will be seen by the Tables set out in pages 1, 4, and 7, in the Appendix.

The average working charges of Provincial Lines may be taken at 80 per cent., whilst by the Cable system they are estimated to average not more than 45 per cent. on the gross receipts.

The saving by the Cable system therefore on Provincial Lines is estimated at over 35 per cent. of the gross receipts.

The Royal Society for the Prevention of Cruelty to Animals on this point has taken a very great deal of interest in the movement, for the withdrawal from the public roads of the horses used in working of Tramways, and attention is directed to the letter from the Society set out in the Appendix.

The terms arranged for the purchase of the whole of the Patents for the United Kingdom, taken out by Mr. Hallidie, with the right to all improvements that have been or may be hereafter perfected by him or on his behalf (for several of which Patents have been applied for), and the benefit of the Contract, dated June 22, 1882, made between A. S. Hallidie and the Steep Grade (Highgate Hill) Tramways and Works Company, Limited, have been fixed by the English, Foreign, and Colonial Patent Cable Tramway Company, Limited (who are the promoters of this Company, and who own all the English and most of the Foreign and Colonial Patents taken out by Mr. Hallidie) at £70,000, payable by instalments, 7,000 Shares in the Company issued as fully paid up, and one-third of the surplus profits in each year in which the Company has earned a profit over 15 per cent. on the ordinary Share Capital paid up and credited as paid up; the remaining two-thirds of the surplus profits being applied, 20 per cent. thereof for a Reserve Fund, 5 per cent. for Directors' extra remuneration, and the remaining 75 per cent. thereof (being half the total surplus profits) for extra Dividend or Bonus on the Share Capital of the Company, payable on the amount paid up or credited as paid up thereon.

Having regard to the great importance of the Patents, and the extensive field open to their application, the Directors consider the terms of purchase very moderate.

The Directors having giving in this prospectus and in the Appendix enclosed herewith all facts necessary to guide investors and enable them to form a judgment as to the desirability of the Shares of the Company as an investment, only desire to add that considering the large field of business available for the Company's operations—which is not surprising when it is known that the lines in San Francisco on the Cable system are earning, on their cost, 20 to 30 per cent. dividends, and the Shares command high premiums—the Directors do not believe they can be considered exaggerating when they state their opinion that the prospects of this Corporation justify them in anticipating an equal amount of success, both as to rate of dividends to be earned, and to the quotation the Company's Shares are likely to attain as the business of the Corporation developes.

With reference to the allotment of the Shares, to obviate the inconvenience and disappointment experienced by many people who at the time of the Steep Grade (Highgate Hill) Tramways Company issuing their Share Capital, were unable to obtain an allotment, the Directors wish to state that they purpose, so far as circumstances will allow, to allot the Shares as follows, viz.:—

7,000 Shares to the Vendors as part payment of the Purchase-money.
5,000 Shares among applications from the Directors and their friends.
5,000 Shares among applicants who are Shareholders in the Steep Grade (Highgate Hill) Tramways Company, Limited, being the first Company in England to whom a Licence has been granted for working the Cable system.
4,000 Shares among applicants who failed to obtain an allotment of Shares in the Steep Grade (Highgate Hill) Tramways Company, and whose deposits had to be returned, who were promised that on the first allotment of the Shares of the Company to be formed for acquiring Hallidie's Patents, they should have special consideration.
20,000 Shares among applicants who are Shareholders in any of the existing Tramway Companies, they being entitled to special consideration as interested in Companies likely to be future Licensees of this Company.
9,000 Shares among applicants from the General Public.

Total, 50,000 Shares.

Should any applicant not receive an allotment, his deposit will be returned without deduction.

The following Contracts have been entered into, viz, December 18, 1882, between the English, Foreign, and Colonial Patent Cable Tramway Company, Limited, and Henry William Shaw, on behalf of this Company, and December 29, 1882, between the English, Foreign, and Colonial Patent Cable Tramway Company, Limited, Henry William Shaw, and the Hallidie Patent Cable Tramways Corporation, Limited.

Copies of the Contract and of the Memorandum and Articles of Association, Patents, and Models can be seen at the Offices of the Solicitors of the Company.

Application is intended to be made in due course to the Stock Exchange for a quotation of the Company's Shares.

Detailed Prospectuses and Forms of Application for Shares, with Lithograph and Appendix, can be obtained at the Bankers, Solicitors, or Brokers, or from the Secretary, at the Offices of the Company, from whom full information on all points can be obtained.

By order of the Board of Directors,
M. KENNEDY, Chairman.
J. M. STEWART, Deputy-Chairman.
H. W. SHAW. Secretary.
Victoria Mansions, Victoria Street, Westminster, S.W.
January 3, 1883.

ROYAL INDIAN ENGINEERING COLLEGE, Cooper's Hill, Staines.

This College has been recently placed on a new basis, and the advantages afforded by it as a training institution for those who purpose adopting the Civil Engineering profession in India or elsewhere, are now offered to all persons desirous of following the course of study pursued there.

A number of Students, not exceeding 60, will be admitted to the College in September, 1883. Candidates for admission must, on July 1, 1883, be over 17 and under 21 years of age, and must give satisfactory proof of their having received a fair general education.

The Secretary of State for India will offer 13 appointments in the Indian Public Works Department for competition among the students entering the College in September, 1883, at the termination of their prescribed three years' College course, that is, in the summer of 1886. The Secretary of State for India will further offer two appointments in the Indian Telegraph Department among the same students after two years' course of study, that is, in the summer of 1885.

In the event of there being more candidates for admission than the College can receive, the preference will be given to qualified candidates according to dates of application for admission.

For all further particulars, apply by letter only to the Secretary, Public Works Department, India Office, S.W.; or to the President, Royal Engineering College, Cooper's Hill, Staines.

JULAND DANVERS, Secretary,
Public Works Department.

India Office, October 25, 1882.

ROYAL AGRICULTURAL COLLEGE, CIRENCESTER.

Established by Royal Charter, 1845,
FOR THE SCIENCE AND PRACTICE OF AGRICULTURE.
For Intending Land Owners and Occupiers, Land Agents, Surveyors, Colonists, &c.

The College Farm, for the practical instruction of the Students, surrounds the College, with which it is in connection, and is a fine mixed Farm of about 500 Acres.

President.
His Grace the DUKE of MARLBOROUGH, K.G.

Committee of Management.
The Right Hon. the Earl of Ducie, Chairman.
The Right Hon. the Earl Bathurst.
The Right Hon. Sir Michael E. Hicks-Beach, Bart., M.P.
Lieutenant-Colonel R. Nigel F. Kingscote, C.B., M.P.
George T. J. Sothern-Estcourt, Esq., M.P.
Ambrose L. Goddard, Esq.
William John Edmonds, Esq.
Major T. W. Chester-Master, M.P.
M. H. N. Story-Maskelyne, Esq., M.P.
The Right Hon. Lord Lyttelton.

For Prospectus of College and Farm, List of Scholarships, Prizes, Diploma, &c., apply to the PRINCIPAL.

NEXT SESSION begins TUESDAY, January 30.

ARMY EXAMINATIONS.—Dr. KAIM and H. ZOBEL, in conjunction with Captain GREENE, assisted by able and Experienced Masters, PREPARE CANDIDATES for Woolwich, Sandhurst, the Militia Competitive Military Examinations, and the Staff College.

The Pupils are received in the Families of the Principals, which will be a Special Advantage to those wishing to practise French, German, and Italian conversation.

Highest references; amongst others, Major-General Sir Evelyn Wood, V.C., K.C.B., Colonel the Hon. P. Methuen, C.B., Scots Guards, Assistant-Adjutant-General, Horse Guards.

For particulars, apply to H. ZOBEL, Poulton House, Hampton, Middlesex.

GROSVENOR SCHOOL, Twickenham.

BOYS receive thorough PREPARATION for Woolwich and Sandhurst, and pass DIRECT. Special arrangements for very young boys. Healthy neighbourhood, good table, public-school tone. Strongly recommended by many Officers high in the Service, to whom reference is permitted. Head Master, the Rev. L. MURRAY D'ORSEY, M.A.

TO ARMY TUTORS.—A North-German Graduate of experience and great success is open to take a Morning Engagement, or Read with Private Students.—"TUTOR," 15 Clarendon Gardens, Maida Vale, W.

MILITARY COMPETITIVE.—TWO VACANCIES on March 15. Four Pupils taken. Limit five.—For particulars, apply to Captain H. D. EVANS, late R.A., Glassaugh, Portsoy, Scotland.

ARMY EXAMINATIONS.

MR. J. WINDER, M.A., Cranworth House, Eastbourne, Sussex, PREPARES TEN PUPILS for Woolwich and Sandhurst. At recent Examinations Candidates prepared by Mr. Winder obtained 6th and 22nd places for Woolwich, and 20th and 27th places for Sandhurst.

THE ROYAL ACADEMY, GOSPORT.

Patrons.
Her Most Gracious Majesty the Queen.
His Royal Highness the Prince of Wales.
His Royal Highness the Duke of Edinburgh.
His Royal Highness the Duke of Connaught.
His Royal Highness the Duke of Albany.

NAVAL CADETSHIPS.—A CLASS will be formed in January for Special Preparation for the next Examination for Naval Cadetships, and there will also be Classes preparing for Woolwich, Sandhurst, the Militia, &c.—Apply to the Rev. EDWARD BURNEY, M.A.

ISLE of WIGHT PROPRIETARY COLLEGE (LIMITED), near RYDE.

Visitor—The Right Rev. the LORD BISHOP of WINCHESTER.
President—The Right Hon. Lord ROLLO.
Chairman of Council—The Right Rev. Bishop McDOUGALL, Archdeacon of the Isle of Wight.
Vice-Chairman—Lieutenant-General Sir HENRY DALY, K.C.B., C.I.E.
Head Master—Rev. F. D. TEESDALE, M.A., New College, Oxon.
Second Master—C. E. BICKMORE, M.A., Fellow and Late Lecturer of New College, Oxon.

The College stands in a beautiful old park of 21 acres, with a large and well filled gymnasium, fives courts, and good sea bathing, and enjoys all the advantages of a southern climate.

Classical and Modern Departments.

The NEXT TERM will commence JANUARY 26. (Boarders to return 25th.)

For Prospectuses and particulars as to Entrance Scholarships, apply to the Head Master, or to the Secretary. W. HAMMOND RIDDETT, Ryde.

ARMY EXAMINATIONS.—Captain W. H. JAMES, F.G.S., P.S.C., late R.E., and the Rev. Dr. FROST, LL.D., 19 Lexham Gardens, W., formerly at 28 Kensington Square, W., PREPARE Gentlemen for the Army, *viâ* WOOLWICH, SANDHURST, and the MILITIA. A Special Class for the STAFF COLLEGE. Captain James passed from the Staff College in 1877 with honours, first in mathematics, &c. During the past fifteen years, over 500 Pupils have passed from this Establishment. Fifty-two successes last year, eighty this year. In the recent WOOLWICH Examination four passed, viz., 4th, 17th, 22nd, 27th, and a fifth pupil qualified, out of seven sent up.

LIEUTENANTS of MILITIA.—At the March Military Competitive Examination, EIGHT obtained commissions, viz.:—Richards (4th), Grant (12th), Wimberley (14th), Cass (28th), Shadwell (30th), Woodwright, Legge, Vignoles (Cavalry).

At the last Examination (September) TEN passed, viz.:—Holland (2nd), Blewitt (8th), Whiffin (14th), Gorman (19th), M'Mahon (20th), Morris (25th), Barthorp (28th), Cochrane-Baillie (33rd), Edwards (36th), another was 41st, and Goodair, 42nd, received a cavalry commission.

At the April Further Literary Examination, Three passed, viz.:—4th, 37th, 86th. This October Four passed, viz.:—5th, 10th, 14th, 26th, being all sent in on both occasions.

STAFF COLLEGE Successes:—1881: 1st, 4th, 16th. 1882: 1st, 7th, 10th, 15th, 22nd, 23rd, 26th.

Captain JAMES prepares Officers for the Promotion Examination. No failure up to date, and 46 have passed since December.

NAUTICAL TRAINING COLLEGE.—The THAMES NAUTICAL TRAINING COLLEGE, H.M.S. Worcester, moored off Greenhithe, Kent, is managed by a Committee of London shipowners, merchants, and captains. Chairman—Sir G. Chambers, 4 Mincing Lane, E.C. YOUTHS from eleven to fifteen and a-half years of age, intended for the sea, are received on board, and specially educated for a seafaring life. The annual terms in the Upper School for cadets from thirteen to fifteen and a half are fifty guineas, and in the Lower School, for cadets from eleven to thirteen, forty-five guineas, with a charge to each of ten guineas for uniforms, medical attendance, washing, &c. The Board of Trade allow that two years passed on board this ship shall count as one year's sea-service. The Admiralty annually give Sea Cadetships in the Royal Naval Reserve. The COLLEGE will REOPEN January 22, 1883, after Christmas Vacation. Forms and Prospectuses may be obtained on application to

W. M. BULLIVANT, Hon. Sec.
72 Mark Lane, London.

MATHEMATICS.—A Cambridge Wrangler VISITS and RECEIVES PUPILS in London; teaches by Correspondence; and supplies, on moderate terms, Solutions of the most Recent Examination Papers, including Sandhurst, Woolwich, I. C. S., London B.A., and B.Sc.—G. HEPPEL, M.A., 180 The Grove, Hammersmith.

BEDFORD GRAMMAR SCHOOL.—Head Master—J. S. PHILLPOTTS, M.A., B.C.L., formerly Fellow of New College, Oxford, and Assistant-Master at Rugby School.

Eight Exhibitions for four years to the Universities.

Special Classes for Woolwich, Sandhurst, E.I.C.S., &c.

All (four) pupils sent up in 1880 passed direct into Woolwich. In 1881, sixth and ninth places. Two passed direct (July, 1882) for Indian Civil Service.

Fees, per annum—day boys under thirteen, £9; above thirteen, £12. Terms for boarders on application as above.

THE ROYAL ACADEMY, Gosport.

Patrons.
Her Most Gracious Majesty the Queen.
His Royal Highness the Prince of Wales.
His Royal Highness the Duke of Edinburgh.
His Royal Highness the Duke of Connaught.
His Royal Highness the Duke of Albany.

A Class will be formed in January for special preparation for the next Examination for Naval Cadetships.—Rev. EDWARD BURNEY, M.A., Head Master.

NEUENHEIM COLLEGE, HEIDELBERG. Head Master, Rev. F. ARMITAGE, First-class Classical Tripos, late Modern Language Master at Clifton College; with Seven Resident Assistant-Masters, French and German. Preparation for English Public Schools and Universities, Military Examinations, and for Commercial Life. German spoken, English diet, large cricket-ground and fives courts.—References to Dean of Westminster; President of Trinity College, Oxford; Head Masters of Clifton College and Bath College, Colonel Dunsterville, &c.

MALVERN COLLEGE.
LIMITED.

The NEXT TERM commences on FRIDAY, January 26. Entrance Examination, January 25.

For particulars, apply to E. B. SCALLON, Esq., M.A., Secretary.

ARMY, *viâ* Sandhurst, Woolwich, or Militia.—PROSPECTUSES, together with reliable Information of Tutors recently successful, sent (gratis), by Messrs. ASKIN, 38 Sackville Street, London, W. References kindly allowed to the Chaplain-General to the Forces and others.

UNITED SERVICES PROPRIETARY COLLEGE, WESTWARD HO! N. DEVON.

NEXT TERM OPENS on FRIDAY, January 19.

Pupils direct from the School obtained the 1st and 17th places in the December Woolwich Examination.

ARMY EXAMINATIONS.—PREPARATION in FRANCE by B. ARNETT, M.A., Cantab., J. J. RIX, B.A., Cantab., and F. BREITENSTEIN. S'addresser au Château de Rigeard, Chartres, France.

A WIDOW LADY, who has successfully brought up a large family, would like to TAKE ENTIRE CHARGE of MOTHERLESS CHILDREN, or a FAMILY, whose friends are abroad. Large house, standing in its own grounds. Happy home. First-rate educational advantages and motherly care guaranteed. Resident English, French, and German Governesses. Terms very moderate. Excellent references can be given.—Address, Mrs. KIMMINS, Ebley Court, Stroud, Gloucestershire.

MILITARY EDUCATION, GERMANY.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

University Candidates for Sandhurst are received as non-resident pupils. Mr. W. A. Grant passed 4th into Sandhurst in this competition at the last Examination held.

Special arrangements made for officers studying for the Staff College or other Military Examinations.

MILITIA COMPETITIVE EXAMINATION.

The standard originally fixed for this Examination having been much raised in September, 1881, no results previously obtained should be taken into account in considering the successes obtained by Militia pupils. Since the date named, there have been three competitions. At these trials Colonel WILKINSON and Lieutenant-Colonel SHAW have secured 24 Commissions for their pupils, although they have only prepared and sent up a very limited number for Examination. The names of all successful pupils have already been published, with the exception of the following:—Lieut. A. G. Ferguson; Lieut. W. H. Ellis; Lieut. M. S. Riach; Lieut. W. V. Eccles; Lieut. H. P. C. O'Farrell,—these passed at the September Examination lately held. Lieut. G. Buchanan took 42nd place on the same occasion, being only 8 marks out.

Also, at the October Literary Examination, Lieut. C. J. Stanton took 4th place on the list.

The results obtained at other Examinations bring the general score up to Forty Successes, achieved by pupils in the last 14 months; during that period the number of pupils on the strength of the establishment, resident and non-resident, has always been limited to 60.—Address, DARMSTADT, GERMANY.

SANDHURST, WOOLWICH, C. S., MILITIA, &c.—The Rev. A. PRITCHARD, M.A. Oxon., assisted by his Brother, Professor PRITCHARD (late R.M. Academy, Woolwich), and a large Staff of resident Assistant-Tutors, PREPARES for any of the above.

The next Term will commence Jaunary 3, 1883.

For particulars of all this year's successes and previous ones, address Rev. A. PRITCHARD, Hill Lands, Wargrave, Henley, Oxon.

OXFORD RESPONSIONS, and all UNIVERSITY MATRICULATIONS.—VACANCIES caused by successes last week at Oxford Responsions.

Address, Rev. A. PRITCHARD, Wargrave, Henley, Oxon.

MILITARY COMPETITIVE for MILITIA OFFICERS.—The Rev. A. PRITCHARD, who is assisted by a retired Field Officer of 8 years' experience as a Garrison Instructor, has, during the year 1882, gained five Commissions with the 14 Candidates who went up from him.

For particulars of marks, places, &c., address Rev. A. PRITCHARD, Wargrave, Henley, Oxon.

LIEUTENANTS of MILITIA desirous of competing for Line Commissions can be received by the Rev. WALTER BAKER, M.A., at Batcombe Rectory, Evercreech, Bath. They will be thoroughly prepared in all Military Subjects by Major Dickens (late 11th Foot), Staff-College Graduate, formerly Assistant Royal Engineer, S.E. District, assisted by Lieutenant-Colonel Coates (late 99th Regiment), formerly of the R.M.A., Woolwich, and Acting Brigade-Major at the Cape.

Great individual attention is given, as few pupils are taken, and each comes under actual *vivâ voce* instruction for 6½ hours a day. Since the introduction of the Military Competitive, out of Thirty-nine Lieutenants of Militia sent up, Twenty-four have been successful, several taking high places in the list. There are opportunities for healthy country amusements and games, a cricket and football ground, lawn-tennis courts (grass and asphalte), a private billiard-room, &c., and in all other respects a liberal and gentleman's establishment is kept.

A Large Staff of Experienced Tutors, all resident, assist in preparing for the Qualifying Examinations, and for the Sandhurst and Woolwich Competitions.

References to parents of successful pupils.

NAVAL CADETS, ASSISTANT CLERKS
HOPE HOUSE, SOMERSET PLACE, SOUTHSEA.
Principal—Mr. T. H. VICKERY.

In addition to the general course of study pursued at this long-established School, Pupils are specially prepared for the Examination required for the above.

At the late Competitive Examination in June, for Assistant-Clerkships in the Royal Navy, THREE of the Five successful competitors were Pupils of this Establishment, taking First, Third, and Fourth places. And THREE passed the test of qualification.

TO ARMY TRAINERS and MILITARY STUDENTS.

The undersigned offers his services in PREPARING LIEUTENANTS of MILITIA for LINE COMMISSIONS, and Officers of Volunteers and Militia for Promotion Examinations, under G.O. No. 20 of 1882.—Apply to Colonel W. J. STEWART, care of Messrs. H. S. King and Co., 45 Pall Mall, S.W.

ARMY EXAMINATIONS.—The Establishment formerly conducted by Dr. LAUMANN and Mr. ELDERTON at Fulham, is now carried on by the latter at MANOR COURT, Hanwell, where pupils are prepared for the above Examinations. Average number of pupils, 10; average number passed per annum, 8.

KINGSLEY COLLEGE,
WESTWARD HO!
Head Master—Rev. F. HEWSON WALL, LL.D.

Visiting Council.
Vice-Admiral Sir Wm. M. Dowell, K.C.B.
Robert Ellis, Esq., M.R.C.S., &c.
Rev. Roger Granville.
General W. N. Hutchinson.
Colonel Kennard, M.P.
Major-General Molesworth, R.H.A.
Sir George Stucley Stucley.
Rear-Admiral A. T. Thrupp.
Secretary, Ambrose Berkeley Wall, Esq., R.N.

The EXAMINATION for the following EXHIBITIONS will commence on April 3, 1883:—(1.) Two KINGSLEY Exhibitions, value £15 each. (2.) Two MOLESWORTH Exhibitions, value £10 each. (3.) Two ARLINGTON Exhibitions, value £7 10s each. (4.) Two ARLINGTON Exhibitions, value £5 each.

ARMY.—LINE and MILITIA.

IMPORTANT to STUDENTS.

Captain DUMARESQ de CARTERET BISSON, M.A., Author of "Our Schools and Colleges" (graciously recognised by the Queen and H.R.H. the Commander-in-Chief), sends, free by post, a selected List of Prospectuses of all the most SUCCESSFUL ARMY TUTORS, and gives his Counsel on Military and Civil-Service Education free of charge. Reference kindly permitted to the late Secretary of State for War.—Address, Captain BISSON, No. 3 Berners Street, London, W.

ARMY,
CIVIL SERVICE, UNIVERSITIES,
PUBLIC SCHOOLS.

MESSRS. BISSON, BORMAN, and CO. send, free of charge, PROSPECTUSES of the most SUCCESSFUL TUTORS for Woolwich, Sandhurst, Military Competitive, Staff College, Home and Indian Civil Services, Universities, Public Schools, &c.—3 Berners Street, W.

ARMY EXAMINATIONS, &c.—In the late Examinations, Mr. WATKINS, late Scholar, Christ's College, Cambridge, passed Messrs. Plomer, Panton, Carpendale, Brownlow (U.C.), and Voyle (I.C.), for Sandhurst, and Mr. Cronin took honours at the Academy; Mr. Brett qualified for Woolwich.

Twenty-two other Pupils have taken high places past year for the above, the Universities, Student Interpreterships, and Militia Examinations, Military and Pass.

A Class for Staff College.

Address, 90 Kensington Park Road, W.

LIEUTENANTS of MILITIA.—A COURSE of INSTRUCTION, including Fortification, Surveying, Tactics, Army Discipline Act, Drill, Queen's Regulations, &c., given by Major DAUBENY and A. PINHEY.—Apply to A. PINHEY (late R.A.), Burlington House, Spring Grove, Isleworth, W.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS., 28 miles from Euston.—Twenty-seven School Scholarships; Four Exhibitions from the School. Four Open Scholarships or Exhibitions gained in 1881.—Address Rev. E. BARTRUM, Head Master.

185 PICCADILLY, LONDON.

HOLLOWAY'S OINTMENT and PILLS.—Diseases of the Skin.—No case of disease of the skin, be its nature what it may, has failed to be benefited when these potent remedies have been properly applied. In scrofulous and scorbutic affections, they are especially serviceable. Scurvy, eruptions, and glandular swellings, which had resisted all other modes of treatment and gradually become worse from year to year, have been completely cured by Holloway's cooling Ointment and purifying Pills, which root out the disease from the blood itself and leave the constitution free from every morbid taint. In the nursery Holloway's Ointment is simply invaluable; it will give ease in sprains, contusions, burns, scalds, and infantile eruptions, and may always safely be applied by any ordinary attendant.

Swords, cloaks, belts, sashes, saddles, &c. for nearly every regiment in her Majesty's Service. Uniforms and apparel purchased.

2/- TEA OF EXTRAORDINARY QUALITY,

As Supplied to Dukes, Earls, Barons, and the County Families of England.

THE unprecedented depression in the Tea Market now enables COOPER COOPER and CO. to offer such value in Tea as would, a few years ago, have been considered simply impossible, but is now a realised fact, for at

TWO SHILLINGS

A POUND,

COOPER COOPER and CO. are able to supply Tea of amazing strength and exquisite quality, while the choice kinds at Three Shillings a pound, which are coming to hand in lessening quantities year by year, COOPER COOPER and CO. have the greatest difficulty, after ransacking the markets of China and India, in procuring in sufficient quantities for their consumption. These choice and selected Teas COOPER COOPER and CO. have the honour to supply to many Foreign Princes, Potentates, Ambassadors, &c.

THE enormous success—without competitors and with no rivals—which has attended the sale of COOPER COOPER and CO.'s Teas is perhaps unparalleled in the annals of this or any other trade, and can only be accounted for by the way in which their business has been conducted, which has gained the patronage of all classes. COOPER COOPER and CO. number among their customers Princes, Dukes, Earls, Barons—in fact, a large per-centage of the entire Peerage—Church dignitaries of every grade, and ministers of all denominations, County Families from every county in Great Britain, and from all classes of the community. COOPER COOPER and CO. are also shipping their Teas every day to foreign parts. Paris would appear to draw its supplies from COOPER COOPER and CO.'s Stores, and in almost every large city, and especially in the seaport towns of Europe, Asia, Africa, and America—in fact, to the very ends of the earth—COOPER COOPER and CO.'s Teas and COOPER COOPER and CO.'s name are known.

COOPER COOPER and CO. have their own Agents in China and India, and are consequently able to sell their Tea at a price which is actually under that which wholesale merchants, brokers, &c., charge to ordinary dealers. They are enabled to do this as they have not the expense of travellers, and no bad debts to provide for, their terms being strictly for nett cash before delivery. They also save an immense amount by keeping no horses and vans—many houses having from 20 to 100 horses, vans, and two men to each, to deliver, sometimes, half-a-pound of tea miles and miles away, this overwhelming expense having all to come out of the quality of the Tea.

COOPER COOPER and CO. have, in fact, no expense but indispensable rent and labour, which in consequence of still-increasing business, amount only to a fraction on the price of the Tea they sell.

COOPER COOPER and CO. may mention that they include among the regular buyers of their Tea a great many London Tea Brokers, from the simple fact that it can be purchased cheaper and better from them than from the importers themselves

COOPER COOPER and CO. sell their Teas for ready money only. They have thus no provision to make for bad or doubtful debts.

AND now a word about this year's crop. It is hardly satisfactory on the whole, but some of the choice crops secured by COOPER COOPER and CO. are simply delicious, COOPER COOPER and CO. are still enabled to sell the very best at Three Shillings a pound, and it is veritably a marvel of goodness—a "thing of beauty" and "a joy for ever." But the most astonishing thing of modern times is the Tea at Two Shillings a pound which COOPER COOPER and CO. are now selling. The rich and wealthy buy this Tea. Ladies drink it in their boudoirs and at their early drums, and, as one of our country patrons writes, "It is lovely."

COOPER COOPER and CO. may add that Indian Tea is becoming day by day a greater favourite among the best judges, and this year's crop has been prepared with greater care than ever. It is strong, pungent, with most agreeable flavour, and the better it is known, the more it will be liked. The Tea is 3s a lb., for the best.

COOPER COOPER and CO. charge threepence a package (of any size) for delivering their Teas at any of the Railway Stations in London, or any place within the limits of the London Parcels' Delivery Co., thus putting all on an equality; those who send for their tea, and those who require it sent.

COOPER COOPER and CO. do not pay railway carriage, but are willing to compound for the same on receiving the sum of 6d. in addition to the price of the Tea, to any Railway Station in England, on quantities of the value of £2 and upwards. Families residing in the country can thus, by clubbing together, have their Tea sent almost carriage free, as well as save about 9d a lb. in the cost.

SODA-WATER MACHINES

BY BARNETT AND FOSTER,

20N FORSTON STREET, LONDON, N.

From Major POWELL, "Army Service Corps."

South Camp, Aldershot.

Gentlemen,—I have much pleasure in testifying to the value of your Machinery for manufacturing Aerated Waters. The Soda-Water Machine and all its accessories which you supplied to the Army Service Corps at Aldershot last summer, is everything that could be desired. It is simple in construction, is easily worked, and produces excellent Soda Water, Ginger Beer, Lemonade, &c., &c., besides which it is perfectly safe in unskilled hands, and appears to be of the best quality and workmanship.

Should the Officers of any Regiment or Corps serving at home care for particulars as to the course we pursued in starting our Machine, the experience we have gained, and the benefits it is conferring on the corps generally, you are at liberty to refer them to me, and I shall be happy to enter fully into the subject with them.

I am, Gentlemen, yours obediently,
R. H. POWELL.

To Messrs. Barnett and Foster, London.

Nearly every Regiment abroad is supplied with Machine for making Aerated Water.

CATALOGUES FORWARDED FREE.

THE

GENERAL AGENCY AND EXCHANGE,

THE voluminous Blue-book containing the Report of Lord Airey's "Committee on Army Reorganisation" teems with evidence that short service in the British Army had, up to the date of the inquiry by that body, proved in every practical point of view a complete failure. The regiments sent out to the Zulu War in 1879—even after they had discarded several hundreds of their youngest recruits—were, according to the testimony of many distinguished officers, both combatant and medical, simply unfit for service, if that service had been against European troops, or in an unfavourable climate. The account given of the regiments sent out for service in India in recent years is even more damnatory. Sir Henry Norman, who was examined as to "the working of the present system so far as regards India," supported his condemnation of it by the production of a paper from the Government of India, forwarding the opinions as to the age and length of service suitable for that country, given by "the Commander-in-Chief in India, the Adjutant-General in India, nine General officers, six Royal Artillery, five Cavalry, and ten Infantry officers; of the Surgeon-General British Medical Department, three Deputy-Surgeons-General, nine Surgeons-Major, and the Sanitary Commissioner with the Government of India." He also produced a minute of Council of India of May 27, 1879, from which it may suffice to extract a single sentence:—"The state of the 2nd Battalion 6th Regiment, which has just landed in India, almost bare of qualified non-commissioned officers, a state which arises entirely from the present system of engagements, and is inseparable from it, is in itself sufficient to condemn that system as applied to India." Lord Airey's Committee was composed of the under-mentioned officers, besides himself:—General Lord Napier of Magdala, G.C.B., G.C.S.I., General Sir J. Lintorn Simmons, G.C.B., General the Earl of Longford, K.C.B., Lieutenant-General Sir P. L. MacDougall, K.C.M.G., Lieutenant-General J. W. Armstrong, C.B., Lieutenant-General Sir H. W. Norman, K.C.B., C.I.E., Major-General Sir A. Alison, Bart., K.C.B., Colonel W. B. Saunders, R.A., Colonel H. P. Hutton, 30th Regiment, and Colonel T. S. Bigge, 5th Fusiliers, with Colonel E. H. Clive, Grenadier Guards, as secretary. No better Committee, it is safe to say, could have been formed; and in the list will be recognised several officers not only of distinction and ability, but well known as prominent members of the progressive school. This Committee reported:—"We have taken a great deal of evidence from officers in high position on the Staff, as well as from a very large number of witnesses who have had practical experience in the battalions themselves, as well as in depôts, of the working of the system of short service and linked battalions with Local Brigade Depôts, as it has hitherto been conducted, and find a complete unanimity as to its defects." Of the seventy-two witnesses amongst whom this complete unanimity was found, and whose evidence is appended to the report, may be mentioned his Royal Highness the Commander-in-Chief, the Adjutant-General, Sir Charles Ellice, the Quartermaster-General, Sir Daniel Lysons, the Inspector-General of Recruiting, the Director-General of the Army Medical Department, Field-Marshal Lord Strathnairn, Generals Sir Thomas Steele, Sir Samuel Browne, Lord Chelmsford, Hardinge, Taylor, Cameron, Newdigate, Radcliffe, Sir Henry Havelock, and Sir Evelyn Wood. Now, as to the "defects" themselves, regarding which there was such authoritative unanimity, did these consist of mere trifling flaws and blemishes upon a system in the main sound, or were they dangerous diseases, affecting the system in its very vitals? The answer to this question is left by the Report in no manner of doubt. The "defects" of the short-service system—in addition to some others, to be afterwards adverted to, in connection with the linked-battalion and brigade-depôt system—were described as having manifested themselves chiefly in the following particulars:—I. The immaturity of the men and their unfitness for soldiers' work.—"The Principal Medical Officer in South Africa writes:—'It is a fact worthy of remark that nearly all the sick of this brigade are youths who are physically incapable of undergoing the fatigue and exposure to which they have been subjected.' The Principal Medical Officer in Afghanistan describes one regiment as 'wholly demoralised,' and states, 'They are composed almost wholly of young soldiers, and coolie labour has to be employed in handling the baggage.' This confirms the generally received opinion, both of military and medical authorities, in which we entirely concur, that immature youths such as we have described should not be counted as effective soldiers for service in the field. If the evil had only existed to a small extent, we should not have directed attention to it, but as it appears that out of about 39,000 rank and file serving in battalions at home, there were lately only 11,752 men who had more than two years' service, and that, as before stated, so very large a proportion are enlisted under 20 years of age, we are of opinion that the evil is one which, if not checked, may be productive of very serious consequences." II. The great waste shown to exist during the first six years of service, and attributable principally to the following causes:—"1, The imperfect physical condition of recruits, causing an undue amount of casualties from deaths and invaliding; 2, desertion; 3, purchase of discharge; 4, discharge of bad characters. The evil is one which must not only affect the discipline and efficiency of the Army, but adds enormously to the difficulty of maintaining its ranks at the required strength. This difficulty has been increasing for many years, and is one which requires very serious consideration." III. The consequent expense entailed thereby, estimated at more than half a million per annum.—"From a return furnished by the Adjutant-General, dated January 13, 1880, it appears that in the three years, 1876, 1877, and 1878, 12,636 men left the ranks in the year in which they enlisted, 11,177 in the following year, and 3,044 in the second year after that in which they enlisted, making a total of 26,857 as the waste within that time. From the estimated cost of a soldier during his first and second years of service, as furnished by the Accountant-General, it is approximately calculated that the cost of the 26,857 men who thus disappeared amounted to £1,532,200. Their total cost, therefore, which represents an actual expenditure of more than £500,000 yearly, has not only been absolutely useless, but it would have been far better for the service if it had never been incurred. This useless expenditure is entirely due to the loss of young soldiers, and therefore, as the number raised during the years upon which these calculations have been based has been only 28,800, whereas, according to actual calculation, under the present system 36,000 will be necessary to maintain the Army at its present strength in future years, it will certainly increase, unless measures are adopted to check it." IV. The deterioration in, or rather the threatened entire disappearance of efficient non-commissioned officers.—"We have taken a great deal of evidence from Staff and Regimental officers, in all of which there is a general concurrence of opinion that, under the present system, there is great difficulty in obtaining non-commissioned officers of the same type as those who have been created under the old, long-service system, and who are rapidly dying out of the Army; there has been a necessity for promoting very young soldiers, who have not sufficient knowledge and experience to command the respect of those under them, and there is a general apprehension, which we fully share, that unless effectual measures are taken without delay to remedy this evil, the discipline and efficiency of the Army will be most seriously affected, not only as regards the performance of its duties in peace, but also with respect to its steadiness in action. The evidence of officers who have served in the late campaigns, especially those who served with and had opportunities of observing the conduct of the young regiments sent out to South Africa last year, is conclusive on this point." V. The inapplicability of the Continental system "to the conditions of our service, in which one-half of the Army is always abroad."—"We have taken a great deal of evidence and heard many opinions on this most important and difficult subject—length of service—which, as it presents itself for consideration in the British Army, is a totally different and much more complicated question than with any existing army in the world. In the large Continental States, where the system of short service with the colours, and a longer service in the Reserve has been brought to such perfection that a standing Army of several hundred thousand men can, in a few days, be completed by thoroughly trained soldiers to three times its normal strength, with transport and supply columns complete, and with a large, well-trained Reserve in addition for home defence, or, if need be, to reinforce the active Army, the problem is simplified by the fact that during peace the service is all within the limits of the country itself, and there is no necessity for maintaining a large force at distant stations abroad. . . . . . With this system each unit is in itself a training depôt, almost the sole duty of which is to be always converting new recruits into soldiers, a duty which is never interrupted, except on the occurrence of war. If we assume the minimum of service required for training and disciplining a recruit, and for the maintenance of an effective cadre for that purpose, to be three years or thereabouts, after which a man passes into the Reserve, it is evident that the Continental system in its simplicity cannot be applied to the whole of our Army, because its duties abroad could not be accomplished with a force so formed, and having so short a period of Army service." VI. The fact, as regards our Reserves (the creation of which was the primary object of Short Service), that though available in the rare event of "imminent national danger or great emergency," they are wholly unavailable for those small wars in which this country is so frequently engaged; the inadequacy, if not the entire absence, of measures for the proper training of the Army Reserve, and the errors of administration which had already made themselves manifest in the "measures to be adopted if the Reserve is called out." Such were the main "defects"—if we are to continue using a term ridiculously inadequate—which the Committee found in the actual working of that system which Lord Cardwell had so magniloquently introduced, and the *Times* loudly trumpeted, ten years before. The Committee describe "the materials for the Army" as having been "hitherto wasting away at such enormous rates without benefit to the Army or to the country, but, on the contrary, involving a vast, useless, and mischievous expenditure of money, impairing the efficiency of the Army, and retarding the formation of the Reserves." Nor is there any want of still more pointed language to be found in the evidence of distinguished and most competent witnesses. "Short service," says General Sir Thomas Steele, "combined with the great waste of men, has destroyed regiments." But perhaps the pith of the matter could hardly be better brought out than in the words of H.R.H. the Commander-in-Chief, when he says, "We have sacrificed the Army to the Reserve." Surely, then, the Reserve itself must be a thing in some degree worthy of so heavy a sacrifice? We have already seen what were the promises of Lord Cardwell and the *Times*, and how it was even thought necessary to take precaution in the Enlistment Act of 1870 by limiting the Reserve to be created under it to 60,000 men. But what have those promises come to? In the words of a witness examined in July, 1879, "The position of things is this, that you have 17,000 men in the Reserve, and if you put the Infantry proportion into the ranks of the Line, you would not have as powerful a body of infantry as you had before the Crimean War." On the 1st January, 1881, the Army Enlistment Act having been in force nearly eleven years,—the numbers of the Army Reserve, Class I., were 20,126,—these men, be it noted, being wholly unavailable for "small wars," liable for service only in case of "imminent national danger or great emergency," while even with regard to this event, in view of the immediate fitness for service in the field of the regiments to which they would be posted, the gravest doubts have been expressed. This, in short, is the great result for which "we have sacrificed the Army" and "destroyed the regiments." The effects produced by the Short-service system up till the year 1879 are forcibly epitomised in the summary of the evidence of Colonel William Mure, a Liberal M.P., since, unhappily, deceased, whose opportunities of observation he himself describes thus:—"I have formed my opinions from a very constant watching, as far as the opportunities of a civilian afford him the means, of the condition of the Army. I have attended repeatedly at recruiting, in the rooms where recruits are brought up. In London, for instance, I am constantly at St. George's Barracks, and see what is going on. Thus I see the recruit from his very beginning. I am constantly at Aldershot, and I have from time to time visited the gymnastic rooms there, where very valuable information as to the physical condition of the Army can be obtained. I have had the advantage, from an intimate acquaintance with many officers, of seeing things the means of seeing which, perhaps, are not always at the disposal of a pure civilian who has not many friends in the Army; and also I have been at reviews, and taken opportunities, when reviews have entailed a march, with two or three days' outing, of watching with my own eyes, and afterwards more carefully ascertaining the manner in which the Infantry regiments of the Line bear fatigue. So your Lordship will see that my opportunities, though general, have been valuable." A very competent witness, undeniably, and the following is what we find as part of the summary of his evidence:—"The results of short service have been (1), the worst body of non-commissioned officers that we ever had, and gradually deteriorating; increased amount of petty insubordination and graver crime; increase of desertion, combined with fraudulent enlistment; (2), youthful, slightly-trained, poorly-disciplined regiments; (3), insufficient supply of recruits in good times, and the enlistment of puny boys of bad character in bad times. Lastly, a feeling of mortification and distrust pervading all ranks. Of recruits enlisted in 1877, one in seven had disappeared in little over a twelvemonth. Difficulty is experienced in getting good men to take stripes; the best non-commissioned officers are eager to get back to civil life. Amongst officers, there is a general feeling of dissatisfaction. Short service was founded on a total misconception of the ordinary duties of the British Army; miscalculation of rate of increase of Reserve; miscalculation of steady absorption of recruits; mistaken estimate of popularity of short service, founded on experience of foreign nations having national conscription." But the opinions of Departmental Committees, and the evidence embodied by them in ponderous and expensive Blue-books, do not very readily come into the possession of the outside public, especially when it is not altogether convenient for the Department itself that they should do so; and Mr. Childers having determined—doubtless, on the recommendation of his trusted advisers at the War Office—to ignore all the more essential recommendations of Lord Airey's Committee, its Report was not presented to Parliament for nearly a year and a half after the date of its signature, notwithstanding the repeated and urgent appeals of Members of both Houses. We think we have succeeded in showing by the somewhat lengthy extracts we have given that the evidence of Lord Airey's Committee was dead against short service as it existed when that body commenced its labours. Unfortunately, the space at our disposal this week prevents our going more fully into the subject at present. We shall recur to it again, for the more we look into the matter, the more evident does it appear that the reformers have been working in a wrong groove. We have all along opposed the principle of short service as Lord Cardwell introduced it, because we saw from the first, notwithstanding all the cogent arguments brought forward by the *Times*, that it would prove a failure. It did fail, and it failed exactly where we said it would do.

THE Admiralty have of late made so many blunders, not to use a harsher term, in their administration of the Navy, that we have been forced to speak with no uncertain voice. It has always been our policy, and will always remain so, to give a general support to the Admiralty, as the representatives of the Crown, assuming, as we do, that the Board, as officers and gentlemen, are actuated by the best motives, and by the good of the service. But we have always reserved to ourselves the right of criticism and censure to the fullest extent, in all cases when Naval officers generally would say that the Admiralty were wrong. We may at times have been at fault, but, at any rate, we have always been honest in our endeavours to improve the position of all classes in the Navy, its organisation, and its matériel. The noblest motive is the public good, and by improving the state and condition of the Navy, our first line of defence, we add to the security of the country. For, as the Act of Parliament lays it down, it is, under the good providence of God, on the Navy that the wealth, safety, and honour of the country chiefly depend. Of late, however, the Admiralty have been doing that which they ought not to have done, while leaving undone that which they ought to have done, in a most marked manner; and were we to refrain from exposing the mistakes and faults which they have committed, and we might almost say the crimes they have perpetrated, we should not be doing our duty to the Navy. Hence, we are forced to speak plainly, and very plainly indeed, when we see a body of officers and gentlemen encouraging anonymous letters from subordinates, reporting their superiors. In the promotion of Ship's Corporal Hadden, the first and certain step has been taken towards sowing the seed of insubordination throughout the service. The Admiralty have promoted this man as a reward for the part he took in exposing the frauds on board the *Clyde*. They have thus placed a direct premium upon espionage in the service. And this step has been taken in utter disregard of the fact that commissioned officers have time after time been severely reprimanded, removed from their ships, and condemned to rusticate on shore for the remainder of their lives, on a scant half-pay, for having merely dared to forward a letter direct to their Commander-in-Chief, when their own commanding officer had declined to receive or forward it. And yet these officers had strictly adhered to the Queen's Regulations and Admiralty Instructions, while the ship's corporal just promoted has contravened those Instructions in every way. Had he reported the irregularities going on in a proper and service-like manner, and thus have openly and straightforwardly exposed the fraud, he would have deserved promotion. But officers have not only been reprimanded for complaining of the conduct of their commanding officers when they had just ground for so doing, but have been dismissed their ships, have been recalled home, and have had their future prospects in the service entirely ruined. And yet they had only endeavoured to do their duty, strictly and honestly. Many have never been employed again, while the defaulting senior has received special marks of the favour in which he has continued to be held at the Admiralty. The knowledge of these facts did deter Hadden from openly reporting his superiors through his commanding officer. He sent an anonymous letter, and has been rewarded for so doing. How, we ask, is it possible for officers to do their duty strictly honestly, and honourably, under such conditions? To accept individual responsibility in an emergency is now what every officer endeavours to shirk, well knowing that he dare not count on the support of the Admiralty. Indeed, "individual responsibility" is dead in the Navy. And yet it was the assumption of that very responsibility in troublous times, or in emergencies, which did so much to make the Navy of England both feared and respected all the world over. Officers have, in consequence of the want of impartial legislation at the Admiralty, had to put up with the most tyrannical treatment from their superiors, well knowing that to complain meant ruin. We do not for a moment suppose that they need expect other treatment now at the hands of the Board, and we therefore advise them to co-operate in a serious endeavour to bring about a much-needed measure of Naval reform, and the reorganisation of all branches of the service. The reform should commence at the very top of the tree, pruning down the gnarled limbs of that Upas tree which has developed its baneful growth in Whitehall, while carefully training the tender shoots of "heart of oak" which are springing up in the Navy. So long as Naval officers remain disunited, without service *esprit de corps* to band them together, other than ship rivalry—which is no spirit capable of any good thing, as it only unites those temporarily serving together on board the same ship—so long will those officers of high rank who temporarily rule over the destinies of the service be able to administer the Navy as they may think fit. The Lords of the Admiralty do not legislate on any fixed principles, but according to the dictates of their own particular whims, "fads," and fancies. There is really no authority in the land superior to their own in Naval matters, and the officers temporarily sitting at the Board have full liberty to do as they like. Each may have his own particular favourites, men who have served under him most probably, and may promote them as he thinks fit, regardless of the opinions of the whole world. That is why it is a common thing in the Navy to see each rising officer with a regular following of his own in every branch of the service, and when he does get a chance, these are the men he promotes, or places in good billets. But how mindful are the Admirals of their own rights, prerogatives, and privileges! They carefully legislate to debar their successors in office from overcrowding their own special lists, while they leave the door open to unlimited patronage in the others, making but a faint show of safeguarding the interests of their juniors. Interest is not supposed to affect promotion, and yet specially-favoured officers are promoted over the heads of a couple of hundred of their comrades, many of whom have far greater claims to advancement. It is this "demon of Patronage" which is the curse of the Navy. Is it possible to get rid of it? Most assuredly. But to do so, Naval officers must be of one mind, and pull together. That, they cannot do, as long as the present system lasts. For they are strangers to each other. Few men serve two commissions together, and even when they do, their comrades in the second ship know little or nothing of them, and it takes some time for them to become friends. By that time the commission is over, and the mess is broken up, the messmates separating, never again, perhaps, to meet in this world. Hence, little or no real *esprit de corps* exists in the Navy. It is every man for himself, and "Old Nick" for us all. But, "Old Nick" takes care of his own "Mother Carey's chickens." Those not specially marked with the "broad arrow" need hope for but little favour and scant grace. A short shrift and a long spell on shore in inactivity, unable to make both ends meet on the scant half-pay, is all they have to look forward to, should they fail to please "Old Nick's" friends. And now, to make matters worse, he has invited these to act as private detectives throughout the Fleet, and to forward to him anonymous communications, giving him the straight tip as to where he can insert his tormentor. What a charming life will not Naval officers lead on board her Majesty's ships in the future! Each man will be looking at the other askaunt, wondering whether he intends to betray him. The Admiralty are well aware that the cohesion among Naval officers is not strong. But if they desired to further weaken it, and effectually ruin the service, they could hardly, not even with the cunning of the Evil One, have hit upon a better plan than that of placing a heavy premium upon espionage. For this may be calculated to divide the Navy into a still greater number of small societies than at present exist among its *personnel*. Then a truly Oriental weakness will grow up among our seamen. And when any three of them are bound together for a common object, the inner thought of each will be to watch for the most favourable opportunity to betray the other two, by sending an anonymous letter to the Admiralty. The sooner, therefore, that Naval officers found a Reform Club or Association, with the object of clearly placing before the country, and exposing, the many vices inherent in the present system of Admiralty administration, the sooner may they hope to secure a just measure of Naval reform. And the Admiralty know it. They trust, however, in the want of cohesion in the Navy, and have placed a heavy premium on espionage, in the hope that, by this means, they will so much weaken Naval *esprit de corps* as to render any combined action against their rule impossible. But there is a party in the Navy which only needs organisation, to become a force that may well make Naval office-seekers uneasy.

HOME truths are not agreeable things to deal with, but, like physic, they are most necessary at times. We have before commented on the singular apathy of successive Admiralties in omitting to provide the Navy with an efficient Fleet of swift Cruisers to protect commerce. This neglect is the more noteworthy from the fact that Russia, at a critical moment, hung on our flanks with a Fleet which, insignificant as it may appear now the danger is past, would have inflicted more injury to England than we can at this hour realise. Thanks to the judicious firmness and tact of Lord Beaconsfield at the Berlin Conference, the country was spared plunging into a conflict for which, in at least one arm of the service, she was wholly unprepared. It is scarcely too much to say that on none of the great highways of commerce had we a ship capable of overtaking the impromptu cruisers which were ready to steam out of American ports, under the guidance of Russian Naval officers,—and manned by whom? The remarkable speech of the representative of the San Francisco merchants, on presenting the golden casket to Lord Beaconsfield, indicated the deep feeling which prevailed amongst men who were capable of estimating the gravity of the position in which they were suddenly placed. To protect the floating wealth between that port and Cape Horn, we had only a few antiquated wooden corvettes, without speed, without coal-capacity, and without that elaborate construction of hull which alone can offer a chance of safety when opposed to the artillery of modern warfare. When this class of ship was competent to uphold the honour of the English flag against all comers shell guns were unknown, and the round shot simply made a hole which the old-fashioned shot-plug easily blocked. Have the officers who are responsible for the efficiency of the Navy ever contemplated the effects of shell fire or collision on ships which are imperfectly bulkheaded and composite built, a method of construction rendering them subject to risk alike by fire and by water. The skilful mechanic cannot always ensure that the most careful forging of the planking to the frames will make an effective joint, or, if made, that temperature, caulking, and straining will not distort it, and allow water to percolate behind the frames; much less will it stand, if riven by artillery or ramming. Briefly stated, we must give up the idea of building ships, and apply ourselves to the problem of producing effective fighting machines. The country whose foresight enables them to effectually solve this problem will, in the event of a Naval war, steal a march on their opponents whose effects may be measured by that of the needle-gun on the armies of Austria during the campaign of 1866. Recently, the Admiralty Board has been supplemented by the acquisition of one of the greatest mechanicians of the age, but it is no detriment to him to assert that the mechanical element of the Constructive Department has not shown itself deficient in any of the great qualities requisite for their important posts. Ships are not equal to the duties they may be called on to perform, from the simple fact that official experience has failed to point out the exact type required. The last example of this is the *Polyphemus*, and it is not unreasonable to ask from what source, for it certainly was not practical experience, the framer of the idea drew his inspiration. It is a well-established fact that it will not require a breach as wide as a barn door in the side of an ironclad or a cruiser to render either *hors de combat*. The melancholy loss of the *Grosser Kurfürst*, and in a humbler way the *Amazon*, are practical examples of this fact, clearly indicating that something beyond mere thickness of armour will be required for the rough usages of war. Since the appearance of our article in the *Army and Navy Gazette* of the 6th inst., the Atlantic liner *City of Brussels* has been sunk off Liverpool, by accidental collision with an ordinary merchant steamer. As this fine specimen of naval architecture was built in 1869, it is presumed her decks are clearer of incumbrances than those of a more modern type, thus rendering her conversion into a man-of-war, so far as this particular factor is concerned, tolerably easy of accomplishment. Her loss indicates in the clearest manner how utterly unfit she was for a fighting ship, supposing, as is not improbable, that her name is on the roll of proposed cruisers. She was disabled in a moment by the stem of the *Rydal Hall*, and foundered a few minutes afterwards. The bubble blown from the pipe of a schoolboy would probably have remained intact as long, yet this is the class from whence the Navy is to draw its supports. Without prejudice, it may be fearlessly asserted that few of the class are superior to the *Brussels* in all that constitutes an excellent transport, but he must be a sanguine man who would essay to convert her into an effective man-of-war. Scarcely a week elapses without similar accidents being recorded, and we trust the Admiralty will ponder well, before committing themselves to an innovation which carries danger in its inception, and disaster in a probably not distant future. Later on, we hope to refer to another weak point in our defensive armour, the First-class Naval Reserve, which, by a singular apathy, has been allowed to drift on in the sailing-ship groove, a sure indication that old-fashioned ideas still survive in the close circle who rule the maritime destinies of a nation of seamen, whose wide-spread commerce grasps in its folds the wealth of the frozen regions of the North, the classical countries of the Old World, and wherever a keel may float in either hemisphere.

H.R.H. Prince Albert Victor of Wales has been appointed Honorary Sub-Lieutenant of the Royal Naval Reserve, from January 8, 1883.

We are in a position to confirm the statement made in these columns some three months back, that Lord Alcester will join the Board of Admiralty on his return to England, in succession to Sir A. Cooper Key.

A Naval Pension of £50 a year has been placed at the disposal of the Admiralty, by the death of Retired Commander J. Delancey Robinson.

Lord John Hay will proceed to Malta in the *Lively*, and the new crew for the *Alexandra* will leave England in the *Nepaul* on January 20. Captain Harry Rawson will act as Flag-Captain, and Mr. George F. Newcom, Paymaster, as Secretary to the new Commander-in-Chief of the Mediterranean Squadron.

Vice-Admirals Sir Leopold M'Clintock and the Hon. Fitzgerald A. C. Foley are both spoken of as likely to succeed Lord John Hay at the Admiralty. An endeavour has been made, we hear, to induce the senior Admirals on the List to retire, so as to make way for the promotion of the First Sea Lord, but it is said the *pourparler* has fallen through. If Sir Astley Cooper Key remains until his turn comes round to be promoted to Admiral of the Fleet, he will not vacate his seat at the Board for another twelve months, unless, indeed, death vacancies supply what negotiation has failed to procure; and in this case, it is possible that Lord Alcester will succeed Lord John Hay.

The fortifications in Kiel Bay, which are already of a very formidable nature, are to be further strengthened by sixteen new forts. It is probable that the greater number of them will be placed inland, so as to defend the great German Naval Establishment against an attack by a hostile army. The first of the Chinese gunboats built at Stettin—the *Ting Yuen*—is to proceed to China early in the spring. She will ship her 12 and 9½-inch Krupp guns at Kiel, and be placed under the command of a Captain of the Imperial German Navy. Her crew is to consist of eight officers and 240 men—all of the German Navy—who are to relieve the crews of the German men-of-war on the China station. The voyage of the *Ting Yuen* will be watched with great interest by German Naval men, as opinions differ greatly as to the amount of seaworthiness she possesses. The Chinese vessel is very similar in construction to the German ironclads of the *Sachsen* class, which have been found to pitch bows under, even in a moderate sea.

Last week we put the interrogatory—"Is it forgotten that some years ago, Colonels Commandant of the Royal Marine Corps were Captains in the Royal Navy?" And we now reply to our own query. In the year 1760, a representation having been made by the Commandants of Divisions that more Field Officers were required, three Naval officers were shortly afterwards appointed Colonels of Marines. Of these, Lord Howe was one, and it does not appear that any but he exercised any executive authority. There is, however, extant a letter from Earl Howe to Colonel Bendyshe at Chatham, dated April 26th, 1763, giving certain instructions, and thereby showing that his lordship took part in the working of the Division. About this date a memorial from the officers of the corps to the Lords of the Admiralty pointed out that "On a representation being made in 1760 that more colonels were wanted, for the better discipline of the Marines, their only Marine Colonel was removed, and commissions given to three gentlemen of the Navy [*sic*], who, though very respectable in their own profession, yet starting for the first time with a land command, were certainly not so fit for conducting the discipline and detail of troops on shore, as old, experienced military officers then in the Marines," &c. In addition to these Naval Colonels, Admiral Boscawen was General, Sir C. Saunders Lieutenant-General, and another Admiral a Major-General of Marines. In consequence of the feeling of the officers, so strongly set forth in their memorial, no further Naval appointments were made to Colonelcies in the corps.

The Admiralty have expressed their serious displeasure at the course taken by Colonel Howard Jones, C.B., in writing to the Press to uphold the character of the battalion of Royal Marines he had the honour of commanding in Egypt. As we said before, we think his championship of the gallant corps was unnecessary. Colonel Jones has expressed his regret at having broken the regulations, and there the matter ends.

The Admiralty have this week dismissed a Writer, for contributing Naval notes and news to a provincial journal. For some time past, a watch had been set at the Admiralty to detect the culprit. A certain writer being suspected, his blotting-paper was carefully preserved, and last week it having been found possible to read upon the blotting-paper word for word what appeared in a certain paper, the writer was summarily dismissed.

The Admiralty have this week been requested by a Naval officer to remove his name from the Retired List of the Royal Navy, on the ground that, now that espionage has been introduced under Admiralty patronage, it is no longer any honour for a gentleman to be in any way associated with the service. It appears that this officer was once severely reprimanded for having forwarded a letter to his Commander-in-Chief which his own commanding officer had declined to forward, and that the Admiralty further visited their displeasure upon this officer for having thus brought about the exposure of the fact that his commanding officer had falsified certain public documents, this necessitating his being superseded in the command of the ship. The Admiralty ordered the junior home, mulcting him in pay, allowances, and full-pay leave on his arrival in England. Their Lordships informed him that this was done because they were highly displeased with his conduct in forcing them to censure his commanding officer. Now that the Admiralty have promoted Corporal Hadden for sending them an anonymous letter, instead of making a straightforward report, the officer in question, in requesting the Admiralty to remove his name from the Retired List of his rank, remarks, after pointing out that two of the present Lords were at the Admiralty when the decision in his case was arrived at, that he does not for a moment suppose their Lordships would then have urged that anonymous letters, sent in a manner entirely at variance with the Queen's Regulations and Admiralty Instructions, constituted a better means of reporting a commanding officer, or one more in consonance with their own views and the traditions of the Navy, than the course he adopted, namely, the one laid down in the Queen's Regulations. Then there are the cases of Captain Rising, Lieutenant Noel, and a host of others, which have evidently been wrongly adjudicated upon, if their Lordship's decision in the *Clyde* case is right; and even if that is wrong, it does not follow that the decision arrived at by the Admiralty in the other cases is a just one.

The trials now going on with anti-fouling and anti-corrosive composition in the Navy are a great farce. Lieutenant-Colonel Crease and the Messrs. Hays compete. But are not Crease and Hays as near as possible one and the same? And is it not true that the very best anti-fouling mixture of all, the one that remains always clean, owing to the fact that it exfoliates as the ship moves through the water, is the one which the officials will not look at, while the Merchant Service is using it to a greater extent every day? Admiralty jobbery again.

Much fuss is being made about the *Warspite*, building at Chatham. When we saw her, in July, she looked about the weakest ribs and trucks, the weakest lash-up of a ship, we well remember ever having seen on the stocks. Her frames and angle-irons really did not look stronger than bedstead iron. And as we stood looking on this miserably weak framework, a vision rose before our gaze of a catastrophe similar to that which has overtaken the *City of Brussels*. She may prove a fast cruiser, but may the Lord preserve all on board if she is ever made to ram, or is rammed!

The Under-Secretary of the Admiralty has been making political speeches in Scotland. Mr. H. Campbell-Bannerman, M.P., is a bold man; at least, a man must be either bold or callous, to utter statements such as he made at Dunfermline this week. According to this Admiralty mouthpiece, "The Government was nothing, if it were not a reforming Government, and its leading features were,—consistency, prudence, and patience!" Surely, Mr. Campbell-Bannerman was speaking not only sarcastically, but "mischievously." We only wish the Government would act up to this detail, and commence at once reforming the Admiralty—about the most inconsistent, imprudent, and impatient institution in the world —and one the administrators of which do certainly not enjoy the sympathy or the confidence of the Navy.

The Admiralty have promoted Mr. G. H. Beaton, Chief Engineer of Devonport Dockyard, to the rank of Inspector of Machinery, and have reappointed him Chief Engineer of that Dockyard, in recognition of his long and valuable services, not the least of which was the saving of the lives of the officers and crew of the *Driver*, in 1861, when that sloop was wrecked on the Island of Mariguana, and when all would have perished for want of water, had not Mr. Beaton succeeded in rigging-up a distilling apparatus and condenser on shore.

Provided Ireland remains quiet—a rather doubtful proviso—Mr. Hamilton will resume his duties as Secretary of the Admiralty on May 1; when we hope the services of Captain Tryon will be suitably acknowledged.

By the retirement of Rear-Admiral Theodore M. Jones, Captain R. G. Gordon, of the Coastguard, will be advanced to flag-rank, when the post of Assistant to the Admiral Superintendent of Naval Reserves will become vacant, as has that of secretary, by the retirement of Mr. Alfred Whitehouse, Paymaster, R.N. There is some talk of Captain D'Arcy Irvine and Mr. Francis A. Carter succeeding to these vacancies.

From Malta, we learn that Admiral Lord Alcester would most probably leave Corfu about January 12 in the *Iris*, after that vessel had brought her new commanding officer, Captain Ernest Rice, from Brindisi, where he was expected last week. The *Helicon* was to leave Corfu a day or two in advance of the *Iris*, so as to convey the Admiral's staff to Malta. The weather has been remarkably fine at Corfu during Lord Alcester's stay there, and some fairly good shooting has been obtained on the opposite coast. On December 30, the ships at Corfu were the *Iris*, *Hecla*, *Bittern*, *Cygnet*, *Cruiser*, and *Helicon*. The *Hecla* and *Cygnet* were to return last week to Malta, while the *Bittern* would go on to Port Said to relieve the *Beacon*, which latter, together with the *Coquette*, *Cygnet*, and *Cruiser*, will shortly pay off and recommission at Malta.

Admiral Fishbourne has addressed a letter to the First Lord of the Admiralty, explaining why ships capsize, and pointing out that results have proved that no more unscientific nor more unsafe designs than those devised by the late Mr. Froude and Sir E. J. Reed, and approved by the Scientific Committee, ever emanated from the brain of a Naval Constructor, and that it needed only a sailor to perceive that floating coffins, and not ships, were being designed from the three-string-and-tray experiments. Admiral Fishbourne concludes his letter with the remark that—"It is a cruel shame that when hundreds of lives are lost, as in the *Captain*, *Eurydice*, *Atalanta*, and other ships, the real authors of these disasters should not necessarily be placed on their trial, as they would be by a coroner and a jury, if the bodies of their victims were cast on our shore; instead of which the betrayers seem to be called only to make ignorant and incorrect statements to exonerate themselves from blame, and so to cast a slur on the professional character of the dead. Till a Royal Prince or a Bishop is thus drowned, we shall never have the saddle placed on the right horse, and Naval architects will be allowed to sacrifice the crews to their stupid and ignorant conceits."

A really good "Naval Journal and Diary" is now being issued by Messrs. Griffin and Co., of Portsea, which no Naval officer should be without. The contents include the notable Naval, Military, and other anniversaries, list of books ordered to be used at the Royal Naval College, probable state of the Active List for the next ten years; all about Greenwich College, and the *Excellent* gunnery course for officers and seamen; journal and diary, each day being headed with a ruled form for wind and weather, barometer and thermometer, and a daily record. At the end of the journal is a ruled monthly summary. The form is most portable, and the diary is as serviceable to a yachtsman or officers of the Mercantile Marine as to those of the Royal Navy. Indeed, we really think that no seafaring man should be without it, and are using it ourselves.

The Admiralty have issued a circular directing that all water-tight doors are to be kept clear for immediate closing. No fitting of any kind is to be allowed which will be required to be removed before the doors can be shut.

Admiral Lord Alcester arrived at Malta from Corfu yesterday, and at once proceeded to make the necessary arrangements for handing over the command of the station to his successor, Lord John Hay.

It appears from a recent circular that although the responsibility of ascertaining that all sea connections are shut when a ship is undocked rests primarily with the dockyard officers, the engineer officer of the ship will also be held responsible by the Admiralty for the connections being shut at that time; and he and the carpenter are to be on the alert during the undocking, to see that none of the sea connections have inadvertently been left open.

As the employment on the Staff of the Army of officers of the Royal Marines is gradually becoming recognised, one Captain being at present on the General Staff in Egypt, and one at Cork, more inducement is held out to officers to qualify by passing through the Staff College; and no doubt advantage will be taken of the notification just issued for the names of those to be given in who are desirous of presenting themselves for the examination to be held in June next, for entry into the College in February, 1884.

In an exhaustive and highly interesting letter addressed to the *Times*, Lord Charles Beresford follows the example of many eminent men who have already favoured the world with their ideas on recent events in Egypt. The task which he thus imposes upon himself contains at least the feature of novelty, inasmuch as it deals, not merely with a portion, but with the entire question at issue, and thus renders it more easy to arrive at a fair conclusion. In the opinion of Lord Beresford, the cause of the recent campaign has never been clearly explained, and even at the present moment presents a mystery, not only to the Egyptians, but to many English people. The crucial question, that one which, more or less, involves all others, is simply this, —"Was the movement which was headed by Arabi rightly named a rebellion? or should it be regarded as a national movement,—a title not unfrequently applied to it in May, 1882, when matters commenced to look serious, by the naval officers belonging to the English squadron, which was sent to Alexandria at that time?" Lord Charles Beresford is of opinion that it was a national movement, and that England was allowed to drift into a war "as arbitrary as it was unnecessary."

The death of General Chanzy leaves the command of the 6th French Army Corps vacant, and as that corps is charged with the protection of the Eastern frontier, it is of the highest importance that it should be commanded by an able officer. There has been some snarling going on between France and Germany on the subject of this corps, which we may explain. It recently occurred to the French military authorities to change the quarters at present occupied by the independent cavalry divisions, of which there are five. The new plan, which was mooted two years ago, is now about to be carried into execution, and its effect will be to strengthen considerably the independent cavalry force on the German frontier. "This proposal," says a French military writer, "is favourably received in military circles. It has in effect the double advantage of reinforcing with compact masses the curtain of cavalry along the new frontier, and of grouping the brigades in such a manner as to render their mobilisation easy in case of necessity." The Germans, who have more than once threatened war in consequence of military preparations in France, seem to be greatly irritated by the new changes, and the German Press directs the attention of Europe to the incessant provocations offered by France. The French declare that they are merely acting on one side of the Vosges as Germany is acting upon the other, and that Germany has at present 44 squadrons of cavalry échelonned along the French frontier and disseminated through the garrisons of Alsace and Lorraine; all within 50 miles of the frontier. Again, the French squadrons have an effective, generally speaking, far inferior to the German squadrons, and the garrisons of Luneville, Epinal, Nancy, Verdun, Pont à Mousson, and Commercy, lie at from 70 to 150 miles from the frontier. How these recriminations will end it would be difficult to say.

In Tuesday's *Gazette*, the senior Captain of the 46th Regiment—the "fighting 46th"—Captain J. M. Low, was promoted to a majority in the 76th; and the second senior, Captain H. H. Newman, was given an unattached majority. The 46th did so well in Egypt that we are glad to find that there exists a disposition at Head-quarters to make up to the regiment for past disappointments.

A very curious case appears to have just occurred in France, throwing a strange light upon Military discipline in that country. No less than thirteen Hussars, "having to complain of their officers," deserted, and remained absent for 50 hours. On their return to barracks they were remonstrated with by the colonel, who received them one by one at his private residence, and heard their excuses; he then allowed them to go to their duty, and they took advantage of this to get drunk, and to shout that they had got the better of their officers. We can quite imagine the *Avenir Militaire* being alarmed at this state of affairs.

Major-General J. W. Laurie has vacated his appointment as Deputy-Adjutant-General on the Staff of the Canadian Militia, and returned to England on promotion. Previous to his departure from Nova Scotia, the General was the recipient of a testimonial from the officers and men of the local Militia, consisting of a General's sword and belts, accompanied by an address, of which the following is a copy:—

"Dear Sir,—We, officers, non-commissioned officers, and men of the active Militia of Canada, in the Province of Nova Scotia, have much pleasure in congratulating you on your promotion to the rank of Major-General in the Imperial service. We desire respectfully to express our deep sense of the valuable service which you rendered to the Militia of Canada during the 20 years in which you were actively connected with it. We will ever remember with the warmest feelings your readiness at all times to make any sacrifice of personal comfort and private means for the promotion of any measure tending to improve the efficiency of the force, whose interest and honour you ever so zealously guarded. It was with very great regret that we heard of the severance of your active connection with the Militia, but we are encouraged to hope that it will be only for a time, and that in due course you will again be connected with us in a position which shall be at once consistent with your present rank, and enable the Militia of Canada to profit by your experience. As a token of the great respect and the warm regard in which you are held by the force which you so long, so worthily, and wisely commanded in Nova Scotia, we beg your acceptance of a sword and belts. We pray that you may be long spared to wear them, and that wherever your lot may be cast, prosperity and happiness may ever attend you and yours.—We have the honour to be, sir, Yours, &c. Major-General Laurie."

We have received from the solicitors of Lieutenant Strachan, Royal Monmouth Engineers, a letter, in which they complain on behalf of their client of the reference in our columns to the unfortunate case in which this young officer played a not unimportant part lately at the local police-court at Chatham. Lieutenant Strachan was attached for a course of instruction to, we believe, the Royal Engineers. On the termination of his course, he appears to have been called upon by some local tradesman, who demanded the settlement of an account. Either the manner or the language used was resented by Lieutenant Strachan, who, after some little altercation, proceeded to summarily remove the offending tradesman from his presence. This led to a summons being issued for assault, with the result that Lieutenant Strachan was fined by the Magistrates £5, and £1 15s. costs, Lieutenant Strachan thinks that we have done him a serious wrong, because we have represented him as having been fined for an "unprovoked" assault; whereas, his solicitors wish it to be distinctly understood that the assault was provoked by the action of the tradesman, or his agent. Lieutenant Strachan is evidently a young gentleman who courts publicity, and, since we are asked to allude again to his case, we do so. At the same time, we cannot but consider it would have been better for all parties to have let the matter drop.

Prince Bismarck is noted for his grim humour. A friend asked him the other day whether he would not send some flowers to be strewn over Gambetta's grave. "Flowers!" exclaimed the Prince; "no. I would plant a cactus there sooner." "Why on earth choose that plant?" asked his friend. "Because we've been a *prickly pair*," quoth the Prince. *Si non è vero, ben trovato.*

We are glad to find that Lieutenant-Colonel Milne Home, Royal Horse Guards, took advantage of the opportunity which was afforded him on Tuesday last, at Berwick-on-Tweed, to express his disapproval of the statements which have been made by his friends, that the absence of his name from the Egyptian honours gazette was due to his political convictions.

At the present moment in France, no military duty is exacted from any one before he attains the age of 20; from 20 till 40 every able-bodied man, with some few exceptions, is bound to serve the State. The other day, however, a Deputy talked of bringing in a Bill for the formation of Volunteer Corps, composed of lads between the age of 17 and the age at which they draw for the conscription, to see whether they are to serve in the 1st or 2nd class of the annual contingent. The War Minister offered some objections to the proposals of the Deputy in question, but stated that he had a plan of his own under consideration, which is shortly to be laid before Parliament. It is thought that the formation of Volunteer Corps will be encouraged, and that the Volunteers will be taken not only from that part of the population too young for active service, but from among men who have served their time in the Active and Territorial Armies. It may be estimated that these Volunteer Corps will furnish 200,000 extra defenders of the country, or double that number should the *volunteering* become obligatory, which is very probable.

It is very much to be regretted that a certain well-known officer should have persisted in his determination to go into court. We fail to see what useful purpose will be served, and we trust that even yet, at the eleventh hour, steps may be taken to prevent an open inquiry into what, after all, is a matter of no public interest.

Mr. Kinglake has just published the seventh volume of "The Invasion of the Crimea," which, it need scarcely be said, will attract public notice more completely than any military work that has been written for a very lengthened period. That such should be the case, "goes without saying." Mr. Kinglake's reputation as a military historian has scarcely ever been questioned, and the volume now given to the public covers the most interesting period of what is known as the "Invasion of the Crimea." In his preface to this volume, the author assumes the rôle of a powerful advocate, not of the late Lord Raglan and the Crimean War, but of Lord Wolseley and the recent Egyptian Expedition. In forcible language he alludes to the happy finding of the General so eminently fitted to lead the armies of England; and in a few incisive words, brings before us a bright view of what occurred after that auspicious event. "The effort that followed was brief; a silent night-march of six miles, conducted in order of battle, by guidance drawn from the stars; the entrenchments of Tel-el-Kebir confronted whilst still it was dark; confronted, stormed, broken, cut through and through in their centre, by Hamley and the Second Division; then confronted and even assaulted in more than one place by Artillery teams, with their guns tearing, strange to say, over the parapet; then, along the whole stretch of each wing, confronted, stormed, carried, by Willis's and Graham's Brigade, by Macpherson, with the Indian Contingent, and, at the last, from the swift, dazzling use Wolseley made of his horses, guns, and foot,—the victory so driven home that, with almost dramatic abruptness, it turned defeat into ruin, brought what was called 'war' to an end, and invested—nay, loaded—our Government with the virtual dominion of Egypt." It becomes almost necessary to pause and take breath while reading Mr. Kinglake's thrilling words, when asking whether it can be wondered at if a country thus swiftly, thus brilliantly, served, abounds in warm gratitude to its Army and Navy. Lord Wolseley and his officers have been richly rewarded by a grateful country. It is quite possible, however, that each will hold in higher esteem the brilliant language in which his services have been recorded by an impromptu advocate.

The death of a French veteran is announced. The deceased soldier, Julien Chassebreuf by name, departed this life at Merdrignac, after having attained the ripe old age of 94 years. He appears to have served under the orders of General Cambronne from Austerlitz to Waterloo. The last active service he saw was at the siege of Antwerp. Julien Chassebreuf is said to have enjoyed the use of all his faculties up to the last moment; in the month of August last he aided in getting in the harvest.

Lieutenant-Colonel Smith Richards, commanding the Bloomsbury Rifles, deserves thanks for his patriotism. It is well-known how great the difficulties are with which Metropolitan Volunteers have to contend in finding suitable head-quarters. The Bloomsbury Rifles have, in common with their neighbours, suffered, for the last twenty years, all the discomforts incidental to a homeless condition; but their Colonel is a man of action. Recognising the want which existed and made itself felt in many ways, he no sooner obtained command of his regiment than he set about to find a site whereon to build a permanent head-quarters. A plot of ground being available in Chenies Street, Tottenham Court Road, he acquired possession of it, and then, from his own private purse, erected a handsome building, which was opened informally on Saturday evening. It is not every commanding officer who will lay down between £6,000 and £7,000 in one year. Colonel Richards' is an act which redounds to the credit of the service to which he belongs, and an officer who will do what he has done to prove his interest in the Force with which he is connected, ought not to pass unnoticed at the War Office. It is something for a man in Colonel Richards' position to set aside his professional duties as a physician, with an extensive practice, in order to serve the State, but the State becomes doubly his debtor when, in addition to all the time he devotes to its service, he comes forward with money.

We are glad to notice that Colonel H. A. Smyth, R.A., in his recently published Prize Essay, advocates the withdrawal of carbines from the Garrison Artillery. There can be no doubt that much useful time is wasted during peace in instructing the gunners in the use and practice of a weapon which it is "hardly conceivable" they will ever be called upon to employ in war. As long as carbines are retained, temptation will exist to train Garrison Artillerymen in Infantry exercises, so as to enable them to gratify the wishes of General officers when they desire to swell the number of men available for field-days. The proper place for the garrison gunner is with his guns, and not in the field. "Marching-past," writes Colonel Smythe, "would be less effective to the eye than heretofore; periodic inspection would see the gunners "on the guns" rather than "under arms," in the reality of shell practice rather than in the dumb show of musketry exercises; but the display of ability would be more genuine, the effect in education more practical, and the men, relieved from supererogatory lessons, would devote a fuller and heartier energy towards the mastery of their proper, most weighty, yet sometimes most lightly regarded duties.

We are informed by a correspondent, who is well acquainted with the Red Sea and its environs, that the Somali territory, which is situated between Abyssinia and Cape Guardafui, opposite to the British settlement of Aden, offers a first-rate recruiting-ground for the new Egyptian army and police. The Somalis are well known in Aden, where they come in search of work and trade. They are described as being a manly, high-spirited race, strong, hardy, and possessed of considerable independence of character, presenting a remarkable contrast to the mild and servile natives of Hindostan. Though now only half-civilised savages, they are quick, intelligent, and not difficult to control. If trained under the supervision of English officers, they would readily learn habits of military discipline. They are staunch Mahommedans. Berbera, the seaport of the Somali tribes, is a place of considerable local importance, being the source from whence are drawn most of the supplies for Aden. Some few years ago, at the supposed instigation of the English Government, the Egyptians laid claim to the suzerainty of this part of Africa, and Egyptian troops now garrison Berbera. It is, however, probable, in view of recent events, that this force will shortly be replaced by a local contingent under English officers. We are very glad to see that Government is fully alive to the necessity of strengthening the position of this country in the neighbourhood of the Red Sea.

THE MARCH TO CAIRO.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—The letter of "Sabreur," in the *Army and Navy Gazette* of Dec. 23, would seem to leave an impression on the minds of your readers that Gen. Drury-Lowe and Brigdr.-Gen. Wilkinson reached Cairo simultaneously, though by different routes, and that the city was occupied jointly by them. This was not so. Gen. Drury-Lowe halted for about two hours at Syriakus to give his force a rest, and to feed both men and horses, during which time he frequently expressed his surprise that Gen. Wilkinson did not arrive, and wondered where he was; and when he finally started from Syriakus, Gen. Wilkinson had not been heard of, nor was any part of his force in sight. Thus it will be seen that Gen. Wilkinson was more than a couple of hours behind Gen. Drury-Lowe at the least. The latter's force arrived at Abbassiyeh about 4.30 p.m., and after the preliminaries had been arranged, Gen. Drury-Lowe received all the Egyptian Generals in the Abbassiyeh Barracks, who surrendered to him and received his orders, and soon after them the Prefect of Cairo arrived and formally surrendered the town. Arabi Pasha also gave himself up to Gen. Drury-Lowe about 10.30 p.m. The citadel was occupied by a detachment of the 4th Dragoon Guards and mounted infantry, the telegraph office also, and orders were given for the occupation of the railway-station at daylight on the 15th, and the complete surrender and laying down of arms of the entire force comprising the garrison of Cairo, cavalry, artillery, and infantry, was arranged and settled by Gen. Drury-Lowe in the Abbassiyeh Barracks, and no communication of any sort passed between Gen. Wilkinson and the military and civil authorities of Cairo. It was not till some time during the night of the 14th that Gen. Drury-Lowe heard of Gen. Wilkinson's arrival at the railway bridge, which, however, is not, as "Sabreur" states, in the vicinity of the railway-station, but several miles from it. It will be seen from this that Gen. Drury-Lowe was the first to arrive in the city; that the city and troops in it surrendered to him, and to him alone; and that the city was occupied by the force that had marched with him. Your military readers will probably ask how it was that Gen. Wilkinson did not follow Gen. Drury-Lowe, and thus divided his force. Gen. Drury-Lowe was unaware that Gen. Wilkinson had detained some part of the Indian Cavalry with him before leaving Belbeis, and, as stated above, frequently expressed his surprise that Gen. Wilkinson did not come up with him. Moreover, Gen. Wilkinson took the road along the canal from Syriakus—a road quite impracticable for cavalry to defend themselves in if attacked—without orders from and unknown to Gen. Drury-Lowe. It is merely to prevent an erroneous impression being conveyed by "Sabreur's" letter, that these matters are here stated by ONE WHO WAS THERE.

H.R.H. the Prince of Wales will to-day unveil at Woolwich the statue which has been erected by the United Services at the Royal Military Academy, Woolwich, in memory of the late Prince Imperial.

"It is in contemplation," the *Standard* says, "to abolish the appointment of Deputy-Quartermaster-General in charge of the Intelligence Department at Head-quarters, War Office, and to place the Intelligence Department under the direct control of the Quartermaster-General of the Army, who will have the assistance of an Assistant-Quartermaster-General and six Deputy-Assistant-Quartermaster-Generals. The pay of the Deputy-Quartermaster-General is £1,200, which would be saved by this arrangement."

The *Bombay Gazette* says:—"It is very generally said that Sir Garnet Wolseley's next great work will be the reorganisation of the Indian Army system, if Lord Hartington intends to persevere with the proposed abolition of the separate commands in Bombay and Madras, allowing the conqueror of Arabi to serve the first term as Indian Commander-in-Chief. But what about the present Commander-in-Chief? A great deal may happen before Sir Donald Stewart's tenure of command expires."

"Soldat" writes:—"In the various despatches about the relative prowess of the regiments engaged at Tel-el-Kebir (which would be much better left undiscussed), there is not much allusion made to the nature of the obstacles in front of each portion of the line of attack. The depth of the trenches and height of the rampart are well known, and plans available for inspection, so that there should be no difficulty in solving the question, if it still continues to be mooted."

ROYAL MILITARY COLLEGE.

We have received from the War Office the following list of Gentlemen Cadets who passed the qualifying examination, in December, 1882, for commissions in the Cavalry and Infantry:—

Order of Merit.	Names.	Marks.
	WITH HONOURS.	
1	McMahon, A. H.	2470
2	Elles, A. W. ...	2451
3	Lindesay, A. L.	2418
4	Pakenham, H. A.	2416
5	Neish, F. H.......	2409
6	De Wilton, A. W.	2370
7	Smith, J. M. ...	2364
8	Kenney-Herbert, A. H. C.	2320
9	Commeline, F. H. B............	2313
10	Hoghton, F. A.	2308
11	Campbell, H. W. G.	2300
12	Dent, E. J.	2292
13	Sandilands, P. O.	2283
14	Deane, J.	2265
15	Schofield, C.......	2258
16	De Lisle, H. de B.	2250
17	Heard, E. V.......	2239
18	Moor, W. H.......	2238
19	Gill, R. H..........	2237
20	Bell, C. P. L.......	2224
21	Cardew, F. G. ...	2222
22	Fooks, H. J.......	2221
23	Cayley, W. de S.	2206
24	Bond, W.	2195
	Peebles, A. L. ...	2195
26	Richardson, J. B.	2194
27	De Berry, R. M.	2193
28	Johnson, A. C. B.	2191
29	Hartigan, A.E.V.	2189
30	Stobart, W. E....	2181
31	Andrews, L. J....	2174
32	White, W. F.......	2173
	PASSED.	
33	Betham, R. M....	2164
34	Falcon, R. W. ...	2161
35	Laming, H. T. ...	2152
36	Boulger, J.	2147
37	Swayne, E. J. ...	2144
38	Mead, H. R.	2138
	Wyndham, G. ...	2138
40	Carter, F. M. ...	2129
41	Zigomala, P. J....	2121
42	Copland, W. S....	2120
43	Gayer, E. A.......	2115
44	Turner, G.	2102
	Wilkinson, C. W.	2102
46	Hamilton, L.A.H.	2100
47	Randolph, B. H.	2096
48	Segrave, T. L. ...	2095
49	Fisher, J.	2089
50	MacCartie, J. F.	2082
51	Bowen, R. C. ...	2081
52	Boileau, C. F. ...	2080
53	Stewart, J. F. ...	2078
54	Cliff, H. M.	2064
55	Chamier, H. D.	2060
56	King, J. G.	2058
57	Broughton, R. ...	2052
58	Bosanquet, L. A.	2045
59	De Teissier, H....	2026
60	Bolton, W. N. ...	2007
61	Mackenzie, H. J.	2003
62	Stewart, J. F. ...	1984
63	Wemyss, D. G....	1978
64	Godwin-Austen, R. A............	1963
65	Bruce, A. T. L.	1961
66	Fairtlough, C. E. G. M............	1958
67	Hamilton, F. W. D.	1954
68	Fischer, T. A. ...	1948
69	Baugh, M. W. ...	1947
70	Crocker, S. F. ...	1946
71	Haggard, H. ...	1945
72	Knatchbull, G. W. C............	1938
73	Caldwell, A. L.	1912
74	Ogilvie, A. L. S.	1909
75	Stansfeld, W. B.	1902
76	Cotton, B.	1900
77	Impey, L..........	1878
78	Grant, G. G.......	1870
79	DeVismes de Ponthieu, R. G. R.	1867
80	Craven, E. S. ...	1865
81	Knowles, J. St. J.	1861
82	Carstairs, A. J....	1859
83	Carruthers, R. A.	1856
	London, J. A. ...	1856
85	Connell, C. E. H.	1846
86	Stuart, D. M. ...	1843
87	Fitzroy, C. N. ...	1839
88	Raitt, H. G. B....	1838
89	Morgan, C. L. M.	1825
90	Young, C. W. ...	1821
91	Murphy, A. R....	1816
92	Mainwaring, C.V.	1810
93	Bagwell, J. P. ...	1807
94	Combe, L..........	1805
95	Robertson, A. S.	1790
96	Leonard, A. W....	1787
97	Talbot, H. L.......	1783
98	Belli Bivar, H. S.	1773
99	Newdigate, F. A.	1756
100	Jones, R. W. W.	1747
101	Cordeaux, W. W.	1714
102	MacLaren, T. G.	1708
103	Vanrenen, A.J.H.	1662
104	Brown, R. J. R.	1605
105	Sillery, C. C. A.	1574

QUALIFIED ON RE-EXAMINATION.

Cholmondeley, H. R.

THE STAFF COLLEGE.

The following list of officers who have passed the final examination of the Staff College has been published. These officers will join their respective regiments (or depôts, should the regiments be abroad) on Feb. 1 next, up to which date they will be considered as on leave of absence; and they will do duty therewith until April 15, when they will report themselves to the General Officer Commanding at Aldershot, with a view to their completing the course prescribed by the Staff College Regulations:—Brevet Major W. C. James, 2nd Dragoons, French;* Brevet Major F. N. Innes, R.A., Mathematics;* Capt. J. C. Dalton, R.A.; Capt. J. K. Trotter, R.A.; Capt. J. B. Leefe, R.M.A., Experimental Sciences;* Lieut. H. de H. Haig, R.E., Military Topography;* Capt. R. G. Warton, Lincolnshire Regt., Experimental Sciences;* Major R. E. Allen, East Yorkshire Regt.; Capt. J. M. Gordon, Royal Scots Fusiliers; Lieut. F. W. Bromfield, Cheshire Regt.; Lieut. C. M. Hutton, Oxfordshire Light Infantry; Capt. T. E. Stephenson, Essex Regt., Experimental Sciences;* Major A. W. Morris, Northamptonshire Regt.; Capt. H. B. Mortimer, North Staffordshire Regt., Experimental Sciences;* Capt. E. Lloyd, Bengal S.C.; Lieut. C. H. H. Beley, Bengal S.C.; Capt. E. Balfe, Bombay S.C., Experimental Sciences.* (Denotes special mention.)

List of officers who have passed in additional subjects:—Brevet Major W. C. James, 2nd Dragoons, German; Brevet Major F. N. Innes, R.A., German, Turkish, landscape drawing; Capt. J. C. Dalton, R.A., German, Russian, Spanish, landscape drawing; Lieut. H. de H. Haig, R.E., landscape drawing; Major R. E. Allen, East Yorkshire Regt., French; Capt. E. Lloyd and Lieut. C. H. H. Beley, Bengal S.C., Russian.

The Army Medical and Transport Inquiry Committee sat again at the War Office on Wednesday, the Earl of Morley presiding. The examination of medical officers who had charge of field hospitals and sick transports was continued all day.

EPPS'S COCOA.—GRATEFUL AND COMFORTING.—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.*—Made simply with boiling water or milk. Sold only in packets, labelled—"JAMES EPPS and Co., Homœopathic Chemists, London."—Also makers of Epps's Chocolate Essence.

The Army.

Royal Horse Guards (Blue). Lieut.-Col. Milne Home, M.P., who was second-in-command of the Household Cavalry in Egypt, was on Tuesday, at Berwick-on-Tweed, presented with a testimonial from his fellow townsmen, consisting of a silver salver, with a suitable inscription. Major Allan, of the Berwick Volunteers, made the presentation, in the presence of a large assemblage. Col. Milne Home, in reply, alluded to the report, which has been current for some time past, that honours have been withheld from him because of his being a political opponent of the Government. He denied that such was the case, and said he would be the last person to attribute such a thing to any Government. The reason of his getting no other reward than the ordinary war medal was that a higher order could not be given to two commanding officers in one regiment. He was only second-in-command, and his commanding officer, Col. Ewart, got the highest, and well deserved it. He was perfectly satisfied with the honours he had received, from her Majesty down to his fellow-townsmen.

4th Dragoon Guards. Major-Gen. Newdigate, C.B., commanding the South-Eastern Division, distributed to the officers and men of the regiment on Tuesday, at Brighton, the medals for the Egyptian Campaign. Gen. Newdigate said it gave him great pleasure to distribute the medals granted to them by her Majesty the Queen for their gallant conduct. He congratulated them upon having served under a General who, immediately after the battle of Tel-el-Kebir, gave orders for that march upon Cairo, which was the finest thing of the whole campaign. That was not only his opinion, but the general opinion of all military men. The General then proceeded with the distribution. The officers who received medals were Lieut.-Cols. Shaw-Hellier (in command) and Pope; Capts. Walton, Penton, Darley, Sandys, and Aylmer; Lieut. and Adjt. Willoughby; Capt. and Pymr. Lane; and Capt. and Qrmr. Williams. Three hundred of the rank and file also received medals. Gen. Newdigate then inspected the barracks, and distributed medals to the men who were still invalided in the infirmary.

5th Dragoon Guards. We understand that Capt. Hegan is to retain the appointment of Commandant of the School of Instruction for Officers of the Auxiliary Forces (Cavalry) at Aldershot. Then surely he ought to be seconded, as all other commandants of the establishment have been?

6th Dragoon Guards (Carabiniers). Capt. Porter is coming home for two years' service at the depôt.

7th Dragoon Guards. Brevet Lieut.-Col. Bibby leaves England next week, in charge of a draft of 50 men, to rejoin head-quarters in Egypt. Major Thomas proceeds out at the same time, in charge of a draft of the 19th Hussars.

4th Hussars. Capt. Ramsay, commanding the detachment at Hampton Court, has received the following letter:—"H.M.'s Office of Works, Whitehall Place, Dec. 18, 1882. —Sir,—I am directed by the First Commissioner of her Majesty's Works, &c., to express to you personally, and through you, to the officers, non-commissioned officers, and men under your command, the thanks of this Board for the services rendered by the 4th Hussars on the occasion of the recent fire at Hampton Court Palace. This Board highly appreciates the discipline, efficiency, and zeal shown by the detachment under your command, by which the efforts of the local Fire Brigade were so ably seconded in averting what might have been a national calamity.—I am, &c., A. B. Mitford, Secretary, Hampton Court."

19th Hussars. Brevet Lieut.-Col. Taylor has accepted the command of the new Egyptian Cavalry. Major Blackett is commanding the depôt at Aldershot.

ROYAL ARTILLERY.

The following officers have joined for the "long course" from brigades in India, and will continue under instruction throughout the year, viz., Capts. S. Murray, P. K. L. Beaver, W. S. Walford, J. St. L. Wheble, F. W. Campbell, and Wynell-Mayow; Lieuts. H. S. Dawkins, F. L. Nathan, C. R. Reynolds, and W. St. P. Bunbury.

Brevet Lieut.-Col. J. F. Maurice, R.A., who lately returned from Egypt, is doing duty in the Intelligence Department.

A grand carnival or masquerade took place at Dover Castle on Friday last. It was very novel, and did great credit to the non-commissioned officers of the Cinque Ports Division, as also to the colonel, who recently distinguished himself in Egypt, the author of the libretto, &c. The whole was produced on a most elaborate scale, and was a decided success. The torch-light procession started from the lecture-hall in the keep-yard to the recreation room, where the libretto was successfully accomplished by the *dramatis personæ*, before a large audience. The company, accompanied by the Royal Artillery band, then proceeded to the officers' quarters to repeat their previous efforts. Great credit is due to Serjt.-Major J. R. Smith, who had the management of the carnival. Capt. and Adjt. Fox also made himself very useful. The beadle (Serjt.-Major Darvell), Father Christmas (Serjt.-Major J. R. Smith), Sir John Falstaff (Serjt. W. J. Nicholl), Pistol (Serjt. G. Grey), Henry VIII. (Serjt.-Major G. Smith), Roundhead (personated by Qrmr.-Serjt. Reves), and the four soldiers of different periods were all exceptionally well pourtrayed.

Col. G. J. Smart has been transferred from the command of the Royal Artillery in Ceylon to the Bombay Presidency, for duty.

ROYAL ENGINEERS.

Major T. P. White has been appointed executive officer on the Staff of the Director of Ordnance Survey, Southampton.

Capt. and Brevet Lieut.-Col. R. C. Hart, V.C., on return from Egypt, has been detailed for special employment.

Lieut.-Col. Sir O. B. St. John, K.C.S.I. (late Bengal), who has been on leave in England, has left for India, to resume duty in the Political Department.

Lieut.-Col. B. Lovett, C.S.I. (late Bengal), who has been employed for some time on special service in Persia, has obtained leave to England.

Major H. Tovey has been appointed Instructor in Military Law, History, &c., at the Royal Engineer Institute, School of Military Engineering, Chatham, in succession to Brevet Lieut.-Col. J. C. Ardagh, C.B., who has received an appointment with the Army in Egypt.

Capt. G. W. Addison is appointed secretary to the Royal Engineer Committee, School of Military Engineering, Chatham.

Lieut. C. V. Wingfield-Stratford has been appointed assist. instructor of musketry at the School of Military Engineering, Chatham, vice Major S. Smith.

Capt. H. Clarke has taken over command of the 12th Compy. at Chatham.

Capt. H. L. Jessep has assumed command of the 13th Compy., on survey duties, Clifton, vice Capt. H. P. Kirkwood, who has taken over the 35th Compy. at Chatham, replacing Capt. J. W. Thurburn.

Capt. M. D. Whitmore is appointed to the command of the 22nd Compy., employed on telegraph duties, London.

Col. Æ. Perkins, C.B., aide-de-camp to the Queen, superintendent engineer, first-class, Military Works Department, India, has been granted leave of absence for one year. Capt. H. J. Harman, assistant-superintendent, 1st grade, officiating deputy-superintendent, 4th grade, Survey of India, has been granted furlough for a like period.

Brevet Major H. C. Chermside, C.M.G., and Lieut. H. H. Kitchener have accepted appointments in the new Egyptian Army.

H.R.H. the Field-Marshal Commanding-in-Chief has caused a letter to be sent to the Commandant of the Chatham District, having special reference to the services rendered by Serjt.-Major T. Loxton, R.E., who conducted the locomotion department of the railway during the Egyptian War, and requesting the Commandant to cause the letter to be promulgated in such a manner as he may deem desirable. The letter was sent in consequence of a report by Sir Garnet Wolseley that Serjt.-Major Loxton was specially deserving of commendation.

Lieut. H. H. Massy has been appointed acting A.D.C. to Major-Gen. Sir J. C. M'Leod, K.C.B., commanding the troops in Ceylon, in the absence of Capt. Cumberland, 42nd Highlanders, who is in England under treatment for wounds received in action in Egypt.

1st or Royal Scots. Col. Stuart, now commanding the 91st Regimental District, Stirling, assumes command of the 1st Regimental District, Glencorse, on the 23rd inst., vice Col. Dalyell. Lieut.-Col. Prior, on vacating his appointment as garrison-instructor at Aldershot, takes up duty with the 2nd Batn. at Fermoy. A rifle-match at 200, 500, and 600 yards, Wimbledon targets and scoring, took place on Dec. 20, at Pembroke Camp, Malta, between a team chosen from G Company, 1st Battalion, and one picked from H Company of the 106th Light Infantry. At the first two distances both sides were nearly equal, but at 600 yards the Scots went away hand over hand, and eventually were hailed the winners with the handsome margin of 36 points.

2nd Queen's Royal West Surrey Regiment. Capt. Nourse, 1st Batn., has been offered and has accepted the adjutancy of the 8th Surrey R.V.

10th Lincolnshire Regiment. Capt. Goldfrap, 2nd Batn., has been selected for the adjutancy of the 4th Middlesex R.V.

11th Devonshire Regiment. Lieut. A. E. Peters, 1st Batn., died at Brighton on the 8th inst. of Egyptian fever, caught whilst on active service. The deceased joined the Army, Dec. 2, 1874.

15th East Yorkshire Regiment. The following appeared in the *Malta Times* of the 30th ult.:—"His Excellency the General Commanding having decided on the establishment of a permanent garrison canteen for the detachments stationed at Pembroke Camp from the 1st prox., Serjt.-Major (Pensioner) Quinn, late 15th Regt., has been appointed steward." Serjt.-Major Quinn served in the Crimean War as a non-commissioned officer, and was there commissioned for repeated acts of bravery in the field. After a time, he retired from the service by the sale of his commission, but, feeling his old military ardour still strong within him, he joined the 2nd Batn. as a private, and was shortly promoted to colour-serjt. After serving some 20 years in his regiment, he was appointed a serjt.-major on the Indian Staff, and was pensioned as such last trooping season. He served his country faithfully for over 28 years, and his old officers and comrades will be pleased to hear that his services have been recognised.

23rd Royal Welsh Fusiliers. Capt. Clough-Taylor succeeds the late Lieut. E. L. Brett, Scots Guards, as senior A.D.C. to the Marquis of Ripon in India. Lieut.-Col. H. F. Seagram, on the Retired List, died at Gresford, North Wales, on the 2nd inst., aged 42. The deceased entered the Army, June 7, 1858, became capt., April 14, 1870, and retired four years ago on a pension.

28th Gloucestershire Regiment. Capts. Moyers and Jacson have passed in subjects A and B for promotion to rank of Major. Lieut. Alcock has also passed in same subjects, for promotion to rank of Capt.

33rd West Riding Regiment. The head-quarters and service companies have left Lucknow for Nowshera.

35th Royal Sussex Regiment. Lieut. Bathurst leaves England next week for Egypt, in charge of a draft of 110 men.

36th Worcestershire Regiment. Col. Lloyd succeeds Col. Carr in command, Brevet Lieut.-Col. Beamish becoming 2nd lieut.-col. and Capt. Rose major.

38th South Staffordshire Regiment. Major Alexander leaves England next week for Egypt, in charge of a draft.

42nd Royal Highlanders (Black Watch). Col. Macpherson, C.B., on retiring upon half-pay, is at once to be provided with a Regimental District command, and will relieve Col. Stuart at Stirling (91st District) on the 23rd inst. Lieut. MacLeod and forty men proceed to Egypt next week, to join head-quarters.

46th Duke of Cornwall's Light Infantry. A correspondent writes:—"Let me draw your attention to another instance in which a deserving officer has been overlooked in the issue of honours for Egypt. I refer to the case of a subaltern of 'the fighting 46th,' who has been twice honourably mentioned in despatches, including the final despatch of Sir G. Wolseley; but has, so far, been left out in the cold. I trust that recognition may yet be granted to the officer to whom I allude, as his case seems to me to be a very hard one." Major Disney-Roebuck, in charge of a draft of sixty men, leaves England next week.

49th Berkshire Regiment. Capt. Collings leaves England next week for Egypt, with a draft, to join head-quarters. Bandmaster J. Gibbon was discharged from the depôt at Reading on Jan. 9. This warrant officer has served 31½ years in the regiment, over 28 years of which he has been an effective non-commissioned officer, and the last 16 years bandmaster of the regiment.

ROYAL MARINES.

Instructions forwarded to Chatham direct a further number of Royal Marines to be sent to Ireland.

A detachment of upwards of 100 non-commissioned officers and men of the Royal Marines left Chatham on Monday, under the command of Capt. W. P. Wright, and proceeded to join the head-quarters of the Plymouth Division for duty on board the vessels-of-war in harbour. The division at Plymouth is much below its proper strength, which has necessitated a number of men of the Royal Marines being drafted to it from this division.

Lieut. Houghton, R.M.L.I., of the Portsmouth Division, has been detailed to embark on board the Pembroke, in the place of Lieut. Wilkinson, superseded, sick.

Capt. W. F. Campbell, of the Plymouth Division, Royal Marines, has been promoted to the rank of major at the Chatham Division, vice Norton, retired, dated Dec. 31. Major Beechey succeeds to the higher rate of pay as major from the same date.

The following detachments of Royal Marines are ordered to join the various ships mentioned:—Valiant, at Tarbert, river Shannon—one lieutenant, two corporals, and 30 privates; Warrior, at Greenock—one lieutenant, one corporal, one bugler, and 33 privates; Revenge, at Queenstown—one serjeant, one corporal, and 19 privates; Defence, Rockferry—one lieutenant, one serjeant, one corporal, and 22 privates: Achilles, Channel Squadron—one lieutenant, one drummer, and 40 privates.

Major Clement W. Carlyon, of the Portsmouth Division of R.M.L.I., is about to retire from the service, at his own request.

Lieut. A. G. Anson, one colour-serjeant, one corporal, one bugler, and 22 gunners, R.M.A., have been placed under orders to embark (with a detachment of R.M.L.I., to be afterwards detailed) in s.s. Nepaul, for passage to H.M.S. Alexandra, ordered to be recommissioned at Malta.

The under-mentioned officers have been granted leave of absence:—R.M.A.—Capts. E. Wheeler, 2 months; S. H. B. Northcote, six weeks; C. J. Cheetham, two months. R.M.L.I.—Lieut.-Col. F. G. Le Grand, one month in extension; Capt. A. C. Pearson, six weeks; Lieuts. R. M. Byne, six weeks; S. P. Peile, five weeks; E. F. David, one month; H. C. Eagles, three months.

50th Queen's Own Royal West Kent Regiment. Capt. Elmhirst has resigned the adjutancy of the Artists' R.V., and is about to retire. Lieut. Brock-Hollinshead leaves England next week for Egypt, in charge of a draft.

59th East Lancashire Regiment. Major Gunter took up duty from the 3rd inst. as garrison instructor at Dover. The regiment has resuscitated its regimental paper, *The 5 and 9, Lilywhite's Gazette.* In his opening remarks, the editor says:—"Our commanding officer, Lieut.-Col. Lawson, having sanctioned the revival of the old 'regimental paper,' with the following objects in view; the cordial co-operation of all ranks is invited:—1st. To foster and encourage *esprit de corps.* 2nd. The publication gradually of the regimental records of our regiment, the old 59th. 3rd. The chronicling of everything in the way of sports, amusements, and events connected with or occurring in the battalion, to serve as a pleasing record of the past, to look back upon in the future, and an agreeable substitute for a letter to friends far and near. To further these three objects, a committee of officers will be formed, who will be assisted by a sub-committee of non-commissioned officers, all of whom are willing to assist in collecting information. Our adjutant will be the editor, and will be assisted by a non-commissioned officer or private as clerk. Assistance is not only asked for, but expected from all who have the interest of the '5 and 9' and their corps at heart, not only in the way of contributions in kind, but by each taking at least one copy, if not more, monthly. Subscriptions will be paid annually in advance; non-commissioned officers and men 2s. a year, officers 3s. a year; including postage, 6d. extra." We are indebted to the excellent little paper for the following items:—"It may not be generally known that the collar badge we now wear is the 'Red Rose of Lancaster.' It is reported, on the best authority, that on leaving Chatham Sir E. Wood regretted 'that he had not seen more of the 59th Regt.' Lieut. White, who was permitted to volunteer his services in the late Egyptian campaign, brought home with him several relics, amongst others a Remington rifle and sword-bayonet and one or two russia leathern water-bottles, with which the Egyptian Army is equipped. We hope in our next issue to report the progress made in the erection at Nottingham of the memorial to the officers, non-commissioned officers, and men of the 59th Regt. who lost their lives during the late Afghan campaign, 1878-79-80, either in action or by disease, to which all subscribed so liberally. A handsome strongly-bound album has lately been substituted by the officers of the battalion for the old albums presented to them at different times by Lieut. Versturme and Col. J. de Montmorency, which had become past repair; and in which all officers who served in the 59th Regt. were expected to place their likenesses. Contributions are invited from all who are now defaulters."

60th King's Royal Rifle Corps. An exchange has been sanctioned between Lieut.-Cols. Henderson, 4th Batn., and Algar, 2nd Batn., Col. Henderson assuming command of the 2nd Batn. at Winchester and Col. Algar of the 4th Batn. in India. Major and Brevet Col. Grenfell, A.D.C., Assist.-Adjt. and Qrmr.-Gen. in Egypt, has accepted an appointment as Brigdr.-Gen. on the Head-quarters' Staff of the new Egyptian Army, and Brevet Major Smith, 3rd Batn., has been appointed to the command of a regiment.

64th North Staffordshire. Capt. Reeves is about to exchange to the 89th Foot.

71st Highland Light Infantry. The colours which were captured at Buenos Ayres in 1807 have this week been returned to Col. Lambton, at the Curragh Camp. They were brought to England a few weeks ago, in accordance with the dying wish of a gentleman in Buenos Ayres who had possession of them, and had kept them, in the hope of being able to personally present them to some member of the Royal Family.

74th Highland Light Infantry. Lieut. Synge embarks for Egypt next week, in charge of a draft of fifty men.

75th Gordon Highlanders. Capt. Pain leaves England next week for Egypt in charge of a draft of ninety men.

83rd Royal Irish Rifles. Major De Montmorency, seconded, obtains the lieut.-colonelcy by the retirement of Col. Gore.

86th Royal Irish Rifles. Capt. Haggard is a candidate for appointment to the Auxiliary Forces as adjt., and succeeds Capt. Elmhirst, of the 50th, with the 20th Middlesex (Artists) Rifles. The death is officially announced of Major J. Boyd, captain on the Retired Full-pay List. The deceased obtained his commission from the ranks, April 8, 1842; became lieut., Nov. 13, 1843; capt. Jan. 23, 1855, and retired with the hon. rank of major, Aug. 16, 1859.

91st Argyll and Sutherland Highlanders. Col. Stuart is to be transferred, on the 23rd inst., to the command of the 1st Regimental District at Glencorse, and will be succeeded by Col. Macpherson, C.B., half-pay, late 42nd Highlanders, just returned from Egypt. The paymastership is vacant by the death of Capt. Caudwell, which occurred at Reading on the 2nd inst. A correspondent writes from South Africa:—"Major J. H. Fawcett died at Sea Point, near Cape Town, very suddenly on December 14. The deceased officer had been suffering from an attack of asthma, which was not considered serious, but died very suddenly of supposed aneurism of the aorta. His death was a great shock to the regiment, as he had gained the respect of all ranks, and his loss will be most sincerely felt. He was buried with military honours at Claremont Church, near Wynberg, on the 16th inst., the funeral being attended by the whole garrison, a great number of volunteer officers, and the majority of the leading civilians of Cape Town and neighbourhood. The battalion, at present under command of Lieut.-Col. Robley, is still encamped at Wynberg, where it was sent in July last, at the commencement of the outbreak of small-pox in Cape Town. The regiment has been remarkably healthy throughout, through having great changes of weather, and though the small-pox, which spread from Cape Town to the suburbs, has been all round the vicinity of the camp, there has not, as yet, been a single case in the regiment. The officers and some friends gave some dramatic performances lately at the Wynberg Hall, in aid of the Small-pox Fund, which were largely attended."

96th Manchester Regiment. The head-quarters and service companies have taken up duty at Mooltan. The death is announced of Major-Gen. C. B. Cumberland, colonel on the Retired Full-pay List, as having occurred on Nov. 27. The deceased entered the Army, Dec. 21, 1820; became lieut.-col., July 22, 1842; col., June 20, 1854; and major-gen., July 8, 1856.

103rd Royal Dublin Fusiliers. The embarkation of the regiment for Gibraltar, which was to have taken place on Monday, is postponed.

Rifle Brigade. Major Anstruther has been transferred as garrison instructor from Dover to Aldershot.

Chaplains' Department. A correspondent writes:—"Quite a void will be felt at Woolwich by the departure of the Rev. Dr. Bullock, Chaplain to the Forces, for duty at Malta, for which station he proceeds this week. For ten years he has devoted himself to the care of the sick at the Herbert Hospital with such zeal and devotion, that his departure will cause sorrow to many a sick soldier, and his kind and cheery manner will be much missed at the Herbert Hospital, as well as throughout the garrison."

Commissariat and Transport Staff. The Secretary of State for War has approved the appointment of Comy.-Gen. Sir E. Morris, K.C.B., late principal Commissariat officer of the Egyptian Expedition, to be Commissary-General at head-quarters, War Office, vice Comy.-Gen. F. E. Watt, C.B., who is to be retired, under the terms of the Royal Warrant, on attaining the prescribed age.

Ordnance Store Department. The following changes have taken place:—Deputy-Comies.-Gen. of Ordnance C. M. Maloney, Devonport to Woolwich; W. F. Wright, C.B., Woolwich to Devonport; H. A. Russell, C.B., Egypt to Aldershot; Assist.-Comy.-Gen. of Ordnance C. G. Campbell, Egypt to Edinburgh; Deputy-Assist.-Comy.-Gen. of Ordnance E. G. Skinner to be Assist.-Comy.-Gen. of Ordnance, for distinguished service in Egypt; C. G. Jeans, Malta to Gibraltar; H. W. B. Bruno, Aldershot to Harwich; Qrmr. G. Spinks, Natal to Woolwich; J. Morton, Cyprus to Woolwich; F. Paterson, Woolwich to Devonport; J. Ashworth died at Malta on Dec. 16; G. Harris and F. Tims, Egypt to Portsmouth; Conductors of Stores G. W. Walrond, Egypt to Blackness Castle; C. F. Hunter, Cyprus to Egypt; J. W. Congdon, Portsmouth to Chatham.

Pay Department. We regret to have to announce the death at Reading, on the 2nd inst., of Capt. W. D. Caudwell, aged 43. He joined the Pay Department in July, 1878, and was appointed paymaster to his old regiment, the 91st Highlanders, with which he served in the Zulu War of 1879, obtaining the medal and clasp for that campaign. During the past month the following changes of station and promotions have taken place in the Department:—Major Rouse, from leave, to Royal Artillery, Aldershot; Major Rippon, from leave, to 29th Regimental District, Worcester; Major Bell, from 1st Batn. Scots Guards, to 8-40th Regimental District, Warrington; Capt. Rose, from 7th Hussars, to 102nd Regimental District, Naas; Capt. Brooke, from Royal Artillery, Aldershot, to 73rd Foot; Capt. Sugden, to the 59th Foot. Assist.-Pymr. A. Gleig to be paymaster and hon. captain (Nov. 21); Capt. Playfair to be staff paymaster and hon. major, vice Richardson, retired (Nov. 20). Two probationers have joined, Capts. J. K. McCausland and G. C. Bayly.

1st West India Regiment. The head-quarters are under orders to leave Sierra Leone, &c., for the West Indies.

2nd West India Regiment is under orders of readiness to proceed to Sierra Leone, &c., from the West Indies. Col. Turton follows Sir W. O. Lanyon into retirement on the 2nd prox., Major Matthews obtaining the command and Major Sheppard the junior lieut.-colonelcy. The following officers at Chatham have been placed under orders to embark for the West Indies early in the ensuing month, viz., Lieuts. Cowan, Macfarlane, Were, Kirkwood, Tottenham, and Castle.

The Auxiliary Forces.

MILITIA.

We are requested to announce that next military competitive examination of lieutenants of Militia for commissions in the Line will take place on March 8 and 9.

VOLUNTEERS.

24th Middlesex (Post Office) Rifles. H.R.H. the Duke of Teck will present the prizes to the regiment at Guildhall on Monday next, and at the same time Major-Gen. Higginson, C.B., commanding the Home District, will hand over the war medals to the detachment of the corps who recently served in Egypt. Prior to the distribution the Lord Mayor and the Lady Mayoress will entertain the Duke of Teck and a select company at dinner at the Mansion House.

We (*Morning Post*) understand that an application will shortly be made to the War Office authorities for permission to raise a mounted-rifle Volunteer company in Cornwall. An influentially signed memorial has just been presented to Col. W. S. Hawker, commanding the 2nd Vol. Batn. of the Duke of Cornwall's Light Infantry, asking that the projected company may be attached to that battalion, the head-quarters of which are at Bodmin. It is understood that, providing this is arranged, the sanction of the War Office will be at once granted. The company of mounted-rifle Volunteers now being organised by the Earl of Mount-Edgecumbe has met with cordial support in Devonshire, and his Lordship's example is likely to be followed in several other counties.

The *Portsmouth Times* has the following:—"Volunteer officers who do their best to make themselves efficient deserve a little more consideration than is sometimes extended to them. Not many days ago, some local officers presented themselves at 9.30 a.m. for examination in tactics by a military board. They were, however, kept cooling their heels for four hours and a half, the excuse being that there were officers belonging to the Regular Forces who must take precedence. But why were not arrangements made by which these officers might have been examined on another day? To be subjected to such a 'snub' was enough to disconcert the Volunteer officers, and I don't at all admire the 'tactics' of those to blame. Worse still, two Volunteer officers who came from Southampton to undergo examination were informed that they must go to Winchester, only, on reaching the cathedral city to find that no board was sitting there. Was this intended as a practical joke, or was the direction to proceed from Portsmouth to Winchester given in ignorance? Civilians who give their time to the Volunteer Service are, I think, entitled to different treatment from that experienced in these instances."

A meeting of Volunteer commanding officers was held on Tuesday at the offices of the National Rifle Association, Pall Mall, for the purpose of considering the desirability of holding an Easter Monday Volunteer Review. The chair was taken by Lieut.-Col. Viscount Ranelagh, South Middlesex Rifles. On the motion of the Chairman, seconded by Col. Laurie, it was unanimously resolved that a review should be held on Easter Monday. Letters were read from the town clerk of Dover and the President of the Local Board of Aldershot, offering Dover and Aldershot as available places. The Deputy Mayor of Brighton (Mr. Alderman Davey) also attended the meeting, and stated that the corporation and inhabitants of the town would be glad to welcome the Volunteers at Easter. A conversation ensued on the merits of the three places before the meeting, as well as of Portsmouth, and it was agreed that a sub-committee should be appointed to make the necessary arrangements. The following were elected to act as the sub-committee:—Lieut.-Cols. Lord Ranelagh, Laurie, the Hon. C. H. Lindsay, Routledge, Brown, Ward, Ray (3rd Middlesex Artillery), Drew, Alt, Wegg-Prosser, Porter, Hozier, and Mears. This concluded the business of the meeting, which was adjourned to the 23rd inst. The resignation of the office of hon. secretary by Lieut.-Col. Vickers was announced, and Lieut.-Col. Routledge was selected to succeed him.

Friday's Gazette.

ARMY.

WAR OFFICE, Pall Mall, January 12, 1883.

Regimental Districts.

Lieut.-Cols. and Cols. E. A. Stuart, from Lieut.-Col. commanding the 91st Regimental District (Princess Louise's Argyll and Sutherland Highlanders), to be Lieut.-Col., to command the 1st Regimental District (the Royal Scots, Lothian Regt.), vice Col. J. T. Dalyell, whose period of service in that appointment is about to expire; D. Macpherson, C.B., from half-pay, to be Lieut.-Col., to command the 91st Regimental District (Princess Louise's Argyll and Sutherland Highlanders), vice Col. E. A. Stuart (both dated Jan. 23).

Staff—Col. T. E. Gordon, C.B., C.S.I., Bengal S.C., from Deputy-Adjt.-Gen. in Bengal, to be a Brigdr.-Gen., to command a Brigade of the Bengal Army, vice Major-Gen. J. L. Nation, C.B., whose period of service in that appointment has expired (Oct. 9, 1882).

Memorandum.

Col. W. E. M. Reilly, C.B., Royal Artillery, to have the temporary rank of Brigdr.-Gen. whilst employed as Director of Artillery and Stores (Feb. 1).

INDIA OFFICE, January 12, 1883.

Her Majesty has approved of the following exchanges between officers of the Staff Corps:—

Bengal Staff Corps.

To be Lieutenant:—Lieut. S. W. Jervis (dated Sept. 22, 1882, but to rank from Sept. 10, 1877).

Madras Staff Corps.

To be Lieutenant:—Lieut. H. D. Gerrard (dated Sept. 22, 1882, but to rank from April 29, 1874).

The Queen has approved of the transfer to the Half-Pay List of the under-mentioned officer of her Majesty's Indian Forces:—

Bengal Infantry.

Major H. S. Anderson (Jan. 3, 1882).

ARMY NOTES.

The *Irish Times* says:—"His Excellency the Lord-Lieutenant, to mark his appreciation of the brave conduct of Army Pensioner Charles M'Donnell, the constable-in-aid who knocked down and arrested Patrick Delany, recently sentenced to 10 years' penal servitude for conspiracy to murder Mr. Justice Lawson, has been pleased to grant him a reward of £50. The sum has just been presented to M'Donnell by Col. Connolly, V.C., in the presence of all the constables-in-aid on duty in Dublin."

It has been decided, says the *Standard*, that the command of the Egyptian Army, held by Major-General Sir Evelyn Wood, shall be regarded as military employment as provided for by the Royal Warrant for the regulation of promotion and retirement, and that Gen. Wood's future in the British Army shall in no way be injured by his acceptance of service under the Egyptian Government.

The *Standard* says, "Lieut.-Gen. Sir Archibald Alison is, we understand, to remain in Egypt until the final break-up of the Army of Occupation, when he will return to England, and take up a command on home service."

A general order was promulgated on Saturday, stating that all officers, warrant officers, and non-commissioned officers of infantry who have served for a period of eight years, and those who have served at home for a similar period, will in future be permitted to register their names for posting to the home and foreign battalions respectively, and their applications will be favourably considered whenever the exigencies of the service admit of an interchange being effected. This order will apply to warrant officers and non-commissioned officers of the Royal Engineers unless serving in India. The names of those desirous of this indulgence will be forwarded to the Adjutant-General, through the general officer commanding, on receipt of this order, and afterwards on July 1 annually.

Recruiting for the Foot Guards is now going on in various parts of the country. The Guards' Brigade is at present considerably under the usual strength, owing to the number of men who have left the Brigade to rejoin the Reserve.

Lieut.-Col. W. Hicks, on the Retired List of the Bombay S.C., has been offered and has accepted the appointment as Chief of the Staff of the Army of the Soudan. Col. Hicks joined the Army, June 21, 1864, and became lieut.-col., April 28, 1875. He served in Bengal during the campaign of 1857-58, with the 1st Belooch battalion, and as Staff officer to the Punjab Movable Column; served in the Rohilcund campaign with Major-Gen. Penny's force; commanded the right wing of the 1st Belooch Battalion, detached with Brigdr. Horsford's brigade previous to and on passage of Raptee, near Nepaul; at the defeat of the enemy at Sitka Ghaut, and capture of their guns (mentioned in despatches, medal); served as brigade-major, 2nd Brigade, 1st Division, during the Abyssinian campaign in 1867-68, and was present at the capture of Magdala (mentioned in despatches, brevet of major, and medal).

The *Standard* correspondent at Cairo announces that the following further appointments to the new Egyptian Army have been made:—Col. Grenfell, Head-quarters' Staff, Brigadier-General; Major Chermside, R.E., Capt. Kitchener, R.E., Major Smith, 60th Rifles, and Capt. Davidson, 79th, to command battalions. Col. Taylor, of the 19th Hussars, to command the cavalry.

It is said that a proposal is at present under consideration for the instruction of British Infantry in heavy rifled-gun drill, instead of in smooth-bore heavy ordnance drill.

A full biography of the late Major-Gen. Sir George Hall Macgregor, K.C.B., has been published by Mr. C. R. Low, in his "Soldiers of the Victorian Age," 2 vols. (Chapman and Hall). The record of Sir George Macgregor's services throughout the first Afghan War, including the defence of Jellalabad, and during the Indian Mutiny, is derived from the private papers of the gallant officer, placed by him at Mr. Low's disposal.

The *Standard* announces that "her Majesty has approved of the words 'Egypt, 1882,' and 'Tel-el-Kebir' being added to the honours of the following regiments, in recognition of the services rendered by them in the late campaign, namely:—1st Life Guards, 2nd Life Guards, Royal Horse Guards (Blue), 4th (Royal Irish) Dragoon Guards, 7th (Princess Royal's) Dragoon Guards, 19th Hussars, Grenadier Guards, Coldstream Guards, Scots Guards, Royal Irish Regt., Duke of Cornwall's Light Infantry, Royal Highlanders (Black Watch), York and Lancaster Regt., Highland Light Infantry, Seaforth Highlanders (Duke of Albany's), Gordon Highlanders, Queen's Own Cameron Highlanders, Royal Irish Fusiliers. The following regiments, most of which formed the garrisons of Alexandria and Ramleh, under command of Major-Gen. Sir Evelyn Wood, have received her Majesty's permission to bear the words 'Egypt, 1882,' on their appointments, namely:—Royal Sussex Regt., South Staffordshire Regt., Sherwood Foresters (Derbyshire Regt.), Princess Charlotte of Wales's (Berkshire Regt.), Queen's Own (Royal West Kent Regt.), King's (Shropshire Light Infantry), Manchester Regt."

EGYPTIAN WAR FUND,
FOR THE
RELIEF OF THE FAMILIES OF THE KILLED, AND THE SOLDIERS, SAILORS, AND MARINES WOUNDED AND DISABLED, IN THE EGYPTIAN CAMPAIGN.

UNDER THE PATRONAGE OF HER MOST GRACIOUS MAJESTY THE QUEEN.

Subscriptions to the Fund can be forwarded to Messrs. Cox and Co., Craig's Court, Charing Cross, S.W.; or Lady Jane Taylor, 16 Eaton Place, S.W.

All properly certified claims addressed to the HON. SECRETARY, EGYPTIAN WAR FUND, New Buildings, Little Park Street, Queen Anne's Gate, S.W., will receive immediate attention.

MESS EXPENDITURE.

ON account of orders recently issued on the above subject, Messrs. PELLATT and CO. (formerly APSLEY PELLATT and CO.), Falcon Glass Works and China Manufacturers (the original firm established 1759, by the father of the late Apsley Pellatt, Esq., M.P.), have decided to supply Messes on their wholesale trade terms, which prices are considerably below those usually paid. This branch, which has been the leading speciality of their Manufactures for upwards of 150 years, receives the same personal superintendence and attention as heretofore, and has on its books upwards of 100 Officers' Messes, from whom testimonials may be seen.—All communications must be sent to their only Show Rooms and Offices, PELLATT and CO., 17 St. Bride Street, Ludgate Circus, E.C.

HOTCHKISS AND CO.,
21 RUE ROYALE, PARIS;
AND
49 PARLIAMENT STREET, LONDON.
MANUFACTURERS of HOTCHKISS' PATENT
REVOLVING CANNON,
SINGLE-BARREL RAPID-FIRING GUNS,
MOUNTAIN and YACHT GUNS, AMMUNITION,

NOTICES TO CORRESPONDENTS.

ESPIONAGE!—Letters from "Post Captain," "Nauticus," "Royal Navy," "Rear-Admiral," and many others, have to stand over until next week.

CONSTANT READER.—The Agent-General for the Colony will give you all information.

R. N.—Captain Hunt Grubbe, although a K.C.B., is not entitled to the prefix "Sir" until he has been knighted by the Sovereign, or her representative, if he should be serving on a foreign station.

S. O. P.—The officer is certainly justified in feeling offended. The Secretary of State for War and Adjutant-General of the Forces have both given their opinion in favour of those who think with him.

AN OLD SOLDIER.—The promotion has been given as a reward for services in the field.

The ARMY AND NAVY GAZETTE this week contains four pages extra.

The NAVAL AND MILITARY STATIONS are published by the ARMY AND NAVY GAZETTE on the first Saturday in each month.

Army & Navy Gazette.
LONDON, SATURDAY, JANUARY 13, 1883.

IT is strange that in one week France should have lost the brain and sword of the National Defence, the two men from whom much was expected in the way of recovering what was lost in 1871—M. Gambetta and General Chanzy; the former the son of an Italian grocer who had settled at Cahors, the latter the son of a country schoolmaster in the Ardennes. M. Gambetta when he died was President of the Committee for the Reorganisation of the Army; and General Chanzy, who commenced life in the Navy, who afterwards went to St. Cyr, who then served until 1870 in Algeria, who, since the Franco-German War, had been Governor-General to that colony, and then Ambassador to the Court of St. Petersburg, died while in command of the 6th Army Corps—that important corps which has its head-quarters at Châlons, which lies along the German frontier, which is never allowed to dip below 35,000 men, and which has in its district several independent divisions of cavalry. In the event of war with Germany, the first brunt will fall upon the 6th Army Corps. Although France cannot be said to desire war, she sincerely regrets both the great orator and the great soldier who fought to the bitter end in 1871, and whom she thought destined one day to win back Alsace and Lorraine for their bereaved mother. When the Franco-German war broke out, General Chanzy was quite unknown to the public; he had served neither in the Crimea nor in Italy, and his name, when it appeared among the list of Generals hurriedly created in 1870, attracted no attention. After the retreat of the French from Orleans, M. Gambetta is said to have written to Marshal MacMahon asking him to point out an officer capable of resisting the victorious legions of the Germans. The Marshal recommended General Chanzy. Upon this, General Chanzy received the command of the Army of the Loire; and he has left behind him a modest account of the campaign which ensued, and which is well worth careful perusal on the part of the military student. Although constantly driven back by the well-trained troops of Germany, Chanzy offered so brilliant a resistance with his raw levies as to astonish his enemies, and save the honour of France. Even after he had been forced back step by step to Mans, he wished to continue the war, and this after the capitulation of Paris. The military qualities which General Chanzy displayed are amply acknowledged in the official German account of the war, and Field-Marshal Von Moltke is said to have been loud in his praise, and to have declared him to be the only officer he knew who could command 200,000 men without losing his head. In 1870 and 1871, General Chanzy had to operate with very indifferent tools, and he no doubt looked forward with anxiety to the day when he should take the field with materials worthy of the glory of the great nation he served. However, this was not to be. General Chanzy is dead and buried,—buried at the expense of a grateful country, deeply afflicted at his loss. We may add that this loss is all the more severe, because the prestige of the deceased General was great in the Army, in which he was regarded as the most able Commander-in-Chief which France possessed.

We understand that H.R.H. the Prince of Wales, at the urgent request of the Princess of Wales, is bestirring himself to put down the cruel sport of "pigeon-shooting." The ladies have formed a ring, and intend "boycotting" Hurlingham until the Gun Club discards "the pretty dove," and adopts the "terra-cotta pigeon,"—a new invention, which is being brought out under the patronage of the Prince of Wales, and can be seen at work at the Ranelagh-Club grounds.

Lord Clyde once said there were two men on his Staff in his last campaign one or other of whom he always employed, when a message was to be delivered under fire with rapidity, decision, and exactly as received. The one was the late Major Fred Alison, who died suddenly some ten years ago, to the great grief of his numerous friends; the other is the present popular Chief of the Staff in Egypt.

Lieutenant J. F. Bagot, Grenadier Guards, has been appointed Aide-de-Camp to the Marquis of Lorne in Canada.

According to an official return, the British Army is composed of 124,434 Englishmen, 13,723 Scotchmen, and 36,945 Irishmen. We should very much like to know how many of those returned under the head of "English" possess names which tell of their Irish birth, or, at any rate, Irish antecedents.

Lieutenant H. L. Gallwey, 59th Regiment, has been appointed Aide-de-Camp (provisionally), to Lieutenant-General T. L. J. Gallwey, Royal Engineers, Governor and Commander-in-Chief of Bermuda.

Should any of the six-and-thirty Colonels over whose heads Major-General Dormer lately jumped feel any soreness thereat, it may be some little comfort to them to know that but for General Dormer's former bad luck, he would always have been their senior, and would probably now have stood on the Major-Generals' List next to Major-General Mark Walker, V.C., who was given a Brevet Lieutenant-Colonelcy in the China War gazette of February 15, 1861. At the conclusion of the China Campaign, General (then Major) Dormer, who had been Deputy-Assistant-Adjutant-General at Head-quarters throughout, whilst a Captain and Brevet Major in the 13th Light Infantry, elected to be rewarded by an unattached Majority, instead of a Brevet Lieutenant-Colonelcy, the result being that for years after he was jumped over by hundreds who had been his juniors as Majors, but who subsequently got their Lieutenant-Colonelcies regimentally or by special brevet before him.

The whole of the ordnance buildings upon the Queen's Wharf at Kingston, Jamaica, were, according to the report of the Governor, destroyed in the recent conflagration.

We are in a position to confirm the report that Brevet Lieutenant-Colonel C. Grove, 15th Regiment, will succeed Lieutenant-Colonel W. R. Lascelles, Rifle Brigade, as Deputy-Assistant-Adjutant-General at the Horse Guards.

Although Commissary-General Sir Edward Morris, K.C.B., has joined the staff of the War Office, Commissary-General Watt, C.B., continues to do duty, as his services cannot be spared until the inquiry is concluded which is now being instituted into the working of the Commissariat and Transport system. Assistant-Commissary-General J. H. Randall, C.B., lately returned from Egypt, has been selected by Sir E. Morris to do duty on his staff.

The appointment of Professor of Military Surveying at the Royal Military College is vacant by the retirement of Colonel W. Paterson, who has held the position since March 25, 1869.

Captain J. E. Lewis, Royal Engineers, has been appointed an Associate Member of the Ordnance Committee at the War Office for Range-finders and Field Guns.

The War Office is again having urged upon it the desirability of breaking up the Northern District into two commands. At the present time, the work of the Major-General holding the command at York and his staff is very excessive. Besides the three cavalry regiments, six batteries of the Royal Artillery, and four battalions of infantry quartered in the district, there are no fewer than twenty-six regimental districts—a third of the whole number—to be looked after. General and staff officers, zealous as they may be, are not usually possessed of the characteristics which rendered Sir Boyle Roche's bird remarkable; they are only blessed with one head and one pair of eyes apiece, and they cannot, therefore, do two people's work. Seeing how much has to be done nowadays by the General commanding a district, owing to the welding of Line, Militia, Yeomanry, and Volunteers into that "harmonious whole" to which Lord Cardwell so often referred, the time seems to have arrived for a little fairer division of labour than exists at the present time in connection with the administration of her Majesty's forces serving in the North of England.

Major T. S. St. Clair, 49th Regiment, has been selected to do duty, as a temporary arrangement, as Garrison Instructor to the Army of Occupation in Egypt, it having been found desirable to enable young officers to utilise their leisure in preparing for the qualifying examination.

The appointment of Deputy-Assistant-Adjutant and Quartermaster-General at Cyprus, which was created in September last under special circumstances, has been abolished, and Captain W. Cooke-Collis, 83rd Regiment, reverts to his regiment.

Brigadier-General Arbuthnot, on vacating the command of the Cavalry in Egypt, will resume his former appointment as Deputy-Adjutant and Quartermaster-General at Malta, relieving Colonel Thynne, Grenadier Guards, who returns to regimental duty.

Owing to the present state of affairs at the Cape, provision is to be made in the new Estimates for the retention of the Inniskilling Dragoons in Natal, and the regiment will probably spend another year in South Africa.

It has been announced that it is the intention to raise the Western District from a Major-General's to a Lieutenant-General's command. Nothing is known as to any such intention at the War Office; and when Lieutenant-General Pakenham retires in April next, he will be succeeded by an officer of Major-General's rank.

Distinguished-service rewards of £100 per annum have been conferred upon Major-Generals R. P. Radcliffe, Deputy-Adjutant-General of Royal Artillery; W. W. Barry, C.B., Royal Artillery; and J. de Montmorency, Colonel on the Retired List, lately commanding a Regimental District.

The Medical officers who did duty in the Palace Hospital at the base in Egypt are, apparently, to get nothing. All who were in Egypt bear testimony to the zeal displayed by Surgeon-Major Anderson and his Staff, and it seems hard that they should have to suffer from the shortcomings of a system which, whatever its defects may be, did not break down from any fault of theirs. They are spoken of as having set an example to the whole of the Medical Staff of the expedition. But they have not even received the Medjidie or Osmanieh, though they were brought time after time to the notice of superiors on account of their devotion. The case of these officers almost proves the truth of the argument that the more a man does when serving with an army in the field, the less chance he has of obtaining honour or reward.

A good-service pension of £50 per annum has been granted to Captain and Quartermaster J. Forbes, 42nd Highlanders, in recognition of his long and faithful services. Captain Forbes has lately served with his regiment throughout the Egyptian Campaign, and was brought specially to notice on account of his devotion to duty.

We notice in Tuesday's *Gazette* the announcement of the promotion of Major G. C. Sturgeon, 24th Middlesex Rifle Volunteers, from Captain to Major in the Reserve of Officers. Major Sturgeon owes his promotion to the fact of his having commanded the Army Postal Corps in Egypt. The services rendered by him and the non-commissioned officers and men under his command were so valuable, that we are glad to find that he has not been allowed to go unrecognised.

We find the name of a Lieutenant-Colonel A. H. A. Gordon, on the Active Half-pay List, in the monthly *Army List*. Who can the officer be? There is only one Colonel A. H. A. Gordon in the Army that we know of, and he is on full pay, of the York and Lancaster Regiment.

Although it is a well-known fact that not one out of ten Militia officers reside in the same county in which they do their annual training, the War Office, with its usual want of forethought, has established a hard-and-fast rule which precludes officers of the Auxiliary Forces from undergoing the examination in tactics anywhere but at the head-quarters of their own particular district, *i.e.*, the district in which their militia or volunteer regiments have their head-quarters. What is the result? Officers who wish to undergo the examination have all the trouble and expense of a long railway journey before they can pass the ordeal. It has happened in several instances that officers have gone up for the examination only to find, on their reporting themselves, that there has been no one to examine them. Surely it is not too much to expect that those who make all the sacrifices which Militiamen and Volunteers do, in order to serve the State, should have a little more consideration shown them.

We should like to see other City Companies follow the example of the Skinners', the Master of which has forwarded a cheque for 20 guineas in aid of the Cambridge Fund for Old and Disabled Soldiers. In going through the list of subscribers to Naval and Military charities, the absence of the rich City Companies is particularly noticeable. Yet to no body of men is the maintenance of an efficient Army and Navy of more importance than to the "City princes," whose names are to be met with on the liveries of the Corporations in question.

The question of Cavalry organisation or reorganisation is carefully and temperately reviewed in a letter to the *Times* from Lieutenant-Colonel Turnbull, formerly Brigade-Major of Cavalry at Aldershot. Colonel Turnbull's letter is especially valuable because he has no pet scheme to propose, and discusses dispassionately the various devices for making each Cavalry soldier appear to be two or more.

The Foot Guards are considerably below their establishment, and night duties press heavily on the battalions doing duty in London. Yet we find that a number of effective Guardsmen are employed at the War Office as messengers, or in some such capacity. Surely, it does not require a stalwart Guardsman to take a letter from one room to another, a duty which could be performed as satisfactorily by a veteran commissionaire. Many of these Guardsmen are evidently expanding their tunics, if not their intellects, and the greatest strain caused by their work is that borne by the buttons in the neighbourhood where their waists used to be.

Captain Raikes, the Instructor of Musketry of the Honourable Artillery Company, a very zealous and hard-working officer, has written a letter to the *Times*, calling attention to the increasing difficulty of finding suitable ranges for rifle-practice in England. If ranges were provided at the public expense, as Captain Raikes suggests, instead of being made or rented by the Volunteers, as at present, they might be available for all branches of our military forces. Many of the ranges used by the Volunteers do not by any means fulfil the conditions of absolute, or even reasonable, safety; and few of them would meet the requirements of field-firing, with the distances possibly unknown and the firing probably rather wild. The subject of rifle-ranges is complicated and many-sided, and will soon demand careful consideration.

There is, after all, some hope for officers who have received no reward for their distinguished services in Egypt. If H.R.H. the Duke of Cambridge is only thought of now, two months after the appearance of the "Beatification Gazette," officers of less exalted rank need not be surprised if they should have to wait twelve times as long.

The Navy.

ADMIRALTY, January 4, 1883.

Royal Marine Light Infantry.—Captain William Frederick Campbell to be Major, vice Norton, retired (Dec. 31, 1882).

ADMIRALTY, January 5, 1883.

Fleet Surgeon David Wilson, who was placed on the Retired List from December 18 last, has been allowed to assume the rank and title of Deputy-Inspector-General of Hospitals and Fleets on the Retired List from the same date.

ADMIRALTY, January 6, 1883.

The following promotions have been made:—Inspector of Machinery Richard Henry Sleeman to be Chief Inspector of Machinery in her Majesty's Fleet; Chief Engineer George Hiram Beaton to be Inspector of Machinery in her Majesty's Fleet, both with seniority of December 9, 1882.

Royal Marine Forces.—Sub-Inspector of Schools Thomas Smith to be granted the hon. and relative rank of Captain (July 1, 1881).

ADMIRALTY, January 8, 1883.

Royal Naval Reserve.—His Royal Highness Prince Albert Victor Christian Edward of Wales to be Honorary Sub-Lieutenant (Jan. 8).

In accordance with the provisions of her Majesty's Orders in Council of February 22, 1870, and August 5, 1875, Rear-Admiral Theodore Morton Jones has this day been placed on the Retired List.

The following promotions have this day been made in her Majesty's Fleet:—Sub-Lieutenant Robert Charles Evershed to be Lieutenant, with seniority of September 18, 1882; Sub-Lieutenant Ernest Leigh Austen to be Lieutenant, with seniority of December 31, 1882.

The following Assistant-Paymasters have this day been promoted to the rank of Paymaster in her Majesty's Fleet, with seniority of the 5th inst.:—Abraham Turner and Samuel Edmond Lark.

ADMIRALTY, January 9, 1883.

Fleet Surgeon George Frederick Augustus Drew, who was placed on the Retired List from the 22nd ult., has been allowed to assume the rank and title of Deputy-Inspector-General of Hospitals and Fleets on the Retired List, from the same date.

ADMIRALTY, January 10, 1883.

The following promotion has been made on the Active List, to date the 8th inst., in the vacancy caused by the retirement of Rear-Admiral Theodore Morton Jones on that day:—Captain Robert Gordon Douglas to be Rear-Admiral in her Majesty's Fleet.

Consequent on the above, the following promotions have taken place on the Retired List from same date:—Captains Charles Fenton Fletcher Boughey, George Henry Parkin, James Andrew Robert Dunlop, D'Arcy Spence Preston, and Henry Bedford Woollcombe to be Rear-Admirals on the Retired List.

In accordance with the provisions of her Majesty's Orders in Council of February 22, 1870, and April 30, 1877, Chief Inspector of Machinery John Oliver has been placed on the Retired List of his rank from the 5th inst.

ADMIRALTY, January 11, 1883.

The following promotion has been made:—Staff Surgeon John Richard Burke, M.D., to be Fleet Surgeon in her Majesty's Fleet, with seniority of December 31, 1882.

APPOINTMENTS.

Commanders—Stewart H. Rickman, to the President, vice Washington; Charles Campbell, to the Alexandra, recommissioned; Hon. Assheton G. Curzon-Howe, to the Sultan, vice Kingscote; Sacheverel C. Darwin, to the Cruiser, recommissioned.

Staff Commanders—William W. Hutton, to the Northumberland, vice Tomlin; George J. Tomlin, to the Alexandra, recommissioned; Andrew W. Miller, to the Wye, vice Sarratt.

Lieutenants—Francis P. Carey, to the Northumberland, vice Burt; George F. Glennie, to the Coquette, recommissioned; Arthur R. F. Bailey, to the Cruiser, recommissioned; W. P. Shakespear, to the Excellent, additional; George W. Wingfield, to the Temeraire, vice Moore; Alfred Pigott, Edmund B. Van Koughnet, Hon. Maurice A. Bourke, Charles G. Dicken, Hon. William Grimston, Charles T. Gimlette, and Evelyn R. Le Marchant, to the Alexandra, recommissioned; Arthur T. Stuart, Edward J. Bain, and John H. S. Burder, to the Cruiser, recommissioned; Lewis F. Blackburn, to the Cygnet, recommissioned; James Erskine, to the Champion, vice William De Salis; William H. P. Buckner, to the Indus, additional, vice Roe; Arthur W. Carter, to the Temeraire; Reginald A. Cave-Brown-Cave, to the Temeraire, additional; Herbert J. G. Garbett, to the Coquette, recommissioned; Henry H. Jauncey, to the Cygnet, recommissioned.

Navigating Lieutenants—George A. Broad, to the Indus, additional; Southwell G. T. Bourke, to the Valorous, vice A. W. Carter; Robert B. S. Wrey, to the Curaçoa; Edward P. Ashe, Arthur E. Saul, and Arnot Henderson, to the Philomel, recommissioned.

Sub-Lieutenants—Reginald A. Allenby and Amherst C. H. Pearson, to the Nelson; Cyril E. Tower, to the Coquette, recommissioned; Herbert M. Wyatt, W. C. Pakenham, and Claud A. W. Hamilton, to the Alexandra, recommissioned.

Midshipmen—Mark E. F. Kerr, George W. Smith, Eustace W. C. Stacey, Hugh H. D. Tothill, Herbert J. O. Millar, John F. Murray-Aynsley, and Arthur O. D'Arcy, to the Alexandra, recommissioned; John F. A. Blandy, Hon. W. G. O. Fortescue, Brian H. T. Bartletot, Sydney R. Fremantle, and Arthur C. Levison, to the Alexandra, recommissioned; Edmund F. Talbot, to the Achilles.

Naval Cadets—Douglas R. L. Nicholson, Henry A. B. Shrubb, and Claude P. Buckle, to the Alexandra, recommissioned; H. Blackett, to the Nelson, supernumerary; Harold Christian, Charles F. Corbett, William B. Cowper Cobb, Cecil J. Fiennes, and S. Gordon Douglas, to the Alexandria, recommissioned; Edward D. Ogilvie, to the Achilles; W. H. D'Oyly, Frank O. C. Osborne, and Thomas H. Foster, to the Invincible; George E. S. Petch, George E. Cave, and Arthur H. Walsh, to the Temeraire; Gilbert C. H. Wintle, to the Superb; Michael Culme Seymour and Philip H. Colomb, to the Northampton.

Inspector of Machinery—Charles P. Turner, to the Alexandra.

Chaplain—Rev. Francis G. Pitman, to the Warrior.

Fleet Surgeons—Henry Macdonnell, to the Alexandra, recommissioned; Henry A. Close, to the Invincible, vice Macdonnell; Thomas G. Wilson to the Trincomalee, vice Close.

Staff Surgeon—William Brown, to the Cruiser.

Chief Engineer—William H. T. Bills, to the Wye, vice Bettison.

Surgeons—William F. Spencer and Arthur W. May, to the Alexandra; James A. Jeans, to the Coquette; Edgar G. Swan, to the Monarch, vice Brown; Arthur W. E. B. Barrett, to the Cygnet; Maurice M. R. Mackenzie, to the Cambridge, vice Swan; Charles A. Macaulay, M.D., to the Warrior, vice Spencer; Robert J. M'Cormack, M.D., to the Achilles, vice May.

Paymasters—Charles Walker, to the Penelope, vice Markham; William Dewar, to the Alexandra; Abraham Turner, to the Vigilant.

Assistant-Paymasters—W. H. W. Markham, to the Espoir; Edward G. Edwards and Frederick W. I. Airey, to the Alexandra, recommissioned.

Engineers—James C. Oare, William J. Allen, and George Sparkes, to the Alexandra, recommissioned; Charles J. Cock, to the Indus, additional, vice Alexander; George Mackney, to the Coquette, recommissioned; Alfred Lawton, to the Defence, additional, vice Mackney; James Shirvell, to the Hibernia, additional, vice Alton; Harry W. Wilkins, to the Asia, additional, vice Shirvell; Francis Ford, to the Indus, additional, vice Landells; James H. Gilbert, to the Alexandra, recommissioned; Thomas Williams, to the Indus, vice Gilbert.

Assistant-Engineers—John A. H. Hicks, to the Temeraire, vice Sharp; Edwin C. Carnt, to the Warrior, vice Hicks; William Hudson and George W. Fowler, to the Alexandra, recommissioned.

Chief Carpenter—Thomas H. Haggarty, to the Ganges, additional, vice Popplestone.

Chief Boatswains—Daniel Wakeham, to Sheerness Yard, vice Beaton; Nicholas Tucker, to be master rigger, Portsmouth, vice Farrel.

Carpenters—Charles Martin, to the Asia, additional, for service in the Camperdown; Henry Harcus, to the Asia, additional; William H. Johns, to the Alexandra, recommissioned; James Goodwin, to the Asia, additional for Phaeton; Thomas Drury, to the Arethusa; David Howe, to the Leander.

Clerks—Frederick R. Waymouth, Richard E. S. Sturgess, John A. Keys, and Edward, W. Street, to the Alexandra, recommissioned; Frederick T. Voules, to the Sultan.

Gunners—James McDonnell (for torpedo duties), to the Alexandra, recommissioned; Benjamin Cook, to the Asia, additional, vice Birch; Frederick Tull, to the Excellent, vice Nightingale; William Walsh (a.), to the Asia, additional, for service in the Avon; William Burgess, to the Coquette, recommissioned; Samuel Saxon, to the Philomel; Gerald Atkin, to the Alexandra; Cain Mahoney, to the Asia, additional, vice G. Atkin.

Boatswains—Richard Cox, to the Alexandra, recommissioned; George Downer, to the Cruiser; John Anderson (for quarter-deck) and William Jones, to the Alexandra, recommissioned; Walter C. Millgate, to the Temeraire.

Promotion.

Daniel G. O. Donnell, to be gunner.

Coastguard.

Chief Boatmen—Jas. Hallenn, Boxmoks, to be chief boatman-in-charge; James Ward, Sidmouth, to be chief boatman-in-charge, Polperro; Jas. Yates, Southend, to be chief boatman-in-charge, Armagh.

Commissioned Boatman—James Ireland, Mothercombe, to be chief boatman, Yealm.

Albatross, Com. Arnold J. Errington, was at Ningpo on Nov. 25. A social meeting was held on Nov. 23 at the Sailors' Rest. About 30 of the crew attended, and spent a pleasant evening. She subsequently sailed for Hong Kong, calling at Chusan, Foochow, &c., on her way down.

Amethyst, Capt. M. Bowden-Smith, senior officer on the south-east coast of America, was, according to letters dated Dec. 12, at Monte Video, and would proceed to the Falklands on Dec. 31. The Rifleman, Com. P. H. W. Mayow, was expected at Monte Video daily. The Rambler, Com. Hon. A. Littleton was about to proceed to Bahia Blanca. The Firefly, Lieut.-Com. E. G. F. Law, was at the Falkland Islands, awaiting the arrival of the Amethyst in January.

Arab, Lieut.-Com. C. R. Wood, left Al Bidaa on Dec. 4 for Kurrachee and Bombay.

Boadicea, Capt. Edmund J. Church, flagship of Rear-Admiral N. Salmon, C.B., V.C., Commander-in-Chief of the Cape of Good Hope and West Coast of Africa station, was at Saldanha Bay on Dec. 18, but was due at Simon's Bay on Dec. 22, when she would rehoist the flag of the Commander-in-Chief (which was temporarily hoisted in the Flora), and leave for a cruise round the station on Jan. 6. The Briton, Capt. A. J. Kennedy, which arrived at Simon's Bay on Dec. 17, was to convey Cetewayo to Port Durnford early in the present month (has since done so). The Algerine, Com. G. W. Allen, was expected at Simon's Bay from St. Paul de Loanda. The Flirt, Com. R. F. Hammick, was at Cape Coast Castle, as senior officer on the West Coast of Africa. The Bullfrog was to remain in the Bights. The Starling was to be stationed in the southern sub-division until further orders.

Daring, Com. Francis Eliott, left Yokohama on Nov. 26, with Sir Harry Parkes on board, for Kobé, intending to return in about a fortnight. (Has since returned.)

Dart, Lieut. and Com. W. U. Moore, left the Cape of Good Hope, on Tuesday, for the Australian station.

Dido, Capt. Compton E. Domvile, left Jamaica on Jan. 4, for Charleston, to convey H.R.H. the Princess Louise, Marchioness of Lorne, to Bermuda, where Admiralty House has been fitted up for her reception and use during the stay of the Princess in the islands.

Espoir, Lieut. and Com. E. H. Gamble, was commissioned at Portsmouth on Jan. 11 for the China station, with a complement of 50.

Fawn, Com. Pelham Aldrich, on passage home, left the Cape of Good Hope on Jan. 11.

Flying Fish, Lieut. and Com. Hoskyn, has been presented with a fine vase, a handsome specimen of Japanese art, by the Mikado, in recognition of his services to the Japanese Embassy when flying from the Korea.

Grappler, Lieut.-Com. H. G. Gough, after landing Lord Napier of Magdala at Oran, was to proceed to Cadiz to be docked on Jan. 8.

Himalaya, Capt. Palliser, sailed last week, with new crews for the Pegasus and Albatross, on the China station. The following officers embarked at Devonport for passage to their respective ships:—Lieut. C. S. Nicholson, Pegasus; Pymr. A. S. C. Clarke, Albatross; Chief Engineer J. W. Duper, Albatross; and Staff Surg. H. M. Ellis, Pegasus.

Iris, Capt. Ernest Rice, flying the flag of Admiral Lord Alcester, Commander-in-Chief in the Mediterranean, arrived at Malta on Friday from Corfu. The Himalaya entered the harbour about the same time.

Kestrel, Com. Edwin Hotham, arrived at Foochow on Nov. 28. The *Foochow Herald* says:—"We understand that she has not been ordered here with any specific object, but is purely on a casual visit, which is expected to last a few weeks. We are always pleased to observe one of her Majesty's gunboats in Foochow, in fact, one would think that this is a sufficiently important port to be entitled to have a man-of-war constantly stationed in these waters. Strong N.E. gales have been prevailing outside. The German man-of-war Iltis is reported to have been seen, with a loss of foremast, steaming north. The recent several phenomena of comet, moon shining by day, and slight earthquake, have rendered the natives exceeding fearful, and they attribute the recent dreadful fire and the existing cholera epidemic to these strange events. With a view to preventing worse results, a general chin-chin joss has been held."

Mallard, Lieut.-Com. H. W. A. Littledale, arrived at St. Vincent on Monday last, and was to leave for Bermuda on Jan. 11.

Minotaur, Capt. John Fellowes, flagship of Vice-Admiral Sir William Dowell, commanding the Channel Squadron, is ordered to be out of dockyard hands by Jan. 13, after which she will recoal and provision, and proceed to Portland early in February. She will be joined there by the other vessels of the Fleet, and will then start upon a training and evolutionary cruise, lasting nearly three months. The Lively will, as also the Sultan, join the Channel Squadron at Gibraltar.

Nelson, Comdre. J. E. Erskine, in command of the Australian station, arrived at Hobart Town on Jan. 5.

Northampton, Capt. N. S. F. Digby, flagship of Vice-Admiral Sir J. E. Commerell, V.C., Commander-in-Chief of the North American and West Indies station, was recommissioned on Dec. 14.

Orion, Capt. FitzRoy, will, we believe, be staioned at Alexandria till April. She is at the Mole.

Orontes, Capt. H. G. Andoe, will be paid off at Sheerness on Jan. 23. She was commissioned for particular service at Portsmouth on Feb. 7, 1876.

Pegasus, Com. Edward F. Day, was at Singapore on Dec. 10. The s.s. Normanby, loading in the Roads for Java ports, was early on Dec. 3 found to be almost in a sinking condition, the engine-room being full of water. By the aid of a boat's crew of the Pegasus, she was warped in shore till she grounded, when she was pumped out, and towed into New Harbour Dock.

Swiftsure, Capt. H. C. Aitchison, flagship of Rear-Admiral Algernon M'L. Lyons, Commander-in-Chief of the Pacific station, was at Ancon on Dec. 6, and was to leave Callao on Jan. 8 for Payta, Galapagos, Honolulu, and Esquimault. The Thetis, Capt. A. C. Curtis, was at Valparaiso, conducting the duties of senior officer on the coast of Chili. The Gannet, Com. E. G. Bourke, was at Valparaiso, under orders of the senior officer; would leave for Coquimbo on Nov. 25, to refit. The Comus, Capt. J. W. East, will leave Vancouver for Callao on the completion of the special service on which she is now employed by the Admiralty. (Has already left to rejoin the flag.) The Sappho, Com. B. F. Clarke, was on passage to Coquimbo; will accompany the flagship from Callao to Payta and Galapagos, and then proceed to Esquimault, calling at Central American and Mexican ports. The Mutine, Com. F. Edwards, was at Ancon; will accompany flagship. The Kingfisher, Com. R. H. Thornton, was on passage to Callao; on arrival from Vancouver, will remain on the coast of Peru. The Rocket, Com. V. B. Orlebar, was at Valparaiso; would leave for England on Dec. 7. The Sylvia, Capt. Wharton, was at the Straits of Magellan, surveying.

Tamar, Capt. T. Harvey Royse, after having had her machinery repaired, proceeded on trial of her engines on Jan. 8. She is ordered to Portsmouth to embark troops for the Mediterranean.

Tenedos, Capt. C. G. Fane, was recommissioned on Dec. 14.

Thalia, Capt. J. W. Brackenbury, C.M.G., left the Sound on Wednesday last week for China, taking out new crews for the Victor Emanuel and Curaçoa with supernumeraries. She called at Gibraltar, and has proceeded for Malta, Aden, Singapore, and Hong Kong.

Tyne, Com. B. E. Cochrane, having completed her refit and repairs at Chatham, will embark detachments of Royal Artillery and other corps for conveyance to Gibraltar and Malta, at the same time taking out reliefs for the vessels in the Mediterranean.

Woodlark, Com. T. P. W. Nesham, was at Bushire, and would proceed to Busreh about Dec. 11.

Zephyr, Lieut. and Com. G. N. Pollard, was at Chefoo on Nov. 26, when three Chinese gunboats were in port, six having previously left for Port Arthur.

STIMULANTS and insufficient amount of exercise frequently derange the liver. Eno's Fruit Salt is peculiarly adapted for any constitutional weakness of the liver. A world of woes is avoided by those who keep and use Eno's Fruit Salt.—"All our customers for Eno's Fruit Salt would not be without it upon any consideration, they having received so much benefit from it.—Wood Brothers, Chemists, Jersey, 1878." CAUTION.—Legal Rights are protected in every Civilised Country. Examine each bottle, and see the capsule is marked "Eno's Fruit Salt." Without it, you have been imposed on by worthless imitations. Sold by all Chemists, price 2s 9d and 4s 6d. Directions in Sixteen Languages, how to Prevent Disease. Prepared only at Eno's Fruit Salt Works, Hatcham, London, S.E., by J. C. Eno's Patent.

Memorial Brasses.—Messrs. John Hardman and Co., who pay special attention to Military Brasses, have lately executed for her Majesty the Queen several important works for St. George's Chapel, Windsor. Designs are prepared for approval, with estimate of cost. —Offices, 13 King William Street, Charing Cross.

"Sapo Carbonis Detergens" is a physician's name for a remedy prescribed for the past quarter of a century for every variety of skin disease. The public have also adopted the same, as a preventive of small-pox, scarlet fever, and measles. Purchasers should see that the Latin brand is on every tablet, and Wright's Coal Tar Soap on each wrapper, without which none is genuine.

NAVAL NOTES.

In Naval circles in Portsmouth it is stated that the Admiralty contemplate temporarily reviving the appointment of second-in-command of the Mediterranean Fleet in favour of the Duke of Edinburgh, which would afford his Royal Highness an opportunity of hoisting his flag as Vice-Admiral. The Duke is not, however, expected to remain on active service on that station for more than six months, but, accompanied by detached vessels of the Squadron, would probably visit the principal Mediterranean ports. It is also understood that Midshipman Prince George of Wales will in the summer be appointed to the Mediterranean Fleet.

Mr. W. H. White commenced a series of five lectures at the Royal Naval College, Greenwich, on Wednesday, Jan. 10, on "The Steering of Ships." The lectures will be continued from 12 to 1 p.m. on each succeeding Wednesday, when, perhaps, Mr. White will explain why the Ajax will not answer her helm.

At the quarterly meeting of the directors of the Naval Medical Supplemental Fund, held on the 9th inst., Sir W. R. E. Smart, K.C.B., M.D., Inspector-General, in the chair, the sum of £54 was distributed among the several applicants.

The Commander-in-Chief at Devonport has had to interfere on board the Thalia, where the crew were nearly in a state of mutiny, owing to their leave having been stopped. The special-leave men were allowed on shore. When will the Admiralty learn wisdom in the matter of leave-granting?

A Marine, belonging to the Crocodile, is in custody on board the Duke of Wellington, at Portsmouth, charged with having broken into the cabin of Lieut. Pemberton, Rifle Brigade, who had just joined the troopship for passage to India, and with having stolen from that officer's baggage money to the value of £114, in notes and gold.

The *Western Morning News* hears that a serious matter has just been engaging the attention of the Commander-in-Chief at Portsmouth. Recently, by orders of the Admiralty, the victualling and other accounts of one of the harbour ships were called for, and these having been forwarded, the books were demanded, when it was found that several were missing, so that it was impossible to institute any comparisons or to check the accounts. The matter has been investigated by Admiral Hornby, and reported to the Admiralty, who have censured the responsible officer for having entrusted the books to the ship's steward, and have ordered the latter to be superseded.

The following ships will undergo steam trials at the Nore during the present month:—Trent, gunboat; Opal, corvette; Tyne, troopship; Ajax, turret-ship; Conqueror, turret-ship; and Stork, gunboat.

The Opal, attached to the Chatham Steam Reserve, is being hastened forward in her repairs, as she is required for immediate commission to relieve one of the vessels ordered home.

The Frolic, which is being brought forward for commission at Sheerness, has been fitted with a false keel and several other important improvements. She was to have been completed during this financial year, but owing to the increase of work, consequent upon the Egyptian war, it will be impossible to complete her before June next.

The Volage will be passed from the dockyard hands into the First Division of the Steam Reserve on Jan. 22, preparatory to being commissioned for service on the China station.

The Caroline is ordered to be fitted with the electric apparatus for discharging torpedoes, and also with Admiral Sir Edward Commerell's patent jury rudder.

The Conquest is likely to be undocked very shortly at Keyham, and to be put into commission. Her destination is expected to be the Australian station.

It appears from the last Quarterly *Navy List* that the following ships have been ordered home:—Gannet, Com. Edmund G. Bourke, from the Pacific (commissioned at Sheerness, April 17, 1879); Firebrand, Lieut.-Com. James J. L. Sisson, from North America and West Indies (commissioned at Devonport, Dec. 9, 1878); Iron Duke, Capt. St. John, from China (commissioned at Devonport, July 5, 1878); Rocket, Lieut.-Com. V. B. Orlebar, from the Pacific (recommissioned at Esquimault, July 25, 1878); Seagull, Lieut. W. H. B. Rae, from the East Indies (recommissioned at Devonport, Feb. 18, 1879); Lily, Com. R. Evans, from China (recommissioned at Hong Kong, June 24, 1879); and the Thetis, Capt. A. Curtis, from the Pacific (commissioned at Devonport, May 13, 1879).

A circular will shortly be issued by the Admiralty affecting engine-room artificers in her Majesty's Navy. Engagements will for the future have to be entered into to serve 12 instead of 10 years, a subsequent 10 years making the total service 22 years, instead of two engagements of 10 years, being the period entitling them to a pension. The pay will be as follows:—Chief engine-room artificer, 1st class, 7s. 6d. a day; ditto, 2nd class, 7s. a day; engine-room artificer, 1st class, 6s. 6d. a day; ditto 2nd class, 6s. a day; ditto 3rd class, 5s. 9d. a day; acting engine-room artificer, 4th class, 5s. 6d. a day (on entry). The higher grades are liable to a reduction of pay and position for misconduct.

The Admiralty have been brought to a sense of their responsibilities in a somewhat unpleasant manner by a coroner's jury. A boy having died on board the Foudroyant, a coroner's inquest was held, when it was ascertained that, although the crew numbered nearly 300, there were no medical men, or even sick-bay, on board. The jury requested the coroner to call the attention of the Admiralty to this disgraceful want of organisation. In reply to his letter, the coroner has been informed that the Admiralty have at once given directions for one of the medical officers of the Cambridge to sleep on board the Foudroyant every night, and also for the establishment of a dispensary on board the latter ship. The Admiralty paid prompt attention to the suggestions of a body of civilians, wielding more or less political power. Had a naval officer presumed to call the attention of the Admiralty to the state of things on board the Foudroyant, he would have been politely told to mind his own business, if not rebuked for interfering.

The Admiralty have given the following directions as regards officers invalided from foreign stations:—1. The form of the report of the medical survey held on such officers (S. 249 Foreign), has been revised, and all surveys are to be reported in the amended form, a specimen of which is attached. In future, the surveying officers are not to express an opinion as to the disability being attributable to the service, but are to state in full the causes of the disability. 2. Should their Lordships consider that the disability is not attributable to the service, or should the reasons for sending the officer home be in other respects unsatisfactory, the officer will be required to defray one-third of the expense of the passage. The following alterations are to be made in the Queen's Regulations:—Page 447, article 1,414—Cancel paragraph *d*, and substitute, "when invalided, and the disease or hurt is, in the opinion of the Admiralty, attributable to the service." Page 583, article 1,853, paragraph 1—In lines 5 and 6 from top of page, omit the words, "Stating whether the disease or hurt was in their opinion atttributable to the service," and add, "in full the causes of the disability."

The Admiralty direct that the following alterations are to be made in the Queen's Regulations regarding the repairs of ships on foreign stations. On page 398, article 1,235, paragraph 4—In line 1, after the word "hand" add in manuscript the words "by the private trade," and add new paragraph 6, as follows:—"When defects of ships are made good in H.M.'s Yards abroad, they are to be dealt with as directed in article 43, page 14, of the Foreign-Yard Instructions; and the lists of defects and estimates are to be forwarded to the Admiralty in every case, as therein directed."

The Hecate, one of the four armoured monitors built some time since for defence of our principal rivers, and carrying in each of her two revolving turrets two 18-ton guns, arranged for "all round fire," has been docked by Messrs. R. and H. Green, at Blackwall, for alterations, &c., whereby increased accommodation for officers and crew, stowing of coals, &c., will be obtained.

Mr. George Kenning had the honour, on Tuesday last, of submitting to her Majesty the Queen, at Osborne, the sword of honour, manufactured by him to the order of the Corporation of the City of London, for presentation to Admiral Lord Alcester.

The Admiralty have approved of Mr. Dixon Kemp's book on "Yacht and Boat-Sailing" being added to the seamen's libraries in the ships of the Royal Navy.

The Satellite has completed her refit and repairs at Chatham, and is now ready for commission.

Mr. Henry F. Jonson, engineer of the Carysfort, has been reinstated in the two years' seniority of which he was formerly deprived by sentence of court-martial. The Admiralty intend this as a special mark of their approval of Mr. Jonson's conduct during the Egyptian war, in fitting locomotives and other engineering work.

Mr. Henry George Harding, Mr. Percy John Macgee, and Mr. Edward Sidney Hall, students on board the Thames training-ship Worcester, having been strongly recommended to the Admiralty by the authorities, have received appointments as midshipmen in the Royal Navy.

Sub-Lieut. E. F. Inglefield, of the London, has been temporarily appointed interpreter in the Swahili language on board that ship, and on the usual certificate of qualification being received, his appointment will be confirmed, and dated Nov. 6 last, the date of his passing the necessary examination.

Oliver Jew, late ship's steward of the Cambridge, was liberated from Bodmin Gaol a day or two since. The primary grounds for release were that Jew was suffering from an organic disease. There is reason to believe, however, that the Admiralty had other objects in view in directing that Jew should be set at liberty. It is known that he offered under certain conditions to make a confession before being sent to Bodmin. These were refused then; but the recent Clyde court-martial disclosures are supposed to have induced the Admiralty to set the ex-ship's steward at liberty, and a Devonport "scandal" is looked forward to as being likely to very soon follow the Clyde scandal.

The Queen, taking into consideration the great public spirit shown by the late Professor Palmer, has been pleased to grant to his widow a pension of £200 per annum. There are four children to provide for, but the Admiralty are considering the advisability of appropriating a sum from the vote of credit towards educating the younger ones.

The following addresses of detached ships are officially announced:—Mediterranean station—Letters for the Orion, Falcon, and Coquette, to be sent to Alexandria. Letters for the Monarch, Condor, and Beacon, to be sent to Port Said. Letters for the Decoy to be addressed care of H.B.M.'s Consul, Suez. Letters for the Grappler are sent to Gibraltar, *viâ* France, daily; Superb, Rhodes, *viâ* Belgium and Trieste, care of H.B.M.'s Vice-Consul. Channel Squadron—Letters for the Minotaur should be addressed Portsmouth; Agincourt, Achilles, and Northumberland, Devonport; Lively, Sheerness. East Indies—Letters for the Dragon should be addressed Malta. Miscellaneous—Letters for the Jackal should be addressed Rothesay, Bute, N.B.; Sylvia, Sandy Point, Straits of Magellan; Valorous, Devonport. Outward bound—Letters for the Dart should be addressed Sydney, N.S.W.; Heroine, care of H.B.M.'s Consul, Monte Video; Linnet, Singapore; Garnet, West Indies; Constance, care of H.B.M.'s Consul, Monte Video. Homeward bound—Letters for the Iron Duke should be addressed care of H.B.M.'s Consul, Suez; Rocket, Seagull, and Fawn, Devonport.

Mr. Nicholas Tucker, chief boatswain of the Monarch, has been appointed to succeed Mr. John Farrell, chief boatswain, as master-rigger at Portsmouth Dockyard.

The directorship of the Indian Marine having been resigned by Capt. Harry W. Brent, R.N., the appointment has, it is stated, been offered to Capt. John Hext.

An application has been made with a view of obtaining a pension on the Compassionate Fund for the daughter of the late Dr. Alexander Cross, retired Deputy-Inspector-General of Hospitals and Fleets, Royal Navy, who died last month. This officer entered the service as assistant-surgeon March 9, 1827. He served in the Challenger, in the East Indies, 1827-1833; in the Lynx, on the coast of Africa, 1833-1837. Promoted surgeon, May, 1838; served as such in the Columbine, 1838-1843, on the West Coast of Africa and in China; in the Imaum, at Jamaica, from 1844-1847; the Ocean, flagship at Sheerness, 1848-1851; in the Equestrian, convict ship, Australia, 1852-1853; in the St. George, 1854-1856, in the Baltic and on particular service; in the Cæsar, 1856-1857, on particular service; in the Wellesley, at Chatham, 1858-1859. Promoted staff surgeon, 1859. Sheerness Dockyard, 1859-1864, during which latter year he was retired with a step of honorary rank. This officer served in her Majesty's Navy for a period of nearly half a century, in all quarters of the globe, and was in possession of the China and Baltic medals, as also a good-service pension on retirement. He died at Chatham at the close of last year, and it is to be hoped the Commissioners will grant his surviving daughter, though over age, the usual Compassionate allowance.

The trial trip of the new armour-plated turret-ship Ajax has proved a failure. When the vessel reached the measured mile her rudder would not act satisfactorily, and the officials watching the results of the trial deemed that it would be unwise to proceed. The vessel, therefore, returned to Chatham.

Com. F. J. Pitt has relieved Com. Sir F. Blackwood, Bart., in the command of the Hibernia. Sir Francis and Lady Blackwood left Malta on the 3rd inst. for Italy and England, greatly regretted by Malta society.

Now that the tendency of the age is to become familiar with distant lands, we cannot help thinking that the directors of the Peninsular and Oriental Steamship Company have shown wise foresight in making a wholesale reduction in their rates for return tickets. For a hundred guineas a man can be carried to and from China or Australia, whilst other facilities are offered to those who wish to visit India. In making a tour of this nature, nothing would tend so much to extend the ideas of the youth of this country as to make it a kind of condition in their lives that, before entering the arena of work, they should obtain some practical knowledge of the ways and customs of the East. Now that the example has been set by the Prince of Wales of sending his sons on a tour similar to that which can be obtained through the Peninsular and Oriental Company's new arrangements, doubtless the experiment will be found a successful one in every way.

MAGAZINE RIFLES.

Next to the machine-gun question, that relating to magazine rifles is the principal one at this moment being discussed in military circles. Up to the present, however, if we except the trials made in 1881 at Woolwich, and those since then carried out at Berlin, no really serious attempt was made to determine the value of these arms, until quite recently, when the Swedish Government appointed a committee of officers to experiment with and report upon the different known systems of magazine rifles. The report of this committee is now before us. Space prevents us going into it in detail. Suffice it to say that the committee divided the rifles into three classes:—1, Rifles with magazines fixed to the barrel, such as the Jarmann, Kropatchek, and Krag; 2, rifles carrying the magazine in the butt, like the Hotchkiss; 3, rifles with the magazine fixed above or below the mechanism, like the Krag, or with movable magazines, like the Jarmann or the Lee. The Hotchkiss rifle soon became disabled; as did also most of the others. The two Jarmann rifles and the Kropatchek were left to compete in the final trials. The committee has recommended the Jarmann rifle, with fixed magazine, for adoption in the Army of Norway and Sweden.

Reviews.

Hints on Boat-Sailing and Racing. By Capt. Fitzgerald, R.N. (Griffin and Co.)—It is a very common error to suppose that boat-sailing is a matter of intuition, rather than of study and experience. However, that mistake is, generally speaking, very soon made clear, and proper attention is given to the best mode of gaining information that will enable the tyro to acquire the scientific knowledge necessary to insure proficiency in boat-sailing. Capt. Fitzgerald's tiny exposition of the art is admirably suited to effect this object. He grapples with the subject right off the reel, and does not loosen his grasp until he has exhausted it and usefully instructed his readers. There is one observation he makes which it is desirable should not be passed over lightly. It is, that boat-sailing is a nursery for ship-sailing, and that a good knowledge of the former will prove an excellent foundation for seamanship in all its branches. Capt. Fitzgerald's manual, if it may be called so, possesses a great many merits, and it is to be regretted that we cannot spare sufficient space to make them as apparent as they deserve.

Russian and English Dialogues. By R. Thompson. (Trübner and Co.)—The Russian language is a most difficult one to acquire, and any assistance that may be directed to enable the student to achieve that object will, no doubt, receive a ready welcome. The little book just published contains a variety of dialogues in Russian and English, which have been completed by Mr. Thompson, who for some time held the appointment of Lecturer of the English Language in the University of St. Vladimir, Kieff. Trifling as this little work may appear, it is easy to understand that to accomplish it must have required many years of study. The compiler's principal aim has been to give as nearly as possible an exact translation of the Russian phrase, and of individual words. One thing is perfectly certain, namely, that he has made a most happy selection of the phrases used in his dialogues.

ARMY and NAVY CLUB.

REQUIRED, the services of a GENTLEMAN as MANAGER and SECRETARY. Applicant must be under fifty years of age, and all applications, to be made in candidate's own handwriting, stating age, past and present occupation, and giving references, to be addressed to the Chairman of the Committee, Army and Navy Club, Pall Mall, and endorsed "Manager." Copies only of testimonials to be sent, and no applications will be received after January 30. By order,

H. ASTLEY HARDINGE,
Secretary and Manager.

Army and Navy Club, January 6, 1883.

WANTED, by a Trained MILITARY BANDMASTER, of great experience, recently discharged on completion of long service, an APPOINTMENT as BANDMASTER, in a Militia or Volunteer Corps. The highest testimonials and references.—Address, 3 Park View Terrace, Oxford Road, Reading.

A WEST-END FIRM REQUIRE a GENTLEMAN, of good family, having a connection among Private Gentlemen, for the Sale of Havannah Cigars.—Apply by letter, with full particulars, addressed, "A. B. C.," care of Mr. REES, 24 Jermyn Street, S.W.

ANY one interested in our VETERANS should apply to the CHARITY ORGANISATION SOCIETY, Duke Street, Oxford Street, for particulars as to a man of 67, who has seen service in all parts of the world, from Spain (under Sir de Lacy Evans in 1836) and the Punjaub in 1841, to the Crimean War and the American Campaigns. He is hale and hearty, but one arm slightly paralysed, and, having exhausted his quarter's pension, is in danger of having to go to the workhouse.

AN F.R.C.S. having a large Professional connection, is desirous of meeting with a PARTNER who can ADVANCE £3,000 to carry on an old-established and favourite Health Resort in one of the most beautiful suburbs of London. From 15 to 20 per cent. may be relied on within the first year.—Address, Dr. F., the Secretary of the Junior Army and Navy Stores, Waterloo Place, S.W.

MEMORIAL to the late CAPTAIN GILL, R.E.

Many Friends of the late Captain Gill, R.E., who was murdered last August in the Desert of Sinai, having expressed a desire that a Memorial should be established to mark their high esteem for his character, and for the courage and energy displayed in his various explorations and travels, the following have consented to act as a Committee for carrying this intention into effect:—

H.R.H. the Duke of CAMBRIDGE, K.G., G.C.B.
The Earl of NORTHBROOK, G.C.S.I.
Lord ABERDARE.
Lord WOLSELEY, G.C.B., G.C.M.G.
Colonel H. Brackenbury, C.B., R.A.
Colonel F. Burnaby, R.H.G.
N. Cork, Esq.
Colonel C. J. East.
H. Griffith, Esq.
Lieutenant-General Sir A. Herbert, K.C.B.
S. Isaac, Esq., late M.P. for Nottingham.
Major C. M. Watson, R.E.
Major-General Sir C. M. Macgregor, K.C.B.
Major-General Sir H. Rawlinson, K.C.B.
General Sir L. Simmons, G.C.B.
Colonel Sir J. Stokes, K.C.B.
General Sir A. Taylor, K.C.B.
Rev. G. R. Thornton.
Sir Thomas Wade, K.C.B.
Colonel Sir C. Wilson, K.C.M.G., C.B.
Colonel Yule, C.B.
Captain C. F. C. Beresford, R.E., Hon. Sec.

It is requested that contributions be forwarded to Captain C. F. C. BERESFORD, R.E., War Office, Adair House, S.W. Cheques to be crossed Messrs. Hoare and Co., and P.O. Orders to be payable at Charing Cross.

CLOSING of the LISTS.

THE HALLIDIE PATENT CABLE TRAMWAYS CORPORATION, Limited.

First Issue of 50,000 Shares of £10 each.

NOTICE is HEREBY GIVEN that the LISTS of APPLICATION for the SHARES of this Corporation will CLOSE this day, SATURDAY, the 13th inst., for London, and MONDAY, the 15th inst., for Country Applications.—By order,

H. W. SHAW, Secretary.

Victoria Mansions, Victoria Street,
Westminster, S.W.

January 12, 1883.

THE VINE CLUB.

PATRONS.

The Lord Ashley.
The Lord Robert Brudenell-Bruce.
General Sir Henry de Bathe, Bart.
The Earl of Ellesmere.
Vice-Admiral H.S.H. Prince Leiningen, G.C.B.
Colonel Sir Robert Loyd-Lindsay, V.C., K.C.B., M.P.
General Lord Wolseley of Cairo, G.C.B., G.C.M.G.

COMMITTEE.

(Nominated by the Patrons.)

The Club is started on a double basis:—

1st.—As a non-political Society of Gentlemen.

2nd.—To enable its Members to obtain, for their own home consumption, Wines, Spirits, and Liqueurs, at the actual wholesale cost price.

This last is an entirely new feature, the advantage of which must be apparent to every wine consumer.

No liability attaches to Membership.

For original Members, the Terms will be:—

Entrance Fee	£1 1 0
Annual Subscription	5 5 0

For Rules, Application for Membership, &c., apply to CHARLES A. PRITCHARD,
Secretary, (pro tem.)

Temporary Offices—20 Regent Street,
Waterloo Place, London, W.

ASSOCIATION and CAPITAL. — To Retired Officers, and others.—The Advertiser, who has acquired a concession for dealing with a Machine of remarkable merit, extensive commercial use and value, upon which a large sum has been expended to bring it to its present state of perfection, is now desirous to commence Manufacturing and Trading, on a practical scale; and to do so, requires Capital, which may be provided by one or more Gentlemen, and be under control. This is a really *boná fide* business, which must result in large returns. Satisfactory references given, and close investigation courted. — Address, Mr. EWART, 33 Lordship Road, London, N.

STEAMSHIP SHARES.

There is no better Investment, for high and steady dividends, than in the Shares of selected Steamers, under good management, insured against all risks, and paying Dividends every two or three months. We have some Shares for sale in Steamers of this description. For further particulars, apply to EASTES and CO., Shipbrokers, 17 Water Lane, London, E.C.

LANE'S PRIVATE HOTEL (Nos. 1, 2, and 3 ST. ALBAN'S PLACE, CHARLES STREET, St. James's, S.W.), for Officers in the Army and Navy, Members of Clubs, and others. Most eligibly situated in the immediate vicinity of the principal Club Houses. Gentlemen requiring sleeping accommodation only, are respectfully informed every attention will be paid to their comfort and convenience. A trustworthy porter in attendance all night.

THE MILITARY and ROYAL NAVAL CLUB,
16 ALBEMARLE STREET, PICCADILLY, W.

For Officers of the Army, Navy, Royal Marines, and Auxiliary Forces, and those retired from the same.

For particulars, apply to the SECRETARY, at the Club.

THE MIDLAND COUNTIES WATCH COMPANY,
OF VYSE STREET, BIRMINGHAM.

Let every reader of this send for our beautiful, new, Illustrated Catalogue, containing List of Testimonials (from all parts of the world), and over 500 fine, copper-plate Engravings of Watches, Jewellery, and Electro-plate, sent gratis and post-free on application to any part of the World.

GENTLEMEN'S FINE SILVER, flat crystal glass, 25s.
LADIES' FINE SILVER, flat crystal glass, 25s.
YOUTH'S FINE SILVER, flat crystal glass, 25s.
LADIES' GOLD LEVERS, in exquisitely chased cases, 70s.
GENTLEMEN'S GOLD LEVERS, engine-turned cases, 80s.

The Rev. Robert Cass, Settle, Yorkshire, writes, February 19, 1880:—The Lady's Gold Lever Watch received from you for 70s, in size, workmanship, and beautiful appearance, resembles a watch usually sold at £10. It gives entire satisfaction."

From Mr. J. J. Harris, Schoolmaster, 2-18 The Royal Irish Regiment, Aldershot, September 22, 1880:—"I am very much pleased with everything I have had from your Company. The watch (25s) has proved to be an excellent one, and is a marvel of cheapness. It is fully equal to, or indeed superior to, many I have seen purchased by Regimental Clubs for treble the money."

These Watches are frequently sold for treble the money. Cheques or P.O. payable to

Mr. A. PERCY, VYSE STREET, BIRMINGHAM.

On receipt of which, any watch will be registered post free to any part of the United Kingdom, and for 2s 6d per watch extra to any part of the postal world.

Our Indian Agents are Messrs. King, King, and Co., Bombay, and Messrs. King, Hamilton, and Co., Calcutta, through whom remittances and orders may be sent, and catalogues obtained.

ARGOSY BRACES.

For **RIDING,** *For* **BICYCLING,** *For* **TRAVELLING,**
For **ROWING,** *For* **HUNTING,** *For* **POLOING,**
For **WALKING,** *For* **SHOOTING,** *For* **TUG-OF-WAR.**
For **TENNISSING,** FOR EVERY-DAY LIFE.

THE ARGOSY BRACES are for sale by every Hosier and Outfitter throughout **EUROPE, INDIA,** and all **BRITISH POSSESSIONS.**

They will wear longer than any other Suspenders, and as they contain no india-rubber, are particularly suitable for hot climates.

The characteristic feature of these Braces consists in the employment of pulleys and cords instead of the fixed attachment at present in use. The effect of this is that the strain varies with the movement of the body, and never becomes excessive on any one part. The advantage is obvious. These Braces may always be worn with comfort, and buttons are not pulled off. Insist on having only the **ARGOSY BRACE.**

Kept in three sizes: No. 1, Boys; No. 2, medium Men's; No. 3, large Men's. Prices from 1s 6d (advancing 6d per pair) to 8s 6d.

⁂ Be very careful to get the right size, when perfect comfort is guaranteed. Size of waist required.

Retail of every Hosier and Army Outfitter throughout the Civilised World, or of

J. E. KILLICK and CO., 137 Strand, London, W.C. (opposite Gaiety Theatre).

28 LEICESTER SQUARE, LONDON.

Any instructions given to Mr. ROBERTS will be personally attended to.

He was for over 28 years in the Public Service.

KEATING'S COUGH LOZENGES.—An ever-increasing sale of 60 years.

KEATING'S COUGH LOZENGES.—The Best and Safest Remedy for COUGHS, ASTHMA, PHLEGM, and Tickling in the Throat.

KEATING'S COUGH LOZENGES. — Convenient to keep handy in the pocket.

KEATING'S COUGH LOZENGES.—Are universally recommended by the Faculty.

Testimonial (Original may be seen).

DEAR SIR,—Having tried your Cough Lozenges in India, I have much pleasure in testifying to their beneficial effects in Cases of Incipient Consumption, Asthma, and Bronchial Affections. So good a medicine ought to be known to be appreciated. I have prescribed it largely with the best results.—"W. B. G.," Apothecary, H.M.'s Indian Medical Service. Sold in tins, 1s 1½d, by all Druggists.

ALL BUT NEW OFFICERS' UNIFORMS, for the Army, Navy, Militia, and Yeomanry, may be obtained of LEWIS MOSES, 65 (late 464), New Oxford Street, W.C., at one-fourth their original cost; or on hire. Swords, cloaks, belts, sashes, saddles, &c. for nearly every regiment in her Majesty's Service. Uniforms and apparel purchased.

SHAVING a PLEASURE.

EDWARD SMITH'S 1s HOLLOW-GROUND RAZOR is pronounced by all the most wonderful razor ever introduced. It has during the past two years stood every test, and thousands have been sold retail only, at No. 3 Cheapside. It never requires grinding or setting, and is complete in case for 1s 1d; post free, 1s 3d. Complete list of razors, &c., on application. N.B.—A liberal allowance to Serjeants and others taking a quantity.—EDWARD SMITH ("The City Toy Shop"), 3 Cheapside, London.

HOLLOWAY'S PILLS are admirably adapted for the cure of diseases incidental to females. Many from delicacy bear in secret, for women are subject to complaints which require especial remedies, and it is now an indisputable fact that there is none so suitable for such complaints as Holloway's Pills. They are invaluable to females of all ages, young or old, married or single. They purify the blood, regulate the secretions, correct all suspended or altered functions, clear the complexion, and brighten the countenance. The first approach of disordered action should be met with appropriate doses of these Pills; whilst taking them, no restriction need be placed over the patient. They contain nothing which can possibly prove injurious to the system. They act by purifying the blood and regulating every organ.

THE VERSMANN'S
PATENT
GERMAN MOSS LITTER.

This Litter is specially prepared from a moss-peat found in Germany, and introduced into this country by the Patentee, Dr. VERSMANN, Ph.D. After a most severe and extensive trial in public and private stables, cowsheds, and kennels, it is pronounced by the highest practical and scientific authorities to be the best and cheapest litter known.

ITS ADVANTAGES ARE:

1. Cheapness, it being not more than one-half the cost of straw.
2. Absorptiveness, as absorbing all the urine, and rendering drains and flushing of stables unnecessary.
3. Prevention of decomposition and generation of bad odours.
4. Affording an excellent soft and elastic bed, particularly agreeable and beneficial to the feet and limbs of horses.
5. Horses do not eat it as they do straw litter. therefore they do not require to be racked up or muzzled to prevent indigestion or broken wind.
6. It is easily managed in the stable, and does not soil or stain horses.
7. It has a wonderful influence on the growth of the hoofs and in maintaining the feet in health.
8. It is extremely portable, being compressed into bales weighing each about 3 cwt., ¾ cwt. to 1 cwt. being sufficient to litter a horse for a month or six weeks.
9. It is not inflammable, and therefore offers but little danger from fire.
10. It is essentially a sanitary litter.
11. The manure is much more valuable than that of straw, and occupies considerably less space.

It will be found of immense advantage of Veterinary Infirmaries, in Stud Farms, Dairies, Kennels, &c.

Address —
The Versmann's Moss Litter Company,
LIMITED.

ARMY, *viâ* Sandhurst, Woolwich, or Militia.—PROSPECTUSES, together with reliable Information of Tutors recently successful, sent (gratis), by Messrs. ASKIN, 38 Sackville Street, London, W. References kindly allowed to the Chaplain-General to the Forces and others.

UNITED SERVICES PROPRIETARY COLLEGE, WESTWARD HO! N. DEVON.
NEXT TERM OPENS on FRIDAY, January 19.

Pupils direct from the School obtained the 1st and 17th places in the December Woolwich Examination.

ARMY EXAMINATIONS.—PREPARATION in FRANCE by B. ARNETT, M.A., Cantab., J. J. RIX, B.A., Cantab., and F. BREITENSTEIN. Rigeard, Chartres, France.

A WIDOW LADY, who has successfully brought up a large family, would like to TAKE ENTIRE CHARGE of MOTHERLESS CHILDREN, or a FAMILY, whose friends are abroad. Large house, standing in its own grounds. Happy home. First-rate educational advantages and motherly care guaranteed. Resident English, French, and German Governesses. Terms very moderate. Excellent references can be given.—Address, Mrs. KIMMINS, Ebley Court, Stroud, Gloucestershire.

MILITARY EDUCATION, GERMANY.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

University Candidates for Sandhurst are received as non-resident pupils. Mr. W. A. Grant passed 4th into Sandhurst in this competition at the last Examination held.

Special arrangements made for officers studying for the Staff College or other Military Examinations.

MILITIA COMPETITIVE EXAMINATION.

The standard originally fixed for this Examination having been much raised in September, 1881, no results previously obtained should be taken into account in considering the successes obtained by Militia pupils. Since the date named, there have been three competitions. At these trials Colonel WILKINSON and Lieutenant-Colonel SHAW have secured 24 COMMISSIONS for their pupils, although they have only prepared and sent up a very limited number for Examination. The names of all successful pupils have already been published, with the exception of the following:—Lieut. A. G. Ferguson; Lieut. W. H. Ellis; Lieut. M. S. Riach; Lieut. W. V. Eccles; Lieut. H. P. C. O'Farrell,—these passed at the September Examination lately held. Lieut. G. Buchanan took 42nd place on the same occasion, being only 8 marks out.

Also, at the October Literary Examination, Lieut. C. J. Stanton took 4th place on the list.

The results obtained at other Examinations bring the general score up to FORTY SUCCESSES, achieved by pupils in the last 14 months; during that period the number of pupils on the strength of the establishment, resident and non-resident, has always been limited to 60.—Address, DARMSTADT, GERMANY.

SANDHURST, WOOLWICH, C. S., MILITIA, &c.—The Rev. A. PRITCHARD, M.A. Oxon., assisted by his Brother, Professor PRITCHARD (late R.M. Academy, Woolwich), and a large Staff of resident Assistant-Tutors, PREPARES for any of the above.

The next Term will commence Jaunary 3, 1883.

For particulars of all this year's successes and previous ones, address Rev. A. PRITCHARD, Hill Lands, Wargrave, Henley, Oxon.

OXFORD RESPONSIONS, and all UNIVERSITY MATRICULATIONS.—VACANCIES caused by successes last week at Oxford Responsions.

Address, Rev. A. PRITCHARD, Wargrave, Henley, Oxon.

MILITARY COMPETITIVE for MILITIA OFFICERS.—The Rev. A. PRITCHARD, who is assisted by a retired Field Officer of 8 years' experience as a Garrison Instructor, has, during the year 1882, gained five Commissions with the 14 Candidates who went up from him.

For particulars of marks, places, &c., address Rev. A. PRITCHARD, Wargrave, Henley, Oxon.

LIEUTENANTS of MILITIA desirous of competing for Line Commissions can be received by the Rev. WALTER BAKER, M.A., at Batcombe Rectory, Evercreech, Bath. They will be thoroughly prepared in all Military Subjects by Major Dickens (late 11th Foot), Staff-College Graduate, formerly Assistant Royal Engineer, S.E. District, assisted by Lieutenant-Colonel Coates (late 99th Regiment), formerly of the R.M.A., Woolwich, and Acting Brigade-Major at the Cape.

Great individual attention is given, as few pupils are taken, and each comes under actual *vivâ voce* instruction for 6½ hours a day. Since the introduction of the Military Competitive, out of Thirty-nine Lieutenants of Militia sent up, Twenty-four have been successful, several taking high places in the list. There are opportunities for healthy country amusements and games, a cricket and football ground, lawn-tennis courts (grass and asphalte), a private billiard-room, &c., and in all other respects a liberal and gentleman's establishment is kept.

A Large Staff of Experienced Tutors, all resident, assist in preparing for the Qualifying Examinations, and for the Sandhurst and Woolwich Competitions.

References to parents of successful pupils.

NAVAL CADETS, ASSISTANT CLERKS
HOPE HOUSE, SOMERSET PLACE,
SOUTHSEA.
Principal—Mr. T. H. VICKERY.

In addition to the general course of study pursued at this long-established School, Pupils are specially prepared for the Examination required for the above.

At the late Competitive Examination in June, for Assistant-Clerkships in the Royal Navy, THREE of the Five successful competitors were Pupils of this Establishment, taking First, Third, and Fourth places. And THREE passed the test of qualification.

TO ARMY TRAINERS and MILITARY STUDENTS.

The undersigned offers his services in PREPARING LIEUTENANTS of MILITIA for LINE COMMISSIONS, and Officers of Volunteers and Militia for Promotion Examinations, under G.O. No. 20 of 1882.—Apply to Colonel W. J. STEWART, care of Messrs. H. S. King and Co., 45 Pall Mall, S.W.

ARMY EXAMINATIONS.—The Establishment formerly conducted by Dr. LAUMANN and Mr. ELDERTON at Fulham, is now carried on by the latter at MANOR COURT, Hanwell, where pupils are prepared for the above Examinations. Average number of pupils, 10; average number passed per annum, 8.

KINGSLEY COLLEGE,
WESTWARD HO!
HEAD MASTER—Rev. F. HEWSON WALL, LL.D.
VISITING COUNCIL.
Vice-Admiral Sir Wm. M. Dowell, K.C.B.
Robert Ellis, Esq., M.R.C.S., &c.
Rev. Roger Granville.
General W. N. Hutchinson.
Colonel Kennard, M.P.
Major-General Molesworth, R.H.A.
Sir George Stucley Stucley.
Rear-Admiral A. T. Thrupp.
Secretary, Ambrose Berkeley Wall, Esq., R.N.

The EXAMINATION for the following EXHIBITIONS will commence on April 3, 1883:—(1.) Two KINGSLEY Exhibitions, value £15 each. (2.) Two MOLESWORTH Exhibitions, value £10 each. (3.) Two ARLINGTON Exhibitions, value £7 10s each. (4.) Two ARLINGTON Exhibitions, value £5 each.

ARMY.—LINE and MILITIA.

IMPORTANT to STUDENTS.

Captain DUMARESQ DE CARTERET BISSON, M.A., Author of "Our Schools and Colleges" (graciously recognised by the Queen and H.R.H. the Commander-in-Chief), sends, free by post, a selected List of Prospectuses of all the most SUCCESSFUL ARMY TUTORS, and gives his Counsel on Military and Civil-Service Education free of charge. Reference kindly permitted to the late Secretary of State for War.—Address, Captain BISSON, No. 3 Berners Street, London, W.

ARMY,
CIVIL SERVICE, UNIVERSITIES,
PUBLIC SCHOOLS.

MESSRS. BISSON, BORMAN, and CO. send, free of charge, PROSPECTUSES of the most SUCCESSFUL TUTORS for Woolwich, Sandhurst, Military Competitive, Staff College, Home and Indian Civil Services, Universities, Public Schools, &c.—3 Berners Street, W.

ARMY EXAMINATIONS, &c.—In the late Examinations, Mr. WATKINS, late Scholar, Christ's College, Cambridge, passed Messrs. Plomer, Panton, Carpendale, Brownlow (U.C.), and Voyle (I.C.), for Sandhurst, and Mr. Cronin took honours at the Academy; Mr. Brett qualified for Woolwich.

Twenty-two other Pupils have taken high places past year for the above, the Universities, Student Interpreterships, and Militia Examinations, Military and Pass.

A Class for Staff College.

Address, 90 Kensington Park Road, W.

LIEUTENANTS of MILITIA.—A COURSE of INSTRUCTION, including Fortification, Surveying, Tactics, Army Discipline Act, Drill, Queen's Regulations, &c., given by Major DAUBENY and A. PINHEY.—Apply to A. PINHEY (late R.A.), Burlington House, Spring Grove, Isleworth, W.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS., 28 miles from Euston.—Twenty-seven School Scholarships; Four Exhibitions from the School. Four Open Scholarships or Exhibitions gained in 1881.—Address Rev. E. BARTRUM, Head Master.

THE PRIORY, BALHAM, SURREY, adjoining Tooting Common.—Mr. BLACKWELL, B.A. (assisted by Graduates in High Honours), PREPARES Gentlemen for Woolwich and Sandhurst, and Militia Officers for the Military Competitive Examinations. At the Preliminary Examination for Sandhurst, held August 30 and 31, 1882, of four pupils sent up, three were successful. During the present year, pupils of Mr. Blackwell have passed the qualifying examination for Militia Officers who are candidates for commissions in the Army, &c.—Terms on application to Mr. BLACKWELL, the Priory, Balham. Reference may be made to the parents of present and former pupils.

MILITARY COMPETITIVE EXAMINATION.—Lieutenants of Militia PREPARED, at 37 Cambridge Gardens, W. At the last September Examination, the following, out of Twelve sent up, were successful:—

C. H. Farquharson	5th	J. F. Campbell......	23rd
J. E. Cullinan	12th	C. L. Crutchley......	31st
C. W. Garraway ...	16th	B. T. Mahon.........	38th

Apply to D. C. FEENY, B.A.

WOOLWICH, SANDHURST, and MILITIA.—Mr. S. H. WINTER PREPARES PUPILS for Military and other Examinations. More than 200 of his pupils have passed, many of them taking very high places.—Connaught House, the Common, Woolwich.

SANDHURST, WOOLWICH, and LITERARY EXAMINATIONS for MILITIA OFFICERS.—Candidates for the above Examinations are PREPARED by Mr. G. M. HICKS, M.A., who receives a limited number. Thorough teaching and individual attention. List of recent successes on application.—5 South Row, Blackheath, S.E.

MR. ST. JOHN BOULTBEE, the Priory, Croydon (late Captain Massie and Boultbee), assisted by a Staff of Graduates of the Universities of Oxford and Cambridge, RECEIVES a Limited Number of Pupils to PREPARE for the Competitive Examinations for Sandhurst, Woolwich, and for the Militia. The number of Pupils is limited to TWELVE. Five Pupils out of Six were successful at the last Sandhurst Examination (July, 1882).—Terms, References, and other information, sent on application.

SUPERIOR and ECONOMICAL EDUCATION for SONS of GENTLEMEN only, in an excellent College School, at 30 guineas a year, and a few very moderate and reasonable extras. Unexceptionable and high-class parental reference as to thoroughness of teaching, careful supervision, and comfortable domestic arrangements.—Address, "HEAD MASTER, CANTABRIGIENSIS," care of Messrs. Terry, Stoneman, and Co., 6 Hatton Garden, E.C.

ARMY TUITION, WEST of ENGLAND.—H. A. JAMES, B.A. Cambridge, and A. J. DE H. BUSHNELL, M.A., Oxford, have been nine years engaged in preparing Candidates for the Woolwich and Sandhurst Entrance and the Militia Literary Examinations. Since June, 1873, for Military Examinations alone, 91 Pupils have completed their preparation at Hillcourt. Of these, 76 have passed. The number in the house is limited to 15.—For terms and references, apply to HENRY A. JAMES, Hillcourt, Marle Hill, Cheltenham.

WIMBLEDON SCHOOL.—Head Master, Rev. CHARLES J. WYNNE, M.A., Jesus College, Oxford.

Vice-Masters—Rev. J. M. EUSTACE, M.A., St. John's Coll., Cambridge; F. E. BENNETT, M.A., New Coll., Oxford.

This School continues to PREPARE for the MILITARY and other COMPETITIVE EXAMINATIONS, and thus it affords an education of the highest order, adapted to the requirements of the present day.

There is an unusually large Staff of Masters, which secures for each boy individual assistance and attention in all his work.

Considerable advantages offered to boys entering before they have completed their thirteenth year.

For further particulars, apply to the HEAD MASTER, or to either of the Vice-Masters.

A Gymnasium, 66 feet by 26 feet, has just been added.

SANDHURST and WOOLWICH.

DR. J. COLLIS BROWNE'S

ORIGINAL AND ONLY GENUINE.

CHLORODYNE.

From SYMES and Co., Pharmaceutical Chemists, Medical Hall, Simla, January 5, 1881.
To J. T. DAVENPORT, Esq.,
33 Great Russell Street,
Bloomsbury, London.

Dear Sir,—We embrace this opportunity of congratulating you upon the wide-spread reputation this justly esteemed medicine, Dr. J. Collis Browne's Chlorodyne, has earned for itself, not only in Hindostan, but all over the East. As a remedy of general utility, we much question whether a better is imported into the country, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are happy to say, are now relegated to the native bazaars, and, judging from their sale, we fancy their sojourn there will be but evanescent. We could multiply instances *ad infinitum* of the extraordinary efficacy of Dr. Collis Browne's Chlorodyne in Diarrhœa and Dysentery, Spasms, Cramps, Neuralgia, the Vomiting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Choleraic Diarrhœa, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power. We have never used any other form of this medicine than Collis Browne's, from a firm conviction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, as we are of opinion that the substitution of any other than Collis Browne's is a deliberate breach of faith on the part of the chemist to prescriber and patient alike. We are, Sir, faithfully yours, SYMES and Co., Members of the Pharm. Society of Great Britain, His Excellency the Viceroy's Chemists.

DR. J. COLLIS BROWNE'S CHLORODYNE is a Liquid Medicine which assuages Pain of every kind, affords a calm, refreshing sleep without Headache, and invigorates the Nervous System when exhausted.

DR. J. COLLIS BROWNE'S CHLORODYNE.
Dr. J. C. BROWNE (late Army Medical Staff), discovered a remedy to denote which he coined the word CHLORODYNE.

The General Board of Health, London, report that it acts as a charm, one dose generally sufficient.

Dr. Gibbon, Army Medical Staff, Calcutta, states:—"Two doses completely cured me of Diarrhœa."

DR. J. COLLIS BROWNE'S CHLORODYNE rapidly cuts short all attacks of

COUGHS, ASTHMA, COLDS,
BRONCHITIS,
EPILEPSY, SPASMS, COLIC,
PALPITATION, HYSTERIA,
and is the true Palliative in
NEURALGIA, GOUT, CANCER,
TOOTHACHE, RHEUMATISM.
GREAT SPECIFIC for
DIARRHŒA,
CHOLERA, DYSENTERY.

IMPORTANT CAUTION.
The immense sale of this remedy has given rise to many unscrupulous imitations.

N.B.—Every bottle of genuine Chlorodyne bears on the Government stamp the name of the inventor,

DR. J. COLLIS BROWNE.

Sold in Bottles, 1s 1½d, 2s 9d, 4s 6d, by all Chemists.

Sole Manufacturer,
J. T. DAVENPORT,
33 Great Russell Street, W.C.

DINNEFORD'S MAGNESIA.

For over Forty Years the Medical Profession have approved of this pure Solution as the best remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion; and as the safest aperient for delicate Constitutions, Ladies, Children, and Infants.

Sold by Chemists throughout the World.

CAUTION.—See that "DINNEFORD and CO." is on every Bottle and Label.

EGYPTIAN DATES.

OUR "Occasional Correspondent," who sent us Egyptian Letters, and our friend Major Brady, who has been favouring his "Brother Tom" with his lucubrations, have, it seems, gone from Cairo and the Fayoum on a tour; but the Major has, under the above heading, forwarded some rough leaves from his diary, and promises that he will, if possible, continue to forward other specimens of "the dry fruit of the Nile," as he calls them, from time to time. We have already given our readers a few notes respecting the Christmas festivities at Cairo, and Major Brady, who, perhaps, was not aware of the fact, goes back upon the weather, which marred somewhat the preparations made by Brigadier-General Arbuthnot, Colonel Cog-hill, Colonel Campbell, and their officers, to enable the troops at Helwan to have a merry Christmas. It was only put off for a day, after all. Here are our dates:—

December 25—Christmas Day.

"One touch of nature makes the whole world kin." 'Tis a pretty saying, but I am afraid it is not true, for "nature" differs. Human nature is various, as "humans" are. But anyway, the landlord of the Hôtel des Bains at Helwan did a very pretty thing on Christmas night, which touched the nature of many British exiles. M. Heltzel is an exile from Bohemia—somewhere Leitzomortzwards—and he felt the Teutonic, not the Czechish, love of Christmas upon him, and, with his good frau, he dressed up a vast Christmas-tree, well decked with fruit suitable to that strange sort of growth; and he invited all the band-boys of her Majesty's 7th Dragoon Guards and 19th Hussars and the Royal Horse Artillery troop to pluck and enjoy themselves, and they did so. Hoch! hoch! hoch! There were Christmas dinners all over Christian Cairo, and in the evening there was a gathering from all the banquets in the halls of Lord Dufferin, which were astonished, if ever walls were, by some games suitable to the occasion, for you may be sure the owner, good M. Catawee, never patronised such festivities, having no faith in the occasion.

December 26.

A grey, raw, windy day. Mud in the streets. But for all that, a gay gurgle of sight-seers and "sport-mens" to Abbaseyah, where there was a "gym-khanah." In the evening the *Mascotte* at the opera, a great success. The Khedive in his box, Lord Dufferin ditto, and a full house. The special train, meanwhile was waiting for Arabi and his fellows and party, 69 in all, wives and female servants. Special arrangements were made for their safe conduct, as it was feared that attempts might be made at Zagazig to lynch them. Guards told off accordingly. When all was ready, and they were in the train, a telegram from Aden announces that the steamer could not enter the port of Suez, because of the violent gale. Guard, 60th, marched back. Then it was told at the opera that there was a hitch. Much uneasiness in high places. Further telegram from Suez that steamer was all right. Then it was necessary to get guard back, and as all the exiles were in the train, it was sent off, and, *siemlich*, arrived all right, without manifestations *en route* of a hurtful kind. It would have been interesting to have heard what the Egyptians said in their exodus. They took in great part very much the same line of country as the Israelites followed in their journey to the Red Sea. Strange contrast! This time, it is the Jews of all sorts who are hunting the Egyptians out of their country to the promised land of Taprohané!

December 27.

Highland games, under patronage of Khedive and Sir A. Alison, &c.; superintended by Sir G. Graham, at Abdeen, beginning at noon and ending at dusk; a fair concourse of natives and many Europeans; all the British officials and colony; Khedive in Palace window, Court on steps and in balcony, &c. The line of sentries too far back, so that crowd could not see as well as they might have done without harm. Races: Tug-of-war, leaping, putting the shot, and the like games, of which tossing the caber and dancing were the only specially Highland pastimes. If Ismail could only have looked ahead a little, and seen it all when he was unfolding to Sir Bartle Frere that night, in 1875, in that Palace, his plan of getting a British official to overhaul his accounts! Whilst the Highland games were in full fling in the square in front of Abdeen Palace, the exiled Egyptians and their people must have been undergoing the *peine forte et dure* of sea-sickness in the Gulf of Suez, for just as a dancing piper was footing it deftly to the strains of the pipes on the deal floor laid on the sand, a telegram came to Cherif Pasha, who was standing near Lord Dufferin's carriage, to announce that the vessel had left Suez, with Arabi and his fellows all well, that afternoon. It may easily be guessed how long these poor women, wives, slaves, and all, remained "all well" in the midst of the half-gale which was blowing, and in the tumult of the *grorse mer* which raged that morning and the day and night preceding it. To most of them, if not all, the sea and its works and workings were unknown quantities and qualities. Possibly, hereafter we may hear how these travellers fared. The newspapers publish the names of the rebels who are to give bail, in sums varying from £5,000 to £500, for their good behaviour, and who are banished for various terms, or confined to or excluded from certain districts, and placed under police surveillance. There are landed proprietors, doctors of law, doctors of theology, and doctors of medicine; there are Under-Secretaries of State, Generals, Colonels, Majors, railway engineers-in-chief, Directors of the Press Bureau, Cadis, editors and proprietors of newspapers, professors, judges, sheiks, Directors of Customs, chefs de bureaux, &c., proving that the movement included men of every grade and shade of opinion. I cannot see any proof of the assertion that the revolution in the beginning originated in an anti-Turk and Circassian feeling among the Egyptian officers *pur sang*. Two at least of the seven Chiefs now on the Red Sea are of Turkish origin. In so far as Turks and Circassians are foreigners, they may have been included in the demonstration against the rule of the stranger, on which Arabi laid much stress in his examination before the Commission. Sir E. Wood is busy with his new army, and is assisted by Baker Pasha, whose plans are modified to suit the proposed reductions of the army. The pay of the men will be raised, and the number of British officers in each battalion will be reduced. French is a *sine quâ non* for an appointment. The new Budget will be out in a day or two, and it will show that the revolution caused very little damage to the taxpaying power of the country. There is a slight increase of admissions to hospital in the camps, *in re* Christmas gaieties, and there are traces of a malady from which the troops have been nearly free hitherto. The number of deaths from enteric fever this month have been only six, as compared with 31 deaths the month before. Cook's first Nile steamer is to start for Second Cataract on January 22, with a very small party on board.

EXPEDITION UP THE RIVER NIGER BY H.M.S. "FLIRT."

(FROM AN OCCASIONAL CORRESPONDENT.)

A few months ago, the National African Company established a new factory for trade at Asaba, on the Wari branch of the River Niger, with the assent of the Assay tribe, to whom the land belonged. About two months after its erection, a neighbouring tribe—the Epatanis—murdered the agent-in-charge, who was a British subject, a native of Sierra Leone, and two Kroomen in his employ. They then cleared out the goods, valued at over a thousand pounds, and burnt the factory down. In September last, E. H. Hewett, Esq., her Majesty's Consul, went to Assay to inquire into the case, and got conclusive proofs against the guilty parties. Perhaps on account of his not being supported by a man-of-war, it seems to have got about amongst the native tribes that no more fighting ships would be sent up the river, and they openly threatened, in some places, that they would do with other factories as had been done with the one at Asaba. Great fears were entertained by the traders that there would be a general rising against them during the coming dry season. The natives from the Brass River employed by them in their steamers were leaving, which has invariably been a sign of coming trouble. In consequence of this, her Majesty's gun-vessel Flirt embarked her Majesty's Consul at the Nun entrance on the 14th inst., and proceeded up the river, to demand the culprits in the late outrage, and a restitution of the stolen property, or to punish the offending tribe. The point to be reached was about 120 miles distant, and the rainy season having ceased, the water was rapidly falling; shoals abound, and there were many exciting moments, when we had but an inch or two to spare; the question with all hands was, "Will she get over it?" and the crew, being sent forward at the touchy parts to bring the vessel more on an even keel, were silently listening to the soundings called by the leadsman in the chains. The scenery on the banks as far as we went was uninteresting, the first 15 or 20 miles being mangrove swamp, and after that tropical forest and bush, with an occasional village of mud huts with thatched roofs. I wish the mosquitos had been conspicuous by their absence; their name was legion; they, like ourselves, were on the war-path, and gave us little rest at night, as we were not provided with mosquito-curtains. We reached Assay, where the National African Company have a factory, on the 15th, and here the Consul had a palaver with the Chiefs, who said that they had no objection to the factory being at Asaba, which was their ground, but that the people were not their people, and only allowed there on sufferance. The palaver ended amicably, and the Consul dashed (presented) the head chief with a gorgeous dressing-gown, red fez, &c. It was amusing to see him parading through the town dressed in these garments, followed by his retainers, shouting and singing. Some of the chiefs then visited the ship, and seemed much astonished at the big guns and Gatlings. Leaving Assay in the afternoon, as we approached Asaba, where the factory was destroyed, the natives fired on the ship. We were passing over a nasty shoal at the time—one of the worst we experienced—and only about fifty yards from the shore. Some of their bullets came on board, but, fortunately, no one was hit; the Consul, however, had a narrow shave. After passing the shoal, we anchored and returned the fire, by which time it was getting dark, so we remained for the night. At 9 o'clock canoes were heard approaching from Abarri—another of the offending villages—about a mile and a half off, the crews beating tomtoms and singing war-songs. Perhaps they imagined we were a trading-vessel aground, and were coming down to make a night attack. Whatever was their intention, after firing in their direction with the Gatling for a bit, they gave it up. On the following morning we steamed to Abarri, and were again fired on by natives concealed in the bush, so no palaver was possible. We anchored off the town, and after firing shell and Gatling, landed a small-arm party and burnt it. No opposition was made to the landing party. We then went back to Asaba, where we were first fired on, and treated that village in the same way, and anchored for the night. There was yet another town to settle with, Zorofani, about three miles off, so we steamed there on the following morning; they had probably heard the result of firing on a man-of-war, so did not attempt it. The place seemed deserted when we took up a position before it, and notwithstanding we hoisted a white flag, it was some time before any one appeared in answer to the shouts of the interpreter from the steam launch, which we sent near in; eventually, about a dozen men came forward, most of them armed. The Consul asked that the King of the tribe should come on board and palaver respecting the murders and looting of the English factory, and promised that he should be sent back in safety. This they refused, saying they were afraid of the ship, and that the Abarri people were to blame, but that if he would come on shore, they would talk. They were then told that their people, both at Asaba and Abarri, had fired on the ship, although they had white flags up on shore, therefore they could not be trusted; and that if they did not come off in half an hour their town would be fired on, so they had better send away their women and children. As they retired and did not appear again, at the expiration of about an hour we opened fire on the town and surrounding bush. We then landed a party, who burnt the houses, &c. A few shots were fired at them at one part, and Lieutenant Pigott, of the Briton, and Robert Parsons, captain's coxswain of the Flirt, received slight flesh wounds from slugs. The three places destroyed belonged to the Epatani tribe, who are regular river pirates. Doing but little trade themselves, they live by plundering the canoes of their neighbours. It is hoped that this punishment will have a salutary effect, and that the lives and property of our traders on the Niger will be safe from attack for some time. We now left for our return, passed over the shoals again in safety, and reached Akassa at the Nun entrance on the 18th, having been five days away. Two or three hippopotami and a few crocodiles were seen during the passage, but, of course, we had no time for sport. The heat on board was very oppressive, the thermometer generally showing 90° Fahrenheit under cover day and night. All precautions were taken to preserve health, and at present no one seems to have suffered. Trade is somewhat dull on the river, and it is said that the French are making encroachments, and going in for "protection" here, as well as on the Congo. The traders have great difficulty in procuring labour in all the African rivers; they are almost entirely dependent on the Kroomen who come from near Sierra Leone, and will not stay away from their country for more than a year at a time. It is contemplated, I believe, to try coolie labour on the Niger.

ESPIONAGE IN THE NAVY.

TO THE EDITOR OF "THE ARMY AND NAVY GAZETTE."

SIR,—If it is true that the Admiralty are about to encourage espionage in the Navy, the sooner gentlemen cease to send their sons into it, the better.—I am, &c.,

F.O.

SIR,—You surely must have been misinformed as to the intentions of the Admiralty regarding anonymous letters. I can hardly believe that a body of English officers and gentlemen would lend themselves to such an underhand practice as that of encouraging spying among all ranks. If it be true, all I can say is that, though we may have officers at the Admiralty, the gentlemanly feeling is conspicuous by its absence; and I, for one, would decline a ship under such a *régime* as is apparently being introduced. —I am, &c.,

POST CAPTAIN.

SIR,—The French are reported to discern the cloven hoof of the man of "blood and iron" in everything. Recently, a Frenchman, who can apparently see further than his compatriots, discovered it in the new steam tramway cars in Paris. "There you see the hand of Bismarck!" quoth he, "for, as you know, during the siege we lived on horseflesh. But Bismarck hopes by introducing those infernal machines to reduce and in the end deprive us of our stock of horses, and thus prevent us from holding out for any length of time when he next lays siege to Paris." Well, Sir, do the Admiralty see nothing but fraud in the Navy, now that they have gone in to reward and encourage spying, backbiting, lying, and slandering? But now that they have daubed themselves with the mud of espionage, those amongst us who have never refrained from raising our voices in warning against their Bismarckian ways will, perhaps, be given a more patient hearing in the future. For, unlike the French, our suspicion has been born of an intimate knowledge of the ways that are tricky at Whitehall. We have known what to expect, and have not been disappointed, although we have been disgusted by these ways that are mean, and which lead to duplicity, suspicion, and spying, and will ruin the Navy.—I am, &c.,

R.N.

SIR,—As the Civil Servants, or one or more of them, have hit upon the plan of encouraging espionage among all ranks in the Navy, with the avowed object of discovering what officers scheme to keep their ships clean in the face of Admiralty cheeseparing, could not the Navy return the compliment, and, by offering a premium to all informers, ascertain to whom the contractors' Christmas boxes go each year, and also whether or not it is true that many private firms pay heavy commissions to Government employés to secure for them lucrative contracts? Perhaps you could help us. Suppose we got up a fund, placed it in the hands of trustees, and offered a good round sum for evidence "to convict?" The action taken would, of course, be retrospective, and the premium given for each case proved, large. We might, too, encourage anonymous letters, naming those suspected of malpractices.—I am, &c.,

A SEA LAWYER, R.N.

PAYMASTERS, R.N.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—Would you be good enough to advocate the claims of the Naval Paymasters? There is great room for improvement in our present treatment, as we are now as a class worse off than any other body of officers. The Naval world is moving on, but the Paymasters seem to be standing still.—I am, &c.,

PAYMASTER, R.N.

[Why, certainly! But Naval Paymasters had better let us know what their views on the subject are. We have ours.—ED. *A. & N. G.*]

WHO CAPTURED THE GUNS?

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—In reference to the letter, "Who Captured the Guns?" and signed Dillon R. L. Lowe, in your issue of the 6th inst., I hope you will kindly allow me space to state that Lieut. Luke, Royal Marines, the subaltern of Capt. Wardell's company, who avenged that gallant officer's death at Tel-el-Kebir by instantly cutting down the man who shot him, is unrewarded, up to this time, in any shape, not even the general medal having yet reached the Royal Marines! This deserving and gallant young officer was with Capt. Wardell when the guns were captured, but the much-coveted decoration has been awarded to a senior subaltern who was not up until long after. Lieut. Luke can tell "Who captured the guns."—I am. &c.,

PALMAM QUI MERUIT FERAT.

ARMY MEDICAL ORGANISATION.

TO THE EDITOR OF "THE ARMY AND NAVY GAZETTE."

SIR,—The name of Baron Mundy is so well known, not only to members of the Medical profession, but also to military men, and that legion of civilians who have served under the Red Cross Flag, that I am sure great interest will be felt by English readers in the following literal translation of an extract from an Austrian publication (*Militärarzt*). Previous to 1866 Baron Mundy was a combatant officer, but he has since devoted himself entirely to the Medical profession, and I venture to assert that there is not a country in Europe in which his beneficial influence cannot in some degree be traced. It is quite impossible that a man of such versatile ability, with a strong will, a facile pen, and a ready tongue, should pass through life and not meet with much opposition; but I think few persons in or out of his profession will deny him the merit he has so well earned during the long and heroic struggle he has maintained for the sake of philanthropic objects, and especially in the cause of soldiers.—I am, &c.,

J. F.

January 4th.

"Farewell words on the termination of my literary labours in connection with military sanitary affairs in Austria-Hungary.—At the close of my literary work in the periodical press of the Austrian Military Sanitary Department, I took leave of my readers in the following words, which were published in an official paper (*Militärarzt*). In a communication addressed to the *Neue Freie Presse*, at the beginning of 1873, after having been repeatedly requested to do so, I published my reasons for wishing to leave the Army in these words:—'I declare that I have requested to be allowed to resign my title as staff surgeon only on one ground, namely, because I consider that the principles which have prevailed in the legislation, organisation, and administration of the whole military Sanitary Department are entirely opposed to the knowledge of modern times, as well as to the experience of recent wars.' To this assertion I again subscribe my name. It seems to me that I have tried long enough to set in motion the mythical stone of the builders of Corinth on this tortuous road. Sometimes I succeeded, and then the bureaucratic or do-nothing establishment put the proposed measures in movement, or were forced into activity. But, on the whole, my efforts were certainly paralysed by the hierarchy. In this manner, I struggled on perseveringly for nearly 16 years, but always with the same object in view. When I entered the Army as a regimental doctor, at the time of the war in 1866, as well as at a later period, when I was staff surgeon, until I left it in 1873, I devoted every farthing of my pay, as well as the payments I received for official missions (Geneva, 1868; Berlin, 1869; Paris, 1867 and 1870-71), to the Widows' and Orphans' Fund of the Army Medical Department. The expenses for researches, travelling apparatus, books, periodicals, and works published in the interest of military surgical knowledge and its requirements, consumed more than half my means. I cannot, therefore, be accused of egotism, nor of an ambitious striving after honours. Had his Excellency the War Minister, Field-Marshal von Kuhn, demanded an explanation from me at the first meeting of the Commission of Inquiry in 1868, I had quite determined, after having brought my work to a satisfactory conclusion, to resign my rank as staff surgeon. Jealousy and vanity, together with weakness, combined to bring about my fall, notwithstanding my unselfish and self-sacrificing labours. May I not ask, then, whether, if I had been allowed to carry through the proposed reforms of the Military Sanitary Department, they would not have been long since in full working order, whereas their realisation must now be withheld from the Army Medical Corps for many years, if not for ever. The bitter fruits of this jesuitical conduct have been already brought home to many members of the hierarchy, who were then my greatest opponents. I have always steadily endeavoured to advance the interests and affairs of the Department, and I have eagerly sought every opportunity to vindicate the professional standing of our military surgeons, and, at the same time, to enrich their experience. Proofs of this have been afforded by my colleagues in France and Germany, to whom I appealed, under most difficult circumstances, in 1870-71. During the wars of 1876-77 and 1877-78, in Spain, Servia, the East, and Russia, I also begged for the professional assistance of my Austrian military colleagues, and it was only selfish reasons which again caused the refusal of my earnest entreaties. Every word that I have publicly spoken as military sanitary professor at the Vienna University, or which I have circulated through the Press, has been inspired by the purest interest in the professional reputation of the Army Medical Department, and in the improvement of the general health of the Army. I am accused of being a 'Utopist' and a 'project-monger,' and I have been called 'unpractical' and 'mad,' and on all sides I have been unscrupulously condemned by great and small. I kept silence, but may I venture now to state that at the time when my opponents were making these coarse attacks upon me, I was able to hold and maintain a leading position through several campaigns in foreign lands? With regard to this, a further proof can be found in the irrefutable manner in which my organising activity has created and developed the Volunteer Sanitary Service of two distinguished knightly orders; and later still, a corps in connection with the Vienna Volunteer Humane Society, for rendering assistance in case of accidents in civil life, as well as for service in time of war. To this association, I am now devoting the remainder of my exhausted energies. And for all this work, what has been my reward? Misunderstanding on the part of many high military authorities, bitter hatred and envy from the military hierarchy and bureaucratic subordinates, opposition, distrust, and indifference towards everything which has been practically accomplished by myself, or which has been made by me the subject of urgent reform, and this even from a large proportion of military medical officers. In short, I almost always found, in the majority, denying Peters, disbelieving Thomases, or betraying Judases; the Johns were seldom to be found. Thus I stand on the day of my literary farewell, and thus I must soon depart—for at the age of sixty, and with my constitution, it will only be in conformity with the laws of nature—to that unknown land from whose shores, according to the poet, there is no return. I may declare to-day that I hope my opponents will be able to say, as I can with truth and justice assert, I have always unselfishly striven to be useful to the holy cause, without injuring any one or attacking any personal interests; I have never disturbed the good and useful in embryo, but I have forwarded, and, in short, unweariedly and unremittingly worked, theoretically and practically, with faithful earnestness, at the formation of a better military and public sanitary system for my fatherland. As a soldier and as a military and civil surgeon, I feel I have done my duty.

J. MUNDY."

SIR,—Now that there appears to be a move in the direction of reintroducing the Regimental System into the Army Medical Department, perhaps the following ideas as to how this might be carried out may seem to you worthy of appearing in your columns. I think I may fearlessly state that the regimental system, if reintroduced, would be alike popular with the officers, medical officers, and men of the Army, and would be found more efficient and not more expensive than the present system. I would suggest that the Department should be divided into three branches, viz., mounted, unmounted, and Staff, the appointments to these three branches to be made by selection, according to whichever branch became most popular. Taking the unmounted branch first, as it would comprise the majority of medical officers, two surgeons-major and two surgeons to be attached to each infantry regiment, one surgeon-major and one surgeon serving with the battalion at home, and the other surgeon-major and surgeon serving with the battalion abroad. Every five years the two serving at home to change places with the two abroad. The mounted branch to be attached to Cavalry regiments and Artillery. One surgeon-major and one surgeon to each cavalry regiment, and one surgeon to each battery of Artillery, where such battery was isolated, or a surgeon-major when two or more batteries were quartered together. All the Medical officers of the mounted branch to be on a separate roster for foreign service; this would probably cause them to have a shorter period of home service than the unmounted branch, and would also sever them from this corps every few years; but as this would probably be the most popular branch of the Department, there would be no difficulty in keeping its ranks full. Each surgeon-major in this branch to receive forage for two horses, and each surgeon for one. The Staff Medical officers should also be on a separate roster for foreign service, and their services should be utilised for the convalescent depôts, large hospitals, &c. On account of the good stations they would enjoy abroad, and the permanency of their appointments, this branch ought not to be an unpopular one, especially for married men with families. In time of war, the surgeons-major in charge of each battalion should remain with his regiment, the juniors to be temporarily detached for general duty, for which they would be quite sufficient in numbers. At the large station hospitals, where the sick of more than one regiment are treated, the Senior Regimental Surgeon-Major to be in charge, and all the other medical officers of these regiments to be under his orders for duty in the hospital. As a rule, it would be found that they would be detailed to take charge of the sick of their own regiments. All Surgeon-Majors, as at present, to receive forage for one horse. The present uniform to be retained. Regimental mess and band subscriptions to be paid as formerly. —I am, &c.,

SURGEON, A.M.D.

THE WEARING OF DECORATIONS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—Now that the subject of retired and active officers wearing their decorations in plain evening dress has been brought forward, I trust it will not be allowed to fall to the ground. Few Naval and Military men who have had the good fortune to earn a medal, and, still more, a higher decoration, but would rejoice at the opportunity of wearing it in private society, and at public evening entertainments. At present such distinctions are, in the case of officers still serving, only seen in barracks, or on the parade-ground, among their comrades; and in the case of retired officers, are never seen at all, but after the toils and perils of war, these once envied insignia are put away in some corner, unknown even to friends, while the owner, no longer able, perhaps, to serve his country, sees others in uniform proudly wearing a decoration which he himself possesses, but is prevented by a foolish fashion from appearing in. The friends and relatives of decorated officers would also be well pleased at the introduction of such a practice; but unless something more than a mere permission, or even encouragement, is received from the higher quarters, the folly of a certain style of men will at once cause it to be tabooed as "not the correct thing."—I am, &c.,

F. O.

"SPECTACLES: THEIR USE AND ABUSE," a Pamphlet by Henry Laurance, F.S.S., Oculist Optician, should be read by all suffering from weak and defective vision; valuable and special instructions are given to those using and requiring Spectacles. It shows how sight is seriously injured by the indiscriminate purchase of Spectacles without regard to their proper adaptation, and traces more cases of blindness and defective vision from this than any other cause. Sent post free. Mr. Henry Laurance, F.S.S., Oculist Optician, personally adapts his Improved Spectacles at his residence, 3 Endsleigh Gardens, Euston Square, daily (Saturdays excepted), 10 to 4. Sir Julius Benedict writes:—"I have tried the principal opticians in London without success, but your spectacles suit me admirably. The clearness of your glasses as compared with others is really surprising." Dr. Bird, Chelmsford, late Surgeon-Major W.E.M., writes:—"I could not have believed it possible that my sight could have been so much improved and relieved at my age, 82. I can now read the smallest print, although suffering from cataract on the right eye." Similar testimonials from Ven. Archdeacon Palmer, Clifton; the Rev. Tidd Pratt, Bracknell, Berks; Rev. O. Thorpe, Peckham; Rev. Mother Abbess, Mill Hill, Hendon; Lieut.-Gen. Macmullen, Brentwood, &c

NOTES FROM ALDERSHOT.

(FROM AN OCCASIONAL CORRESPONDENT.)

Route-marching has been carried on by the various regiments independently during the week. Little else in the shape of general military instruction is going on in the Division. The 103rd Royal Dublin Fusiliers still remain here, the departure of the regiment for Gibraltar, which had been ordered for Tuesday last, having been postponed until further orders. War games were played during the week by the 15th Hussars and the Royal Engineers. The General commanding regularly attends at these games, and takes much interest in this system of instruction. Major R. H. L. Anstruther, Rifle Brigade, has now been transferred from Dover to Aldershot, and appointed, from the 9th inst., to succeed Lieutenant-Colonel G. U. Prior, Royal Scots, as Garrison Instructor, South Camp. Deputy-Surgeon-General J. Ekin, C.B., M.B., has assumed the duties of Sanitary Officer of the Division. The Principal Medical Officer inspected during the week the hospitals of the Division, also all recruits who joined the command during the past month. Surgeon-Major F. Ferguson has taken over medical charge of the 2nd Infantry Brigade from Surgeon-Major Smith. A few days ago, Trooper Martin, a young soldier of the 3rd Hussars, shortly after leaving the riding-school, made off, mounted, in the direction of London. The Military Mounted Police were soon on his track, but, his horse being a good one, he was not overtaken till he had nearly reached Windsor, where he was arrested without difficulty. Temper seems to have been the only reason for his escapade. The Camp has not been so dull for many years past as it is at the present time. To the ordinary private soldier, these long winter months must be specially dreary and monotonous. Rational amusements, in a general way, there are none within the bounds of the camp, unless the very questionable comic-singing of broken-down concert-hall professionals in the canteens can be considered such. Here, indeed, Private Atkins, when he is tired of childish games in the recreation-room, or wearies of papers teeming with political matters which he does not understand, can, for a time at least, drive away *ennui* with the quart pot, provided he is "in funds," or foregathers with a chum who happens to be in that happy condition. If the private soldier could always purchase good beer in the canteen, he would, perhaps, not feel so much the following morning the effects of his potations of the previous night. But only those who don't know anything at all about the matter believe in the generally excellent quality of the soldier's beer. At one time, during the winter months, there was a continuous round of genuine amusements, dramatic performances, lectures, concerts, penny readings, &c. Of the latter class of entertainment, the Royal Engineers formerly took the lead. When the late Colonel C. C. Chesney, R.E., commanded the Royal Engineer companies here, they had an excellent glee club, which assisted much to drive away dull care during the long winter evenings. Colonel Chesney was himself an able elocutionist, and I shall never forget his splendid reading, at one of these entertainments, of Tennyson's "Northern Farmer." But all those days are gone. The Officers' Divisional Dramatic Club only exists in name; the Serjeants' Dramatic Club is no more; the Officers' Music Society, which at one time gave monthly concerts, has also, apparently, ceased to exist, and penny readings or regimental theatricals or concerts are unheard of. The Theatre Royal, Z lines, South Camp, formerly a popular place of amusement, has been recently turned into a School of Instruction for Army Signalling. A rage for classes of all kinds, schools of instruction, and boards of examination has set in, to which everything else is made subservient. But the truth of the adage, "All work and no play makes Jack a dull boy," is becoming painfully apparent. The Royal Engineer Theatre, now the only building of this kind in the Camp, seems to be mainly used as a religious meeting-place for the furtherance of mission work, and happiness and pleasure anywhere and everywhere but at Aldershot Camp. Truly, as regards this matter of amusement and recreation, a strange apathy has fallen upon us. Perhaps 'tis now the dark hour before the dawn. Her Majesty the Queen has been graciously pleased to accept as a souvenir of the Egyptian Campaign, a handsomely framed photograph, by Messrs. Hills and Saunders, Aldershot, of the copy of the New Testament pierced during the advance on Tel-el-Kebir by a Remington bullet, while in the haversack of Private Roome, 74th Highland Light Infantry, as mentioned in my "Notes" of November 25 last. The Rev. A. Malim, Chaplain to the Forces, Hon. Secretary for the Society for the Propagation of the Gospel for the Camp, has issued a report and statement of account, which shows that a sum of £66 10s. has been subscribed by the troops at Aldershot for the Society during the past year. Exactly ten years ago this month, the first steps were taken for the holding of an industrial exhibition at the Camp. The object of the undertaking was to induce soldiers to occupy a portion of their spare time in the manufacture of useful articles, and to cultivate among them a taste for intellectual pursuits. A similar exhibition had been held in 1864, the results of which were in all respects satisfactory. General Sir J. Hope Grant, then in command of the Division, took the warmest interest in the matter, his A.D.C., Lieutenant H. Knollys, acting as hon. secretary. The exhibition was opened with much *éclat* on July 9, 1873, in the Officers' Club, under the patronage of H.R.H. the Duke of Cambridge. Prizes were awarded on the opening day, which was observed as a general holiday throughout the Camp. The exhibition remained open for three weeks, and was visited by thousands from all parts. Over 1,200 articles were exhibited, and the undertaking proved a great success. It is often asked here, "Why has no similar exhibition been since held?" An undertaking of this nature can surely be organised once in a decade. There is no lack of material to hand for the purpose. A spirit of honourable rivalry among the various corps would be the means of bringing much talent to the front. If, therefore, the right people would only take the thing up, and commanding officers heartily co-operate, there is yet time enough to organise a Military Industrial Exhibition for July next, equal to any yet held. A new range-finder, the invention of Lieutenant-Colonel Weldon, Madras S.C., will shortly be on trial here by Artillery and Infantry. It is said to be much simpler, and decidedly superior, to either of the range-finders now in use. A meeting will be held on Monday next, under the presidency of Major-General Sir T. Fitz-Wygram, Bart., to arrange for the Divisional Steeplechase Meeting in April next, and to appoint a secretary, in place of Major Turner, R.H.A., now Military Secretary to the Lord-Lieutenant; each corps and department in the command to be represented. Major C. A. Rochfort-Boyd, R.E., is under orders to proceed to India at an early date. Captains J. E. Josselyn and A. J. Montgomery, and Lieutenant J. H. Jellett, R.A., have been examined for promotion in subjects (*a*) and (*b*), section 4, paragraph 28, Q. R., and have been found qualified. Boards of examination will assemble on Tuesday next, the 16th inst., for the examination of the following officers and non-commissioned officers, in Part II. of the new Musketry Syllabus, for company certificates :—1st Board—President, Lieutenant-Colonel Field, 15th Hussars; members, Major Turner, 26th Cameronians, Major Berkeley, 39th Regiment; to examine, Majors Napier and Jervoise, Captains Peckham, Alexander, and Jackson, and five non-commissioned officers, 3rd Hussars; Captains Beatty and Conran, Lieutenants Harris and Lamb, and three non-commissioned officers, 39th Regiment; Major the Hon. C. Dutton and Lieutenant Smythe, 85th Shropshire Light Infantry; Major Godwin-Austen, 1st Battalion, 24th Regiment; Lieutenant Dugdale, 16th Lancers. Second Board—President, Lieutenant-Colonel Cox, 87th Royal Irish Fusiliers; members, Major Shaw, 103rd Fusiliers, Major Hopwood, 3rd Rifle Brigade; to examine, Captain Martin, Lieutenants the Hon. E. H. Stopford, Henry, Wolfe, and Conran, and one non-commissioned officer, 87th Royal Irish Fusiliers; Lieutenants Warren and Proby, and eight non-commissioned officers, 103rd Fusiliers; Captains Hervey and the Hon. R. Sidney, Lieutenants C. á Court, McGrigor, and Morrison, 3rd Rifle Brigade. The examinations will be conducted, and marks subsequently assigned by the members of boards, in accordance with Memorandum dated Horse Guards, July 3, 1882, and the Syllabus dated November 3, 1882.

THE EGYPTIAN WAR RELIEF FUND.

No small addition to the above fund was made last week by the energy of John Noble, Esq., of Park Place, Henley-on-Thames, by whose kindness a series of four amateur dramatic performances were given on Tuesday, Wednesday, Thursday, and Friday in last week, the gross proceeds of which were devoted to this object. The scene of operations was the little theatre attached to Park Place, and licensed to Mr. Noble, and the pieces chosen for representation were the drama, "Our Bitterest Foe," (an incident of the late Franco-German War), the farce "No. 1, Round the Corner," and a comedietta, "Nature and Philosophy." In the last-named piece, Lieut. Price, R.N., late of H.M.S. Phœnix, as Brother Philip, showed an amount of talent that was only equalled by Miss Noble's impersonation of Duenna Gertrude and her brother's conception of Colin, who was ignorant of the existence of the opposite sex. Mr. Noble played the part of the innocent boy to perfection. Miss Dixon's charming rendering of two very pretty songs also deserve mention here. In the preceding farce, Mr. Molloy, as our old friend Nobbles, brought down the house; while in "Our Bitterest Foe," both Mr. Noble, as the fugitive French officer, and Mr. Martineau, as the triumphant Prussian General, deserved all the applause accorded to them. In short, the "Park Place Amateurs" scored on this occasion a success such as rarely falls to the lot of an amateur troupe. The little theatre was most tastefully decorated with flowers, banners, and military weapons, one of the chief objects of interest being a rifle captured from one of Arabi's men at Kassassin, and brought to England by Corpl. Hodge, of the 2nd Life Guards, who was himself present at the performance on Wednesday. On each of the four nights the house was crowded to its utmost limits, and a novel and attractive feature of the entertainment was the nightly attendance of a detachment of the Queen's Own (Oxfordshire) Hussars (of which Mr. L. Noble is senior lieutenant), which acted as a guard at the entrance in honour of the arriving guests. After the final performance on Friday, a bump supper was given to a large number of guests, when the proposal (by the Rev. G. W. Rolfe) of the "Park Place Amateurs" was the signal for the most tumultuous applause, all of which had been fairly earned.

Amusements.

The weather has been, so far, favourable to the interests of theatrical managers, and at those establishments possessing special attractions the attendance has been above the average. At Drury Lane, the receipts for morning and evening performances are understood to have reached nearly one thousand pounds a day; but it should be remembered the expenditure is estimated to approach three hundred pounds for each representation, so that the profits are not so enormous as some calculators imagined.

The Covent-Garden Promenade Concerts are successfully centined. The elaborate extravaganza of "The Yellow Dwarf," at Her Majesty's, has been improved by reconstruction; and the last nights of "The Overland Route" are announced at the Haymarket, where a final revival of "Caste" is fixed for next Saturday, Jan. 20. Mrs. and Mrs. Bancroft resume their old positions as Captain Hawtree and Polly Eccles, Mr. Conway is George d'Alroy, Mr. David James Eccles, Mr. C. Brookfield Sam Gerridge, Miss Gerard Esther, and Mrs. Stirling the Marquise de St. Maur.

The Olympic has been reopened, and Miss Genevieve Ward, assuming the responsibilities of management, has reappeared in the metropolis, after an interval of two years, in Messrs. Grove and Merivale's drama of "Forget Me Not," produced at the Lyceum during an intercalary season of 1879. Her performance of the daring and unscrupulous heroine, Stephanie, has lost nothing of its original power. Her adroit antagonist, Sir Horace Welby, is now personated by Mr. W. H. Vernon, Mrs. Leigh Murray is again Mrs. Foley, and Mr. David Fisher represents the eccentric Prince Mallcotte, while Miss Lucy Buckstone portrays Alice Verney, and Mr. Philip Beck the revengeful Corsican, Barrato. New scenery has been painted by Mr. Ryan, and much care has been manifestly bestowed on the decorative accessories of the present revival

A slight comedietta, by Mr. Arthur Law, entitled, "A Happy Return," now precedes the clever play of "Comrades," at the Court Theatre. There is but the shadow of a story, but Mr. Arthur Cecil, depicting an old Naval officer, Capt. Hardy, acting under the erroneous belief that his beloved son has committed a forgery, turns the single pathetic situation to effective account. Young Mr. Dion Boucicault is the son, and Miss Ruth Francis prettily plays the sympathising niece, Grace Fielding.

At Toole's Theatre a welcome change of programme has taken place. Mr. J. L. Toole now advantageously resumes his popular character of Caleb Plummer, in "Dot," and the general cast is very efficient. Mr. Dion Boucicault's dramatic version of Charles Dickens's impressive story of "The Cricket on the Hearth," was produced at the Adelphi on Monday, April 14, 1842, and twenty years of hard and continuous work upon the stage have enabled the popular comedian now to present his original embodiment as a highly-finished artistic study. In the first cast appeared Miss Woolgar as Tilly Slowboy, Miss Louise Keeley as Dot, Miss Henrietta Sims as the blind girl, Bertha, Mr. S. Emery as the carrier, John Peerybingle, and Mr. C. H. Stephenson as Tackleton. These characters are now well represented by Miss Eliza Johnstone, Miss Ely Kempster, Miss Effie Liston, Mr. John Billington, and Mr. G. Shelton.

A new drama, in six acts, by Mr. Robert Buchanan, will be produced at the Adelphi in the middle of February, when Mr. Charles Reade's tenure expires.

The Royalty will be reopened by Miss Kate Santley on Easter Monday, when a new English opera will be produced, written by Mr. George R. Sims, and composed by Mr. Frederic Clay.

Rapid progress is being made with Mr. Edgar Bruce's new theatre in Coventry Street, and "The Prince's," as the house is to be named, is expected to be finished in June. Mr. C. J. Phipps is the architect.

After a long illness, Mr. Julian Hicks, a scenic artist of considerable ability, has expired, leaving a widow and a very numerous family in most necessitous circumstances. The deceased was the son of the well-known melodramatic actor, N. T. Hicks, whose popularity at the Surrey and the Victoria forty years ago was regarded as almost phenomenal.

Obituary.

Admiral J. Hallowes died on Thursday at Milton, near Portsmouth, aged 93 years. This officer entered the service in July, 1803, as first-class volunteer on board the Ranger. That vessel being captured by the Rochefort squadron two years later, he was sent prisoner to Verdun, and there detained for nearly five years and a half. On his release in 1810 he joined the Helder, stationed in the Baltic, and was subsequently invested with the command of a gunboat, in which he took part in an attack, on Nov. 30, 1813, upon the strong batteries that defended Cuxhaven, and was present at the surrender of Glückstadt in 1814. He attained the full rank of admiral on the Retired List on July 30, 1875. His services were recognised in despatches, and he received a medal.

Com. John Delancy Robinson died on Friday last at his residence, near Braunton, North Devon, aged 81. He was the youngest son of the late Col. Robinson, and entered the Navy in Aug. 1814, as 1st-class boy on board the Mæander, 44 guns, in which ship, bearing the flag for some time of the Hon. Charles Elphinstone Fleming, he served off the coast of Portugal and in the Mediterranean until the autumn of 1816, part of the time as midshipman. Subsequently, after serving at St. Helena for five years, he returned to England in 1822, and in June, 1823, was promoted to the rank of lieutenant in the Hyperion. Previous to that event, however, he had assisted in the boats of the Tyne (28 guns) at the capture of a piratical vessel in the West Indies. As lieutenant he was employed for a length of time on a variety of particular services, and in Aug. 1832, was appointed to the Coastguard, in which service he remained till 1836, subsequently retiring. He was promoted to the rank of commander on the Retired List in Jan. 1862, and was granted a lieutenant's naval pension in Feb. 1879.

Tuesday's Gazette.

ARMY.

"OFFICERS—TO THE FRONT."

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—The paucity of officers in British regiments is great in India, that I venture to bring the following fac to notice:—At the head-quarters of the regiment to whi I belong, we have two lieutenant-colonels; no major. company is commanded by the acting adjutant, who also instructor of musketry. D Compy. has only o officer, who is assistant-instructor of musketry. E Comp has no officer. F is commanded by the officer also charge of the details of a Presidency town! H has o lieutenant, who is also in charge of E (?). I has only o captain at head-quarters, and he is also president of nea all the regimental institutions. K is in charge of a sub tern not dismissed drill. Need I say more on the efficien of the regiment, should it be wanted for active service the field?—I am, &c.,

A CONSERVATIVE.

ACTIVE SERVICE cannot wear out the teeth that are brushed ni and morning with ROWLAND'S ODONTO, the purest and most fragr dentifrice ever made. All dentists allow that neither washes pastes are as efficacious for polishing the teeth and keeping th sound and white as a pure and non-gritty tooth-powder; s ROWLAND'S ODONTO has aways proved itself. Ask any dealer perfumery for ROWLAND'S ODONTO, and avoid spurious imitati theirs being the only original and genuine Odonto.

MR. RICHARD JAMES WOOD,

AT THE OFFICE, 16 WELLINGTON STREET, STRAND, *and* NOT *to the* EDITOR *of the* ARMY AND NAVY GAZETTE.

The subscription to the paper is 7s. per quarter, or 28s. per annum, PAYABLE IN ADVANCE, *inclusive of postage to any part of the United Kingdom.*

To India, £1 12s. 6d. per annum.

The ARMY AND NAVY GAZETTE *can be obtained in Paris of our Agent,* Mr. J. W. S. NEAL, *English Stationer,* 248 *Rue de Rivoli, to whom Advertisements and Orders for the Paper may be sent.*

"SHORT SERVICE" received an unexpected and very damaging blow in the memorable speech of Sir Frederick Roberts, at the Mansion House. The high authority of the speaker, and his estimate of the short-service regiments which he had commanded in the Afghan Campaign, produced an effect on the public mind but little to the taste of the Army reformers at the War Office, the most prominent of whom, Sir Garnet (now Lord) Wolseley, thought it necessary to take up the cudgels in defence of the system, in an article published in the *Nineteenth Century*. In this, however, as most people competent to judge thought at the time, he had very indifferent success; indeed, he did himself and his cause much more harm than good. But it was not possible for the War Office to avoid some modifications in the Short-service system, and these were eventually introduced in the voluminous Warrants and Regulations issued to the Army on July 1, 1881. Lord Airey's Committee had not, indeed, recommended the entire discontinuance of this system. Even if they had desired to do so, they were debarred therefrom by the terms of their appointment. In his "Memorandum of Instructions," the Secretary for War (Colonel Stanley) says:—"I am desirous to make it clear that there is no intention on the part of the Government, to depart from the general principles of reorganisation which have been accepted by the country since 1870." The Committee was, therefore, only nominated "in order that, by their advice, steps may be taken to remedy the practical defects which are found to have occurred in Lord Cardwell's schemes." They did advise very important modifications of those schemes, of which those relating more immediately to the conditions of service may be briefly stated as follows:—That stricter rules should be framed as to the medical examination of recruits on first enlistment, and the preference given to recruits of 20 years of age; that soldiers should be enlisted for 14½ years' service, of which six months will be passed as recruits before being finally posted to corps, eight years will be under the colours, and six years in the Reserve; that every non-commissioned officer after a year's probation, and also such privates as may be recommended by commanding officers, should be allowed to extend their service and proceed to pension, provided the total number of all ranks so allowed should not exceed 25 per cent. in each battalion; and that various measures should be taken for the increase, periodical training, and mobilisation of the Reserves, and for making them available on occasions falling short of "imminent national danger or great emergency." To these recommendations Mr. Childers gave only very partial effect. The enlistment for 12 years was retained, but modified to seven years' Army and five years' Reserve service, which may be extended to eight years' Army and four years' Reserve service, if the period of Army service expires while the man is serving abroad; the minimum age for enlistment was fixed at 19, or "the physical equivalent of 19;" the recommendation as to extension of service by non-commissioned officers (only) was adopted in a modified form, the conditions of Reserve service remaining unchanged. That these modifications are an improvement by which something will be gained, cannot be doubted; but the question is, will they serve to remove the serious, if not fatal, "defects" which are shown to have existed before their adoption? Short service, under Lord Cardwell's conditions—in the terse language of Sir Thomas Steele—"destroyed our regiments." Will short service under Mr. Childers's conditions give us regiments fit for every service that may be required of them? It is a question which, perhaps, cannot be decisively answered till a European war puts it to a practical test. Meanwhile, Mr. Childers and the War-Office reformers and their panegyrists of the Press are in the highest feather, and pointing out triumphantly as the effect of their measures that recruits are now crowding into the Army of the proper age and quality, almost in greater numbers than are required. True, some perplexity is apt to arise, when we find them attributing this result sometimes to short service, and sometimes to the Territorial Scheme. As a matter of fact, the one has certainly very little, and the other nothing at all, to do with it. We have it abundantly shown in evidence that, as regards the particular term of enlistment, the great bulk of recruits are quite indifferent on the subject And it would be much nearer the mark to say that the present brisk recruiting is owing to the improvement of late years made in the pay and treatment of the soldier, which has placed him more on a level, even pecuniarily, with the man in civil employment; to the removal, as the "advantages of the Army" become known, of old-standing prejudices against the service; and especially to the glut in the labour market, which is sufficiently indicated by the increasing flow of emigration from many parts of the country. All these causes would have operated equally under the conditions as to length of engagement which existed before Lord Cardwell meddled with them. However, letting the causes alone, the jubilation of our reformers over the apparent success of their measures would doubtless be very reassuring, if we could only forget that we have been listening to the same song of rejoicing from that quarter, and from that quarter alone, with little interruption, ever since Army reorganisation began. Lord Cardwell's complacent optimism has been already referred to, and the advocates of his schemes never ceased prophesying smooth things, and ridiculing all who disbelieved in them, until the Afghan and Cape wars, and the urgent remonstrances of the Indian authorities, absolutely compelled the War Office to acknowledge and institute an inquiry into the "defects," as they were mildly termed; in plain English, the entire failure of "Lord Cardwell's schemes." When, therefore, Mr. Childers is found taking up the former strain of official optimism, and Sir Garnet (now Lord) Wolseley disposes of those who differ from him by setting them down as antiquated noodles, club croakers, and what not, it is fitting to remind the authorities that measures similarly heralded in recent years have been seen to collapse like pricked windbags; in short, that the Army reformers are discredited by so many past failures, that, so far from their having any right to expect their future success to be taken for granted, the presumption in the case is all the other way. But, unfortunately, there is more than *primâ facie* ground for continuing to regard the Short-service system with considerable misgivings. There are even somewhat ominous admissions from the men in office themselves who are responsible for it. Let us grant that the modifications of 1881 will probably improve the state of the battalions actually serving in India and the Colonies. We all know that the battalions at home would have to bear the whole strain of any sudden emergency, whether great or small. Now, we have the high authority of Mr. Knox* for saying:—"It is impossible to form a Reserve by means of short service, unless the home Army be regarded mainly as a machinery for training large numbers of young men; but in accepting this principle, it is of the first importance to prevent these young men being accumulated in excessive numbers in the battalions upon which active service will first fall." To this essential saving clause in the principle, however, Mr. Childers, upon his own admission, has not been able to give effect. In moving the Army Estimates on March 14 last, he said:—"If you divide the number of infantry recruits by the number of battalions at home, it follows that there will be in each of the battalions at home on the average nearly 270 recruits, and as the average strength of the home battalions is just under 600, it follows that nine-twentieths, or nearly one-half, of the rank and file of the battalions at home, must consist of recruits, in any circumstances." Not only is this the admitted actual state of the home battalions at the present moment, but, so far from its being clear how this state of matters can ever be remedied under the existing arrangements, we have it as the expressed opinion, about four years ago—whatever his opinion may be now—of none other than the indispensable Mr. Knox, that under those arrangements no remedy is possible. In a Minute, dated November 5, 1877, he observed:—"Regarding, then, the preparedness for immediate service of the battalions standing first on the Roster as the main object now to be obtained, consistently, more or less, with the system of short service, I submit that the present plan of raising certain battalions by means of recruits to a high establishment (even as now proposed to be modified) must fail, and that the best, and, indeed, only course, is to maintain all the battalions of infantry at home at a uniform establishment, relying upon the Reserve to complete them for active service." Now, it is quite unnecessary to say that it is not what is here pronounced to be "the only course," but the other plan, which we are told "must fail," that is being followed at the present moment.† But even if we had not Mr. Childers's own admission of the too great youthfulness of the home Army, and Mr. Knox's description of it as merely a machinery for training recruits, there is the evidence on this head which any one may obtain by the use of his own eyes, wherever he finds an infantry regiment quartered. It has always been a received article of faith with experienced officers that no soldier, till after he had served for three years at least, could be considered other then a mere recruit; and it is of such that our home battalions—unless, perhaps, a few just returned from foreign service—to all appearance, now wholly consist. Such a thing as an old soldier is very rarely to be seen. It may be admitted, speaking generally, that with these recruits, as recruits, little fault is to be found; they are probably not inferior in any way to those of a former period, and in time would, no doubt, develop into very good soldiers. But if the question is put whether battalions which are admittedly little else than training schools for recruits are fit for active service, the unhesitating answer must be,—Certainly not. But then, we are told, in the event of a great war, when "imminent national danger or great emergency" may be declared, the home Army is to "rely upon the Reserve," to complete it for active service. Emergencies, it is to be borne in mind, must, now-a-days, be expected to arise on very short notice. This raises the question of the immediate readiness of the Reserve. Now, it is, of course, to be expected that, in the absence of any provision for periodical trainings, the general tendency among the Reserve men must be to become rusty in drill and to deteriorate in discipline. The account given of them, indeed, by some of the Staff Officers charged with their periodical payment is by no means favourable. "Their discipline is very indifferent," says Colonel Todd, S.O.P.; "they are insolent and independent;" "the discipline of the present Army of Reserve men is totally different from what the discipline used to be formerly." But even setting this aside, and granting that the Reserve men are all forthcoming when called up, also that they are all of satisfactory age and physique, still, no officer would say that a battalion largely made up of such men, strangers to the regiment and to each other—for they do not rejoin their old regiments—would be fit for immediate service in the field against a trained European army, such as Germany could put into the field. In the words of Major-General Willis,—"You must give some little time for the men to get a knowledge of one another and of their officers, or else your regiment is nowhere, if you go into the field. The men, instead of hanging together and hanging to their colours and their officers, are like a flock of sheep, if they get into difficulties." It is, indeed, needless to say that it is this "hanging together," this cohesion, which is the be-all and end-all in a perfectly disciplined regiment; to acquire it, time is obviously necessary. But would the necessary time be given? Everybody knows the saying of the French Marshal "The British Infantry is the best in the world; fortunately, there is not much of it." He speaks, of course, of the Infantry of a former era,—of the veteran regiments which he had seen in the Peninsula, whose very names even have recently become things of the past. As for the British Infantry of the future, we are assured by the men who have refashioned it that their arrangements have secured that there shall always be plenty of it; but the quality of the new and entirely different article which they are turning out is a matter which remains, to say the least, for the present, exceedingly uncertain. However, when all objections have been stated, it would be vain to contend that there is not much to be said for a Short-service system, at any rate, if accompanied with proper checks and safeguards. That it has answered very well in Germany, is certain; though it is equally certain that it would not answer in this country, if applied in exactly the same way, because the purposes for which our Regular Army is required are wholly different. Whether it can be modified and adapted to our purposes, is the question which has yet to receive a decisive answer. With regard to this, the key-note seems to have been struck by his Royal Highness the Duke of Cambridge, at the close of his evidence before Lord Airey's Committee, when, after saying he wished it to be understood that he was not prepared to condemn the system, he continued:—"In answering questions put to me, I have spoken on matters of fact, and not of opinion; but I feel that although I accepted the necessity for the introduction of the Short-service system at the time it was brought into operation, it was impossible to know exactly how it would work; and as we now find various difficulties arising out of it, I have stated them, because any system must be considered as tentative, until it is found to succeed." Just so. From the year 1870 to the year 1881, it was a tentative system. Up till the last-named year, it had certainly not been "found to succeed;" on the contrary, it had proved itself, beyond all question, a failure. It has now been in some respects modified, and possibly it may, in course of time, be "found to succeed." But the point to be particularly noted is that it is still only a "tentative system," and that it is yet a great deal too soon for Mr. Childers, backed up by Lord Wolseley, to go forth proclaiming it to the world as a system which has actually proved successful; while the possible issues involved are so momentous that both the Army and the country have only too good reason for looking on with anxiety at what is still, at the best, nothing else than a very doubtful experiment. Because we succeeded lately in putting an Army Corps, not even complete in numbers, into the field in Egypt, there are critics who would actually have us believe that our system has been tested and proved to be all that could be desired of it. But it has to be borne in mind that the campaign in Egypt was no test at all of the success of our present system. If it was, all we can say is that we are far worse off as regards military preparedness than we have hitherto imagined ourselves to be. So much nonsense has been spoken and written with respect to the walk-over in Egypt, that we desire to bring those interested in the Army to their senses. We have endeavoured to show, in the series of articles which we have published, how worthless are the opinions of those who have endeavoured to bolster up short service. Their tactics from the first have been to ridicule the arguments of all who have opposed them. The public have been asked to wait and see how matters turned out. The public have waited very patiently, indeed, and each step taken has left us further off than ever from the goal for which we have been striving. What would have been our position to-day, had the reformers had it all their own way? The nation would have been on the brink of ruin; the Army which has fought its battles for generations would have been scattered to the winds, and there would have been nothing to replace it. With these facts before them, facts which are indisputable, as the expressions of opinion we have quoted of those most interested show conclusively, the country ought to be mindful. The Army has been in the hands of the reformers for twelve years. It is time we should ask ourselves—How have the reformers done their work? There can be but one answer to the question, for they have condemned themselves out of their own mouths.

---

* Mr. Knox was then "Estimate Clerk" in the War Office, but has since been promoted to be successively Deputy-Accountant-General and Accountant-General. He has been either a member of, or a leading witness before, every important Committee that has sat at the War Office for many years past, no matter what the particular subject of inquiry; and it could easily be shown from the Blue-books that perhaps no other single individual has had so much to do as this gentleman with the changes in Army organisation that have taken place since 1870.

† The following is from Mr. Childers's speech on March 14 last:—"It may be remembered that last year we proposed that on the Roster the 12 battalions of 950 men should be followed by four battalions of 850 men each; four of 650 men each; eight of 500, and 43 of 480. We have made a change of some importance in that respect. It was practically found that that jump from 500 to 650, and from 650 to 850, was an inconveniently large one. We have, therefore, altered the establishment, by making no jump of more than 100 men, so that instead of the numbers as I have given them, we shall have four battalions of 850 each, four of 750, four of 650, four of 550, seven of 500, and 37 of 450." This "jump system," of course, is exactly the one which Mr. Knox said, contrasting it with the battalions at a uniform establishment, "must fail."

THE Royal Naval Engineers have had a hard battle to fight for more than thirty years. The sudden transition from sailing ships to steamers found the Admiralty utterly unprepared for the change. No Engine-room staff existed in the Navy. It had to be created. And the Admiralty chose the worse course possible to create the new branch, when it dawned upon their minds that Engineers and Stokers had become really necessary in the service. They then engaged locomotive drivers, fitters, and stokers, mere labourers, to act as Engineer officers in the Navy, and, by so doing, at once stamped the branch as one unfitted for gentlemen. As a matter of course, Economy was the cause of the action of the Admiralty. In those days, even more so perhaps than at present, a well-educated, clever, mechanical engineer was worth his weight in gold in most parts of the world, and the pay offered by the Admiralty was never intended to tempt such men to join the service. But as time went on, the Admiralty came bit by bit to perceive that they had made a mistake. Then an attempt was made to induce gentlemen to join the Royal Naval Engineers, but by this time the vulgarity of the locomotive drivers and their generally dirty appearance had secured for them the sobriquet of "Greasers." Both by occupation and in appearance they were lubricators, and little else. Hence, few gentlemen remained long in this branch. Various reforms were introduced. The pay and position of Engineers were improved from time to time. Still, although officers of the Navy, they were shunned and avoided by the whole body of Naval officers. Orders were given in most ships for the Gun-room officers on no account to associate with or even speak to Engineer officers, except on duty. This was due to a fear that the Engineers would contaminate the morals of the Midshipmen and Naval Cadets, those dear little boys the ladies have ever been so fond of caressing, under the belief that they must be so innocent! And to protect this supposed innocence, the youngsters were ordered to avoid the Engineer officers' mess, while their own remained a perfect pandemonium! The hospitality of the ship and of the officers' friends on shore was never accorded to, as the invitations never included, the Engineer officers. This was simply due to the fact that at first they were only mechanics, and that subsequently they were never looked upon as gentlemen, although their branch became filled with the sons of gentlemen. The fault lay entirely with the Admiralty, for gentlemen could have been secured from the outset, had they desired to do so. But they did not. And we do not believe they would have done so to this day, but for the agitation commenced some years ago by the Engineer officers themselves. The influence of the heads of large Engineering firms throughout the country were enlisted by their former pupils, and soon brought such political pressure to bear upon the Admiralty that their Lordships found it impossible to withhold the much-needed reforms any longer. They were, however, unwilling to concede all that was asked, and each concession secured has been literally dragged piecemeal from the Admiralty. Each successive Board has gone on tinkering, until the old pot is so covered with patches that nothing of the original vessel is now visible, while most of the first patches are entirely worn out. At last, a training-ship was fitted out at Portsmouth, in which to educate Engineer apprentices for the Navy. This year, the first batch of Royal Naval Engineer Cadets pass out of the *Marlborough*, and will join sea-going men-of-war. The total number of students who will be examined is forty; and the new entries for the year will be limited to twenty-five. By the new regulations just issued, one-fifth of these will be nominated, as in the case of Naval Cadets, from among the sons of officers of the united Services who have lost their lives while in the service of their country, or sons of officers who have performed long and meritorious services. The remaining studentships will be competed for by open competition. The subjects in which the candidates will be examined remain the same as under the previous regulations; but, in addition, translating Latin into English, and elementary mechanical drawing, have been added. We wonder why the Admiralty still prefer the dead to the living languages? The contribution towards mess and educational expenses is increased by the new regulations from £75 to £100, for the four years the student has to undergo training on board the *Marlborough*. Prior to sending these young Engineer officers to sea, we believe the Admiralty have been desirous of abolishing the Engineers' Mess. The recent Order in Council made this apparent, but beyond this, the Admiralty abolished the Engineers' Mess in the *Nelson*, and by way of trial, appointed the Engineer officers to the ward-room and gun-room messes, according to their relative ranks. In the *Nelson*, the change has worked well. Nevertheless, the Admiralty appear to have been frightened at the very boldness of their own reform. They have recalled the last Order in Council no sooner than it was issued, owing, it is said, to the apprehension that it might be read as implying that all Engineer messes are *de facto* abolished. Hence the Order in Council has been returned to the printer for correction. We hope the Admiralty will reconsider this matter. The Royal Naval Engineers of to-day are, as a rule, a most gentlemanly class of men. They can hold their own in society with the other branches of the service, and no social distinction should any longer be made between them. The experiment which has turned out so well in the *Nelson* should at once be repeated in every ship in commission in the Navy, and Royal Naval Engineers should be placed as near as possible on the same footing in regard to the Navy as the Royal Engineers hold in the Army, with this exception, that an Engineer officer should never be eligible to hold the executive command of a ship or a squadron.

We understand that arrangements have been made by the German Government whereby, in consideration of the payment of one million pounds sterling, Vice-Admiral H.R.H. the Duke of Edinburgh will abdicate his claims to and surrender his reversionary interest in the Grand Duchy of Saxe-Coburg Gotha.

Vice-Admiral H.R.H. the Duke of Edinburgh, accompanied by Her Royal and Imperial Highness the Duchess of Edinburgh and Prince Alfred, left England for Berlin on Monday last, to be present at the celebration of the Silver Wedding of the Crown Prince and Princess of Germany.

The Admiralty would do well to issue a circular enforcing the strict observance of the Queen's Regulations by all ranks afloat, and at the same time let it be clearly understood that forwarding anonymous letters will be severely punished, whenever the sender is discovered. The provincial Press has taken this matter up. In no single case has the action of the Admiralty been approved; and even by the Liberal section of the Press it has been condemned, and stigmatised as a most egregious error, likely to ruin the Navy.

The Admiralty intend reorganising the Royal Naval College at no distant date, when a general mess will be established.

Lord Northbrook, accompanied by Rear-Admiral Brandreth, Mr. Campbell-Bannerman, M.P., and Captain Beaumont, paid a visit of inspection to Portsmouth Dockyard on Thursday.

An officer of the Royal Marine Artillery, who has for many years been a Professor at the Royal Military College, has it in contemplation to bring out a history of the Royal Marine Corps. Such a history is much needed, the only extant accounts of the corps being by Captain Alexander Gillespie and Lieutenant Paul Harris Nicolas, the former of which was published in 1803 and ends with 1801, and the latter published in 1845, and ending with 1842. Thus, from 1842 to the present date, there is no published record, and it will be satisfactory to have the more recent services of the corps embodied in a readable form. These will include the Kaffir War, Burmah, the Crimea and Baltic, China, Indian Mutiny, Japan, New Zealand, Abyssinia, Ashantee, Natal, Egypt, and minor affairs, besides other matters connected with the internal economy and constitution of the corps. It is presumed that such a work cannot be got out without guaranteed support, and it is to be hoped that officers of the services generally will show their interest by entering their names for copies, should a circular be issued to that effect.

C'est le ridicule qui tue!—even the Lords of the Admiralty. "Better late than never," therefore, is all we can say in regard to the Egyptian Naval honours. We cannot thank the Admiralty after delaying the *Gazette* for two months, as even now it is incomplete. But of that hereafter. We have already more on hand than we can find room for in our columns.

The senior Major of the Royal Marine Light Infantry stands in a doubtful position with regard to his further promotion, inasmuch as if no vacancy occurs before March 14 next, he will be compulsorily retired under the Age Clause of the Order in Council of November 29, 1881. It is always a hard case, when an officer becomes the senior of his rank, that he should be compelled to retire, for lack of a vacancy to promote him.

Captain William Codrington, C.B., of the *Excellent*, who is said to have been selected to replace Rear-Admiral Herbert as Director of Naval Ordnance, has, in consequence of the promotion of Captain Douglas to flag rank on January 8, been appointed Naval A.D.C. to the Queen from that date.

Mr. Nathaniel Barnaby, Director of Naval Construction at the Admiralty, will read a paper at the Royal United Service Institution on February 9 on "Battle Ships," when, no doubt, all who take an interest in the Navy will attend, to support or oppose the views entertained by Mr. Barnaby regarding the Naval policy of the Admiralty. We hope to see the question thoroughly discussed, as it is one of great national importance. We fear, however, that this is impossible, as Naval officers on the Active List will not dare open their mouths in opposition to the views of the powers that be, lest by so doing they might injure their future prospects in the service. We hope, however, that there are still some independent men in the service.

"It will be gratifying to yachtsman," says the *World*, "to hear that the Admiralty have appreciated the advantages to be derived from yacht-racing and boat-sailing to such an extent, that they have ordered copies of Mr. Dixon Kemp's admirable work on 'Yacht and Boat-sailing' to be supplied to the seamen's libraries in the Royal Navy." This is very nice and suitable, as such a work cannot fail to interest Naval men, though some people might perhaps be inclined to ask what *are* the peculiar advantages to be derived from yacht-racing, except to owners and skippers, or to doubt whether any number of books will ever teach a man how to sail a boat. But what will the eminent yachting editor and critic say, when he finds that the Admiralty have selected his own work for the perfecting of Naval officers in the perpetration of those enormities against which the *Field* fulminated in such scathing terms all last season? To "building yachts with the public money" and "racing them (*malgré* the committees, of course), in private regattas," must now be added "adopting Mr. Dixon Kemp's work as their text-book!" Truly there is about all this something of the irony of fate.

Any one who has the slightest acquaintance with the subject would imagine that a man who has qualified for seaman gunner is, *a fortiori*, fit to be a trained man. Nevertheless, it appears to be the custom at present, in the event of a man misbehaving himself in a gunnery-ship, to discharge him to general service, and deprive him of the trained man's daily penny until he requalifies, even though he may have held the rating for years before volunteering for seaman gunner. In a sea-going ship, a seaman gunner so deprived would at once be made a trained man, good conduct not being a necessary stipulation. Why should not this course be pursued in the gunnery-ships, and such men, unless they have some physical defect which totally disqualifies them, be discharged to the depôt ship as trained men? It cannot, surely, be considered *infra dig.* to make trained men in the *Excellent*.

The Admiralty announce that on February 6 will be commenced on board the *Excellent* a course of instruction in gunnery for senior officers of the Navy on half-pay. Officers who have permission to attend, should report themselves on board at 9.30 a.m. of that day.

Lord Alcester has, we hear, been somewhat annoyed at our having given publicity to the fact that it was his Lordship's intention to bring home the *Sultan* with her wounds unhealed and gaping, to enable her Majesty to see that the bombardment of Alexandria was not mere child's-play. Our announcement has upset the official apple-cart. The scheme has fallen through, and the *Sultan* has been ordered to Malta, to repair damages and make good defects, and will then rejoin the Channel Fleet in February. From this, it is evident that the little naval display which was being arranged at the Admiralty, has been abandoned, and as the Egyptian gazette was being held over until that event came off, there was no longer any excuse for the Admiralty not awarding the honours so nobly won by the Navy in Egypt. The Navy, under the paternal care of the Admiralty, receives its decorations two months after the Army. And yet we were told a certain high official has been "labouring hard" in the interest of the Navy.

Captain John Hext has, we hear, been appointed Director of the Indian Marine, his name being retained on the Active List of the Navy.

Commander Fawkes has presented to Captain Northcote, R.M.A., a handsome silver inkstand, in the name of the ward-room officers of the *Northampton*, as a slight mark of the esteem and friendship in which Captain Northcote is held by his messmates, and in recognition of the able and efficient manner in which he discharged the duties of wine caterer to the mess during the whole of the commission of the *Northampton* as flagship of Vice-Admiral Sir Leopold M'Clintock. The presentation was made on board on December 12 at Antigua.

The recent sad occurrence outside the Mersey brings once more prominently before the nautical world the question of the "straight" and "clipper" stems for merchant vessels; and every thoughtful seaman will again marvel at the almost universal adoption of the former by shipbuilders. Is it a matter of economy? Surely the saving must be trifling in a huge modern steamer. Is it for the purpose of minimising dock space, and saving dues? How often does 20 feet or so become a matter of importance in this respect, when steamers range from 400 to nearly 600 feet in length? Is it for appearance sake? There are not many who would hesitate between the graceful curve of the old fashioned stem, and the present "chopped off" arrangement. One more question might be put. Is it to ensure the destruction of any vessel with which such a steamer may happen to come into collision? The reply is obvious, for our shipbuilders are neither lunatics nor homicides; but that the present build of steamers is admirably adapted for this purpose is beyond dispute. Setting aside the failure of the water-tight compartments to perform their task—which, in this instance, as in many others, is accounted for by the statement that the vessel was struck exactly on the edge of a bulkhead—can there be any reasonable doubt that had the *City of Brussels*, with her "clipper bow," been the one to deliver the blow, the injuries below the water-line would have been comparatively slight, and the melancholy loss of life, in all probability, have been avoided? The intentionally destructive ram of the modern ironclad is merely a development—and, in some instances, a very slight development—of the dangerous straight stem; and it is a fact, however deplorable, that many lives have been unnecessarily lost through the apparently unreasonable antipathy of modern shipbuilders to the old-fashioned form of bow.

The Commander-in-Chief at Portsmouth would surely take it to heart, if he was aware that the editor of a leading "Society" journal has not deemed him a person of sufficient importance to make it worth his while to ascertain correctly the gallant Admiral's Christian name. Sir *George* Phipps Hornby certainly looks odd; but then the editor was describing a fancy ball, so some latitude may perhaps be permitted in the matter of "fancy" names.

From Malta, we learn that Admiral Lord Alcester has hoisted his flag on board the *Helicon*, and that his Lordship has made the following dispositions:—The *Alexandra*, *Cruiser*, *Coquette*, and *Cygnet* will be paid off about February 5, their crews returning home in the hired transport *Nepaul*. The *Beacon* will most probably return home to pay off in May, but definite orders are awaited from the Admiralty. The *Dragon* is ordered to be ready for sea by February 11, when she will proceed to the East Indies. The sailing orders of the *Sultan* have been received.

The *Beacon*, commissioned January 7, 1879, and now in the Mediterranean, is still without a symptom of relief, though the crews of the *Coquette* and *Cygnet*, commissioned six months after, are being relieved. Can the reason be that the two latter ships have spent the whole of their service in the pleasant waters of the Mediterranean, while the *Beacon* has had eighteen months service besides in the East Indies?

We hear that a Commissioner has been appointed at the Russian Admiralty to report upon the growth of the German Fleet and Dockyards, and to indicate the effect the development of Danzig into a great Naval station will have on the security of the neighbouring Russian ports, such as Port Baltic, Riga, and Revel. It is regarded as not improbable that the fortifying of Danzig will lead to a large extension of the Russian coast defences in the Gulf of Finland, those at Cronstadt and Sveaborg already engaging the attention of experts. The development of Germany's Naval strength in the Baltic comes at a bad time for Russia, and involves her in perplexity. She wants to maintain her Army on a peace footing to its fullest extent, and to do this in the face of disorganised finances, she is compelled to starve the Navy. And at the same time, she is desirous of creating a new Fleet in the Black Sea, at the expense of the old one in the Baltic, which, in view of Germany's action, she cannot now safely do. The position of affairs, therefore, is this. The Government cannot increase the Navy Estimates—which, by the way, had been reduced for the coming year—and, therefore, cannot largely develope, at the same time, both the Black Sea and Baltic Fleets. One, therefore, must go to the wall; and it is believed, in spite of statements to the contrary about the shipbuilding intentions of the Government in the Black Sea, that the southern fleet will suffer. Perhaps a single man-of-war may be constructed at Sebastopol, but the expensive and costly fleet for the Black Sea projected a short time ago, is hardly likely to be taken in hand for the present. On the other hand, there will, no doubt, be an extra increase of shipbuilding in the Baltic shortly, mainly in vessels for coast defence.

Mr. G. H. Beaton, promoted last week to Inspector of Machinery, entered the Navy in May, 1852, and was promoted to Chief Engineer in 1861, after having served during the Crimean War in the following vessels, viz.:—*Tiger*, in the bombardment of Odessa and blockading Sebastopol, was wrecked in her and taken prisoner by the Russians; on exchange of prisoners was appointed to *Sulina*, employed embarking and landing troops; was present at the taking of Eupatoria, battle of Alma, and bombardment of Sebastopol. Appointed to gunboat *Grinder* in 1855, employed in the Sea of Azov blockading and destroying enemy's stores. Took part in the capture of Kinburn, was employed on the wreck of the gunboat *Jasper* on Arabit Spit, diving (without apparatus), in an endeavour to save the ship. In August, 1861, was wrecked in the *Driver* on the island of Mariguana, and made a distilling apparatus from parts of wreck, which supplied the ship's company with fresh water, and received the thanks of the court-martial for this service. Served seven years continuously in the *Jason* on the West Indian station; fitted an apparatus for ventilating the bilges, whereby the ship was made quite healthy, although previously suffering from fever. He was afterwards appointed to Port Royal Dockyard for two and a half years, and then served three years in the *Hector*. Was Chief Engineer of Malta Dockyard, nearly six years, during which time the factory was much improved and the number of men increased, so that ships instead of being sent home to be paid off, were recommissioned at Malta, thus effecting a great saving of expense. When the *Serapis* was conveying H.R.H. the Prince of Wales to India, her boilers primed so excessively on the passage from England to Malta that a speed of seven knots per hour was with difficulty maintained. On her arrival at Malta, he succeeded in completely remedying this defect. The ship afterwards steaming $13\frac{1}{2}$ knots with ease. For this service he received a special letter of thanks from the Admiralty, in addition to others received on various occasions. He was appointed in 1879 to the post of Chief Engineer of Devonport Dockyard, and is continued in that appointment on his well merited promotion.

A propos of the trial of plates at Spezzia, to which we have already referred in these columns, we find so important a French journal as the *Débats* saying that they turned to the honour and glory of French metallurgists. The writer adds:—"Italy is giving herself the luxury of four enormous ships, which will cost her 110 million francs. The two first, the *Duilio* and the *Dandolo*, are armed with plates furnished by the Creusot works. For the third, Italy applied to English industry, solely to indulge in political spite [owing to the Tunis expedition]. Afterwards the Italian Government took it into its head to have some comparative trials, which would have been of use before the plates of the *Italia* were ordered from England. Guns of an enormous size [Armstrong is not mentioned] were fired at point-blank range. At the second shot the English plates flew to pieces. The French plate was not damaged by the first shot, and the point stuck in it as if it had been clay; it resisted the second and third shots, and yielded only to the fourth. The representative of M. Krupp, who was present, warmly congratulated, but perhaps rather against the grain, the Creusot delegates. Now that Gallophobia has gone out of fashion in Italy, the Minister of Marine will, perhaps, decide upon returning to Creusot for the plates for the fourth ship, the *Lepanto*. As for the *Italia* she will have to put up with a cuirass of second-rate quality. There is much inconvenience in introducing politics into such matters." The *Débats* has evidently been deceived. The French plate only hung together longer than the English, owing to its innumerable fastening bolts. The English compound plates have, both in Russia and in Italy, proved of better quality than the French plates.

An *International Army and Navy Review* has been started in Berlin by Herr Ferdinand von Witzleben-Wendelstein. This is rather a bold undertaking. The title itself we should have imagined enough to ensure its non-success, if not its interdiction in Germany. The October number contains many good articles. The leading paper on "The Study of the Philosophy of War," by Edouard Reitz, a paper on Russia, with a memoir of Skobeleff, and a paper on Egypt, in French, dated from on board the *Péluse*, are all well worth reading. Articles in any language, addressed to Herr Otto Janke, Berlin, are, we believe, inserted, if of sufficient merit.

The inquiry into the cause of the bursting of a 28-centimètre Krupp gun at Fort Heppens, near Wilhelmshaven, has resulted, as was anticipated, in the verdict that the accident was not due to any fault in the construction of the gun, but to a flaw in the main steel tube. This fact, though expected, has created a profound sensation in Artillery circles, as a gun burst not long ago on board the gunnery-ship *Renown*, the cause being the same; and it cannot be denied that a feeling of distrust of the heavy steel guns is rapidly gaining ground, which cannot but be detrimental to the service. The few advocates of steel, bronze, wrought iron, &c., who are able to raise their voices against the all-steel principle of gun-making in Germany, where Krupp is looked upon as one of the mainstays of the Empire, remark, and no doubt with truth, that a steel forging of the enormous size of a main barrel for a 28-centimètre gun cannot be sufficiently worked upon to make the material of an even strength throughout, and that the same is therefore unreliable. The accidents which have lately occurred to the steel shafts of several Atlantic steamers would appear to confirm this.

It is said that the German Government contemplate making trials with a land torpedo, the invention of Colonel von Zubowitz, of the Austrian Army. Experiments made in Austria have shown that it is possible for a company of soldiers to lay these torpedoes a distance of one mile in fifteen minutes, and thus to make the ground perfectly impassable to hostile troops. The torpedoes can be exploded singly or all together, at the option of the officer in charge. The Austrian Government are reported to have purchased this invention.

It is satisfactory to find, from the twenty-third report of the National Rifle Association, that the past year's working shows not only increased receipts, which may be taken to indicate that the new regulations have met with general approval, but a wider recognition of the important work which the Association is entrusted with. The Council expresses its indebtedness to Lieutenant-Colonel Morris, Finsbury Rifles, for organising, at short notice last July, a large staff of officers, non-commissioned officers, and men to act as register-keepers and markers, consequent on the withdrawal of Regulars for service in Egypt.

When the 4th Dragoon Guards, 7th Dragoon Guards, and 19th Hussars were ordered to Egypt, the War Office were obliged to call upon the Cavalry then at home for volunteer Subalterns. Between 30 and 40 zealous soldiers eagerly came forward. Some have been killed, some have died of fever, and all have distinguished themselves. Not one of the survivors has, however, been rewarded, not one has been mentioned in despatches. The reason is obvious, but the omission will have its effect, when next time volunteers are called for.

The 2nd Bavarian Army Corps—the last troops retaining the Werder rifle—were at the close of last year supplied with the Mauser, so that the entire German Army is now in possession of a uniform arm. The Werder rifle is the invention of an engineer of that name connected with the Klett Works at Nueremberg, and in the Franco-German War of 1870-71 proved far superior to either the Chassepôt or needle-gun, so that it was not without some reluctance that the Bavarian officials were prevailed upon to discard it in favour of the new Prussian rifle.

We believe the period of service of Lieutenant-General Nicholson, C.B., R.E., as Governor of Jersey, and Major-General Nelson, C.B., as Governor of Guernsey, has been still further extended from April 1 to October 1. Can it be that, with the reduced list of Major-Generals, no other officers can be found qualified or willing to accept these posts? Major-General Nelson is already over age for employment.

The Military force stationed at Quetta and the Pisheen Valley, by latest accounts, consists of a European regiment of infantry, a battery of artillery, a mountain battery ditto, four Native regiments of infantry, and one of cavalry. With such a strong force, it seems a strange policy to leave it far out of the reach of a railway, especially when Peshawur, our frontier post in the North-West, is being connected with the Indian railway system.

Colonel D. R. Barnes, commanding the 50th Regimental District at Maidstone, has been compelled to resign his appointment in consequence of ill-health, and is to be succeeded by Colonel W. J. Chads, half-pay, late 62nd Regiment, lately commanding the Reserve Depôt at Ismailia.

"It is curious enough," writes one of our correspondents from Cairo, "to see the opera-house, always cosmopolitan in the aspect of the audience, with a local colouring of faces and dresses when there is a full house, now brightened up somewhat by the addition of British officers in uniform. The Dufferin box is on the stage on the right of the house, facing the box of the Khedive, which is in the first tier, and opposite that reserved for the great visitors and Ministers. Over it are the harem boxes of the Viceregal family and of the Egyptian bigwigs, screened by an embroidered veil, through which there is just visible a sparkle of jewels now and then, but some of my more fervid friends declare they can see eyes glancing brightly behind it as well. Next to the Dufferin box is that of Sir A. Alison; next to the box of the Commander-in-Chief is that of Baker Pasha. The others numbered up to nine on that side are mostly appropriated to various Europeans or Levantines, some of whom have their nights, whilst others are season subscribers. Sir Edward Malet's box is the first on the left side, and next is that of Mr. Fitzgerald; and then the boxes round to the stage-box on that side are generally in possession of red-coats, with alternations of stamboulines, fezes, and evening-dress. In the pit there are many constant attendants in uniform. Sir Gerald Graham has a stall in a good position, and Major-General Dormer has another, and dotted all over the house in the first and second tier and in the stalls you may see faces well known at the Senior Rag, the Junior, the Naval and Military, &c. Truth to tell, our uniforms, now-a-days, do not blaze and sparkle as they did when epaulettes were in vogue, and do not make the show of a theatre *paré* on the Continent. But the effect is good, *tout de même*. There is a numerous and admirable orchestra, and the dresses, appointments, and *mise-en-scène* are fresh, rich, and luxurious. There is a well-drilled and numerous chorus, and a capital *corps de ballet*. Then as to the troupe? Hem! To begin with, Madame Albert Mary is a very charming and accomplished actress, with a very pleasant French voice, which she manages with consummate skill and tact. Her 'Madame Favart' is, in all respects, excellent. M. Fronty deserves next to be mentioned, as a very great acquisition to the company,—a practised musician and a finished actor; and there are Fossombronis, three at least, of various degrees of capacity and promise; but M. Andran in the matter of voice leaves something to be desired in tenor parts, and of the merits of the other ladies and gentlemen I have not yet made up my mind, and so shall say nothing more at present. The house is too large for bouffe and operettes, and for the present season all the pieces must be of that character,—'Giroflé Girofla,' 'Madame Favart,' 'Le Petit Faust,' 'La Mascotte,' &c. English operette is, of course, impossible; but there are English voices and faces *partout*, and many officers appear to have been joined by their wives, and to have settled down for some time in the land, though we hear on all sides of a reduction of the Army to one-half being imminent."

Although forty batteries were added to the German Field Artillery in 1881, a further addition will probably be made this year. Herr von Kameke, the Minister of War, has lately had several audiences of the Emperor, which are generally supposed to have had some connection with the intended measure, especially as Lieutenant-General von Voigts-Rhetz (Chief of the 4th Field Artillery Inspection, at Coblenz) has been called to Berlin. There is no doubt but that Parliament will vote the necessary funds, as Germany is at present weak in this arm, as compared with her neighbours, France and Russia. The figures are:—France, 2,622 guns; Russia, 2,460 guns; Germany, 2,040 guns. Since the above was written, Herr Von Kameke has officially announced that the German Government does not intend to at once increase its Field Artillery, it being only in contemplation to make some alterations in the organisation of the force.

It appears from a close inspection of the official *Army List* that the last batch of Lieutenants of the Royal Engineers promoted to the rank of Captain on January 4, 1883, on completion of twelve years' service, have been superseded by 600 officers of the other branches of the service. The average length of service of the 50 junior Captains of the Line, from the date of their first appointment in the Army, is eight years and seven months, and the senior Lieutenant of Artillery has nine years four months' service.

Lieutenant-Colonel Boie, of the Great General Staff, has been attached to the Commandantur at Königsberg. This has caused some sensation in German military circles, and is ascribed to the fact that the Government wish to keep well posted up as to the doings on the other side of the eastern frontier. Lieutenant-Colonel Boie served in the war of 1870-71 as captain on the staff of Field-Marshal von Manteuffel, and is considered one of the best officers of the "new school."

The impulsion given by France to her colonial policy, and the part she is playing in Tunis, Tonquin, Madagascar, on the Congo, &c., has induced General Billot and Admiral Jauréguiberry to concert measures with the view of appointing a commission of halting-places at Toulon, Cherbourg, Rochefort, Brest, L'Orient, Dunkirk, Havre, Nantes, Bordeaux, Cette, Marseilles, Port Vendres, Algiers, Philippeville, Oran, and Bone. Tunis, we see, continues to swallow up a good deal of money, and a good many French newspapers are crying out against the protectorate as a bad speculation. The last money demanded was £1,000,000 for organising mixed companies, and placing the Regency under a strictly military *régime*. No less than 45,000 men were employed in punishing the Kroumirs and putting down the rebellion in Tunis! The present force in the country is over 30,000 strong, but when things get more settled, it is calculated that a mixed force of 25,000 men will be sufficient for all purposes. As far as Tonquin is concerned, it appears that the French have given up the idea of sending a regular expedition to that country, in order to take it under their protection, and gradually annex it to Cochin China. They will for the present content themselves with sending out a battalion or two of Marine Infantry, to reinforce Commandant Rivière, who, after having captured Hanoï, has been holding that place with a very small force. The fact of the French Government having been turned from its first intentions with regard to Tonquin is, no doubt, due to the remonstrances of the Court of Pekin, which at one moment appeared determined to order the Imperial Army to attack Commandant Rivière, and to drive him out of Hanoï. More peaceful counsels have since prevailed, and it is now the intention of the two Powers to act together in the suppression of the Black Flag pirates who infest the Red River, and interfere with Chinese and foreign commerce. It remains to be seen what will be done when the pirates are suppressed. The French will, no doubt, wish to remain in the country, and to this the Celestial Government will object most strongly. On the Congo, persuasive measures, and not force, are to be employed; and the De Brazza mission will be backed up merely by a small naval detachment, consisting of a gunboat, a despatch-boat, and a transport.

The members of the Committee of Commanding Officers of Metropolitan Volunteer Corps, who went down to Brighton on Thursday, might have saved themselves the journey of 100 miles and the soaking they received on the Downs, had they been so disposed, for it is now well known that—notwithstanding the strong efforts which were made at the special meeting on the 9th inst. to have the Review at Aldershot on the next Bank Holiday, and the opinion still maintained by a considerable number of officers that the vicinity of the Camp is the best place for the manœuvres—London-super-Mare has been virtually selected all along. It was also known that the ground of 1881 was again available, and this, about six miles in area, has been so thoroughly explored that a personal visit was rendered unnecessary. A good map and plans, such as those produced at Lieutenant-Colonel Knight's offices, would have fully answered every purpose, especially as it rests with the Commander of the South-Eastern District to make the actual report to the War Office on its adaptability to the purpose to which it is again proposed to put it. But these visits and exchange of courtesies between the commanding officers and reception committees are part of the programme, and must be gone through. Of the twelve officers appointed, nine put in an appearance. We are glad to see that with the approval of the Duke of Cambridge, the Commander of the Home District intends to repeat the very useful and interesting work of the marching columns. If this is as well arranged as it was last year,—of which there can be no doubt, as it will again be in the hands of Colonel the Hon. Paul Methuen, C.B.,—it should be a more important feature than the Review.

We would bring to the notice of the Yeomanry Cavalry of Great Britain that in a most public, spirited, and generous manner, Major Tritton and the officers of the Middlesex Yeomanry have instituted a Yeomanry Cavalry Club, at 43 Albemarle Street, Piccadilly, in order to create and keep up that *esprit de corps* which is so desirable towards upholding and strengthening the ranks of this important branch of the service. The subscription is only three guineas, and the club being proprietary, there is no pecuniary liability whatever. The club consists of coffee, billiard, smoking, reading, writing, and card rooms, and the rules are framed on the same principles as regulate other military clubs in London. We trust that the Yeomanry will support such a laudable and useful undertaking.

There will be no want of pictorial illustration of the Egyptian Expedition. In a few months there will be an admirable panorama of Tel-el-Kebir open in London. It is the work of M. Pecheird, an artist of extraordinary talent, who has been for some weeks engaged in sketching the country and in preparing the studies, from which he has executed an elaborately-finished work *in petto*, from which the panorama is to be taken. The latter will be twenty times the size of the picture which was lately inspected by Lord and Lady Dufferin, and has also been seen by many military people of taste and judgment, who are loud in praise of the finish and truthfulness of the battle-piece. Mr. Woodville, the talented painter of the Maiwand episode, which attracted notice in the Academy last year, is at Cairo, busy on materials for pictures of Tel-el-Kebir and Kassassin. The Queen has sent him a commission for a picture, and the care, spirit, and accuracy of Mr. Woodville's preliminary sketches give assurance of most interesting and effective productions in the ensuing year.

"To-day," says a Cairo letter of Dec. 18, 1882, "160 of our invalids were despatched in one of Messrs. Cook and Son's steamers, from the Kasr-el-Nil bridge, on an excursion up the Nile. This is indeed a pleasant change from the barracks at the citadel and at the Abbaseyah for officers and men, but it is rather costly; not so dear as if they had to be sent home, however. And perhaps the Egyptians will pay, *willy, nilly?* Did the men not lose their health in Egypt?—*Q. E. D.* Messrs. Cook have now the exclusive concession for excursion steamers on the river, and they have acted in a very liberal spirit as regards officers and men of the Army of Occupation; but they cannot be expected to take soldiers on pleasure parties up to Thebes without some return. They have carried the invalids down to Alexandria for the expenses out of pocket. The results of the up-river excursions have generally been very favourable indeed. The soldiers are received everywhere on landing with respect and interest by the people, and the shores of the Nile are quite as safe as those of the Thames, and, indeed, much quieter than the banks of our metropolitan river near Maidenhead on a Sunday, when the nobility and gentry are busy with their devotions in Boulter's Lock."

Some interesting experiments will shortly be made by officers of the German Engineers in taking photographs of the terrain from a balloon. Preliminary trials have shown that it is possible to take a clear, instantaneous view from a height of about 1,200 yards, the balloon rising the while at the rate of 20 ft. to 30 ft. per second.

THE ARMY RESERVE.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—I see that men who have completed six years with the colours are allowed to join the Army Reserve. I wish to ask this question,—Is this a privilege allowed to one corps more than another? If not, perhaps some one can explain the reason why myself and others in the same corps are debarred from that privilege, after we have repeatedly referred to our commanding officer, but without receiving any satisfactory answer?—I am, &c.,

A WOULD-BE RESERVE MAN.

HOW WAR MEDALS ARE NOT GIVEN.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—Having recently read in your columns a letter signed "Humbug," could you give me space for a few lines? I wear the medal and clasp for South Africa, 1879, which I received for the war in Zululand. I never saw a shot fired in that country. Afterwards I took part in the Secocoeni Campaign and Transvaal War, in both of which I saw fighting; during the latter, I was shut up in a place which was besieged by the Boers for about 100 days, and around which constant fighting went on. For these campaigns I have never received any medal or decoration. Surely this, Sir, is MORE HUMBUG?

A general quarterly court of the Royal Naval Benevolent Society was held at Willis's Rooms on Jan. 15, the chair being occupied by Admiral George Goldsmith, C.B., and amongst other members present were Capts. Henry Baker and James Jeffery, Com. T. Wright, and W. Eames, Esq., chief inspector of machinery afloat. The annual report of the committee, which was read by Mr. John St. John Wagstaffe, the secretary, showed that the receipts for the past year were as follows, viz.:—Annual subscriptions, £536 3s.; life subscriptions, £10; donations, £117 15s.; legacies, £45; amounting together to £708 18s. The late Admiral H. E. Coffin, who had been an annual subscriber to the funds of the society for 67 years (as well as a liberal contributor by donations), had bequeathed to the institution the sum of £45; and the following were some of the donations which had been received, viz.:—£20 from Pymr. G. M. Lang, R.N.; £10 10s. from the Skinners' Company; £10 each, from E. J. L. Blyth, Esq., "E. W.," and Mrs. Larcom; £5 5s. each, from the Saddlers' Company, the Haberdashers' Company, the Rev. W. Parker, and L. G. Haviland, Esq.; £5 each, from W. Slater, Esq., the Rev. G. L. Greame, Admiral J. N. Strange, and Miss M. J. Willis; £3 3s. from Com. C. P. Boger, R.N.; and £3 from Capt. F. Durrant, R.N. There had been 252 applicants relieved, by the distribution among them of the sum of £1,656; 31 members of the society had died, and 24 new members had been enrolled. The committee concluded its report by earnestly hoping that many new members might join the society during the present year, and thereby enable a wider distribution of relief, which was urgently needed. The court then proceeded to consider memorials, and awarded grants to 58 applicants, amounting to the sum of £383. A vote of thanks to the gallant chairman terminated the proceedings.

Vice-Admiral Sir W. M. Dowell, K.C.B., commanding the Channel Fleet, rehoisted his flag on Wednesday, on board the Minotaur, on returning from leave. The flagship will, with the other ships composing the squadron, rendezvous at Portland, previous to proceeding on an evolutionary cruise. The Channel Fleet will probably leave England early in February, after being reinforced by the Warrior. At Gibraltar the Sultan will also join, which will make a total of six ships, a good number for evolutionary purposes. The cruise will extend to St. Vincent, Cape de Verdes, calling at Madeira and Teneriffe, probably *en route.* Unless any political disturbance occurs to recall them, it may be expected the cruise will extend over several months.

Gen. Stone, many years Chief of the Staff of the Egyptian Army, has resigned. He leaves Egypt for his home in America.

ARMY NOTES.

The health of Mr. Childers has been much benefited by his residence at Pisa, where he has passed between three and four weeks. Mr. and Mrs. Childers will shortly return to England, but on their way homeward will remain a week at Florence.

Instructions have been issued by the Under-Secretary of State for War regarding loss of life certificates, &c., by pensioners or other persons entitled to payment of pensions. When such a person loses his certificate of identity or form of life certificate, he will be required to prove such loss by solemn declaration before a justice of the peace, or other officer by law authorised to administer an oath.

The Cairo correspondent of the *Times* telegraphs on the 16th inst.:—"Sir E. Wood has been to-day named Sirdar, or Commander-in-Chief, and Pasha Ferik. He has now about 1,000 men enrolled."

We are requested to state that preliminary examinations for admission to the Royal Military College at Sandhurst will be held in London, Edinburgh, and Dublin, on the 7th and 8th prox., and on March 14 and 15. Gentlemen who propose to be candidates for cadetships in the Royal Military College will be permitted to present themselves for the preliminary examination on either, but not on both of these occasions. No candidate will be allowed to attend the "further," unless he has passed the preliminary examination. Gentlemen who wish to attend the examination in February or March must apply, in own handwriting, direct to the Secretary of the Civil Service Commission.

The Durban correspondent of the *Standard*, telegraphing on the 17th inst., says:—"Cetewayo arrived in the Zululand of the future on the 13th of this month, and was at once waited upon by Somhola, one of his former chiefs, who was deposed under the settlement made by Sir Garnet Wolseley. Somhola had with him a considerable following for so small a chief, consisting of about 300 men and women. They greeted the King most enthusiastically. After taking leave of Cetewayo, Somhola's people cheered the soldiers for bringing back their King."

On the withdrawal of two battalions of infantry from Egypt, Lieut.-Gen. Sir A. Alison's command will consist as follows:—Cavalry, 7th Dragoon Guards and 19th Hussars. Artillery, G Baty. B Brig.; I and N Baties., 2nd Brig.; C Baty. 3rd Brig.; and Nos. 5 and 6 Batteries, Scottish Division. Engineers, 17th, 21st, and 26th Companies. Commissariat and Transport, 8th, 11th, and 12th Companies. Ordnance Store Corps, C Company. 38th Foot, 42nd Foot, 46th Foot, 49th Foot, 50th Foot (half-batn.), 3rd Batn. 60th Foot, 71st Foot, 75th Foot, and 79th Foot.

We (*Irish Times*) have the best possible grounds for stating that the announcement which has appeared in *Truth* to the effect that H.R.H. the Duke of Connaught will receive promotion in October next to the rank of Lieutenant-General, and succeed Gen. H.S.H. Prince Edward of Saxe-Weimar in command of the Portsmouth district, has absolutely no foundation. His Royal Highness's name never has been mentioned officially in connection with this appointment, which is invariably held by an officer of high position in the list of Lieutenant-Generals.

Tuesday being the anniversary of the battle of Corunna, the usual custom of decking the colours with laurel was observed by those battalions of the Grenadier Guards which took part in the engagement. The subaltern doing duty with the detachment of the 2nd Battalion Grenadiers, which mounted the Queen's guard in London in the morning, carried the laurel-decked colours from Chelsea Barracks to the guard-room at St. James's Palace, and the band of the regiment played a selection of music in the courtyard of the Palace during the ceremony of changing the guard.

The *Standard* says:—"A correspondence has been passing between the Home authorities and the Cape Government relative to a sum of £11,919 17s. 1d., which it is pointed out is still standing against the Cape Colony in the War-Office books, on account of the Expedition to Griqualand West, the Province of Griqualand West having been exonerated from all liability in respect of the grant in aid on condition of annexation, the Cape Government assuming all responsibility on its behalf."

"Minor Tactics" writes:—"It surely is somewhat unfair that the captains' examination-paper in tactics, in the examination in subjects *c* and *d*, should be more difficult than an average Staff-College paper on the same subject. The paper set in the examination just over was one that it would be almost impossible to answer in the three hours allowed for the purpose, for an officer might have had the text-books off by heart, and yet have found it difficult to complete his answers within the allotted time. It is one thing being well up in a subject, it is another being able to finish a four hours' paper in three."

The Government of India have sanctioned a substantial increase to the pay and allowances of ridingmasters of Cavalry and Artillery, and to quartermasters of Cavalry and Infantry in that country. The grant is to have effect from Oct. 1. Why this date should have been fixed is not apparent, as these officers ought in common justice to receive the boon with retrospective effect from July 1, 1881, as in the case of the majors and lieutenant-colonels, and we trust that the Government of India will take steps to extend the benefit of the present grant to the date of the Royal Warrant, as there are any number of precedents for such a course:—

New Rates of Pay and Allowances.

À propos of the recent remarks of the *Bombay Gazette*, a correspondent sends us a copy of a register of temperature kept during his stay at that station, which fully bears out our statistics:—"Crater, Aden, 1881, 3 p.m., May 27, 103 deg.; June, 91.06; July, 91.13; August, 92.45; September, 91.96; October, 86.77; November, 82.26."

In his report, recently issued, the American Secretary at War states the expenditure of the Department for the fiscal year to have been $45,349,319, while the estimated expenses for the present fiscal year will amount to about $6,500,000 less than this sum. The report says that the General of the Army urges strongly that the limit of the enlisted strength of the Army be fixed at 30,000, instead of 25,000 men, and the Secretary concurs in this recommendation. The proportion of deserters during the year was alarming, the numbers being 3,721, which is more than half the number of enlistments. The Secretary is very emphatic in demanding some remedy for this serious state of things, as it is not only very expensive, but very hurtful to the *morale* of the army. The General believes that a partial remedy may be found by increasing the pay to what it was immediately after the Civil War.

The *Irish Times* says:—"Although the Duke of Connaught is still looking forward to visiting India, he will not leave England until after the next drill season at Aldershot. His Royal Highness, as at present arranged, will resume his brigade command at that station in April, and will, it is expected, continue to do duty at the Camp until his departure for India, which may now be regarded as decided upon."

Some time ago, a Committee, presided over by Major-Gen. Macdonald, was formed, having for its object the collection of the old colours of Scottish regiments, so as to have them placed and preserved in St. Giles's Cathedral, Edinburgh. Such movement having received the gracious approval of the Queen and of the Duke of Cambridge, the Committee are about to issue a statement, in which they say that, up to the present, they have been enabled to ascertain that there are in the hands of private persons, chiefly in Scotland, 11 stands; in churches in Scotland, five stands; in possession of the Royal Family, three stands; in Government buildings, at home and abroad, three stands; in charge of civic authorities in Scotland, three stands; at the depôts of the respective regiments, three stands; in churches in England, two stands; lost, two stands, of which one was carried at Waterloo, the other in the Peninsula; in a church in Ireland, one stand; buried, one stand; burned accidentally, one stand; burned intentionally, one stand. In more than one case it has been ascertained that old colours have been carried about by regiments for years, simply for want of a recognised and appropriate place in which they might safely be deposited. A circular letter, prepared by the Committee, points out that if this scheme were carried into effect, the old colours would have an abiding-place in the heart of the capital, just as in the case of England, Ireland, and on the Continent. Up to the present, the Committee have been promised several stands of old colours.

The new German *Army List* shows that, besides the Emperor and Empress, the Prussian Army numbers among its officers nine Princes and two Princesses of Prussia. They include the Crown Prince and Crown Princess, the Prince and Princess Frederick Charles (the Red Prince), and other Hohenzollern Princes.

The *British Medical Journal* says:—"It is understood that the increase in the Army Hospital Corps, which has just been resolved on by the War Office, is one result of the evidence which has been laid before Lord Morley's Committee at the War Office on the Hospital Service of the Army, respecting the limited number of the hospital attendants relative to the demands for their services in home and foreign hospitals, as well as in transports conveying military invalids. This deficiency was one of the points chiefly insisted on in the report which we published from Mr. Ernest Hart on the alleged defects in the working of the Army Medical Department in the Egyptian Campaign. The fact of returning to the system of recruiting the corps from the ranks of regiments, instead of continuing the plan of direct enlistment, we understand to foreshadow changes in the training depôt at Aldershot, so far as the teaching of military drill there is concerned. The circular issued from the War Office calls for volunteers from regiments for this service. Volunteers must not have served less than one year in the ranks, or more than three years. Non-commissioned officers up to the rank of serjeant, who may volunteer for service in the Hospital Corps, will be allowed to retain their rank, instead of commencing as privates, as formerly was the rule."

Obituary.

Mr. J. G. Barnes, Retired Paymaster R.N., died at Weymouth on Jan. 15. He entered the Navy about the year 1840, and was promoted to assist.-pymr. in March, 1847, pymr. Aug. 1854, and retired in April, 1876. He served as senior clerk in the office of the Commander-in-Chief of the Baltic Fleet, on board the Duke of Wellington, in 1854, and was in the Impérieuse in 1855. He was for several years in the West Indies, serving on board the Archer, Gladiator, and Pylades, on that station. His last employment was on board the Achilles, Coastguard ship. Long service in the West Indies having permanently destroyed his health, he was compelled to retire in 1876, and has been a constant invalid ever since.

More ships are indeed wanted than we possess in the Navy. Last Saturday, the *Evening News* said:—"It must have been with a strange feeling that our readers saw in yesterday's paper a telegram to the effect that a vessel of the United States Navy has had to be called in to keep order in the British Colony of British Columbia. We have not ships enough in the Pacific, we suppose, to do the duty required of us, and so we are forced to be indebted to the Yankees! This is the outcome of Lord Northbrook's boasted administration of the British Navy.

'For public censure you are far from caring,
But this 'last straw,' my lord, is e'en past Baring.'"

The Army.

4th Dragoon Guards. We are glad to receive the following letter, which fully bears out our previous statements as to the feeling existing among the senior officers:—"Sir,—In consequence of misrepresentations and remarks that have appeared in various papers with regard to the command of the 4th Dragoon Guards during the campaign in Egypt, and also to there being two parties in the regiment, I think it but fair to my commanding officer and the regiment that the following facts should be made known:—Lieut.-Col. Shaw-Hellier commanded the regiment up to Sept. 6, including the actions of Aug. 25 and 28, and had all the anxiety and trouble of pulling the regiment together after our hurried disembarkation and move to the front. Lieut.-Col. Pope rejoined on the 8th, and had command to Sept. 12. I then had the luck to take up the command on the morning of Tel-el-Kebir and the march to Cairo, and retained it till the arrival of the regiment in England. As regards party feeling, perfect amity always has existed between my brother-officers and myself, from commanding officer downwards, and, I am happy to say, still exists. In justice to all concerned, I beg to request that you will make this public.—I am, &c., G. R. A. Denne, Major and Brevet Lieut.-Col., 4th Dragoon Guards. Shorncliffe, Jan. 17."

6th Dragoon Guards (Carabiniers). Capt. Porter is *en route* from India in H.M.S. Jumna.

6th Dragoons. Col. Gore completes five years' service in command of the regiment on Tuesday next, when he will be placed on half-pay.

13th Hussars. Lieut. Noble is *en route* from India in H.M.S. Jumna.

ROYAL ARTILLERY.

A correspondent writes from Aden:—"The Royal Artillery on this benighted rock are grateful for your calling attention to the hardship of keeping artillery sixteen years instead of ten in India. Their case is specially hard, as last March they left Bombay for England with the full expectation of being kept the usual one year on their way at Aden. Now, all is dark and doubtful. Their one hope is, that when the Artillery leave Egypt, two batteries may be sent on to relieve them."

The Committee of the St. John Ambulance Association has sustained a severe loss by the departure for Egypt of its deputy-chairman, Lieut.-Col. F. Duncan, who has been appointed to the command of the Artillery of Sir Evelyn Wood's Army. Since the establishment of the St. John Ambulance Association by the Order of St. John, five years since, Col. Duncan has devoted nearly all the time he could spare from his professional and public duties to the development of the movement, much of the success of which must be attributed to his eloquent advocacy and unsparing energy in attending meetings at the centres in all parts of the kingdom, even in remote localities such as the Shetland Isles. Col. Duncan's services were not only entirely honorary, but his labour of love was carried on at great personal expense to an extent of which few persons have any idea; and the vacancy caused by his resignation will be difficult to fill in more senses than one.

Brevet Lieut.-Col. J. F. Maurice, who lately returned from special duty with the Army in Egypt, has been attached to the Intelligence Branch of the Quartermaster-General's Department at the War Office.

Col. E. F. Chapman, C.B., A.D.C. (late Bengal), Military Secretary to the Commander-in-Chief in India, is about to return to England on leave of absence, probably for four months.

Col. W. E. M. Reilly, C.B., R.A., is to take up his duties as Director of Artillery and Stores at the War Office on the 1st prox., vice Lieut.-Gen. Sir Frederick Campbell, K.C.B. Col. Reilly will retain his appointment as A.D.C. to the Duke of Cambridge whilst employed at the War Office. His transfer to head-quarters leaves the command of the Artillery at Aldershot vacant. The new Director was for some years Assistant-Director of Artillery and Stores, under Sir F. Campbell.

See also 1st or Royal Scots.

ROYAL ENGINEERS.

The will (dated Sept. 7, 1880) of Capt. W. J. Gill, late of Edinburgh Mansions, Victoria Street, Westminster, who was killed on Aug. 10 last by the Arabs at Wady Sudr, between El Arish and Nahkl, in Egypt, was proved on the 6th ult. by G. H. Sawtell, one of the executors, the value of the personal estate amounting to upwards of £160,000. The testator leaves to his mother an annuity of £600; to his sister, Frances Eliza Minchin Gill, £10,000, and an annuity of £1,000; upon the trusts of the marriage settlement of his sister, Mrs. Lucy Annie Ram, £10,000; to his faithful friend and servant, Joshua Sumerall, £1,500; to his servant, Mrs. King, £200; and the residue of his property to his brother, Robert Thomas Gill.

Grenadier Guards. Lieut. the Hon. G. F. H. Somerset, A.D.C. to the Governor of Bombay, is on passage home from India in H.M.S. Jumna.

Scots Guards. The *Morning Post* says:—"The 2nd Batn., Scots Guards, at present stationed at Wellington Barracks, is the next battalion of Guards set down for service in Ireland. The battalion, which will probably soon relieve the 3rd Batn. Grenadier Guards in Dublin, will be stationed at Richmond Barracks."

1st, or Royal Scots. The hired transport Bolivar, of the West Indies and Pacific Line, with several detachments of troops on board, was wrecked on the Cobblers reef, to the north-east of Barbadoes, on the 12th ult. The Bolivar, with nine officers, two officers' wives, and six children, 12 serjeants, 220 rank and file, 11 women, and eight soldiers' children, belonging to the Royal Artillery, Royal Scots, and one or two other corps and Departments, embarked at Portsmouth and Queenstown, sailed from the latter place on Nov. 26, and reached Madeira safely on Dec. 1. After coaling at the latter place, the vessel sailed for Barbadoes, all going well until the 12th ult., when land was sighted, with the Ragged Point Lighthouse visible right ahead, about 6.45 p.m. The course of the vessel was altered so as to bring the light on the starboard bow; the vessel was abreast of the lighthouse about 8 p.m., when about 8.45 she struck heavily on the Cobblers, and continued for some time to drive on, grinding upon the coral reef. By order of the officer commanding the troops, Lieut.-Col. H. W. Wardell, R.A., the troops at once fell in and took their stations on the quarter-deck, with sentries on the boats. At 7 a.m. the lifeboat, with the women and children, left the ship and reached the land, but was unfortunately stove in by the surf and capsized, the native fishermen rendering valuable assistance in saving life and averting any casualty. By 11 a.m. all the troops were safely landed at Long Bay, where every available assistance was rendered to them, and such refreshments as could be procured on short notice provided by the manager at Long Bay Castle and other gentlemen in the neighbourhood. A telegram was at once despatched by Col. Wardell to the Assistant-Adjutant and Quartermaster-General, by whom the necessary arrangements were made for transporting the party by special train. After a couple of hours' rest, the detachment were marched to the station at Bushey Park, about three miles distant, the women and children being conveyed in waggons furnished by the neighbouring estates. A special train conveyed them to Bridgetown, from whence the men were marched to the garrison. Owing to the difficulty of disembarking from the ship and landing in the surf, through which many of the officers and men had to swim for some distance, it was found impossible to land the arms and accoutrements; but these, together with most of the stores, have been recovered. We understand that Col. Wardell speaks in the highest terms of the valuable assistance rendered by the officers, and the admirable behaviour of the men under his command. The following letter from his Excellency the Governor has recently been published in the *Gazette*:—"With reference to the letter from the Assistant Military Secretary, his Excellency the Governor desires to express his thanks to all those who rendered any assistance to the troops and other persons who were wrecked in the hired transport Bolivar on the east coast of the island, on the night of the 12th inst.—By his Excellency's command, C. C. Knollys, Acting Colonial Secretary. Colonial Secretary's Office, Dec. 19, 1882."

2nd Queen's Royal West Surrey Regiment. Lieut. Elias, 2nd Batn., is *en route* from India in H.M.S. Jumna.

3rd East Kent Regiment (the Buffs). Major Harrison, 2nd Batn., has been appointed A.D.C. to Major-Gen. Sargent, C.B., commanding the troops at Hong Kong.

4th King's Own Royal Lancaster. Lieut.-Col. Twentyman is *en route* from India in H.M.S. Jumna, to assume command of the 1st Batn. at Preston, on promotion.

5th Northumberland Fusiliers. Brevet Major Kilgour, 1st Batn., is about to be appointed adjutant of the 3rd Batn. (Northumberland Militia), vice Major Vincent. Lieut. Carter, 2nd Batn., is on passage home from India in H.M.S. Jumna.

11th Devonshire Regiment. The remains of Lieut. A. E. Peters, who succumbed to fever contracted during the Egyptian campaign, were interred at Exeter on Saturday, with military honours. The deceased, who was 28 years of age, was the son of Mr. W. H. Peters, of Harefield, near Lympstone, volunteered for service in Egypt. Whilst there, he was stricken down with fever, and returned invalided to England. He was sojourning at Brighton when he died, and his body was removed to Exeter for burial. The funeral *cortége* left the barracks at 2 o'clock. The corpse was borne upon a gun-carriage of the Royal Horse Artillery, and the band of the 4th Batn. Devonshire Regt. was in attendance. Mr. W. H. Peters and his two daughers, with Col. Lennox, followed the remains, and the ceremony was also witnessed by Major Ballantine, Lieut. Curry, Lieut. Ellacombe (brother officers of the deceased), and some officers of the local Volunteer corps. Half a battery of the Lympstone Volunteer Artillery also attended.

18th Royal Irish Regiment. Lieut. Crawford, 1st Batn., is on passage home from India in H.M.S. Jumna. The 2nd Batn. is under orders to proceed from Egypt to Malta.

21st Royal North British Fusiliers. Col. Templeman completes five years in command of the 1st Batn. on Tuesday next, and will shortly be gazetted to half-pay.

22nd Cheshire Regiment. Lieut. Butcher, 2nd Batn., is on passage home from India in H.M.S. Jumna.

23rd Royal Welsh Fusiliers. Capt. Evans and Lieut. Walker, 1st Batn., are on passage home from India in H.M.S. Jumna.

35th Royal Sussex Regiment. Capt. and Adjt. Sapte has been appointed A.D.C. to Major-Gen. Sir R. Biddulph, K.C.M.G., C.B., Governor and Commander-in-Chief of Cyprus.

39th Dorsetshire Regiment. Major Wynen completes five years' service as a D.A.A.G. on the Staff in India on the 23rd inst.

40th South Lancashire Regiment. Col. Shipley attained the age of 55 on Thursday, and will have to retire from that date under the terms of the Royal Warrant.

43rd Oxfordshire Light Infantry. Lieut. Porter is on passage home from India in H.M.S. Jumna.

ROYAL MARINES.

The following detachment of Royal Marines will be held in readiness to embark in the Sapphire for service on the East India and China stations:—One colour-serjeant, one serjeant, two corporals, one drummer, 27 privates (five as ward-room officers' servants), R.M.L.I.; and one corporal or bombardier and five gunners, R.M.A.

An exchange of ships has been approved between Major F. V. G. Bird, R.M.L.I., of the Valiant, and Capt. W. P. Rumley, of the Repulse.

An Order in Council, dated Nov. 30, 1882, has been promulgated, making provision for those officers of the Royal Marine Artillery and Royal Marine Light Infantry who may be incapacitated by illness, or wounds, or hurts received in the service, before attaining the age for voluntary retirement. It provides that an officer who becomes temporarily unfit for service, in consequence of wounds or injuries received while on duty, or ill-health, certified by the Medical Director-General to have been contracted in the service, be granted half-pay until he recovers and is fit for re-employment, provided the term on half-pay does not extend beyond the date to which he would be otherwise subject to retirement; but except in the case of wounds or injuries received on duty, the officer must be of three years' seniority in the corps. After remaining not less than one year on half-pay, and reported still unfit for further service, he may be placed upon retired pay, provided he has been upon full pay for a period of five years, if the disability has been produced by the service, or twelve years in other cases. An officer who entered the service before April 1, 1870, shall be allowed a rate of retired pay not less than that which would have been granted to him under the Orders in Council of Feb. 22, 1870, and Feb. 5, 1872; and an officer who entered after April, 1, 1870, but before July 1, 1881, may, at the discretion of the Admiralty, be granted a retired allowance under the conditions contained in Pars. 12 and 13 of the Order in Council of Jan. 15, 1878. The new scale of retired pay, under the circumstances quoted, applies to officers under 24 years' service permanently incapacitated for further employment, after having been over one year on half-pay; if incapacitated in and by the service, after five years on full pay; and if incapacitated only in the service, after 12 years' service on full pay:—

Scale.

Service. Years.	Lieut.-Col.	Major.	Capt., having by Brevet. higher rank	Capt.	Lieut.

* If with seven years as Major. † Or, if Artillery, half-pay.

50th Royal West Kent Regiment. Col. Barnes has resigned command of the 50th Regimental District in consequence of ill-health, and is succeeded by Col. Chads, half-pay, late of a Reserve Depôt in Egypt.

51st King's Light Infantry, South Yorkshire Regiment. Capt. Smyth is on passage home from India in H.M.S. Jumna.

53rd, the King's Shropshire Light Infantry. The regiment is under orders to proceed from Egypt to Malta.

56th West Essex Regiment. The death is announced of Mr. T. D. Sullivan, late lieutenant, which occurred at the Royal United Service Institute on Tuesday. Mr. Sullivan joined the service Dec. 7, 1858; became lieut., Sept. 1, 1860; and retired in 1867.

57th Middlesex Regiment. Major Collins, Equerry to H.R.H. Princess Louise, arrived at Osborne on Friday last, and had the honour of dining with her Majesty.

60th King's Royal Rifle Corps. The regiment should have been included in our list of the regiments approved by the Queen to add the words "Egypt, 1882," and "Tel-el-Kebir" to their honours.

62nd Wiltshire Regiment. Col. Chads, half-pay, who lately commanded the regiment, has been appointed to the command of the 50th Regimental District, Maidstone. The officers have offered to pay the expense of fixing a clock in the tower of Salisbury Cathedral in memory of their comrades who recently fell in Afghanistan, and the Dean and Chapter have accepted the offer.

65th York and Lancaster Regiment. Lieut.-Col. Fife Cookson, late of the regiment, the Conservative candidate for Sunderland, has announced his intention to withdraw his candidature.

68th Durham Light Infantry. Lieut. Kenyon-Slaney is *en route* from India in H.M.S. Jumna.

69th, the Welsh Regiment. We (*Irish Times*) understand that the difficulties which had arisen to prevent Lieut.-Col. Tulloch, C.B., Welsh Regt., from obtaining the Victoria Cross for his gallant services during the siege of Alexandria are likely to prove insurmountable, and that Col. Tulloch's name will have to be added to the long list of those who have fairly earned the "Cross for Valour," but have not got it.

70th East Surrey Regiment. Lieut. Bloxsome is on passage home from India in H.M.S. Jumna.

71st Highland Light Infantry. Gen. Dalrymple, hon. colonel of the regiment, writes:—"Will you do me the favour to correct a statement which appeared in the last number of the *Army and Navy Gazette*, to the effect that the colours of the 71st Highland Light Infantry, lost at Buenos Ayres, in 1806, had been restored to the regiment by a Spanish gentleman there? The colour in question is a banner for the pipe-major's bagpipes, and not a regimental colour, to which it has no resemblance. I may add that the regiment was not defeated at Buenos Ayres, but being a single battalion, without any prospect of being relieved, they surrendered, and with all the honours of war."

74th Highland Light Infantry. The body of the late Major Colville, killed at Tel-el-Kebir, which had been brought from Egypt, was buried with full military honours on Friday, in the churchyard of the village of Seale, near Aldershot. The 84th, a regiment in which the deceased was well known, and which served with him in Egypt, furnished the firing party.

75th Gordon Highlanders. Lieut. A. G. Pirie died at the Royal Naval Hospital, Malta, on the 5th inst., in his 27th year, from the effects of wounds received at Tel-el-Kebir on Sept. 13. The deceased, who served throughout the operations in Egypt, joined the Army, Feb. 16, 1878, and became lieut., July 21, 1880.

76th West Riding Regiment. "Justice" writes :—"In your last edition, you remark, with regard to the promotion of the two senior captains of the 46th, one to a majority in the 76th, that you are glad there exists a disposition at head-quarters to make up to the 46th Regt. for past disappointments; it does not, however, seem to strike you that in doing away with disappointments in one regiment, the authorities are causing similar ones in the other. This is the second majority within the last month which has been given in the West Riding Regt. to outsiders, and in these days of compulsory retirement the block of promotion to the lower ranks is very hard. No one is more pleased than I am to see rewards liberally given to officers who had the luck to serve in Egypt, as in most cases have been done; but at the same time I have not the slightest hesitation in stating that every officer, and I think every man, in the 76th Regt., would have been delighted to have had the chance of taking part in the late campaign, and would have done their work well had they been there."

78th Seaforth Highlanders. Capt. G. S. C. Justice died on the 30th ult. on board the P. and O. Company's steamer Deccan in the Red Sea, whilst on passage home from India. The deceased joined the Army, Aug. 8, 1865; became lieut., July 13, 1867; and capt., July 24, 1873.

83rd Royal Irish Rifles. Capt. Cooke-Collis, Deputy-Assist.-Adjt. and Qrmr.-Gen. at Cyprus, has been ordered to rejoin his depot at Belfast, his appointment at Cyprus having been abolished.

87th Royal Irish Fusiliers. The depôt at Colchester rejoined head-quarters at Aldershot yesterday, after being absent for five months, attached to the Provisional Batn. under command of Col. Watson.

88th Connaught Rangers. It is in contemplation to erect in the military church at Aldershot a brass tablet in commemoration of the officers, non-commissioned officers, and men of the regiment who died either in action, through wounds or sickness, during the service of both battalions in South Africa.

89th Royal Irish Fusiliers. Lieut. Harrison is on passage home from India in H.M.S. Jumna.

90th Scottish Rifles. Lieut. and Adjt. Lysons, V.C., is on passage home from India in H.M.S. Jumna.

100th Leinster Regiment. Col. Barrett is *en route* from India in H.M.S. Jumna, on retirement upon half-pay.

102nd Royal Dublin Fusiliers. Major Corballis, Lieuts. Rowe and Grant, and a draft of 200 men, left England on Tuesday for Ceylon, in the P. and O. steamer Khedive, to join head-quarters.

103rd Royal Dublin Fusiliers. The order for the removal of the regiment from Aldershot to Gibraltar has been finally cancelled.

104th Royal Munster Fusiliers. The regiment is to be brought home from Malta.

106th Durham Light Infantry. The left half-battalion at Malta is to be removed to Gibraltar, to rejoin head-quarters.

Rifle Brigade. Lieut.-Col. Lascelles completes his period of Staff service as D.A.A.G. at the Horse Guards on the 31st inst.

Medical Department. The *Standard* says:—"The report of Lord Morley's Committee, now sitting at the War Office, to inquire into the working of the Army Medical and Transport Organisation, is to be printed and submitted to Parliament. The Committee will shortly bring its labours to a close."

The Auxiliary Forces.

YEOMANRY CAVALRY.

Royal North Devon Hussars. The officers and some ex-officers of the regiment dined together at the Golden Lion Hotel, Barnstaple, on the 12th inst., under the chairmanship of Lord Clinton, and an opportunity was taken of presenting Col. Sir Arthur Chichester with two very handsome and costly silver punch-bowls on his approaching marriage with Lady Chichester, the widow of Sir Bruce Chichester. The Hon. Mark Rolle and most of the officers of the regiment were present. Lord Clinton made the presentation in a few words. Many were the expressions for Sir Arthur's future happiness, and his health was drunk with much warmth. The band of the regiment performed some music at intervals. The ordinary toasts were disposed of.

VOLUNTEERS.

5th (West) Middlesex Rifles. Col. Kent, commanding the Hounslow Regimental District, presented the prizes to the regiment on Saturday evening, at the Eyre Arms Assembly Rooms, St. John's Wood. Lieut.-Col. Mears, the commanding officer, in his opening address, said the corps had sixty more efficients than last year, and was still increasing. In responding to a vote of thanks, Col. Kent expressed himself as perfectly satisfied with the progress made. A new drill hall for the regiment is now approaching completion.

18th Middlesex (Paddington Rifles). Lieut.-Col. Barrow writes:—"Your remarks on the patriotism of the commanding officer of a Metropolitan regiment of Volunteers building, at his own cost, a new head-quarters, gave all pleasure to read; but in justice to the commanding officer of my regiment, Col. Gordon Ives, it seems to me it should be known that, ten years since, he built at his own expense what is probably the best private drill-place in London, and afterwards bought our head-quarters, Greville House, at a cost of from £4,000 to £5,000."

19th Middlesex (Bloomsbury) Rifles. We have always considered the Bloomsbury Rifles one of the best Volunteer regiments in the Metropolis, and the large company which assembled at the new head-quarters in Chenies Street on Saturday evening, on the occasion of the annual prize distribution, may be taken as evidence of the fact that the regiment has many admirers and friends. Blessed as it is with an honorary colonel and lieutenant-colonel, who spare no trouble or expense in order to promote the interests of the regiment, with an adjutant who can boast that in fifteen years he has never taken a day's leave, and with a body of officers who, for smartness and general efficiency, are second to none in the Volunteer service, it would be hard indeed if the Bloomsburys did not prosper. They have earned a position for themselves by steady hard work, and they well merit the encomiums which are showered upon them whenever they appear in public. Col. Richards was able to give a most satisfactory account of the regiment on Saturday evening. Last year they returned 986 efficients out of a total enrolled strength of 1,003. Col. Lord William Seymour, in the absence of Major-Gen. Higginson, presented the prizes, and at the close of the ceremony Colour-Serjt. Hall, on behalf of the non-commissioned officers and men, presented Lieut.-Col. Richards with an illuminated address and a silver-mounted sword and spurs, in recognition of his services, extending over a period of twenty years. Certainly, no testimonial was ever more thoroughly deserved, Col. Richards' liberality being unbounded, and his exertions on behalf of the regiment unceasing. Before the ceremony the officers entertained a large number of friends at dinner in their mess room, in which supper was laid afterwards.

24th Middlesex (Post Office) Rifles. The annual distribution of prizes took place on Monday in the Guildhall. The Lord Mayor and Lady Mayoress, with the Sheriffs, who arrived in semi-state from the Mansion House, accompanied by the Duke of Teck, Major-Gen. Elkington, Col. the Hon. Paul Methuen, Col. Clive, Grenadier Guards, were received at the Guildhall with a general salute from a guard of honour composed of Army Postal Corps, under the command of Major Sturgeon. Lieut.-Col. Du Plat Taylor made a statement with regard to the corps. After a few words of welcome to the Duke of Teck and regret at the absence, through illness, of Major-Gen. Higginson and the Postmaster-General, he went on to say that the corps kept up their strength, and that he was perfectly satisfied with their conduct, discipline, and general behaviour. After referring to the complimentary despatches on the Army Postal Corps by Lord Wolseley, the Colonel announced that he had that evening received permission from the Secretary of State for War to organise two companies of Field Telegraphists. Speaking of the Easter Review, he gave it as his opinion that the only proper place for it was Aldershot, where much more was to be learned than at any seaside outing. The Duke of Teck afterwards presented the prizes, and at the conclusion of the ceremony, at the call of the Lord Mayor, a hearty vote of thanks was passed, with three cheers for his Serene Highness. In responding, the Duke testified to the admirable way in which the Army Postal Corps did their work in Egypt. In the course of the evening, the Duke of Teck presented the Egyptian war medals to Major Sturgeon, Capt. Viall, and the non-commissioned officers and men who served in Egypt with the Postal Corps. Prior to the ceremony, the Lord Mayor and the Lady Mayoress gave a dinner-party at the Mansion House. The company included H.S.H. the Duke of Teck, Major-Gen. Elkington, C.B., and Mrs. Elkington, Col. Clive, Col. the Hon. Paul Methuen, C.B., Col. Walker, C.B., Col. Elles, C.B., Count Cassini, Lieut.-Col. and Mrs. Du Plat Taylor, Mr. Algernon Turnor, Mr. Alderman and Sheriff and Mrs. De Keyser, Mr. Sheriff and Mrs. Ronald Savory, and Major Sturgeon.

The Sub-Committee of Commanding Officers of Metropolitan Volunteer Regiments, appointed to consider the question of a site for the proposed review at Easter, met on Monday at the offices of the National Rifle Association. Some correspondence that has taken place with the authorities of Brighton, Dover, Aldershot, and other places was read, and it was resolved that the Committee should, in response to an invitation of the Mayor of Brighton, visit that town and inspect the ground that could be placed at their disposal.

The Gazette.

ARMY.

WAR OFFICE, Pall Mall, January 16, 1883.

1st North Riding of Yorkshire—Lieut.-Col. J. G. Wilson resigns his commission.

(Where not otherwise specified, the foregoing commissions and announcements bear date January 20, and the current year must be understood.)

THE EASTER MONDAY REVIEW.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—Will you use your influence, before it is too late, to induce the War-Office authorities to order the review on Easter Monday to be held at Aldershot? Time which might be of the utmost value to our Citizen Army in acquiring a knowledge of many details of their profession will be lost by going to Brighton, to the detriment of the public service and the gain of no one, except the railway company and the hotel and lodging-house keepers of that town. Those who would go to Brighton prior to the review would willingly go to Aldershot, where they would save considerable expense by sleeping under canvas, and would be learning at the same time useful lessons in discipline, and other details which every soldier ought to know, and which a Volunteer has very few opportunities of acquiring. At Brighton they can only employ the spare day in strutting up and down the King's Parade.—I am, &c.,

Captain.

Lord and Lady Wolseley have been this week the guests of Major-Gen. Feilden, C.M.G., M.P., at Witton Park, Blackburn.

The Secretary of State for War has decided that officers on full pay of regiments who accept appointments under the Egyptian Goverment shall in all cases be seconded, and shall be allowed to enter the service of the Khedive only on the understanding that they are to conform to any regulations now enforced, or which may hereafter be drawn up, as regard seconded officers.

The issue is announced of 200,000 shares of £2 each, being the unappropriated capital of the Montana Company, Limited, to acquire and work the Drum-Lummon Reef, Marysville, Montana, U.S.A., believed to be one of the greatest silver and gold mines in the world. The capital of the company is £600,000, in 300,000 shares of £2 each. Nearly 100,000 shares have already been applied for.

EGYPTIAN WAR FUND,

FOR THE

RELIEF OF THE FAMILIES OF THE KILLED, AND THE SOLDIERS, SAILORS, AND MARINES WOUNDED AND DISABLED, IN THE EGYPTIAN CAMPAIGN.

UNDER THE PATRONAGE OF HER MOST GRACIOUS MAJESTY THE QUEEN.

Subscriptions to the Fund can be forwarded to Messrs. Cox and Co., Craig's Court, Charing Cross, S.W.; or Lady Jane Taylor, 16 Eaton Place, S.W.

All properly certified claims addressed to the HON. SECRETARY, EGYPTIAN WAR FUND, New Buildings, Little Park Street, Queen Anne's Gate, S.W., will receive immediate attention.

P. M. C.

ON account of Orders recently issued regarding Mess Expenditure, Messrs. PELLATT and CO. (formerly APSLEY PELLATT and CO., of Holland Street, Blackfriars—the original firm—established in the year 1759, by the father of the late Apsley Pellatt, Esq., M P.), Falcon Glass Works and China Manufacturers, Manufacturers, by special appointment, to H.M. the Queen and the Royal Family, &c., Contractors to H.M.'s Government, the Lords of the Admiralty, the Indian Stores, &c., have decided on supplying all Regiments with their Manufactures on their wholesale-trade terms, which Prices are very much below those usually paid by Officers' Messes. This Firm have made Mess Contracting the speciality of their business for upwards of 150 years, and have, at the present time, upwards of 140 Regiments on their books, including the most prominent of H M.'s Service. For the past 18 months, Messrs. Pellatt and Co. have obtained the commands of every regiment giving their orders on arrival home from foreign service, without a single exception. On receipt of patterns from any Regiment, Messrs. Pellatt and Co. return estimates for the exact matching of goods. Several Regiments have favoured us in this way of late, many being Native Indian Regiments, and the estimates returned have always shown such a great saving, as to secure the future commands and greatest satisfaction of the Mess.—All Communications and Patterns should be sent to the Offices and Show Rooms, addressed,

PELLATT and CO., Falcon Glass and China Works, 17 St. Bride Street, Ludgate Circus, London, E.C.

Shadbolt (Historical Division) (Sampson Low and Co.).—Married Women's Property Act, 1882 (Ward, Lock, and Co.).—National Rifle Association, 1882 (Waterlow and Sons).—The Edinburgh Review, January (Longmans and Co.).—The Quarterly Review, January (J. Murray).—The Era Almanack, 1883 (*Era* Office).

NOTICES TO CORRESPONDENTS.

ESPIONAGE.—Letters received and held over:—"The Midshipmite," "Rear-Admiral," and others.

NEMO.—It should do so. But you will have some difficulty in getting Somerset House to allow it.

LOUISVILLE.—The 42nd, unquestionably.

INQUIRER.—If you wish to be understood, retain your old title. The new titles are quite beyond the comprehension of an individual of only ordinary intelligence.

The ARMY AND NAVY GAZETTE this week contains four pages extra.

The NAVAL AND MILITARY STATIONS are published by the ARMY AND NAVY GAZETTE on the first Saturday in each month.

Army & Navy Gazette.

LONDON, SATURDAY, JANUARY 20, 1883.

IT has long since become almost proverbial that Ireland is the most difficult kingdom under the sun to manage, and that its people are the most difficult to understand. The rumours of one day are nullified by those of its successor, and the reassuring aspect of the peasantry only serves to lead to false conclusions. On Thursday, Earl Spencer, who is on a visit to Lord Portarlington, received a deputation from the townspeople, and was presented with an address of welcome. In reply, the noble lord expatiated on the "improved state" of the country, on the terror struck into the hearts of the malcontents, who have at length found that they can no longer molest law-abiding people with impunity. On the day following, we find this placard, clothed in thick, black type, on lavender-coloured paper, most widely posted about Portarlington:—"Remember Francis Hynes, done to death by twelve drunken Castle hacks. Remember Patrick Walsh, the widow's son. Remember Myles Joyce, mangled and tortured in his death agony, because he dared assert his innocence on the scaffold. Remember all the victims of bribed Judges, packed jurors, salaried and perjured witnesses. Remember some rotting in British convict prisons, and others happier that they have got out of the reach of landlord spite and the revengeful cruelty of Dublin Castle. Remember the little children of the poor labouring men who gasped out their harmless lives in August of fever, denied the shelter of a roof, or the comfort of a fire, by the demon in human form, who rests in soft luxury in the Viceregal Lodge, paid by the people whom he oppresses, and over whose sufferings he gloats. Remember the massacre of Ballina, by order of the English Herod, the childish Earl, who wreaks the envy of his joyless old age on the humble homes and hearts of the Irish peasantry,—show that you remember those things, and receive Spencer according to his deserts." Whatever this placard may mean, for whatever may be the results flowing from it, there can be no doubt that it presents a painful, if not ludicrous, contrast to the hopeful phrases uttered by Lord Spencer not very many hours before. In the present state of Ireland, it is simply childish to endeavour to eradicate the evil that exists by a few softly-rounded periods or well-balanced sentences. The people are too "'cute" by nature to be deceived by them, and such a burlesque as that enacted in Portarlington a few days ago must fall to the ground without any useful effect. The publication of this placard is a direct challenge to the Executive, who will scarcely venture to decline to meet it. In all probability, some of the troops who have just returned from enduring the miseries of a campaign in Egypt during the hot season will be ordered to Ireland; and that if they be so, the movement will be carried out with promptitude and despatch.

A few days ago, at Blackburn, Lord Wolseley, who was presented by the Town Council with an address of welcome and congratulation, in reply drew a picture of the miseries which were necessarily endured during the hot season in Egypt by our soldiers; a limited means of transport; the absence of the shelter of tents, as well as of trees and constant exposure to the sun, were bad enough; but to these trying circumstances was added a great want of food, washed down by the muddy water of the Canal, which resembled pea-soup more than wholesome water. At the same time, Lord Wolseley declared that great strides had been made in raising the character of the soldier since he entered the service; also, that in the recent campaign, without flogging, there were are only three courts-martial; and that during his entire stay in Egypt, he never saw a drunken soldier. The last-mentioned fact is wondrous strange. Could the muddy water of the Canal, which, according to Lord Wolseley's own statement, was all the poor fellows had to drink, have produced much intoxication?

Major C. V. Eccles, Rifle Brigade, will accompany Lieutenant-General Sir William Jervoise, G.C.M.G., from Western Australia to New Zealand as Aide-de-Camp.

Mr. T. D. Sullivan, formerly Lieutenant 56th Regiment, the librarian and accountant of the Royal United Service Institution, died on Tuesday, the 16th instant, after an illness so brief that its duration might be counted by hours, rather than days. During his thirteen years' tenure of office, Mr. Sullivan was a zealous official, whose services were thoroughly appreciated. Many officers have acknowledged the valuable assistance he gave them when they were engaged in historical researches. The announcement of his unexpected death will be received with sincere regret by the members of the Institution, who will long remember his uniform courtesy and his devotion to his duties.

In the Royal Navy Retired Vice and Rear-Admirals rise one step in rank, on the promotion of the next junior officer on the Active List. Could not the Secretary at War see his way toward conferring a similar boon on the sister-service, accompanied, however, by an increase of retired pay? Take, for instance, the Major-Generals lately at the top of the list, Generals Best, Knox, and Wilkinson, all "shelved" on, say, a maximum for life of £700 per annum. These officers had, under the old rules, the certainty of succeeding in time to the colonelcies of regiments with £1,000 a year, but they have now been passed over by Major-Generals Radcliffe and others, who eventually will be able to retire upon Lieutenant-Generals' pensions, ranging from £750 to £850 per annum. In like manner, Lieutenant-General Jeffreys has been passed over by Lieutenant-General Sir F. Colborne, but as General Jeffreys got a regiment, he is not so great a sufferer in a pecuniary way. What we would suggest is that when a General officer on the Active List is promoted to a higher grade, the officer who originally stood above him should also be raised to the next rank, not to be styled "honorary;" and that he should receive the higher scale (according to his age) of that rank, viz., £900 to £1,000 for a full General, £750 to £850 for a Lieutenant-General, unless he has previously elected to wait for a regiment, as some of the Lieutenant-Generals have done. The present arrangement is obviously unfair, for it falls hardest on those who have the strongest claims,—those who have been unfortunate in their professional careers; whilst it benefits the lucky few who have had influence and friends to obtain for them the prizes of the service.

In former wars, our enemies could make as close estimates of the composition and numbers of our armies as we could of theirs. Owing to recent changes, they will be unable to do so any longer,—at least, as regards our Infantry. If we have no means of telling by their uniforms the regiments to which Infantry soldiers belong, or even whether they are Line or Militia, the enemy will be at the same disadvantage. Nay, more, they will be unable to count, or even to see, battalions which are numberless and colourless!

The services of Quartermaster Walsh, of the 72nd Highlanders, have been strangely overlooked at the War Office. Captain Walsh was one of the senior Quartermasters of the Army in Egypt; whilst his services during the Afghan Campaign ought to have brought him prominently to notice. He was present at Charasiab, Cabul, and Candahar, and for several months occupied the post of Provost-Marshal to the 2nd Division, and also to the force under Sir F. Roberts's command, which marched to the relief of Candahar, getting a very strong recommendation from Sir F. Roberts in despatches, his name being published, together with that of Colonel Money's, 3rd Sikhs, in a supplementary despatch. These services alone would seem to entitle him to a brevet, at least. And yet he has got nothing. He is such a meritorious soldier, and so deservedly beloved in his regiment, that the omission of his name has occasioned the greatest disappointment to all ranks of the Seaforth Highlanders.

We understand that Lieutenant C. B. Pigott, 60th Rifles, who did such good service with the Mounted Infantry during the operations in Egypt, has been offered by Sir Evelyn Wood an appointment in the Mounted Infantry of the new Egyptian Army.

It is satisfactory to find that the War Office has at length considered it worth their while to offer prizes to regiments for proficiency in signalling. Good signalling is just as important in the present day as gooding shooting; in fact, it might almost be considered more so, inasmuch as it belongs to or affects strategy rather than tactics, and is closely allied to telegraphy. An important piece of information obtained through its means might on occasion decide the fate of an impending battle, save an outpost from imminent danger, or by giving timely notice, afford succour to a convoy threatened by the enemy. In cases during the Afghan War signalling was shown to be of the greatest assistance in conveying intelligence between detached parties and their head-quarters, in places where the telegraph could not be laid down, and the despatch of single messengers was always attended with danger, on account of the treacherousness of the inhabitants.

So far as we can learn, there seems no probability of the War Office asking Parliament, for the present, to provide the money necessary to enable it to purchase Strensall Common, of which it was lately proposed to acquire possession, for the purpose of establishing a tactical station in the North of England. The common in question lies about six or seven miles north of the City of York, on the north-eastern line to Scarborough, and consists of 1,080 acres, through which runs the River Foss, a tributary of the Yorkshire Ouse, which it joins at the metropolitan city. The object of the purchase, as defined in the Bill lately before Parliament, is obtaining "an area for a military training-ground and store depôt in the North of England, including the erection of stores, magazines, buildings, rifle-butts, and works, the pitching of a camp, and the exercise of troops." The Bill was necessary, in order to ascertain and transfer to the Crown any common right, but provision was taken in it to enable the Secretary of State not only to drain and fence the common, but to erect such buildings and works as he might direct. The story of this proposed acquisition was as follows:—Some ten or twelve years ago, a feeling prevailed that it was not well to have "all our eggs in one basket," either at Woolwich or Aldershot; and it was pointed out that for an entrenched camp on which all the strength of England might rally in case of invasion, there was no better site than Cannock Chase. But although Cannock Chase is a waste, it has not only water and railways running through it, but soil rich in minerals, and the cost of its purchase would have been great. The Government of the day hesitated, although it was pointed out that the iron and coal under the property would save the country very large sums annually. However, the time at which the purchase could have been made on reasonable terms went by, and Cannock Chase, it was argued, would be of little avail, in case of a descent upon the north-east coast. Accordingly, the War Office cast about for another place, and Strensall was fixed upon as eminently eligible; first, as covering York and the bulk of the central manufacturing districts of England; and secondly, because it commands almost as much railway communication with the coast as the junction at York itself. There is a further reason for acquiring and utilising this site. Aldershot, however good it may be for the South of England, is too far away for the use of the troops, whether Regulars, Militia, or Volunteers, in the Northern half of the island. Accordingly, Strensall was to become a North-of-the-Trent Aldershot.

According to the *Army List*, the Island of Guernsey experiences difficulty in obtaining Captains for its Militia force. The Artillery Regiment has apparently not two Captains out of a complement of six, the 1st (East) Regiment three out of six, the 2nd (North) Regiment four out of six, while the 3rd (South) has not two out of six. Why is this, we wonder? The difficulty does not seem to exist in Jersey.

The appointments lately gazetted promise to block the list of Queen's Aides-de-Camp for some years to come. The officers upon whom the honour is conferred for service in Egypt are all supernumerary, and will be absorbed as vacancies occur. There would seem, however, to be no chance of any vacancies occurring for some considerable time. Colonel E. Chippindall, C.B., is the senior Colonel in the Army holding the appointment of Aide-de-Camp. When he is promoted, Colonel A. H. King, R.A., will be placed on the paid establishment, being succeeded on the list of Unpaid Aides-de-Camp by Colonel G. B. Wolseley. It is probable that no further opening will occur until Colonel Sir T. D. Baker, K.C.B., becomes a Major-General. Colonel Sir Thomas Baker is some way down the list of Colonels, and it is scarcely ikely that he will get his step for a year or so, at the learliest; meanwhile, there will be a complete block.

Sir John Forsyth, C.B., K.C.S.I., late Principal Inspector-General of her Majesty's Indian Medical Department (Bengal), and Honorary Physician to the Queen, died on Sunday, at Brighton, in the 84th year of his age. The deceased was nominated a C.B. (Civil Division) in 1862, and a K.C.S.I. in 1881. By his death, a vacancy occurs among the Honorary Physicians to the Queen.

The question of the wearing of medals and orders by officers in evening dress, which was broached in this paper some months ago, has been taken up warmly by the *Morning Post*. Scarcely a day passes in which some letters on the subject do not appear in the columns of that journal. Nearly all of them advocate the wearing of medals in plain clothes, but they differ as to the best way to obtain official sanction for this innovation. The feelings and wishes of the officers of the Army and Navy, both active and retired, are now well known, and we trust that his Royal Highness the Duke of Cambridge will soon settle the question in the most satisfactory way by expressing his approval of, or at least giving his sanction to, a practice against which no valid objection can be urged.

No one who met Surgeon-Major Anderson in Egypt doubted for a moment that the discomforts said to have been suffered by the sick and wounded on board H.M.S. *Malabar*—even if the charges of neglect could have been substantiated—were in any way due to neglect on his part. From all accounts, no medical officer attached to the expedition worked harder than Dr. Anderson did in the base hospital at Ismailia, and it is satisfactory to know that he has been able to convince Lord Morley that the very utmost was done, both by himself and his subordinates, to provide for the wants of those entrusted to his charge.

A provincial paper which, from its position ought to have known better, asks what the Duke of Cambridge did in connection with the Expedition in Egypt to justify his Royal Highness's appointment as Personal Aide-de-Camp to the Queen, and goes on to say, "We should like to know also what are the emoluments are of this new office into which the Royal Duke has been pitch-forked?" We will answer the question. The appointment is purely honorary, and carries no pay of any kind. After this explanation, our contemporary will, we hope, be satisfied that no wrong has been done; and next time he will, we hope, make himself certain of facts before attacking one who, from his high position, is debarred from defending himself in the public Press.

The Navy.

WHITEHALL, January 12, 1883.

The Queen has been pleased to give and grant unto the under-mentioned officers in her Majesty's Naval and Marine Forces her Majesty's Royal licence and permission that they may accept and wear the Insignia of the several Classes of the Orders of the Osmanieh and the Medjidie attached to their respective names, which his Highness the Khedive of Egypt, authorised by his Imperial Majesty the Sultan, has been pleased to confer upon them, in recognition of their distinguished services before the enemy during the late Campaign in Egypt:—

2nd Class Osmanieh.—Vice-Admiral Sir William M. Dowell, K.C.B.

2nd Class Medjidie.—Rear-Admirals Sir William N. W. Hewett, K.C.B., K.C.S.I., V.C.; Sir Francis W. Sullivan, K.C.B., C.M.G.; Sir Anthony H. Hoskins, K.C.B.

3rd Class Osmanieh.—Captains Henry Fairfax, C.B., George S. Bosanquet, Elibank H. Murray, Edward Kelly, Charles F. Hotham, C.B., Robert H. M. Molyneux, C.B., Robert O'B. Fitzroy, C.B., Edward H. Seymour, Robert P. Dennistoun, John A. Fisher, C.B., Henry F. Stephenson, C.B., Charles E. Foot, Edmund St. J. Garforth, Thomas H. Royse, and Harry H. Rawson, C.B.

3rd Class Medjidie.—Captains John Fellowes, Charles C. P. FitzGerald, Arthur K. Wilson, John W. Brackenbury, C.M.G., John Hext, Lord Charles de la P. Beresford; Commanders John E. Pringle, William F. S. Mann, Edward G. Hulton, Alfred A. C. Parr, John C. Burnell, George T. H. Boyes, Eustace D. Maude, Andrew K. Bickford, Harry F. Hughes-Hallett, James L. Hammet, John P. Pipon, Tynte F. Hammill, Reginald F. H. Henderson, Arthur W. Moore, Staff Captain Henry Hosken; Staff Commanders John A. R. Petch, George J. Tomlin; Chief Engineers George Hunt, Francis E. Julian; Fleet Surgeons Daniel O'Connor, M.D., Henry N. M. Sedgwick; Paymaster Hugh H. Burniston; Secretaries John S. Moore, Henry C. W. Gibson; Lieutenant-Colonel Frederick G. Le Grand, R.M.L.I.

4th Class Osmanieh.—Commanders William L. Morrison, Charles K. Purvis; Lieutenants Edmund G. Festing, Lionel A. De Sausmarez, Charles J. Barlow, Percy Hockin, Frank C. Younghusband; Chief Engineers Edward T. Read, James G. Barrow, George T. Crook; Staff Surgeons John Lambert, Edward E. Mahon; Secretaries Francis A. Carter, William Trew, Richard B. White; Majors Matthew H. Farquharson, R.M.L.I, Henry S. Bourchier, R.M.L.I.

4th Class Medjidie.—Lieutenants Henry T. Smith-Dorrien, Michael P. O'Callaghan, William C. Reid, Percy M. Scott, Richard Poore, Archibald B. Milne, John Gibbings, Gerald L. K. Harman, Henry J. Davison, Thomes G. Fraser. Engineers Edward Matthews, John Baillie, Henry G. Johnston. Staff Surgeon Charles C. Godding. Surgeon Charles A. Macaulay, M.D. Captains Charles J. Cheetham, R.M.A.; Frederick Baldwin, R.M.L.I; George A. E. Gore, R.M.L.I.

5th Class Medjidie.—Lieutenant Bernard Carrey, Sub-Lieutenant George Couper, Midshipmen Eustace W. C. Stracey and Drury St. A. Wake, Engineer George Welch, Assistant-Paymaster John H. G. Chapple, Gunners Thomas Davidson and George Peavitt, Boatswain William Hurrell, and Lieutenants Reginald A. Marriott and Harry L. Talbot, Royal Marine Artillery.

ADMIRALTY, January 12, 1883.

In accordance with the provisions of her Majesty's Order in Council of February 22, 1870, Lieutenant George Hodgkinson has been placed on the Retired List from the 8th inst., with permission to assume the rank and title of Commander on the Retired List from same date.

ADMIRALTY, January 13, 1883.

The under-mentioned Engineers have been promoted to the rank of Chief Engineer in her Majesty's Fleet, with seniority as stated against their names:—William Alexander Harvey, December 7, 1882; Charles Albert Walmsley, December 9, 1882.

The following promotion has been made:—Sub-Lieutenant Charles Pellew Ogle to be Lieutenant in her Majesty's Fleet, with seniority of Jan. 14, 1883.

In accordance with the provisions of her Majesty's Order in Council of Feb. 22, 1870, the under-mentioned officers have been placed on the Retired Lists of their ranks from the dates stated.—Paymaster Isaac Hearnden, from the 10th inst.; Commander Verney Lovett Cameron, C.B., D.C.L., from the 12th inst.

ADMIRALTY, January 15, 1883.

In accordance with the provisions of her Majesty's Order in Council of Feb. 22, 1870, Staff Captain Henry Davenport Sarratt has been placed on the Retired List from the 14th inst., with permission to assume the rank and title of Captain on the Retired List from same date.

ADMIRALTY, January 16, 1883.

In accordance with the provisions of her Majesty's Order in Council of February 22, 1870, Paymaster Frederick Lima has been placed on the Retired List from this date, with permission to assume the rank and title of Paymaster-in-Chief on the Retired List.

ADMIRALTY, January 17, 1883.

In accordance with the provisions of her Majesty's Order in Council of April 1, 1881, Inspector-General of Hospitals and Fleets Samuel Sloane Dalzell Wells has been placed on the Retired List of his rank from the 16th inst.

APPOINTMENTS.

Captains—Lindesay Brine, to the Hercules, additional for temporary service at Naval Reserve Office; Harry H. Rawson, C.B., to the Alexandra, recommissioned; John R. F. Fullerton, to the Sapphire, commissioned.

Staff Commanders—J. J. Covey, to the Asia, additional for service in the Dreadnought, vice Miller, appointed to the Wye; Thomas J. H. Rapson, to the Pembroke, additional for the Ajax, vice Pounds; William King, to the Repulse, vice Hewlett; Albert R. Wonham, to the Asia, additional for the Devastation, vice Wise.

Lieutenants—George Le C. Egerton, to the Vernon, vice Bush; Hon. Hugh Tyrwhitt, to be Flag Lieut. to Vice-Admiral Lord J. Hay.

Sub-Lieutenant—A. K. Du Pré, additional, to the Valorous.

Midshipmen—R. J. Prendergast, to the Invincible; Edward G. W. Davy, to the Northumberland; Philip N. Ward, to the Achilles.

Chief Engineer—Henry D. Garwood, to the Orontes.

Surgeons—Alfred H. Miller, to the Philomel, recommissioned; John B. B. Triggs, M.B., to the Duke of Wellington, additional; Horatio R. Sparrow, to the Nelson, additional; William G. C. Smith, to the Cleopatra, vice Connell; Edmund D. Maddick, to the Pembroke, additional; John S. Logan, M.D., to the Duncan; Thomas Nunan, M.D., to the Cambridge; William H. Norman, to the Vernon; Robert J. Lawson, M.B., John Cashin, Francis Woore, and John M. Phillips, M.B., to Plymouth Hospital.

Paymasters—G. E. Marcon, to be Secretary to Vice-Admiral Lord J. Hay, K.C.B., on appointment to command of the Mediterranean station; William C. S. Hyne, to the Philomel, recommissioned.

Assistant-Paymaster—Charles R. Smith, to the St. Vincent, vice Voules.

Engineers—William Hair, to the Orontes; John R. R. Potam, to the Northumberland, vice Wright; Caleb J. North, to the Asia, additional, vice Potam; John S. Watch, to the Euryalus; James F. Babb, to the Flirt, vice Goff; Benjamin R. King, to the Wasp, vice Babb.

Assistant-Engineers—Henry A. Evans, to the Orontes; John M. Downer, to the Polyphemus, vice Watch.

Gunners—John Candy, to the Clyde, vice Fitzgerald; Samuel H. Ellis, to the London, vice Worthington.

Boatswains—William Freathy, to the Asia, vice Wakeham; William B. Mann, to the Agincourt, vice Gibs; Lawrence McCarthy, to the Wye, vice Hill; James Kirby, to the Indus, additional for the Conquest, vice Olver.

COASTGUARD.

Chief Boatman—William Davis, Kessingland, to be chief boatman-in-charge, Tillingham.

Commissioned Boatman—James B. Bailey, Stokes Bay, to be chief boatman, Lotlund.

ALGERINE, Com. G. W. Allen, on return to the Cape of Good Hope from Port Durnford, would remain till Jan. 10, and then leave for St. Helena, and would eventually join the flag at St. Paul de Loanda. Mails to Simon's Bay up to Jan. 19, then to St. Helena up to March 2, after that to Cape Coast Castle.

AUDACIOUS, Capt. R. E. Tracey, flagship of Vice-Admiral G. Willes, C.B., Commander-in-Chief on the China station, was at Hong Kong up to Dec. 12. The Curaçoa was to leave Kobé for Yokohama on Nov. 29. The Daring was at Yokohama on Nov. 25, and was expected to leave the same day for Kobé with Sir H. Parkes, her Majesty's Minister at Japan. The Zephyr was at Chefoo on Nov. 24, and would remain. The Swift left Shanghai on Dec. 4, for Hong Kong, calling at Wanchow, Chin Chin, and Tamsin. The Albatross was at Amoy on Dec. 8, would leave on Dec. 12 for Swatow, then Hong Kong. The Champion, at Hong Kong on Dec. 12, was to leave on Dec. 18 for Singapore, to take charge of the Straits Settlement Division. The Foxhound, which left Hong Kong on Nov. 23 for Sula and Sandakan (North Borneo), afterwards proceeded to Labuan. The Pegasus was at Singapore on Dec. 2, and would remain. The Kestrel was at Hong Kong on Dec. 12, and would remain. The Encounter, the Fly, and the Vigilant were at Hong Kong, refitting.

BRITON, Capt. A. J. Kennedy, arrived at the Cape of Good Hope on Monday last, after having landed Cetewayo at Port Durnford on Jan. 10.

CLEOPATRA, Capt. Hippisley, was at Shanghai on Nov. 30, when a serious accident took place at the rifle range. It appears that while a party from the Cleopatra were going through target practice at the 300 yards range, a Chinawoman was at work in the field at what ought to have been a safe distance from the butts. Unfortunately, however, either through wide firing or a ricochet shot, a bullet passed through one of her feet, and seriously grazed, but did not penetrate, the other. The woman was immediately taken to the Chinese Hospital, where her injuries were attended to, and where she is going on as well as can be expected.

COCKCHAFER, Lieut. and Com. Hill, has been moved out of Hamoaze, to prepare for her steam trials.

CONDOR, Com. Jeffreys, arrived at Malta on Jan. 10.

CURAÇOA, Capt. Long, arrived at Yokohama on Dec. 5 from Kobé, and exchanged salutes with the port and men-of-war in harbour. The United States flagship Richmond, after a stay of upwards of five months, left on Dec. 6 for Kobé.

DART, Lieut. and Com. U. V. Moore, left the Cape of Good Hope for the Australian station on Jan 9.

DIDO, Capt. C. E. Domvile, which has been placed at the command of H.R.H. the Princess Louise (Marchioness of Lorne), arrived at Charleston, South Carolina, from Bermuda, on Wednesday last, and would probably leave on Jan. 22.

EURYALUS, Capt. Hastings, C.B., flagship of Rear-Admiral Sir W. N. Hewett, V.C., Commander-in-Chief on the East Indies station, would leave Goa for Trincomalee and Calcutta on Jan. 26. The Tourmaline was at Bombay. The Linnet was at Aden; will sail on Jan. 20. The Arab left Kurrachee on Dec. 15 for Bombay, to refit and give leave. The Ranger was to leave Rangoon on Dec. 7 for Akyab, returning to Rangoon about Jan. 23; will accompany the Euryalus to Calcutta. The Osprey was at Aden, and the Harrier was cruising in the neighbourhood of the Comoro Islands.

GRAPPLER, Lieut.-Com. H. G. Gough, returned to Gibraltar from Cadiz on Tuesday last.

HARRIER, Lieut. and Com. Scott J. B. Willcox, has captured a schooner, named the Gazelle, hailing from the Seychelles Islands, at Johana, Comoro Islands, and has brought her to Zanzibar, she being suspected of piracy on the high seas.

HECLA, Capt. A. K. Wilson, at Corfu, is about to move to Malta. Mails to Malta.

HELICON, Lieut. and Com. Alfred L. Winsloe, arrived at Malta from Corfu on Jan. 9, with Capt. Hotham on board.

INFLEXIBLE, Capt. E. H. Seymour, at Patras, would leave about Jan. 20, with mails for Syracuse.

IRIS, Capt. Ernest Rice, flying the flag of Admiral Lord Alcester, Commander-in-Chief in the Mediterranean, was at Malta on Jan 16. The Inflexible, at Patras, would leave for Syracuse about Jan. 20. The Bittern, at Brindisi, will shortly proceed to Ismailia. The Sultan, the Temeraire, the Invincible, the Alexandra, the Dragon, and the Antelope were at Malta; the Monarch and the Condor were at Port Said; the Orion, the Falcon, and the Coquette were at Alexandria; the Falcon was ordered to Port Said. The Carysfort had arrived at Malta, and the Decoy at Ismailia. The Beacon, at Ismailia, is ordered to Suez. The Superb was at Ayas Bay, the Cockatrice at Constantinople, and the Grappler at Gibraltar.

IRON DUKE, Capt. H. C. St. John, which is on her way home from the China station to pay off, may soon be expected at Devonport, as she left Aden on Jan. 17. The arrival of this vessel is looked forward to with considerable interest by the tradesmen of the town, as it is known that she is to be paid off at this port, and that she has a crew of over 600 officers and men, who have been out in her for nearly four years. The Iron Duke will be the first large vessel paid off at Devonport for some considerable time.

NELSON, Comdre. J. E. Erskine, was at Adelaide up to Dec. 12; left Sydney on Oct. 26, and arrived off Williamstown on Oct. 29, where the Nelson was docked. Sailed Nov. 29 for Adelaide, and arrived Dec. 1; would leave for Hobart about Dec. 20. The Diamond was at Sydney on Nov. 23; would leave for Hobart about Dec. 20. The Miranda was at Adelaide on Dec. 3; would leave for Hobart about Dec. 20. The Espiègle was at Cooktown on Dec. 12; about to leave for Brisbane and Sydney, thence proceed to Hobart about Dec. 20. The Lark was to leave Ugi on Nov. 15 for Sydney or Auckland. The Beagle, at Cooktown Nov. 20, and the Sandfly, at Port Bulwer, Queensland, Nov. 19, were about to leave for Sydney.

NORTHAMPTON, Capt. Noel S. F. Digby, flagship of Vice-Admiral Sir John E. Commerell, V.C., Commander-in-Chief on the North America and West Indies station, was at Barbados up to Dec. 29. She would leave with the Tenedos, Fantôme, and Flamingo on Jan. 1, to visit the remaining islands of the Windward group, arriving at Trinidad about Jan. 10; would visit one or two ports on the Spanish Main, and then proceed to Jamaica. The Dido was on passage to Bermuda, to coal and to prepare for embarking her Royal Highness the Princess Louise (Marchioness of Lorne) at Charleston, U.S.A., about Jan. 15. The Urgent, at Bermuda, was to be towed to Jamaica by the Dido, after that ship has disembarked the Princess Louise. The Mallard, *en route* to Bermuda from the West Coast of Africa, is, after refit, to proceed to Jamaica, if she can reach there by Feb. 1. The Supply was on passage to Bermuda from Antigua, and was to be turned over to the dockyard. The Garnet is ordered to Jamaica with steam launch from Antigua. Letters have also been received at the Admiralty from the Commodore at Jamaica up to Dec. 24. The Tyrian was at Port Royal. The Griffon was in the harbour at Kingston, protecting that town against alleged intended acts of incendiarism; will proceed to Bermuda, when services are no longer required. The Foam, which sailed on Dec. 23 for a cruise round the north side of Jamaica, will be recalled to Port Royal by telegraph, when services are required. The Firebrand was at Port Royal.

POLYPHEMUS, Com. May, is ordered to Chatham, to take in new boilers.

SAPPHIRE, Capt. J. R. T. Fullerton, was commissioned on Thursday, to relieve the Encounter on the China station. Complement, 231 officers and men.

SEAGULL, Lieut. and Com. Walter H. B. Graham, arrived at Simon's Bay on Jan. 13.

STORK, Lieut. and Com. Blennerhasset, was inspected on Monday by Vice-Admiral E. B. Rice, C.B., Commander-in-Chief at the Nore, prior to being undocked, and leaving Sheerness for service on the China station, to relieve the Moorhen.

SULTAN, Capt. Walter Hunt Grubbe, K.C.B., at Malta, is ordered to have defects made good by Jan. 31, but, if all we hear be true, she will have to proceed to sea with only half her defects made good, if discharged from the Dockyard on that date.

TAMAR, Capt. T. H. Royse, which was to have left Portsmouth early last week for the Mediterranean, still remains at that port. It is understood that the Government have in contemplation the possibility of being compelled to send reinforcements to South Africa, and that this is the cause of the delay.

THALIA, Capt. Brackenbury, arrived at Malta on Jan. 15, and left the next day for Hong Kong.

TYNE, Com. Basil E. Cochrane, left Portsmouth on Sunday, with Naval reliefs for the Mediterranean.

The under-named men have been awarded the medal for long service and good conduct:—M. Long, lamp-trimmer, of the Cambridge; E. Cavanagh, bandsman, of the Northumberland; D. Pearce, quartermaster, of the Cambridge; T. P. Edgecombe, carpenter's mate, of the Impregnable; E. Burnett, captain's cook, of the Polyphemus; J. Champion, A.B., of the Victoria and Albert; W. Gardener, admiral's steward, of the Hercules; W. A. Hartfield, engine-room artificer, of the Pembroke; J. Benorthan, boatswain's mate, of the Royal Adelaide; J. Sweeney, W. Wick, and J. Brien, chief boatmen, of the Coastguard; M. Connor, F. C. Hawton, and F. C. Sampson, boatmen, of the Coastguard.

Mr. W. A. Mount, the Naval Storekeeper at Bermuda, who has, since May last, been in England on sick leave, will, it is believed, sail for Bermuda next week.

HOW TO AVOID THE INJURIOUS EFFECTS OF STIMULANTS.—The present system of living—partaking of too rich foods, as pastry, saccharine and fatty substances, alcoholic drinks, and an insufficient amount of exercise—frequently deranges the liver. I would advise all bilious people, unless they are careful to keep the liver acting freely, to exercise great care in the use of alcoholic drinks, avoid sugar, and always dilute largely with water. Experience shows that porter, mild ales, port wine, dark sherries, sweet champagne, liqueurs, and brandies, are all very apt to disagree; while light white wines, and gin or old whisky largely diluted with soda water, will be found the least objectionable. ENO'S FRUIT SALT is peculiarly adapted for any constitutional weakness of the liver; it possesses the powers of reparation when digestion has been disturbed or lost, and places the invalid on the right track to health. A world of woes is avoided by those who keep and use ENO'S FRUIT SALT, therefore no family should ever be without it. CAUTION.—Legal Rights are protected in every Civilised Country. Examine each bottle, and see the Capsule is marked "ENO'S FRUIT SALT." Without it, you have been imposed on by worthless imitations. Sold by all Chemists, price 2s 9d and 4s 6d. Directions, in Sixteen Languages, how to Prevent Disease. Prepared only at ENO'S Fruit Salt Works, Hatcham, London, S.E., by J. C. ENO'S Patent.

MEMORIAL BRASSES.—Messrs. JOHN HARDMAN and Co., who pay special attention to Military Brasses, have lately executed for her Majesty the Queen several important works for St. George's Chapel, Windsor. Designs are prepared for approval, with estimate of cost. —Offices, 13 King William Street, Charing Cross.

The ARMY AND NAVY GAZETTE exchanges with or receives the following Service papers abroad:—*L'Avenir Militaire*; *Bulletin de la Réunion des Officiers*; *L'Armée Française*; *L'Italia Militare*; *Rivista Europea*; *Rivista Militare*; *Memorial de Ingenieros*; *La France Militaire*; *Moniteur de la Flotte*; *Le Progrès Militaire*; *Der Veteran*; *Streffleur's Oesterreichische Militärische Zeitschrift*; *Jahrbücher für die Deutsche Armee und Marine*; *Militär Wochenblatt*; *Giornale d'Artiglieria e Genio*; *Organ der Militär-Wissenchaftlichen Vereine*; *Vedette*; *Deutsche Heeres Zeitung*; *Militärische Zeitschrift*; *Armeeblatt, Wien*; *Army and Navy Journal of New York*; *The American, Philadelphia*; *Revista Maritima Brazileira*; in addition to all the home and colonial professional periodicals and journals.

NAVAL NOTES.

The Admiralty have decided on making the following alterations in the armament of the under-named ships:—The Sultan is to have her eight 10-in. muzzle-loading 10-ton guns replaced by eight 18-ton breech-loaders; her four 12-ton muzzle-loaders by four 11-ton breech-loaders; and her seven 20-pounders by a corresponding number of 4-in. 22½-cwt. breech-loaders. The Hercules is to have her eight 18-ton muzzle-loading guns superseded by eight 18-ton breech-loaders; her two 12-ton muzzle-loaders by six 4-ton breech-loaders; and her four 6½-ton muzzle-loaders and six 20-pounders by six 22½-cwt. breech-loaders. The Triumph is to have ten 8-in. breech-loading guns substituted for her ten 12-ton muzzle-loaders, and eight 4-in. breech-loaders for her four 64-pounders and six 20-pounders. The Emerald is to have twelve 64-pounders exchanged for four 6-in. and eight 5-in. breech-loaders. The Mercury and Iris, instead of being armed with ten 64-pounder muzzle-loading guns, are each to have four 6-in. and six 5-in. breech-loaders; and the Cormorant two 6-in. and six 5-in. breech-loaders in place of her two 90-cwt. and four 64-pounder muzzle-loaders. The remainder of the Navy will have their armament altered in like manner as fast as breech-loading ordnance is supplied by the War Office.

The following Admiralty letter, in the form of a circular, has been received on board all ships:—"Engine-room artificers will for the future enter into an engagement on their first entry in the Royal Navy to serve twelve instead of ten years, and a subsequent period of ten years, making a total service of 22 years, instead of two engagements of ten years, being the period entitling them to a pension. The pay will be as follows:—Chief engine-room artificer, first class, 7s. 6d. a day; ditto, second class, 7s. a day; engine-room artificer, first class, 6s. 6d. a day; ditto, third class, 5s. 9d. a day; acting engine-room artificer, fourth class, 5s. 6d. a day (on entry). The higher grades are liable to a reduction of pay and position for misconduct. The order is to take effect from Nov. 30, 1882, and all those who have entered the service since Nov. 30, 1882, are to have the option of making another engagement for 12 years instead of 10 years, or to be discharged to the shore."

The news, says the *Morning Advertiser*, that the Admiralty are prepared to allow their Assistant-Secretary to receive and act upon anonymous letters sent to him by either officers or men serving in the Royal Navy who may chance to have a grudge against any of their superior officers, has been received with dismay throughout the service. Already one naval officer has written to the Admiralty, requesting that his name may be removed from the *Navy List*, and we understand a movement is on foot in the service whereby Naval officers hope to initiate an agitation throughout the kingdom which will result in securing a thorough measure of Naval reform. We are informed that the Admiralty has been somewhat taken by surprise, never anticipating such a result as a consequence of their encouragement of anonymous communications and complaints; and that, with a view to nipping this agitation in the bud, their Lordships have been seriously considering the advisability of dealing in a summary manner with the officer who has shown so much independence, by immediately removing his name from the List of his rank, and thus, to all intents and purposes, dismissing him the Service. On the other hand, we learn that such a contingency was fully considered prior to the officer requesting to have his name removed from the *Navy List*, and that preparations are being made for an active agitation throughout the country in favour of drastic Naval reforms.

The Volage was inspected last week by Rear-Admiral McCrea, Admiral-Superintendent at Devonport, after which her sails were unbent and stowed away. She will be turned over from the dockyard authorities on Jan. 22, and placed in the First Division of the Steam Reserve. She will probably be commissioned for service on the China station, and in Naval circles it is believed that her command will be offered to Capt. C. Knowles, who commanded the Blanche during her last commission. The Volage, while she has been in the hands of the dockyard authorities, has been completely re-armed, and now carries the new 6-inch breech-loading gun. These guns, of which she has ten, are of enormous range and piercing power, and are no less than 13 ft. 9 in. in length. In addition to these she will carry a full equipment of Nordenfelt machine-guns.

The statistical report of the health of the Navy for the year 1881 has been issued as a Blue-book. In this it is stated that during the period included the sanitary condition of the force was satisfactory, and offered a fair comparison with former years. There was a considerable decrease in the sick rate, amounting, when compared with 1880, to 30·36 per 1,000; but the invaliding rate remained practically the same. The general death-rate showed a slight decrease, but was abnormally large, owing to the loss of life caused by the blowing-up of the Doterel; the death-rate by disease alone shows a slight increase over that of 1880. On the home station the ratios of sickness, invaliding, and death were all lower than the average of the previous 10 years. The total force in the service afloat during the year was 44,400 officers and men, of whom 24,090 were between the ages of 15 and 25, 14,290 between 25 and 35, 5,205 between 35 and 45, and 815 above 45.

Lieut. Hasenclever, of the Imperial German Navy, has been granted leave of absence for one year, in order, at the request of the Chinese Government, to undertake the duties of instructor of the Chinese Navy.

In accordance with Admiralty instructions, preparations are now being made at Chatham Dockyard for the construction of another large armour-plated ship, to be named the Mersey. She will be over 300 feet long, and about forty wide. Her engines will be very powerful.

THROAT IRRITATION.—Soreness and dryness, tickling and irritation, inducing cough and affecting the voice. For these symptoms use Epps's Glycerine Jujubes. In contact with the glands at the moment they are excited by the act of sucking, the Glycerine in these agreeable confections becomes actively healing. Sold only in boxes, 7½d, tins, 1s 1½d, labelled "JAMES EPPS and Co., Homœopathic Chemists, London." A letter received:—"Gentlemen,—It may, perhaps, interest you to know that, after an extended trial, I have found your Glycerine Jujubes of considerable benefit (with or without medical treatment) in almost all forms of throat disease. They soften and clear the voice.—Yours faithfully, GORDON HOLMES, M.D., Senior Physician to the Municipal Throat and Ear Infirmary."

DEATHS.

CROZIER.—On the 15th inst., at her residence, Westhill, Freshwater, Isle of Wight, Julia, widow of the late Admiral Richard Crozier, in her 73rd year.

THE PARASCHO CIGARETTES.

THE PARASCHO CIGARETTES are now being made from the New Crop of Yenijeh Tobacco, and will be found to possess in perfection the peculiar and delicate aroma for which these Cigarettes have become so famous. The Parascho Cigarettes are made only from the finest Yenijeh (Turkey) Tobacco, and are rolled in the best paper procurable, free from Nitre, and made specially for the Parascho Cigarettes. The Parascho Cigarettes will be found different from and superior to all others. The Parascho Cigarettes are pronounced by connoisseurs to be "the only Cigarettes worth smoking."

The Parascho Cigarettes are supplied to the leading members of Fashionable Society, Clubs, and Messes.

The Parascho Cigarettes are made in eight different sizes, and are put up in boxes, each containing 50, 100, and 250 Cigarettes. The Parascho Cigarettes may also be had in sample boxes, containing 24 Cigarettes (accompanied by a detailed price List), on receipt of 2s 6d in stamps, or postal order.

THE PARASCHO CIGARETTE DEPOT, 65 Park Street, Grosvenor Square, London, W.
And may be had from all the leading Tobacconists.

If fitted with Tolley's Patent "Giant-Grip" Action, specially designed to prevent the SLIGHTEST MOVEMENT at the moment of discharge. The strongest action extant ...	£28

An inspection of above invited.

The shooting of our Rifles is under the personal supervision of a member of the Firm, and is not deputed to any subordinate, AS IS USUAL IN MOST CASES. By this means we are enabled to guarantee to our customers Rifles with a figure of merit that cannot be beaten.

[Extracts.]

From Capt. J. E. B., 45th Regiment: "I yesterday fired with the rifle without raising the back sight from 25 to 200 yards, and almost every shot struck its fellow, with the other barrel."

B. W. W., Assam, India:—"I must certainly give you credit for the splendid weapon that you have built me."

Capt. F. W. M., Mysore:—"I have never had a rifle (and I have had all kinds) which has given me such satisfaction."

Lieut.-Col. W. A., 22nd Regiment:—"The Express Rifle gives me perfect satisfaction."

Lieut. C. W. D., 92nd Highlanders:—"I have fired with it, and find it very accurate and well balanced."

C. F. SHOT GUNS, Hammer or Hammerless, £13 13s, £15 15s, £17 17s £20, £25, and £30.

We are constantly receiving a supply of above from our manufactory in Birmingham, at our London address, where one of the principals can at any time be seen.

HOLLOWAY'S PILLS.—GOOD SPIRITS.—Every one has frequently experienced sudden personal changes from gaiety to gloom. The wind and weather oftentime receive the blame, when a faulty digestion is alone the cause of the depression. Holloway's Pills can be honestly recommended for harmoniously attuning circulation and respiration, disturbance of the balance of which produces a sense of fulness and oppression after eating. They clean the furred tongue, and wholesomely stimulate the liver, and act as a gentle aperient to the bowels. They healthfully rouse both body and mind. Holloway's Pills are the best known antidotes for want of appetite, nausea, flatulency, heartburn, languor, depression, and that apathy so characteristic of chronic derangement of the digestion.

ALL BUT NEW OFFICERS' UNIFORMS, for the Army, Navy, Militia, and Yeomanry, may be obtained of LEWIS MOSES, 65 (late 464), New Oxford Street, W.C., at one-fourth their original cost; or on hire. Swords, cloaks, belts, sashes, saddles, &c. for nearly every regiment in her Majesty's Service. Uniforms and apparel purchased.

THE VERSMANN'S
PATENT
GERMAN MOSS LITTER.

This Litter is specially prepared from a moss-peat found in Germany, and introduced into this country by the Patentee, Dr. VERSMANN, Ph.D. After a most severe and extensive trial in public and private stables, cowsheds, and kennels, it is pronounced by the highest practical and scientific authorities to be the best and cheapest litter known.

ITS ADVANTAGES ARE:

1. Cheapness, it being not more than one-half the cost of straw.
2. Absorptiveness, as absorbing all the urine, and rendering drains and flushing of stables unnecessary.
3. Prevention of decomposition and generation of bad odours.
4. Affording an excellent soft and elastic bed, particularly agreeable and beneficial to the feet and limbs of horses.
5. Horses do not eat it as they do straw litter. therefore they do not require to be racked up or muzzled to prevent indigestion or broken wind.
6. It is easily managed in the stable, and does not soil or stain horses.
7. It has a wonderful influence on the growth of the hoofs and in maintaining the feet in health.
8. It is extremely portable, being compressed into bales weighing each about 3 cwt., ¾ cwt. to 1 cwt. being sufficient to litter a horse for a month or six weeks.
9. It is not inflammable, and therefore offers but little danger from fire.
10. It is essentially a sanitary litter.
11. The manure is much more valuable than that of straw, and occupies considerably less space.

It will be found of immense advantage of Veterinary Infirmaries, in Stud Farms, Dairies, Kennels, &c.

Address —
The Versmann's Moss Litter Company,
LIMITED.
63 QUEEN VICTORIA STREET, LONDON, E.C.

CAUTION.—Proceedings will be taken against persons infringing the Company's patent.

At the Preliminary Examinations of 1882, 20 Candidates were sent in, and 15 passed.

G. FAITHFULL, Storrington, Sussex, January 10, 1883.

ROYAL SCHOOL for DAUGHTERS of OFFICERS of the ARMY.

Patron—Her Most Gracious Majesty the QUEEN.
Chairman—Major-General J. T. BOILEAU, R.E., F.R.S.

The Daughters of all Officers in her Majesty's Army, inclusive of the Royal Marines, and of officers who have sold out or otherwise retired from the Service, provided those children were born prior to such retirement, are eligible. The ages of admission are from 10 to 15. Each donation of £5 5s entitles to one life vote. Each subscription of 10s 6d entitles to one vote at all elections during the year. Further CONTRIBUTIONS to meet the current expenses are earnestly solicited by the Committee.

By order, G. W. FORSTER, Secretary.
Office, 22 Cockspur Street, London.

ARMY EXAMINATIONS.—Dr. KAIM and H. ZOBEL, in conjunction with Captain GREENE, assisted by able and Experienced Masters, PREPARE CANDIDATES for Woolwich, Sandhurst, the Militia Competitive Military Examinations, and the Staff College.

The Pupils are received in the Families of the Principals, which will be a Special Advantage to those wishing to practise French, German, and Italian conversation.

Highest references; amongst others, Major-General Sir Evelyn Wood, V.C., K.C.B., Colonel the Hon. P. Methuen, C.B., Scots Guards, Assistant-Adjutant-General, Horse Guards.

For particulars, apply to H. ZOBEL, Poulton House, Hampton, Middlesex.

GROSVENOR SCHOOL, Twickenham.

BOYS receive thorough PREPARATION for Woolwich and Sandhurst, and pass DIRECT. Special arrangements for very young boys. Healthy neighbourhood, good table, public-school tone. Strongly recommended by many Officers high in the Service, to whom reference is permitted. Head Master, the Rev. L. MURRAY D'ORSEY, M.A.

ARMY EXAMINATIONS.

MR. J. WINDER, M.A., Cranworth House, Eastbourne, Sussex, PREPARES TEN PUPILS for Woolwich and Sandhurst. At recent Examinations Candidates prepared by Mr. Winder obtained 6th and 22nd places for Woolwich, and 20th and 27th places for Sandhurst.

WOOLWICH, SANDHURST.—MORGAN JENKINS, M.A. (Wrangler), assisted by an experienced Staff, prepares resident and non-resident Pupils. References to parents, many of whom have had more than one son successful at this establishment. Two passed (38th and 71st) in the recent list for Sandhurst.—50 Cornwall Road, Westbourne Park, W.

EDUCATION (Neglected or Delicate Health).—Special advantages OFFERED by Rector of Country Parish, near Harrowgate. Reference to parents of pupils. Terms, £100.—Address, CANTAB, care of Messrs. Dawson and Sons, 121 Cannon Street, London, E.C.

THE ARMY COLLEGE, ABINGDON, BERKS.

OFFICERS PREPARED for the Militia Military Competitive Examination ONLY. For particulars, apply to the Secretary, the Abbey, Abingdon, Berks.

ARMY EXAMINATIONS, PRELIMINARY.

A very successful Tutor PREPARES Candidates *singly*. Each Pupil receives 2 hours' individual instruction daily.—For particulars, apply to Mr. DAVIS, 6 Hogarth Road, S.W., opposite Earl's Court Station.

ARMY EXAMINATIONS.—Captain W. H. JAMES, F.G.S., P.S.C., late R.E., and the Rev. Dr. FROST, LL.D., 19 Lexham Gardens, W., formerly at 28 Kensington Square, W., PREPARE Gentlemen for the Army, *viâ* WOOLWICH, SANDHURST, and the MILITIA. A Special Class for the STAFF COLLEGE. Captain James passed from the Staff College in 1877 with honours, first in mathematics, &c. During the past fifteen years, over 500 Pupils have passed from this Establishment. Fifty-two successes last year, eighty this year. In the recent WOOLWICH Examination four passed, viz., 4th, 17th, 22nd, 27th, and a fifth pupil qualified, out of seven sent up.

LIEUTENANTS of MILITIA.—At the March Military Competitive Examination, EIGHT obtained commissions, viz.:—Richards (4th), Grant (12th), Wimberley (14th), Cass (28th), Shadwell (30th), Woodwright, Legge, Vignoles (Cavalry).

At the last Examination (September) TEN passed, viz.:—Holland (2nd), Blewitt (8th), Whiffin (14th), Gorman (19th), M'Mahon (20th), Morris (25th), Barthorp (28th), Cochrane-Baillie (33rd), Edwards (36th), another was 41st, and Goodair, 42nd, received a cavalry commission.

At the April Further Literary Examination, Three passed, viz.:—4th, 37th, 86th. This October Four passed, viz.:—5th, 10th, 14th, 26th, being all sent in on both occasions.

STAFF COLLEGE Successes:—1881: 1st, 4th, 16th. 1882: 1st, 7th, 10th, 15th, 22nd, 23rd, 26th.

Captain JAMES prepares Officers for the Promotion Examination. No failure up to date, and 46 have passed since December.

NAUTICAL TRAINING COLLEGE.—The THAMES NAUTICAL TRAINING COLLEGE, H.M.S. Worcester, moored off Greenhithe, Kent, is managed by a Committee of London shipowners, merchants, and captains. Chairman—Sir G. CHAMBERS, 4 Mincing Lane, E.C. YOUTHS from eleven to fifteen and a-half years of age, intended for the sea, are received on board, and specially educated for a seafaring life. The annual terms in the Upper School for cadets from thirteen to fifteen and a half are fifty guineas, and in the Lower School, for cadets from eleven to thirteen, forty-five guineas, with a charge to each of ten guineas for uniforms, medical attendance, washing, &c. The Board of Trade allow that two years passed on board this ship shall count as one year's sea-service. The Admiralty annually give Sea Cadetships in the Royal Naval Reserve. The COLLEGE will REOPEN January 22, 1883, after Christmas Vacation. Forms and Prospectuses may be obtained on application to

W. M. BULLIVANT, Hon. Sec.
72 Mark Lane, London.

ARMY EXAMINATIONS.—Special Preparation, by JOHN GIBSON, M.A. (First-class Classics, Camb., 1874, formerly Master at Westminster), assisted by Two Resident University Graduates and Visiting Professors. In June, 1882, out of 4 Pupils sent up, 2 passed, and a third scored over 4,100 marks at his first trial. In November, 1882, out of 4 Pupils sent up, one took the 14th place on the list, and another scored over 4,300 marks. All the Pupils sent up were First trial Candidates, and 2 of the successful ones had only read 2 months with Mr. Gibson; the other, 4 months. In the last 2 Preliminary Examinations, 5 passed, out of 7 sent up.

N.B.—The next Preliminary Guide, containing the Answers to the Questions set in the February Examinations, will be published about the middle of February. Address, Bromley, Kent.

MATHEMATICS.—A Cambridge Wrangler VISITS and RECEIVES PUPILS in London; teaches by Correspondence; and supplies, on moderate terms, Solutions of the most Recent Examination Papers, including Sandhurst, Woolwich, I. C. S., London B.A., and B.Sc.—G. HEPPEL, M.A., 180 The Grove, Hammersmith.

BEDFORD GRAMMAR SCHOOL.—Head Master—J. S. PHILLPOTTS, M.A., B.C.L., formerly Fellow of New College, Oxford, and Assistant-Master at Rugby School.

Eight Exhibitions for four years to the Universities.

Special Classes for Woolwich, Sandhurst, E.I.C.S., &c.

All (four) pupils sent up in 1880 passed direct into Woolwich. In 1881, sixth and ninth places. Two passed direct (July, 1882) for Indian Civil Service.

Fees, per annum—day boys under thirteen, £9; above thirteen, £12. Terms for boarders on application as above.

THE ROYAL ACADEMY, Gosport.

PATRONS.
Her Most Gracious Majesty the Queen.
His Royal Highness the Prince of Wales.
His Royal Highness the Duke of Edinburgh.
His Royal Highness the Duke of Connaught.
His Royal Highness the Duke of Albany.

A Class will be formed in January for special preparation for the next Examination for Naval Cadetships.—Rev. EDWARD BURNEY, M.A., Head Master.

NEUENHEIM COLLEGE, HEIDELBERG. Head Master, Rev. F. ARMITAGE, First-class Classical Tripos, late Modern Language Master at Clifton College; with Seven Resident Assistant-Masters, French and German. Preparation for English Public Schools and Universities, Military Examinations, and for Commercial Life. German spoken, English diet, large cricket-ground and fives courts.—References to Dean of Westminster; President of Trinity College, Oxford; Head Masters of Clifton College and Bath College, Colonel Dunsterville, &c.

MALVERN COLLEGE, LIMITED.

The NEXT TERM commences on FRIDAY, January 26. Entrance Examination, January 25.

For particulars, apply to E. B. SCALLON, Esq., M.A., Secretary.

ARMY, *viâ* Sandhurst, Woolwich, or Militia.—PROSPECTUSES, together with reliable Information of Tutors recently successful, sent (gratis), by Messrs. ASKIN, 38 Sackville Street, London, W. References kindly allowed to the Chaplain-General to the Forces and others.

ARMY EXAMINATIONS.—PREPARATION in FRANCE by B. ARNETT, M.A., Cantab., J. J. RIX, B.A., Cantab., and F. BREITENSTEIN. Rigeard, Chartres, France.

MILITARY EDUCATION, GERMANY.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

University Candidates for Sandhurst are received as non-resident pupils. In this competition two candidates (the only ones sent up) have passed into Sandhurst during the past year; Mr. W. A. Grant taking fourth place in July, and Mr. G. Barton-Smith second place in December.

In addition to the University candidate, two other pupils passed on the general list at the recent Sandhurst Examination,—Mr. C. D. Radcliffe (tenth place) and Mr. H. Marwood.

Special arrangements made for officers studying for the Staff College or other Military Examinations.

MILITIA COMPETITIVE EXAMINATION.

The standard originally fixed for this Examination having been much raised in September, 1881, no results previously obtained should be taken into account in considering the successes obtained by Militia pupils. Since the date named, there have been three competitions. At these trials Colonel WILKINSON and Lieutenant-Colonel SHAW have secured 24 COMMISSIONS for their pupils, although they have only prepared and sent up a very limited number for Examination. The names of all successful pupils have already been published.

Also, at the October Literary Examination, Lieut. C. J. Stanton took 4th place on the list.

The results obtained at other Examinations bring the general score up to FORTY-EIGHT SUCCESSES, achieved by pupils in the last 18 months; during that period the number of pupils on the strength of the establishment, resident and non-resident, has always been limited to 60.—Address, DARMSTADT, GERMANY.

SANDHURST, WOOLWICH, C. S., MILITIA, &c.—The Rev. A. PRITCHARD, M.A. Oxon., assisted by his Brother, Professor PRITCHARD (late R.M. Academy, Woolwich), and a large Staff of resident Assistant-Tutors, PREPARES for any of the above.

The next Term will commence Jaunary 3, 1883.

For particulars of all this year's successes and previous ones, address Rev. A. PRITCHARD, Hill Lands, Wargrave, Henley, Oxon.

OXFORD RESPONSIONS, and all UNIVERSITY MATRICULATIONS.—VACANCIES caused by successes last week at Oxford Responsions.

Address, Rev. A. PRITCHARD, Wargrave, Henley, Oxon.

MILITARY COMPETITIVE for MILITIA OFFICERS.—The Rev. A. PRITCHARD, who is assisted by a retired Field Officer of 8 years' experience as a Garrison Instructor, has, during the year 1882, gained five Commissions with the 14 Candidates who went up from him.

For particulars of marks, places, &c., address Rev. A. PRITCHARD, Wargrave, Henley, Oxon.

LIEUTENANTS of MILITIA desirous of competing for Line Commissions can be received by the Rev. WALTER BAKER, M.A., at Batcombe Rectory, Evercreech, Bath. They will be thoroughly prepared in all Military Subjects by Major Dickens (late 11th Foot), Staff-College Graduate, formerly Assistant Royal Engineer, S.E. District, and Colonel PALMER, late R.A., two of whose pupils passed in September last with high marks.

Great individual attention is given, as few pupils are taken, and each comes under actual *vivâ voce* instruction for 6¼ hours a day. Since the introduction of the Military Competitive, out of Thirty-nine Lieutenants of Militia sent up, Twenty-four have been successful, several taking high places in the list. There are opportunities for healthy country amusements and games, a cricket and football ground, lawn-tennis courts (grass and asphalte), a private billiard-room, &c., and in all other respects a liberal and gentleman's establishment is kept.

A Large Staff of Experienced Tutors, all resident, assist in preparing for the Qualifying Examinations, and for the Sandhurst and Woolwich Competitions.

References to parents of successful pupils.

NAVAL CADETS, ASSISTANT CLERKS

HOPE HOUSE, SOMERSET PLACE, SOUTHSEA.

Principal—Mr. T. H. VICKERY.

In addition to the general course of study pursued at this long-established School, Pupils are specially prepared for the Examination required for the above.

At the late Competitive Examination in June, for Assistant-Clerkships in the Royal Navy, THREE of the Five successful competitors were Pupils of this Establishment, taking First, Third, and Fourth places. And THREE passed the test of qualification.

TO ARMY TRAINERS and MILITARY STUDENTS.

The undersigned offers his services in PREPARING LIEUTENANTS of MILITIA for LINE COMMISSIONS, and Officers of Volunteers and Militia for Promotion Examinations, under G.O. No. 20 of 1882.—Apply to Colonel W. J. STEWART, care of Messrs. H. S. King and Co., 45 Pall Mall, S.W.

ARMY EXAMINATIONS.—The Establishment formerly conducted by Dr. LAUMANN and Mr. ELDERTON at Fulham, is now carried on by the latter at MANOR COURT, Hanwell, where pupils are prepared for the above Examinations. Average number of pupils, 10; average number passed per annum, 8.

KINGSLEY COLLEGE, WESTWARD HO!

HEAD MASTER—Rev. F. HEWSON WALL, LL.D.

VISITING COUNCIL.
Vice-Admiral Sir Wm. M. Dowell, K.C.B.
Robert Ellis, Esq., M.R.C.S., &c.
Rev. Roger Granville.
General W. N. Hutchinson.
Colonel Kennard, M.P.
Major-General Molesworth, R.H.A.
Sir George Stucley Stucley.
Rear-Admiral A. T. Thrupp.
Secretary, Ambrose Berkeley Wall, Esq., R.N.

The EXAMINATION for the following EXHIBITIONS will commence on April 3, 1883:—(1.) Two KINGSLEY Exhibitions, value £15 each. (2.) Two MOLESWORTH Exhibitions, value £10 each. (3.) Two ARLINGTON Exhibitions, value £7 10s each. (4.) Two ARLINGTON Exhibitions, value £5 each.

ARMY.—LINE and MILITIA.

IMPORTANT to STUDENTS.

Captain DUMARESQ DE CARTERET BISSON, M.A., Author of "Our Schools and Colleges" (graciously recognised by the Queen and H.R.H. the Commander-in-Chief), sends, free by post, a selected List of Prospectuses of all the most SUCCESSFUL ARMY TUTORS, and gives his Counsel on Military and Civil-Service Education free of charge. Reference kindly permitted to the late Secretary of State for War.—Address, Captain BISSON, No. 3 Berners Street, London, W.

ARMY, CIVIL SERVICE, UNIVERSITIES, PUBLIC SCHOOLS.

MESSRS. BISSON, BORMAN, and CO. send, free of charge, PROSPECTUSES of the most SUCCESSFUL TUTORS for Woolwich, Sandhurst, Military Competitive, Staff College, Home and Indian Civil Services, Universities, Public Schools, &c.—3 Berners Street, W.

ARMY EXAMINATIONS, &c.—In the late Examinations, Mr. WATKINS, late Scholar, Christ's College, Cambridge, passed Messrs. Plomer, Panton, Carpendale, Brownlow (U.C.), and Voyle (I.C.), for Sandhurst, and Mr. Cronin took honours at the Academy; Mr. Brett qualified for Woolwich.

Twenty-two other Pupils have taken high places past year for the above, the Universities, Student Interpreterships, and Militia Examinations, Military and Pass.

A Class for Staff College.
Address, 90 Kensington Park Road, W.

LIEUTENANTS of MILITIA.—A COURSE of INSTRUCTION, including Fortification, Surveying, Tactics, Army Discipline Act, Drill, Queen's Regulations, &c., given by Major DAUBENY and A. PINHEY.—Apply to A. PINHEY (late R.A.), Burlington House, Spring Grove, Isleworth, W.

THE PRIORY, BALHAM, SURREY, adjoining Tooting Common.—Mr. BLACKWELL, B.A. (assisted by Graduates in High Honours), PREPARES Gentlemen for Woolwich and Sandhurst, and Militia Officers for the Military Competitive Examinations. At the Preliminary Examination for Sandhurst, held August 30 and 31, 1882, of four pupils sent up, three were successful. During the present year, pupils of Mr. Blackwell have passed the qualifying examination for Militia Officers who are candidates for commissions in the Army, &c.—Terms on application to Mr. BLACKWELL, the Priory, Balham. Reference may be made to the parents of present and former pupils.

MILITARY COMPETITIVE EXAMINATION.—Lieutenants of Militia PREPARED, at 37 Cambridge Gardens, W. At the last September Examination, the following, out of Twelve sent up, were successful:—

C. H. Farquharson	5th	J. F. Campbell	23rd
J. E. Cullinan	12th	C. L. Crutchley	31st
C. W. Garraway	16th	B. T. Mahon	38th

Apply to D. C. FEENY, B.A.

WOOLWICH, SANDHURST, and MILITIA.—Mr. S. H. WINTER PREPARES PUPILS for Military and other Examinations. More than 200 of his pupils have passed, many of them taking very high places.—Connaught House, the Common, Woolwich.

SANDHURST, WOOLWICH, and LITERARY EXAMINATIONS for MILITIA OFFICERS.—Candidates for the above Examinations are PREPARED by Mr. G. M. HICKS, M.A., who receives a limited number. Thorough teaching and individual attention. List of recent successes on application.—5 South Row, Blackheath, S.E.

MR. ST. JOHN BOULTBEE, the Priory, Croydon (late Captain Massie and Boultbee), assisted by a Staff of Graduates of the Universities of Oxford and Cambridge, RECEIVES a Limited Number of Pupils to PREPARE for the Competitive Examinations for Sandhurst, Woolwich, and for the Militia. The number of Pupils is limited to TWELVE. Five Pupils out of Six were successful at the last Sandhurst Examination (July, 1882).—Terms, References, and other information, sent on application.

SUPERIOR and ECONOMICAL EDUCATION for SONS of GENTLEMEN only, in an excellent College School, at 30 guineas a year, and a few very moderate and reasonable extras. Unexceptionable and high-class parental reference as to thoroughness of teaching, careful supervision, and comfortable domestic arrangements.—Address, "HEAD MASTER, CANTABRIGIENSIS," care of Messrs. Terry, Stoneman, and Co., 6 Hatton Garden, E.C.

ARMY TUITION, WEST of ENGLAND.—H. A. JAMES, B.A. Cambridge, and A. J. DE H. BUSHNELL, M.A., Oxford, have been nine years engaged in preparing Candidates for the Woolwich and Sandhurst Entrance and the Militia Literary Examinations. Since June, 1873, for Military Examinations alone, 91 Pupils have completed their preparation at Hillcourt. Of these, 76 have passed. The number in the house is limited to 15.—For terms and references, apply to HENRY A. JAMES, Hillcourt, Marle Hill, Cheltenham.

THE GRANGE, Cowes.—Rev. ARTHUR WATSON, M.A., Graduate in Honours, Cambridge, PREPARES for Public Schools, Naval, and other Examinations. 1st, 3rd, 4th, 5th, &c., places for Naval Cadetships, a First Class at Oxford, and other Honours have been gained. The NEXT TERM commences JANUARY 25.

HOME EDUCATION.—A CLERGYMAN'S WIFE, near London, wishes to meet with a GIRL about fifteen to EDUCATE with her only Daughter, who is attending M. Roche's French Classes. There are special advantages for German, Latin, and Music. Terms moderate.—Address, "M. C.," Montpelier House, Blackheath.

TO ARMY TUTORS and OTHERS.—A most convenient DETACHED RESIDENCE at Lewisham, on the high road (and well seen from the railway), near station and Blackheath. Contains about 20 rooms and complete offices; good garden. Rent, £125. Elegantly redecorated; ready for instant occupation. Stabling adjoining can be had if desired. The lease can be purchased at a very moderate price.—Address, "T. P.," The Laurels, Lower Sydenham, S.E.

MANITOBA and the CANADIAN NORTH-WEST, through which runs the

CANADIAN PACIFIC RAILWAY.

FARMING and GRAZING LANDS for SALE.
Easy terms to actual Settlers.

If you desire to receive, free of charge, the Railway Company's New Regulations for the Sale of Lands in the Canadian North-West, and also the latest Maps, Pamphlets, &c., containing the latest information about the country, address—

ALEXANDER BEGG,
Canadian Pacific Railway Offices,
101 Cannon Street, London.

QUEENSLAND INVESTMENT and LAND MORTGAGE COMPANY (Limited).
Head Office—50 Old Broad Street, London, E.C.

DIRECTORS IN LONDON.—Sir Robert R. Torrens. K.C.M.G.; Archibald B. Buchanan, Esq., late M.L.C.; General the Hon. W. Feilding; George N. Marten, Esq.; W. H. Maturin, Esq., C.B.; J. L. Montefiore, Esq.

2/- TEA OF EXTRAORDINARY QUALITY,

As Supplied to Dukes, Earls, Barons, and the County Families of England.

THE unprecedented depression in the Tea Market now enables COOPER COOPER and CO. to offer such value in Tea as would, a few years ago, have been considered simply impossible, but is now a realised fact, for at

TWO SHILLINGS

A POUND,

COOPER COOPER and CO. are able to supply Tea of amazing strength and exquisite quality, while the choice kinds at Three Shillings a pound, which are coming to hand in lessening quantities year by year, COOPER COOPER and CO. have the greatest difficulty, after ransacking the markets of China and India, in procuring in sufficient quantities for their consumption. These choice and selected Teas COOPER COOPER and CO. have the honour to supply to many Foreign Princes, Potentates, Ambassadors, &c.

THE enormous success—without competitors and with no rivals—which has attended the sale of COOPER COOPER and CO.'s Teas is perhaps unparalleled in the annals of this or any other trade, and can only be accounted for by the way in which their business has been conducted, which has gained the patronage of all classes. COOPER COOPER and CO. number among their customers Princes, Dukes, Earls, Barons—in fact, a large per-centage of the entire Peerage—Church dignitaries of every grade, and ministers of all denominations, County Families from every county in Great Britain, and from all classes of the community. COOPER COOPER and CO. are also shipping their Teas every day to foreign parts. Paris would appear to draw its supplies from COOPER COOPER and CO.'s Stores, and in almost every large city, and especially in the seaport towns of Europe, Asia, Africa, and America—in fact, to the very ends of the earth—COOPER COOPER and CO.'s Teas and COOPER COOPER and CO.'s name are known.

COOPER COOPER and CO. have their own Agents in China and India, and are consequently able to sell their Tea at a price which is actually under that which wholesale merchants, brokers, &c., charge to ordinary dealers. They are enabled to do this as they have not the expense of travellers, and no bad debts to provide for, their terms being strictly for nett cash before delivery. They also save an immense amount by keeping no horses and vans—many houses having from 20 to 100 horses, vans, and two men to each, to deliver, sometimes, half-a-pound of tea miles and miles away, this overwhelming expense having all to come out of the quality of the Tea.

COOPER COOPER and CO. have, in fact, no expense but indispensable rent and labour, which in consequence of still-increasing business, amount only to a fraction on the price of the Tea they sell.

COOPER COOPER and CO. may mention that they include among the regular buyers of their Tea a great many London Tea Brokers, from the simple fact that it can be purchased cheaper and better from them than from the importers themselves

---

COOPER COOPER and CO. sell their Teas for ready money only. They have thus no provision to make for bad or doubtful debts.

AND now a word about this year's crop. It is hardly satisfactory on the whole, but some of the choice crops secured by COOPER COOPER and CO. are simply delicious, COOPER COOPER and CO. are still enabled to sell the very best at Three Shillings a pound, and it is veritably a marvel of goodness—a "thing of beauty" and "a joy for ever." But the most astonishing thing of modern times is the Tea at Two Shillings a pound which COOPER COOPER and CO. are now selling. The rich and wealthy buy this Tea. Ladies drink it in their boudoirs and at their early drums, and, as one of our country patrons writes, "It is lovely."

COOPER COOPER and CO. may add that Indian Tea is becoming day by day a greater favourite among the best judges, and this year's crop has been prepared with greater care than ever. It is strong, pungent, with most agreeable flavour, and the better it is known, the more it will be liked. The Tea is 3s a lb., for the best.

COOPER COOPER and CO. charge threepence a package (of any size) for delivering their Teas at any of the Railway Stations in London, or any place within the limits of the London Parcels' Delivery Co., thus putting all on an equality; those who send for their tea, and those who require it sent.

COOPER COOPER and CO. do not pay railway carriage, but are willing to compound for the same on receiving the sum of 6d. in addition to the price of the Tea, to any Railway Station in England, on quantities of the value of £2 and upwards. Families residing in the country can thus, by clubbing together, have their Tea sent almost carriage free, as well as save about 9d a lb. in the cost.

COOPER COOPER AND CO.,

50 KING WILLIAM STREET, London Bridge; 63 BISHOPSGATE STREET WITHIN, E.C.; 268 REGENT CIRCUS, W.;
35 STRAND (near Charing Cross), W.C.; 7 WESTBOURNE GROVE, London, W.

THE MONTANA COMPANY, Limited.—The SUBSCRIPTION LISTS will be CLOSED on or before THURSDAY, JANUARY 25.

ISSUE OF 200,000 SHARES OF £2 EACH,

BEING THE UNAPPROPRIATED CAPITAL OF

THE MONTANA COMPANY, LIMITED

INCORPORATED UNDER THE COMPANIES' ACTS.

To acquire and work the DRUM-LUMMON REEF, Marysville, Montana, U.S.A., believed to be one of the greatest Silver and Gold Mines in the World.

CAPITAL, £600,000, in 300,000 SHARES of £2 EACH,

OF WHICH 100,000 ARE TAKEN IN PART PAYMENT OF THE PURCHASE-MONEY.

PRICE, Par, or £2 per Share, payable as follows:—Two Shillings per Share on Application, Eight Shillings per Share on Allotment, Ten Shillings per Share on March 10th, 1883, Ten Shillings per Share on April 10th, 1883, Ten Shillings per Share on May 10th, 1883; or the Shares may be paid up in full on Allotment.

The Mine being already opened up to a sufficient extent to admit of working upon a large area, early profits may be expected, which will be largely increased upon the completion of additional crushing and other machinery.

SECRETARY.—Mr. James Johnston.

OFEICES:—30 and 31 ST. SWITHIN'S LANE, E.C., London.

ABRIDGED PROSPECTUS.

THE DRUM-LUMMON SILVER AND GOLD MINE, which has been agreed to be purchased by the Montana Company, Limited, has been personally inspected and examined by John Darlington, Esq., of Coleman Street Buildings, London, Mining Engineer, and by Stewart Pixley, Esq., head of the firm of Pixley and Abell, the well-known Bullion Brokers, of 27 Old Broad Street, London.

The following is a summary of the conclusions arrived at from the Reports of the various Engineers:—

> That the Lode is of the unusual width in the main cross cut of 80 feet, consisting exclusively of a pure quartz matrix, of ample richness to yield large and lasting profits.
>
> That although the operations hitherto have mainly been for the purpose of opening out the Lode, the whole of the quartz removed has been milled, and has proved sufficiently valuable to pay the entire cost of the work and leave a considerable balance, notwithstanding that assays show that as much as £5 of bullion per ton has been left in the Tailings.
>
> That the quartz obtainable in the present workings upon a space 150 feet deep, and 375 feet in length, after making liberal allowances for low grade and sterile portions, and taking only 60 per cent. of the width of the Lode, is exceptionally large,—150,000 tons,—of the estimated value of £750,000.
>
> That at the depth of 150 feet, the Lode maintains the same appearance as above that level, and that the prospect of obtaining additional supplies in advance of and below existing workings amounts to a practical certainty.

Mr. Stewart Pixley's conclusions coincide with the above, with the following additions:—

> That taking a greater width of the Lode, but still much within the width of 80 feet, the present workings, at the depth of 150 feet, contain 260,000 tons of ore, estimated to be worth, say £1,300,000.
>
> That in each side (North and South) of the area of the present workings, at the same level of 150 feet, the quantity of ore may be estimated to be over one million tons.
>
> That assuming the Lode to hold out down to the proposed 550 foot level, to which it can be economically worked, the ore contained would, on the same basis of calculation as above, amount to from 3,000,000 to 4,000,000 tons, sufficient to keep the mine at work for the next one hundred years.

This extraordinary mining property is situated on the side of a steeply inclined mountain at Marysville, a small town about 20 miles north-west of Helena, the capital city of the territory of Montano, in the United States of America.

The lode within the limits of the exploration is entirely filled with quartz, consisting of Gold and Silver Ores, and is of the width of 80 ft. between the foot and hanging walls.

The hanging wall is composed of granite, and the foot wall of elvan.

Both underground and surface workings prove that the lode is a well-defined fissure vein of enormous size and strength; that the structure, texture, and character of the vein is highly satisfactory; and that the whole body of it will in all probability yield an average of $40 per ton of 2,000 lbs.

The continuation of the lode in depth is geologically a practical certainty.

The extraction of the quartz and drainage of the lode are effected at present by means of a day level or tunnel. A second day level or tunnel to work and drain the lode at the depth of 550 feet from the surface, is intended to be driven at a depth of from 300 to 400 feet lower than the existing tunnel. By means of these two tunnels the mineral can be readily and cheaply extracted from the lode for a very great number of years to come, without any necessity for either winding or pumping machinery.

The statements made as to the value of the ores do not depend upon assays, but upon the actual working of from 6,000 to 7,000 tons of quartz removed from the mine over a period of about four years.

Every ton of ore taken out has been fit to mill, and has returned a profit, and notwithstanding the extent to which the mine is developed, there are no waste heaps.

The result thus obtained has been that during the last two years 72 sales of bullion have been made to the United States Assay Office, Helena, which realised a net amount of £7 12s. per ton.

The original owner, from whom the vendors have acquired the property, has stipulated that he shall still retain one-third interest in the mine.

The Directors are happy to state that they have succeeded in securing the valuable co-operation of the Messrs. Matheson and Co., of London, as the agents for carrying on the commercial part of the business of the Company, thus ensuring the most efficient and careful management in that respect.

Complete prospectuses, containing full particulars, may be obtained, with Forms of Application, from Messrs. Brunton, Bourke, and Co., the Company's Brokers, 18 Finch Lane, E.C., London; Messrs. Lawrie and Ker, Edinburgh; or Messrs. Auld and Guild, Glasgow; or at the Offices of the Company, 30 and 31 St. Swithin's Lane, London.

By order of the Board,
N. STORY MASKELYNE, Chairman.
JAMES JOHNSTON, Secretary.

SPECIAL SUPPLEMENT TO THE

ARMY AND NAVY GAZETTE.

JOURNAL OF THE RESERVE, AND AUXILIARY FORCES.

No. 1,200.—Vol. XXIV.] SATURDAY, JANUARY 20, 1883. [REGISTERED FOR TRANSMISSION ABROAD.} GRATIS.

THE INVASION OF THE CRIMEA.

In our last issue we took the opportunity of offering a few observations on Mr. Kinglake's Preface to the Seventh Volume of "The Invasion of the Crimea," and of pointing out the facile manner in which the gifted author of "Eothen" converted that preface into a spirited but one-sided description of the recent British operations in Egypt. At present, we wish, without criticising the complete volume, to transcribe a few important passages, which can scarcely fail to prove interesting. In the ninth chapter of this volume, Mr. Kinglake treats of newspaper correspondence in the Crimea, and thus sketches the modern war correspondent:—"The bold, skilled, sagacious envoy whom the conductors of our modern newspapers despatch to a seat of war is a member of what has now become an interesting, chivalrous profession, with not only its recognised duties, but also a code of honour, implying so much of the military spirit that he who chooses to follow this venturesome calling is accustomed to hold himself in readiness for instant, unquestioning obedience, when ordered off on short notice to meet toil, privation, and danger in any part of the world. How successfully, in the face of besetting difficulties, such an envoy can plant himself upon the spot where light may be expected to fall, how he winnows away the fables surrounding him in the tumult of camps and fastens upon the dim-looking truths, and gives them besides their significance, and sends them on their magic flight homewards!" Mr. Kinglake next turns his attention to Mr. Delane, and his task as Editor of the *Times*. A theme of no ordinary interest is thus presented to the historian. To handle it in the masterly manner it is worthy of requires all the literary skill, all the keen perception of human nature, and all the descriptive power which belong to the author of "Eothen." In his opinion, Mr. Delane, far from being well fitted by nature to play the cold part of a censor, and defend the country against a mighty torrent of motives tending all of them in favour of publicity, the great editor —florid, bright-eyed, in the prime of keen life, and beaming with zeal—was a man of warm, swift-coursing blood; a man of those qualities which, in speaking of wine, are called full-bodied and generous; a man of great ardour, great eagerness, and one passionately imbued with that very spirit of journalism which, if he would save his country from being harmed by the *Times*, he needs must bridle and moderate. The editor of the *Times*, moreover, was so constituted that, like the devoted liegeman of chivalrous times, like the advocate still often found in modern courts of law, he could not only "take up" with vehemence the cause that he had to support, but become its convinced partisan, and therefore, his ready obedience to all the words of command which from time to time laid down anew the varying path of the newspaper, does not prove him to be consciously acting in a spirit of servile ductility. On the contrary, those who best knew him claim a right to believe that with every alteration ordained, he himself really, honestly changed. Mr. Kinglake points out how well Mr. Delane was fitted to become a director of the Press, were it only from his early training, both mental and physical, which tended to mould his character and form his habits of thought. There can be no doubt that Mr. Delane was fully conscious of the responsibilities he accepted when called in (to use Mr. Kinglake's words) to steer the great journal in calm and in storm, to be arbiter of the policies of States and the reputations of men, to have the strength of mind and body that the labour required, and to be all the while exulting, unaffectedly exulting, in the task. This, one sees, was to have intense life, and, Delane's genial nature inclining him to let comrades share the elixir by hearing the things he could tell them, his society, as may well be supposed—and this especially at critical periods—was beyond measure interesting to men who cared eagerly for the actual state of the world. Mr. Kinglake further observes on the peculiar facility possessed by Mr. Delane of bending the conversation in such a way as to avoid coming into dispute with his comrades, and liked best to reinforce what they said by conveying in anecdote some fragments of that rare knowledge concerning men and their motives with which he was always abundantly armed.

NOTES FROM ALDERSHOT.

(FROM AN OCCASIONAL CORRESPONDENT.)

The departure of the 103rd Royal Dublin Fusiliers has been cancelled, and it is expected that shortly the strength of the Division will be augmented by the arrival of two or more regiments. Quarters for four battalions, now unoccupied, and dismantled some months ago of barrack furniture, which was sent to Egypt, are being refitted throughout with new furniture, and being prepared for occupation. Major-General Willis's Brigade (2nd) still consists of only one battalion. Two more regiments at least can be accommodated in the quarters allotted to this brigade. Divisional duties have always fallen rather heavily on officers stationed here, and an effort has been made this week to lighten these duties by discontinuing the Divisional Captain of the day, a duty which, up to last Saturday, has been diligently performed daily since the formation of the Camp. The duties of the Divisional Captain were to assist the field-officers of the day in visiting the divisional guards by day and night, and inspect bread and meat daily. The field-officer will now do the whole of the guards, and the Captain of the week will inspect the bread and meat, as well as the forage, his original duty. The following non-commissioned officers on the permanent staff of the Yeomanry Cavalry have been ordered to join the School of Instruction for Auxiliary Cavalry Forces at Aldershot (Captain E. Hegan, 5th Dragoon Guards, Commandant) on the 1st prox., for the purpose of undergoing a course of instruction in the new Cavalry drill:—Serjeants Barber, Royal Bucks; Stride and Freestone, Dorsetshire; Kirby, Montgomery; Usher and Cooke, Worcester; Sinton, North Somerset; Dobbs, Medcalf, and Douglas, Shropshire; Miniar, 1st West York; Robinson, Yorkshire Hussars; Simpson, South Notts; Nicoll, East Lothian; and Hemsley, Warwickshire. Lieutenant-Colonel Weldon, Madras S.C., is now at Aldershot for the purpose of imparting instruction in the use of the new range-finder, his invention. This instrument will be supplied to several batteries of Artillery and battalions of Infantry here, and the experimental trials will extend over a period of three months. The following officers joined the Veterinary School at Aldershot on Monday last, for a course of instruction (Veterinary-Surgeon to the Staff, W. B. Walters, Instructor):—Lieutenant-Colonel Alleyne and Major West, R.A.; Captain Peckham and Lieutenants Long, Forester, and the Hon. C. Bingham, 3rd Hussars; Lieutenant Daly, 15th Hussars; Lieutenant Littledale, R.E.; Captain Gillon, 71st Highland L.I.; Lieutenants Deane and Urmston, Bengal S.C.; Lieutenant Parkinson, 28th Gloucestershire Regiment; Captain Dumaresq and Lieutenant Lumb, Commissariat and Transport Corps. Lectures are delivered five days a week. A Court of Inquiry, consisting of Lieutenant-Colonel Luck, C.B., 15th Hussars, president; a Field-Officer, Royal Artillery; and a Field-Officer, 1st Brigade, members, assembled at the Divisional Court-martial Room, South Camp, at 10.30 a.m., on Friday, to inquire into and report upon a matter that was laid before it, and which is generally understood to have some connection with the unauthorised removal from Egypt to Aldershot of various articles, some of them of a remarkably curious kind. Many rumours on this subject have been in circulation during the week. The court of inquiry is but a preliminary investigation, and it is not unlikely that more will be heard of the matter. Lieutenant A. E. W. Colville, 3rd Battalion Rifle Brigade, has been examined for promotion to the rank of Captain in subjects (*a*) and (*b*), sec. 4, par. 28, Queen's Regulations, and has been found qualified. Captain F. W. Bennet, R.E., and Surgeon-Major W. H. McNamara, M.D., A.M.D., have arrived at Aldershot for duty. Lieutenant-Colonel C. E. Scott, R.H.A., has been ordered to proceed to Portsmouth on special duty. War-games were played during the week by the 26th Cameronians and 87th Royal Irish Fusiliers, assisted by Royal Artillery and Cavalry. A large and important meeting was held on Monday last in the Divisional Court-martial Room, Major-General Sir F. FitzWygram, Bart., presiding, at which were present representatives of all corps and departments in the command. The affairs of the Divisional Races and Divisional Dramatic Club were fully gone into, a secretary for each appointed, and arrangements made for publishing a programme of the Spring Steeplechases, and for giving theatrical performances at the Club-house at an early date. This meeting, though long in coming, is certainly a step in the right direction. A number of warrant and non-commissioned officers, members of the Divisional Staff Serjeants' Mess, met together a few evenings ago, in their comfortable mess-room, Q Lines, South Camp, to make a presentation and bid God speed to Mr. Johnson, late Garrison Serjeant-Major, on the occasion of his leaving the Army to take up a Civil Service appointment at the Cape. The present was a handsome solid silver liqueur-stand, on which is suitably engraved the good wishes of his comrades. Mr. Johnson held for five years the position of Garrison Serjeant-Major at the Camp. General Sir Daniel Lysons, K.C.B., having returned from the Continent, will shortly resume command of the Division, which has been held during his absence by Major-General Sir Frederick FitzWygram, Bart. The inhabitants of the town of Aldershot profess to be much disappointed that Brighton has been selected for the Easter Monday Volunteer Review, as stated; the Clerk of the Local Board of Health here having written to the secretary of the commanding officers, pointing out the advantages that would be derived if Aldershot were chosen for this purpose. That the tradesmen of Aldershot would derive much benefit in such case, cannot be doubted; but, notwithstanding the blandishments of the local magnates, I much doubt if ever the Volunteers will be persuaded to select Aldershot for an Easter Monday Review.

FORMATION OF A SECOND GERMAN IRONCLAD-CRUISING SQUADRON.

In our issue of December 30 we gave the names of the ironclads destined to compose the first or sea-going German squadron of evolution. We now hear that a second squadron, consisting of the Sachsen, Bayern, and Würtemberg, will be formed, to cruise solely in the Baltic. The three vessels are sister-ships, and are officially styled, "Ausfall or Sortee Corvettes." These ships have displacements of 7,400 tons, and carry six $10\frac{1}{4}$-in. Krupp guns each. They are intended for coast defence, and for operations at not too great a distance from home, as they are mastless. Herr von Stosch, the German Minister of Marine, is greatly averse to commissioning vessels-of-war simply for experimental purposes; but two reasons are said to have induced him to make an exception in the case of these corvettes, namely, the reports of the captains who conducted the sea-trial trips of several vessels of this class, and the hostile attitude lately assumed by the Russian Press. The reports above referred to were to the effect that, even in comparatively smooth water, the ships rolled and pitched to such an extent as to render their guns almost useless; and that the pumps had to be constantly kept at work, to clear the water out of the open barbette batteries. These circumstances alone would have sufficed to induce the Minister to order the formation of a squadron, for the purpose of testing the sea-going qualities of the Sachsen class in the weather usually met with in the Baltic; but that this decision was confirmed, if not hastened, by the hostile feelings lately exhibited towards Germany by the Russian Press, is certain, and has naturally made German Naval administration desirous of making their officers well acquainted with a class of vessel destined to play an important part in a war with Russia; for, whatever may be the faults of the four vessels of the Sachsen class, they are certainly more than a match for any fleet of ironclads the Russians are able to send to sea.

THE EQUIPMENT OF INFANTRY.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—With reference to your article on the Oliver accoutrements, in a recent issue of your *Gazette*, I hope you will allow me to make the following remarks:—I have no personal knowledge of this equipment, which, I have no doubt, possesses many advantages; but in adopting it, or any other, there are two main points which do not appear to have been sufficiently considered. These are the nature of the weapon now carried by our soldiers, and the marked deterioration which has of late years taken place in their stature and physique, consequent upon the adoption of the short-service system. The latter fact is only too apparent to every observer, and has been again and again commented upon. We have placed in their hands a weapon with which they can in a few minutes fire away a great number of cartridges, and yet we have not provided them with accoutrements calculated to meet this vastly-increased expenditure of ammunition, and the want of such consideration has on several occasions been most painfully apparent, and led to most disastrous results. Young and undergrown ponies cannot carry the same loads as horses of more mature age, and yet we seem to expect that the youthful striplings now composing the main bulk of our regiments shall possess the same strength as our soldiers of former years, infinitely their superiors in everything calculated to give physical powers and endurance. Having made these preliminary remarks, I will proceed to state what I consider would be the most serviceable equipment for the Infantry soldier, constituted as he now is. *Boots*—The Glengarry boot, as supplied by the Co-operative Boot Company in the Haymarket, is the most comfortable and useful boot for general purposes. It consists of a boot reaching to the ankle, fastened by a single strap and buckle, which, while giving all necessary support, is put on and off in a moment, never shrinking and becoming unwearable, as so often happens to the ammunition boot, so long the bane of the soldier, invariably giving him sore feet after every long march. *Socks*—Well-made, hand-knitted, woollen socks or half-hose, in various sizes. *Drawers*—Flannel or woven, of woollen material. *Trousers*—Knickerbockers or knee-breeches, made loose down to the knee, with belt round the waist, to obviate the necessity of braces, of the same material as the coat. *Gaiters*—Of black leather, reaching from the knee to the ankle, with metal buttons fastened on by means of a screw and socket, which never break or get out of order. *Jersey*—Of woollen material. *Shirt*—Of coloured flannel, with turn-down collar of the same material. *Neck Handkerchief*—Of black silk, tied in a sailor's knot. *Waistcoat*—Of the same material as the coat. *Coat*—Of closely-woven woollen material, calculated to repel the rain, made as a Norfolk jacket, with a rolling collar, but without a belt round the waist. *Cap*—A light forage cap, with peak to protect the eyes from the glare of the sun, the Glengarry bonnet at present in use being most objectionable in every respect, exposing the eyes of the unfortunate wearer to the full light of the sun, and the nape of the neck to the rain. *Colour*—Dark green, or the dark blue now so generally used for the lining and cushions of carriages, as being a fast and unfading colour. *Great-coat*—Of light, but closely-woven woollen material, calculated to repel the rain, to be carried rolled over the left shoulder. The ammunition to be carried in a leathern belt round the waist, with waterproof flap, so made as to be quickly filled with cartridges and revolved without difficulty, so as to bring the supply of ammunition easily to the front. All the rest of the soldier's kit to be carried by the Land Transport Corps in waterproof bags calculated for the purpose. The Boers in South Africa were dressed and accoutred more or less in the manner above mentioned, and their vast superiority to our soldiers, both as rifle-shots and skirmishers, became at once apparent. I would add that however great may be the ingenuity exercised to contrive a suitable equipment for the soldier, it will on every occasion be found necessary that he should at once be relieved of the unnatural weight given him to carry, and of everything except his rifle and ammunition, when called upon to fight, to make long marches in a hot climate, or any active exertion requiring the full exercise of his physical powers. The evening before the night march on Tel-el-Kebir, we are told that all baggage was left in camp at Kassassin, to be sent on the following day, which, no doubt, comprised knapsacks and everything else the troops could possibly dispense with. Had they been called upon to carry these, they would not have been able to make the sudden rush over the ramparts which they did so successfully. The attack would, consequently, have failed, and they would thus have been deprived of all the prestige and of the honours which have awaited them since their return from Egypt.—I am, Sir, &c.,

A Deputy-Inspector-General of Hospitals
on Half-pay.

ESPIONAGE IN THE NAVY.

TO THE EDITOR OF "THE ARMY AND NAVY GAZETTE."

Sir,—Seeing that the Lords Commissioners of the Admiralty have been pleased to mark their approval of the conduct of Ship's Corporal Hadden, of H.M.S. Clyde, in reference to the late Clyde scandal, by promoting him to the rating of Master-at-Arms, I would venture to suggest that there are other officers in that ship, whose conduct in reference to the said scandal should be considered equally deserving of recognition by their Lordships. I do not know the Paymaster of the Clyde, but a correspondent in one of your contemporaries (the *Aberdeen Daily Free Press*), thus describes him, "Mr. Keogh is, no doubt, an honourable man, conscious of the importance of his position, and jealous of the integrity of the Queen's Navy." But having read the evidence of Mr. Keogh at the court-martial on Com. Heron, I think it would be difficult for that correspondent to maintain that Mr. Keogh's exhibition of the qualities he ascribes to him, was (in connection with these frauds, as he is fond of designating the transactions which formed the subjects of inquiry by the courts-martial) at all times all that could be desired. Here is Mr. Keogh's statement, on oath:—"He [Mr. Fitzgerald, gunner] made use of a remarkable expression to me in the office, to the effect that he got little enough from the Service, and that he meant to lay his hands on everything he could. He also stated that he did not intend to keep any rough accounts, as the Admiralty did not pay him for it." I can well imagine the feeling of surprise, not unmingled with contempt, with which that distinguished officer, the President of the Court, immediately on hearing the above statement, put this question to Keogh,—"Was this reported by you to the captain?" Nor is it difficult to imagine the feeling of something very like disgust with which every member of the Court must have listened to the answer,—"No; the gunner has spoken to me in two ways at various times, in a diffident way at one time, and in an authoritative way at other times. He was second in command of the ship, and when he made those statements to me, he spoke in an authoritative manner. I took them as orders, and I did my best to comply with them." What the authoritative orders were in the above statement which Mr. Keogh did his best to comply with, we are not precisely informed, but judging from Mr. Keogh's silence on the matter until subjected to a cross-examination on oath, it is probably not an unfair inference to draw that the said orders must have had something to do with Mr. Fitzgerald's projected robberies, in which Mr. Keogh was required to give his assistance—if not by active participation, at least by silent connivance. It might be interesting to know what Mr. Keogh's definitions of diffidence and authoritativeness are. Most people, I presume, would suppose that this exemplary gunner, to whom these qualities are by turns ascribed, was devoid of diffidence, as he evidently was of honesty. On Mr. Keogh being further questioned whether he had reported Mr. Fitzgerald's neglect of duty in not keeping his rough account-books, he replied, "I did not report to Capt. Heron that the gunner neglected his duty in not keeping those books, because the gunner was second-in-command of the ship, and I hoped, in course of time, to persuade him to keep his books." Truly, Mr. Keogh herein displayed a fine "consciousness of the importance of his position," and of his "jealousy of the integrity of the Queen's Navy!" He, a commissioned officer, ranking with a major in the Army, to permit an avowedly dishonest rascal of a warrant officer to come into his office and grossly insult him, by telling him that he intended to steal everything of Government property he could lay his hands on! Further, to impudently tell him that he did not intend to keep his rough accounts, but impliedly that Mr. Keogh must keep them for him, to all of which the Paymaster listened, not only without remonstrance or complaint, but did his best to comply with." It is sincerely to be hoped, for the honour of the service, that there is not another paymaster in it who would submit to such a degradation. Then we have Mr. Adolphus Keogh, paymaster, inquiring of Mr. Adolphus Haynes, writer, what authority there is for purchasing firewood for the ship? to which the latter Adolphus replies that there is no Admiralty authority for the purchase, but that it has been the custom to purchase two tons annually. Mr. Bullen, in his defence of Capt. Heron, said that Mr. Keogh had one idea. That idea was fraud. He scented fraud in everything, said the barrister. Mr. Keogh stated that he had repeatedly protested against a fraud that had been going on for eight years, namely, paying 40s. a ton for firewood, the proper price being 25s. But Mr. Keogh ought to have known that there was no necessity for these repeated protestings, that they were entirely superfluous, that they were, in fact, in themselves a dereliction of duty; that if he discovered any fraud on the part of any one, no matter who, in the purchase of stores for her Majesty's service, it was his duty instantly to report it to the Rear-Admiral in command of the Naval Reserves, who would immediately have ordered an investigation thereon. If Mr. Keogh did not know this to be his duty, or, knowing it, did not perform it, he was in either case totally unfit for his position. Corporal Hadden evidently knew his duty, and performed it as best he could. Their Lordships of the Admiralty have fitly recognised the Corporal's integrity; although in previous cases they have visited their displeasure on officers for performing their duty, when by so doing they exposed their commanding officers. Whether they will as fitly recognise the Paymaster's remains to be seen.—I am, &c.,

Nauticus.

Sir,—I have always considered confidential reports most objectionable, as affording a captain the opportunity of blasting an officer's character behind his back, if he is disposed to do so; and there are, I fear, some capable of such conduct.—I am, &c.,

Post Captain.

H.M.S. THALIA.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—Observing in your "Naval Notes" in the *Army and Navy Gazette* of Jan. 13 a paragraph stating that the Commander-in-Chief at Devonport had to interfere on board the Thalia, where the crew were almost in a state of mutiny, owing to their leave being stopped, &c., I beg to acquaint you that such is not the case. The *Western Morning News* published a paragraph to that effect in error, but it was fully contradicted afterwards by the same paper, only too late to be seen by Capt. Brackenbury ere the Thalia left Devonport on her present voyage. I need not tell you that this misrepresentation has been a great source of annoyance, not only to Capt. Brackenbury, but also to the ship's company, who requested to be allowed to contradict it, which request was refused, on service grounds. In a letter received to-day from that ship, I am told everything is settling down, the ship getting into good order, and that she is most comfortable in every respect. I hope you will insert this letter, in justice to a kind-hearted, gallant, and talented officer, whose sole aim is to command a smart, efficient, and comfortable ship.—I am, &c.,

Old Shipmate.

Devonport, Jan. 17.

THE "7-POUNDER" IN EGYPT.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—An article in your issue of Dec. 30, 1882, draws attention to the good services done by the 7-pounder jointed or screw guns both in Afghanistan and Egypt, and to their movability over the sands of Egypt as well as in mountainous districts, for which they were originally designed. It may be interesting to supplement your remarks on the efficiency of this class of artillery in the country suitable for it, and with reference also to the paragraph in the *Army and Navy Gazette* of the 9th ult., commenting on Lord Wolseley's speech at the Civil Engineers' dinner, by observing that, though without "pack on back and gun on shoulder," the 7-pounder screw-gun battery attached to the Indian Contingent was, I believe, the only body of dismounted British troops which did march the whole distance from Ismailia to Cairo in the recent Egyptian campaign. After a rapid march from Ismailia to Kassassin, the battery was engaged in the action at that place on the morning of Sept. 9, and formed part of the force which held the ground in front of the Tel-el-Kebir lines during the rest of that day. On the 13th, it was engaged in the front attack by the Indian Contingent, under Sir Herbert Macpherson, south of the Canal, and in the attack on the Egyptian camp after the entrenchments were carried; and it then marched, without rest, to Zagazig, covering from 32 to 35 miles in about 20 hours between leaving camp at Kassassin and reaching Zagazig. which included a detour of about four miles caused by order, to cross from the south to the north side of the canal by a bridge beyond Tel-el-Kebir, which, it appeared, did not exist. After the delay of a week at Zagazig the battery marched to Cairo, about 50 miles in three days, mostly over heavy sand. And it eventually re-embarked for India, with, I believe, the whole of the animals it brought with it, in good and serviceable condition, with the exception of one mule, which was destroyed, after being badly wounded at Kassassin, returning whence it came in little than three months.—I am, &c.,

G. O.

ARMY NOTES.

The returns of sick for the whole of the forces in Egypt, dated Jan. 12, show that 28 officers out of 382, and 1,675 men out of 12,633, were then in hospital. The average of the cases among the cavalry in nearly 21, and among the artillery nearly 19 per cent. The sick-list for the first 15 days of January at Cairo alone shows 518 fresh admissions, and 11 deaths, of which ten were occasioned by enteric fever. Although, therefore, some improvement continues, it is manifest that the state of things is far from satisfactory. Both the nature of the illness and the character of the climate point unmistakably to the fact that the men are suffering from the hardships of the campaign, and that, especially with those who had the most trying work to perform, the only remedy is removal from the influence of a climate which, though generally healthy, is never favourable to rapid and perfect recovery from fever. There is no reason why those regiments which are suffering most should not be at once withdrawn.

The *Times*' correspondent at Cairo telegraphs:—"Opinions differ as to the number of English troops which are necessary to preserve order in Egypt, but the most timorous admit that the present number is excessive. Throughout the recent disturbances, Cairo was, perhaps, the most tranquil portion of Egypt, Alexandria the most turbulent, and the interior the most insecure. Yet, with less than 3,000 men at Alexandria, and 150 at Ismailia, we keep over 10,000 in Cairo. The removal of some of these would increase the chances of health of the remainder. Our political interest, moreover, lies in lessening as much as possible the burdens on Egypt, and proving the absolute sincerity of our intention only to preserve order by reducing the number of troops, I will not say to that which is absolutely necessary, but to that which even alarmists consider necessary. This would allow of the return of nearly half the force."

The Secretary of State for War has decided, says the *Standard*, to carry out some important changes in the administration of the War Office, the details of which are being worked out in view of the early appearance of the Army Estimates for 1883-84. These changes will have the effect of greatly facilitating the conduct of official business in the department presided over by the Surveyor-General of Ordnance. It is in consequence of the reorganisation of the office that it has been determined to leave open for the present the appointment vacated by Gen. Sir John Adye.

The *Standard* says:—"The Secretary of State for War has decided that the General Officers late promoted for distinguished service in the field in Egypt, viz., Gen. Lord Wolseley, Lieut.-Gen. Sir Archibald Alison, and Major-Gen. the Hon. Sir J. C. Dormer, shall continue as supernumeraries to the establishment of their respective ranks, until promotion has been obtained by the officers who would have stood next below them in their present rank had the General Officers above-mentioned had to await their promotion until it came to them in the ordinary course."

Major W. J. Barker (retired), Royal Marines, informs us "that he intends to set on foot a society, entitled, 'The Retired Officers' Employment and Mutual Aid Society.' Funds for its support, he suggests, might be raised from the following sources:—(1), Voluntary subscriptions from officers, Army, Navy, and Marines; (2), public subscriptions; (3), a Government grant; (4), to be maintained by fees from those for whom the society may from time to time provide appointments. He invites officers of the Army, Navy, and Marines who would assist him in the undertaking to communicate with him at 11 Catherine Street, Liverpool."

It is certain the Queen's Physician, Dr. Fairbank, has written strongly recommending Lentilla, or Tonic Daily Food. It cures indigestion, heartburn, constipation, liver and stomach complaints, &c., besides having such wondrous nourishing properties. Makes soup, puddings, porridge, biscuits, custards, &c. Tins, 1 lb., 1s 6d; ½ lb., 10d. Barrels, 28 lb., 30s; 14 lb., 16s. Of all Chemists.—Proprietor, H. J. Deacon, Beckenham, Kent.

MILITIA PATRONAGE AND RECRUITING.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—Your correspondent, "J. S. B.," who describes himself as a country parson, says that "energy and freshness are not unnaturally wanting in an old Linesman," and talks of Militia recruits enlisting in order to serve under the squire or the squire's son, of the men liking to serve under those they see all the year round, &c. Now, Sir, I have been a major in one of the best known of our Militia regiments for the last ten years, and the opinion that I have formed, and it is one which has been in every instance confirmed by the adjutants of other regiments whom I have questioned on the subject, is that the feeling which "J. S. B." describes is almost, if not quite, extinct. I will not say that it never existed in the old days of the Militia, when both officers and men were, as a rule, far less disciplined, far less efficient than they are now (I am putting it as mildly as I can). Militia recruits enlist for the bounty, many being also induced by the prospect of the month's "outing" every year. The officers whom they like most are those who know their duty best, and they look with great respect on those officers who they know to have served in the Regular Army, more especially if a bit of ribbon on the breasts of the latter shows that they have seen active service. "Tempora mutantur et nos mutamur" is very true of the Militia, which is now very different to what it once was. Were the whole of the officers taken from another county, I do not believe the difference in the number or the quality of the recruits would be perceptible. At the same time, I should be the last to deny that, from a social point of view, it is a great advantage to a Militia regiment that a large number of its officers should be men of position in the county. It would be far pleasanter to serve in a regiment so officered than in one the officers of which were more or less strangers to one another. From a professional point of view, their residence in or out of the county is of the slightest moment, and in no way affects recruiting. The professional and social stand-points are perfectly distinct. The "freshness" in which your reverend correspondent considers that ex-Linesmen are lacking is sometimes called "rawness;" and if "J. S. B.," being a country parson, is also a sportsman, I would ask him which he considers the more valuable hunter, the fresh (raw) four-year-old, or the seasoned hunter of six or eight years, who has thoroughly learnt his business? The ex-Linesman is also accused of being wanting in "energy," by which, I take it, a want of keenness is implied. Would "J. S. B." be surprised to hear that in the recent examination of Militia field-officers and captains in tactics, the only officer in the whole Militia force who obtained a "special mention" was an ex-Linesman? This does not look as if the non-professional were keener or more energetic than the professional or ex-professional.—I am, &c.,

A County J.P.

Sir,—The experience of your correspondent, "J. S. B." is, I must confess, different to mine, for as an old Linesman, and one who has been connected with two Militia regiments, I have learnt that the Militia soldier, so long as he gets his bounty and his pay, and is justly treated, cares very little as to whether he is officered by the squire's son or a stranger. In a Scotch Militia regiment with which I am acquainted, a very large proportion of the men are Irishmen and Roman Catholics. In the same way, a large proportion of an Irish Militia regiment come from Glasgow. The most important part of the question is, that the Militia should be efficiently officered, which I contend that it now is not. The remedy I would propose is that commanding officers should not be permitted, as they now are, virtually to appoint their officers. Some time ago, the War Office created a large reserve of officers. These men continually complain that they have no uniform, no status, and nothing to do. Let the authorities draft them as they are required into the various Militia regiments. Thus two difficulties will be overcome, and, moreover, the regiments will then be officered by men who understand what the interior economy of a regiment is. To my mind, this is the most important function of an officer. But to make the officering of the Militia regiments really efficient, it is absolutely necessary that a great number of the present commanding officers should be got rid of. Many of them are very inefficient, and several have not even qualified. A Militia orderly-room, when the prisoners are being told off, is often truly a painful sight. The commanding officer, knowing nothing of his business, has to be coached by the adjutant in front of the prisoners; and if he does take it upon himself to award a punishment, the chances are that it is a wrong one. Then the prisoner has to be brought back and informed of the mistake. In reference to my former letter, several ex-Linesmen have from time to time informed me that they would gladly enter a Militia regiment, but they are deterred by the sums of money that are sometimes demanded of them, as in the case to which I referred in a former letter. The squire's son, a young gentleman with, doubtless, plenty of money, may be able to pay these fees; but, as all real service men know, there are not many ex-Linesmen who can afford, out of their limited means, to pay from £40 to £50, in addition to all the other necessary expenses.—I am, &c.,

Light Infantry.

Sir,—There have appeared lately in your paper letters concerning the appointment of a certain captain to the 1st Warwickshire Militia. I notice that the officer commanding the battalion, in his published reply to these letters, alludes to the great difficulty he has in finding captains. The British public, I fear, take but little interest in the Militia, but those who know anything of the present organisation and condition of our land forces will, I feel sure, agree with me when I say that the maintenance of the Militia in a state of high efficiency is a matter of the utmost importance. Surely no one will assert that such a state of efficiency can be maintained without good officers, and therefore this difficulty in getting them (for very great difficulty there undoubtedly is) deserves consideration?

One of the reasons which I think makes the Militia service unpopular among Line officers of any standing, is the effect which the recent promotions of captains and majors of the Line to majorities and lieutenant-colonelcies has had in lowering the relative position of Militia majors and lieutenant-colonels with regard to them, inasmuch as the Militia lieutenant-colonels suddenly find themselves junior to numbers of Linesmen who, a few weeks ago, were majors; and, in the same way, Militia majors find themselves junior to hundreds of men who but quite recently were captains. Surely I shall not be found fault with for calling this a hardship and injustice? Take my own case as an example:—I served 20 years' in the Line, and shortly after retiring, as a major in the Army, about nine years ago, I joined a Militia regiment as major, which position I still hold. A few months ago, when Line majors and captains were promoted in such numbers as to give two lieutenant-colonels and four majors to each Line battalion, I suddenly found myself made junior to hundreds of these captains, some of whom were subalterns in my own regiment at the time of my retirement. Surely something might be done to rectify such a state of things? A similar promotion might be given in the Militia without detriment to the service at large, and at a very small cost to the country, or, if that is considered too great a boon, at least the honorary rank now held by officers of Militia, as some recognition of length of service, might be converted into brevet rank, so as to save them from this wholesale supersedure; and this could be done without any cost whatever to the country, and would go far towards making the Militia service attractive to old Line officers, who are just the men so much wanted in it. I trust that you will think this matter worthy of your notice.—I am, &c.,

Militia Major.

THE ADVANTAGES OF A MODIFIED REGIMENTAL MEDICAL SYSTEM.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—Any officer who has had a practical experience of the Army must feel that all that has been written against the above is the merest thrash, and nothing more. The proposition does not mean the revival of a number of small hospitals, and carrying about of medicine-boxes, but simply the appointment of a medical officer, and one only, to each battalion for five years, who would, when necessary, be available for duty in the stationary hospitals. This was the system introduced by Sir Galbraith Logan, when Director-General. Great pity they did not leave "well alone." Young and unmarried officers, instead of frequenting low hotels and miserable lodgings, would have pleasant comrades, a regimental club, where an officer could live comfortably, if not extravagant, for a sum not exceeding 6s. a day, with a monthly subscription of about £1 to keep up the establishment, with eight days' pay a year, or thereabouts, in addition, or about £125 a year. I ask you, where will a Medical officer get such advantages? If a young officer, he will live with soldiers, learn their habits and customs have his soldier-servant for 10s. a month, in good room (which he can furnish nicely, if a man of taste), the best society, and get into a good form, which never afterwards deserts him, get his rough corners rubbed down, learn respect for his seniors, and lose altogether his medical-student ideas,—incalculable advantages for any young man. The universal wish of the Army is to have a medical officer with each regiment, and it is very bad form to throw chimerical obstacles in the way, considering that without the *raison d'être* of an Army, Medical service would be nowhere. The Medical Department forgets that in the absence of this force of organisation, the Indian Government might at any time say, "We do not want you British medicos; we will hand the station hospitals over to our own officers, as you have so obligingly arranged that your presence in charge of English soldiers is no longer necessary." A nice howl there would be! But it would be a very melancholy one, as the best paid appointments, three surgeons-general, several deputies, and a goodly number of senior Medical officers would have to go on half-pay, with prospective chances of the Director-General being a thing of the past; a practical example of the old Latin motto, "Dum perdere vult, Deus dementat,"—as long as British regiments have with them their hospital, such a contingency could never occur. Dr. Crawford is an old regimental officer himself, has never shirked a bad climate or hard work, knows as well as any one that what works most smoothly is best, and the many advantages of a regimental club, should not be led away by one side or the other, but do what is best socially and departmentally. The medical staff can have, as of old, its own representative messes, where these messes can be procured—Aldershot, Netley, and a few other places—but where they cannot be, surely it is no advantage to have a home and personal friends. Without these, life is not worth living.—I am, &c.,

Common-sense.

MUSKETRY TRAINING IN THE ARMY.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—Permit me, through the medium of your columns, to offer my support to the views of "Dorsetshire" on musketry training in the Army. The late expeditions in the Transvaal and Egypt have, I think, conclusively proved that the shooting of our Infantry in the field is most lamentably bad in every way, and for which result the present system of training is altogether to blame. Firing at known distances at a target is a most necessary and useful training for recruits, but is worthless to prepare them, once trained for shooting in the field, where distances are unknown, and the objects to be hit present such a very different appearance to the conventional black-and-white targets of practice. The whole of the present system of musketry training is based on the one idea of how best to obtain a high figure of merit, which will look well in the returns and obtain praise from the authorities. In consequence of this, the actual shooting is of a very unpractical nature; all distances are known; no shooting in bad weather; a liberal doctoring-up of foresights and backsights by the musketry instructor with various-coloured paints; trial shots by the same at the targets; no hurry; men sitting down before their time arrives to shoot; direction of misses signalled, &c. No, Sir, depend upon it, if the present system of instruction continues, no improvement in field shooting by our Infantry may be expected, which, with our small Army, may yet prove of very serious consequences to the country. The new regulations of passing over the duties of instructors of musketry to officers commanding companies will not, if the present system be defective, improve the field shooting of the soldier, for no body of men could be more zealous or painstaking than the present Instructors have shown themselves. As for granting money prizes for individual firing, it could never have been intended that the public money should be expended in awarding men for becoming mere target shots, and when required to shoot down an enemy in the field, be unable to do so at the most ordinary distances. As "Dorsetshire" recommends, all shooting of "trained" soldiers should be carried out by sections at unknown distances, which system would require men to combine judging distance with firing. I would further suggest that the practice takes place in all weathers; any position to be allowed, but no painting-up of foresight and backsight permitted; water-bottles, haversacks, and great-coats to be carried; prizes to be awarded to the best shooting seven of each company, according to average of hits obtained. Honorary badges to be worn on the right arm by both officers and men of the best shooting company in each battalion, for a year. No classification to be published as to the shooting of different regiments. Targets to be of iron, and cut out to represent the figures of men. All good hits to count two points; ricochet, one point. But for any system of musketry instruction to bring good results, it must be clearly understood and acted up to, that it is of far greater importance than bayonet exercise, manual exercise, change front on No. 5, and marching past.—I am, &c.,

Reform.

RESERVE OF OFFICERS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—Allow me to return you my sincere thanks for your kindness in allowing my letter with the above heading to appear in your influential journal, the refuge and resource of those unfortunates in the services (and they are many) who have just grievances, or who want information. I was also very glad to read "X.'s" letter in your last issue, as it proves that the same doubts which occurred to me have been felt by other officers, and because I feel sure that in these times the only way to get things done by the "powers that be" is to force what is required on their notice through the publicity afforded by the Press. "X." mentions an instance of a Reserve officer having been refused employment in the late campaign, on the ground that he was not in the Army; for the "use and guidance" of any similar applicants in the future, I beg to make the following quotation from "our only General's" despatch, dated Cairo, Sept. 24, 1882, and published in a supplement to the *London Gazette* of Tuesday, Oct. 31, 1882 (date of Supplement, Nov. 2, 1882):—"23. Of all those who have taken a prominent part in this campaign, none have had harder work, and none have done better work than all ranks in the Mounted Infantry . . . . . . when the command devolved on Capt. Lord Melgund, *Army Reserve* [the italics are mine], who, having been wounded on Aug. 24, lately returned to duty." This of itself is, I should think, enough to show that being in the Reserve constitutes being in the Army, as Lord Wolseley does not even refer to Lord Melgund's being a captain in the Roxburgh Mounted Rifle Volunteers, and it is to be presumed he considered him in the Army, since he allowed the command of the mounted infantry to devolve upon him. Since my letter to you, I have succeeded in getting some little information on one, at least, of the points about which I wrote to you, namely, that referring to the wearing of uniform. I am informed that in the next issue of the "Dress Regulations" there will be a uniform for Reserve officers. The exact details are not given, but it appears to be a kind of unattached uniform. This means, for cavalry officers joining the Reserve, that on retiring they must provide themselves with a new kit, if they wish to appear as soldiers at the Court of their Sovereign; and that if they are afterwards employed in their own arm of the service, they must then provide themselves with cavalry uniform. This, to me, seems absurd. No one, I should think, would maintain that Reserve officers should wear the uniform of their late regiments unchanged; but I opine the proper thing would be to allow the Reserve to wear the uniform of the regiments they formerly belonged to, subject to such a change in the lace or facings that, while it would plainly appear what arm of the service, and, if possible, what regiment, they had served in, there should be no danger of mistaking them for officers on full pay. If this were done, officers would be put to a minimum expense, and they would have the proud feeling that, although circumstances had compelled them to retire, they still, albeit distantly, were part and parcel of the old corps in which they had served. It would also be desirable if, when regiments are ordered on active service, instead of calling for volunteers from other regiments, and thereby rendering the latter inefficient, the cadre of officers should be filled up from their own Reserve. Should there be a European war, the War Office will be obliged to avail themselves of the services of the Reserve; that this is so is, I think, proved by the fact that one popular cavalry regiment was nine officers short when ordered to embark for Egypt, the deficiency was made up by volunteers, but on this regiment returning home, and on nine subalterns being gazetted to the regiment, the authorities found it advisable to exact a promise from these young officers *that they would not exchange to infantry for two years.* I give you the name of the regiment I refer to, in confidence, but not for publication. This, however, does not look like there being much doubt about the Reserve being wanted, the first time we have a real war.—I am, &c.,

A Puzzled Ex-Dragoon.

THE UNVEILING OF THE STATUE OF THE PRINCE IMPERIAL AT WOOLWICH.

The statue which has been erected by the united services at the Royal Military Academy, Woolwich, in memory of the late Prince Imperial, was unveiled by the Prince of Wales on Saturday last. The Prince of Wales was accompanied by Princes Victor and George, and the Dukes of Edinburgh and Cambridge. A guard of honour of cadets gave the Prince of Wales a royal salute as he drove up at about 1 o'clock. The Duke of Cambridge, in his capacity of President of the Memorial Committee, read an address, which stated that they had received upwards of £4,310 from more that 25,000 subscribers of all ranks, and from every branch of her Majesty's sea and land forces. The Prince of Wales then stepped forward and unveiled the statue. It is the work of Count Gleichen. The Prince is represented as standing, with his left hand resting on the hilt of his sabre, the point of which is on the ground. In his right hand he holds a field-glass, which, from the poise of the head and distant speculative gaze, he has evidently just been using in surveying the field. He is in patrol jacket, riding trousers, and boots, while on the earth behind him, as if unheedingly dropped, lies his tropical helmet. At each corner of the pedestal is a projecting angle supporting the French Eagle on outstretched pinion; above is the Imperial Crown, having beneath it a laurel wreath around the initial "N." The massive pedestal rests on a square base, approached on each side by four continuous broad and shallow steps. The pedestal on its four sides is inscribed as follows:—"Napoleon, Prince Imperial. Born in Paris, March 16, 1856; killed fighting in South Africa, June 1, 1879. Gentleman Cadet, Royal Military Academy, from Nov. 18, 1872, to Feb. 16, 1875. Erected by upwards of 25,000 officers and men from all branches of her Majesty's Forces." His Royal Highness then addressed the assembly. He said:—"I have acquiesced with the greatest pleasure in the wish of the Committee that I should unveil this statue to the late lamented Prince Louis Napoleon. In doing so it is obvious to every one that the short ceremony of to-day is not a political one in any sense of the word, for it is subscribed for by 25,000 of all classes of her Majesty's Forces. We are assembled for the purpose of inaugurating a monument to the memory of a young and gallant Prince, who fell fighting for the Queen of England. This is a specially well-chosen spot for the statue, which has been so successfully modelled by my relative, Count Gleichen, who is beside me, to stand opposite the Academy, where the young Prince passed two years. There he grounded himself in military knowledge, and showed extraordinary ability. Though a foreigner, and naturally having difficulties to contend with in his knowledge of the English language, the report of the professors showed that he might, had he chosen to enter the Army, have gone either into the Royal Engineers or the Royal Artillery. Afterwards he was attached to a field battery during the autumn manœuvres in the vicinity of Aldershot, and naturally when the war in South Africa broke out, and he saw his comrades, with whom he had studied here, and with whom he had participated in the manœuvres in peace time, had gone to share in the trials and arduous difficulties of that war, his impulse was also to join them, and, by the Queen's permission, he did join our Army. The rest is a matter of history. We all know what befel him, and how deeply he has been regretted by every one. Those virtues, that blameless life, that courage, that obedience to orders, which were always what he exhibited most, will, I am sure, prove a bright example to many young men entering this Academy. I feel sure that when the cadets who are educated here look upon the statue that has been inaugurated to-day, they will see before them the features of a young and brave Prince who died with his face to the foe, and will wish to emulate his bright example." Col. Bigge, one of the Queen's Equerries, then advanced to place a laurel wreath, by her Majesty's command, around the neck of each bronze eagle adorning the pedestal.

TORPEDOES.

A lecture was delivered last night at the Royal United Service Institution, by Lieut. Sleeman, Retired Royal Navy, on "The Lay and other Locomotive Torpedoes, Considered for the Purpose of Coast Defence; and also as the Armament of Ships, Torpedo, and Submarine Boats." The lecturer first proceeded to classify locomotive torpedoes, under the heads of uncontrollable and controllable, the Whitehead being considered as belonging to the first category, and the Brennan, Ericssen, and Lay torpedoes to the second. After minutely describing these different kinds of torpedoes, Lieut. Sleeman brought his own experience forward, to prove that there was no drag on the cable of the Lay torpedo. He then discussed at length the question of ship torpedo nets, and other means of defending ships against torpedo attack, pointing out that with an instrument such as the Lay, which it was possible to direct with unerring certainty both by night and day, and under all conditions of wind and weather, it was apparent that it would be possible to explode one torpedo beside the obstacle, and then steer a second and third torpedo, if necessary, through the breach thus made, and effectually destroy the ship or ships it was attempted to protect. Besides these engines of warfare, another had been invented by Mr. Thorsten Nordenfelt, in the shape of a submarine, cigar-shaped, torpedo ram, some 65 feet long and 8 feet diameter amidships. This submarine boat was being tried in Sweden, and had so far given good results. Its speed was about 14 knots, and it carried two Lay and a rocket torpedo. Such a boat could pass through the breach made in the defences, supposing a fleet or squadron were inside, and could at its leisure discharge its torpedoes with unerring certainty. In fact, the means of carrying on submarine war were so rapidly developing, that there was no telling what might not yet be in store for us in the future. In the face of this uncertainty, such perfectly controllable torpedoes as the Lay became necessary adjuncts in a maritime war, without which no nation would feel secure. Lieutenant Sleeman proceeded to discuss the tactical value of the Lay torpedo, first treating it as a weapon for harbour defence. He illustrated by means of charts and diagrams of the Dardanelles and the port of Cartagena how easily an immense area is thoroughly defended by means of a few Lay torpedoes, worked from different points, clearly demonstrating that it would be almost impossible for any hostile fleet to force its way past such defences, or to carry out an effective bombardment. The lecturer then proceeded to treat the Lay torpedo as a factor in ship attack and defence, pointing out that, up to this time, the torpedo has been steadily ignored in the study of Naval tactics. This is true, so far as this country is concerned. Not so in France. We would call the attention of the Admiralty most particularly to the use made of the towing torpedo by the French Navy. Each ship is supplied with two of these engines of modern warfare, fitted on the Harvey principle. In a naval combat, these are towed astern. It would be a rash antagonist who would attempt to ram an adversary protected by towing torpedoes, as should the vessel attempting to ram, miss her enemy, and have to pass under his stern, the chances are greatly against her ever having another opportunity of repeating those tactics. Hence, we believe that all ships should carry Harvey or other towing torpedoes during a Naval battle. If two Lay torpedoes could be so towed, and in such manner secured that, at a moment's notice, they could be cast off and steered into an enemy, a great step in advance would have been gained. Lieut. Sleeman does not touch on these points in his lecture, but proceeds to discuss the question of torpedo-boat attack and defence, citing two instances of actual attack, the one during the Russo-Turkish War, at Batoum; and the other in the Pacific, at Callao, in both of which cases the torpedo attack failed. The lecturer maintained that, had Lay torpedoes been used, they would have been successful. We regret that our space does not admit of our going at greater length into this interesting lecture, the first of the season.

ROYAL UNITED SERVICE INSTITUTION.

The following lectures are announced to take place before Easter, viz., afternoons at 3:—

Friday, January 19.—Lieut. C. Sleeman, late R.N., "The Lay and other Locomotive Torpedoes considered for the Purpose of Coast Defence, and also as the Armament of Ships, Torpedo, and Submarine Boats."

Friday, January 26.—Sir Samuel White Baker, M.A., F.R.S., &c. 1. "Cyprus as a Naval and Military Strategical Position." 2. "Steel, Bullet-proof Cart Shield, for the Protection of Field Batteries."

Friday, February 2.—Capt. J. C. R. Colomb, F.S.S., F.R.G.S., "The Use and Application of the Marines, Past, Present, and Future."

Friday, February 9.—Nathaniel Barnaby, Esq., C.B., Director of Naval Construction, Admiralty, "On Battle-ships."

Friday, February 16.—Capt. N. L. Walford, R.A., "The Effects of the Bombardment of the Forts of Alexandria, and the Lessons to be Learnt Therefrom."

Wednesday, February 21.—Capt. N. L. Walford, R.A., "The Effects of the Bombardment of the Forts of Alexandria, and the Lessons to be Learnt Therefrom." Part II.

Friday, February 23.—Lieut. Berkeley Piggott, 3rd Batn. 60th Royal Rifles, late Mounted Infantry, "The Mounted Infantry in Egypt."

Friday, March 2.—Lieut.-Col. C. E. Webber, C.B., R.E., "Suggestions as to the Transport of the Future."

Friday, March 9.—Col. Herbert Stewart, C.B., A.D.C., 3rd Dragoon Guards, "The Future of Cavalry."

Friday, March 16.—F. A. Abel, Esq., C.B., F.R.S., &c., "The Most Recent Progress in the Production and Application of Explosive Compounds."

Reviews.

◆

Memoirs of the Services of the 64th Regiment (2*nd Staffordshire*), *from* 1758 *to* 1881. (W. H. Allen and Co.)—The author of this handy little volume, Lieut. H. G. Purdon, deserves great credit for the care with which he has evidently done his work. It is not often that young officers, in these transition days, can be induced to take sufficient interest in their regiments or the service to devote their leisure hours in filling the *rôle* of military historians. Lieut. Purdon seems to have undertaken his task as a labour of love, and the volume before us is a valuable addition to the regimental histories already published. It is nearly 50 years now since Mr. Cannon, of the Adjutant-General's Department, was commanded by his Majesty King William IV. to compile an account of the services of every regiment in the British Army. Since that date the Army has undergone great changes, and has added fresh laurels to those it then possessed. Lieut. Purdon gives full particulars of the movements of the regiment up to July 1, 1881, the date upon which, by the fiat of the Government, the old 64th ceased to exist, and the regiment assumed the title by which it is now officially known,—the 1st Batn. of the Prince of Wales's (North Staffordshire).

The current number of the *Army and Navy Magazine* opens with a novelty in the form of an epic poem, written by Capt. Clark Kennedy, and describing "The Midnight Charge at Kassassin," one of the most brilliant events in the truly remarkable campaign recently concluded in Egypt. A good deal of stirring words and similes, some familiar, others not so, mark the progress of the narrative. Occasionally, we stumble over lines that decidedly halt. For example:—

> "And piloted by Ewart's voice, we head towards the north,
> The foemen in the darkness wot not of the coming storm."

Such small faults, however, may perhaps be justified by the plea for "poetic licence," and are fully compensated for by not a few striking passages throughout the poem.

Letters have been received at the Admiralty from the Commodore at Jamaica, up to Dec. 24, stating that the Griffon, Com. R. W. Davies, was at anchor off Kingston, protecting the town against alleged intended acts of incendiarism, but, that as soon as her services are no longer required, will proceed to Bermuda.

Amusements.

◆

The Promenade Concerts, COVENT GARDEN, continue to be well attended. The nightly selections are chiefly from Beethoven, Gounod, Verdi, Rossini, and Mozart. Madame Patey and Mr. F. King have been included among the vocalists, and instrumental solos have been identified with the well-known names of Mr. Carrodus, Mr. Howard Reynolds, and Mr. Edward Howell. Madame Antoinette Sterling appeared on Tuesday, and on Wednesday evening Madame Rose Hersee reappeared in London, after an interval of some duration, caused by severe indisposition.

To the AVENUE THEATRE has been transferred Audran's lively three-act comic opera of "Olivette," originally brought out in the metropolis at the Strand, in September, 1880. Several members of the former Strand company are identified with the revival. Miss Florence St. John is again the sprightly heroine, M. Marius acts once more De Merrimac with great spirit and humour, and Miss Minnie Byron, Mr. Bracey, and Mr. Ashley figure very pleasantly in the cast. New scenery and costumes have been provided, and the entertainment seems altogether quite in harmony with the requirements of the audience. The children's pantomime of "Dick Whittington" is still represented every afternoon.

Besides being reconstructed in its scenic arrangements, "The Yellow Dwarf," at HER MAJESTY'S, has been greatly improved by some changes in the distribution of parts. Mr. Vance now assumes male attire as the Grand Chamberlain Merry-Pebbles; Mr. E. Girardot, a clever young actor, plays the Dwarf, with greatly increased effect; Hymen is personated by Miss Emily Duncan; and Queen Kocottina is judiciously assigned to Miss Harriett Coveney, an experienced interpreter of such characters.

"Betsy," at the CRITERION, will speedily give place to Mr. George R. Sims's highly-diverting farcical comedy of "Mother-in-Law," a piece exactly suited to the theatre.

Morning performances are at this period unusually in favour, and for the first time in the annals of DRURY LANE THEATRE, the pantomime has been repeated not only every night, but every day throughout the week.

When audiences at the VAUDEVILLE grow tired of "The Rivals," Mr. Thomas Thorne will produce a new three-act comedy by Mr. H. J. Byron, called "Open House."

The final revival of Mr. T. W. Robertson's comedy of "Caste" under the Bancroft management will take place at the HAYMARKET THEATRE this (Saturday) evening. The play was originally produced at the Prince of Wales's Theatre on April 6, 1867, and enjoyed a remarkably long run. A new comedy by Mr. A. W. Pinero, and an English version of Sardou's "Fedora," will occupy the later portion of the season.

At Easter, a new three-act burlesque drama, written by Mr. F. C. Burnand, and founded on the subject of Bluebeard, will be brought out at the GAIETY.

A special morning performance of "The School for Scandal," with a powerful caste, will be given at the GAIETY on Thursday afternoon, Jan. 25, for the benefit of the widow of Mr. Charles Lamb Kenney, so well known as an accomplished scholar and dramatic critic.

The new theatre at the corner of Coventry Street, Haymarket, now being constructed from the designs of Mr. C. J. Phipps, is to be called "The Prince's." A large hotel, bearing the same name, will be built on part of the site, covering an area of 16,000 superficial feet.

"The Comedy of Errors," as revived at the STRAND, comprises, besides Mr. J. S. Clark, as Dromio of Syracuse, and Mr. Harry Paulton, as Dromio of Ephesus, Miss H. Lindley, Miss M. A. Giffard, Miss Sallie Turner, Miss Blanche Thompson, and Messrs. W. H. Pennington, F. Charles, G. L. Gordon, J. P. Haynes, H. J. Turner, and G. Weathersby. Appropriate costumes have been designed by the Hon. Lewis Wingfield, and new scenery has been painted by Mr. T. W. Ryan. The amusing farce of "Toodles," in which Mr. John S. Clarke resumes a character on which he has based a distinct reputation, is the after-piece, with new songs and dances introduced. The last notable revival in the metropolis of "The Comedy of Errors" was at the Princess's, in February, 1864, when the Brothers Henry and Charles Webb appeared as the twin Dromios.

Mr. Frederick Burgess's eighteenth annual day-and-night musical and dramatic fête, celebrated on Tuesday at the ST. JAMES'S GRAND HALL, attracted, as usual, an overwhelming attendance. The principal comedians connected with the prominent West-end theatres gave once again their valuable assistance to the liberal entertainment provided by the much respected joint-proprietor of the "Moore and Burgess Minstrels" organisation; and among the number may be mentioned Miss Russell, Mr. W. J. Hill, Mr. Lionel Brough, Mr. Harry Paulton, Mr. James Fernandez, the Emile Girards, Mr. E. W. Mackney, Mr. James Wallace, and the wonderful giant and dwarf known as Colonel Chang and General Mite. The full choir and orchestra of the Moore and Burgess company of minstrels added to the enjoyment of the large assemblage, and the glees of Sir Henry Bishop, excellently rendered, supplied some of the most delightful features of a very varied programme.

"TIME TRIES ALL THINGS."—Of the numerous preparations announced for promoting the growth of the hair few survive, even in name beyond a limited period, whilst ROWLAND'S MACASSAR OIL, with an unparalleled reputation of more than 80 years, is still considered by the public to be the best and safest preserver and beautifier of the hair ever yet produced. They who prefer it can now have the oil of a golden colour, without in any way losing its beneficial effects. Sold everywhere. Sizes, 3s 6d, 7s, 10s 6d, and 21s.

"SAPO CARBONIS DETERGENS" is a physician's name for a remedy prescribed for the past quarter of a century for every variety of skin disease. The public have also adopted the same, as a preventive of small-pox, scarlet fever, and measles. Purchasers should see that the Latin brand is on every tablet, and WRIGHT'S COAL TAR SOAP on each wrapper, without which none is genuine.

Printed and Published for the Proprietors, at the Office, No. 16 Wellington Street, Strand, London.—SATURDAY, January 20, 1883. Letters on business and Remittances should be made to Mr. RICHARD JAMES WOOD.

THE experience gained at the bombardment of Alexandria has revived public interest in machine-guns, and convinced impartial persons that, in spite of artillery trades-unionism, this weapon is of great practical value. We ourselves have long been convinced that the destructive power of the machine-gun could be advantageously utilised. In no case, to our mind, would machine-guns be more effective than in India. We refer to no particular pattern of gun, and, therefore, we shall avoid going into the details of weight of gun, carriage, and ammunition, number of shots discharged per minute, and strength of the gun's crew. We simply deal with the question on broad grounds. Almost all our recent campaigns in India have been carried on in hilly—generally, indeed, mountainous—districts. Scarcely a year passes, without our being compelled to send a flying column into the hills which form the fringe of our North-West Frontier. Success on these occasions depends upon the rapidity of our movements, and the severity of the blow struck, on the rare occasions on which the enemy expose themselves to our fire in any numbers and in close formation. To move quickly, we must be lightly equipped, and be encumbered by as few baggage or other animals as possible. Our mountain guns are certainly very mobile, require little transport, and comparatively few men. They can also be taken over almost any ground that can be traversed by infantry. Still, machine-guns weigh less than mountain guns, and are far more easily transported. Indeed, they can be easily carried by a few coolies. Again, the fire of machine-guns at any distance under 1,200 yards is far more deadly than that of mountain guns, while a smaller crew are exposed to return fire. To check a sudden rush made by a crowd of the enemy gathered under cover, at say 30 or 40 yards' distance, the machine-gun would be much more effective than a mountain gun firing case. Certainly at 2,000 yards a mountain gun would produce an effect of which the machine-gun would be incapable, but the object is to engage the enemy at close quarters, not to frighten him away while still at a distance. It is very rarely that mountaineers occupy a defensive work against which it would be advantageous to employ shells, and it is generally known beforehand whether such defensive works are likely to be occupied by the foe. Therefore, in most cases machine-guns would do the work now performed by mountain guns far more effectually, while requiring fewer men and less transport. To meet the few exceptional cases, a couple of mountain guns might be kept either with the main body, or the reserves. When the expedition into "the Hills" is on a large scale, and something like a systematic campaign is being undertaken, it is necessary from time to time to send convoys from the base to the front, and to establish a line of communication, guarded by small posts. In the narrow passes in "the Hills," even a couple of mountain guns would be an incumbrance to the convoy; while in the case of an attack, it would often happen that the guns could not be disengaged with sufficient promptitude from the baggage, and brought into action. No such difficulty would occur with machine-guns. As to the defence of posts on the lines of communication, the number of mountain guns and artillerymen on the frontier would not suffice to attach even a single piece of artillery at all the important points. Practically, any number of machine-guns might be so employed; two of these weapons with only a dozen infantry would, if placed at the opposite angles of a square enclosure, bid defiance to the largest body likely to be collected. In night attacks on posts or camps by the Hill tribes or Afghans, the enemy are frequently unseen, until suddenly a crowd of howling savages makes a sudden rush over the last 40 or 50 yards. It is in such cases of the utmost importance to pour into the enemy's ranks, within half a minute, the largest possible number of missiles. It is beyond dispute that a machine-gun can discharge more missiles in that time than a mountain gun. Apart from the question of mountain warfare, machine-guns would be particularly useful in India. No one can assert that at any moment the rebellion of 1857 might not be repeated, on a smaller or larger scale. At all events, sudden, partial insurrections are quite within the limits of probability. Were such an event to happen, it would be quite impossible to occupy each station with a strong garrison of regular troops. Every one of the latter would be needed, either in the field or to guard the principal strategical points. Neither would it be desirable, even if possible, to remove civilians and women and children from the out-stations to the principal garrisons. To provide for such an event as stations being left almost without troops, a scheme was long since approved of by the Indian Government, and has been partially carried into effect, for constructing places of refuge at certain stations. These places of refuge would be defended by a small number of men of all descriptions. There might be a small detachment of Regular troops, but the garrison would consist for the most part of sick and convalescents, and civilians, both Europeans and half-castes, belonging to the Government Offices and the various shops. They might have no artillery with them at all, and if there were a few pieces, a sufficient number of men skilled in working them properly would be wanting. We cannot imagine a greater addition to the strength of such posts than two or three machine-guns. The management of them is soon learnt, and were one placed at each of the two opposite angles of an enclosure, it would be absolutely impossible for the enemy to approach the walls. Indeed, were the enclosure a square, with each side 100 yards long, 20 men provided with two machine-guns could, if provisions lasted, hold out for an indefinite time against any force likely to be brought against them. Owing to the cheapness of machine-guns, there is no reason why every station in India should not be provided with a couple at least. Of course, in the event of a general rising, the rebels, if commanded by men of ordinary capacity, would endeavour to destroy our telegraph wires and the lines of railway. The machine-guns would be most useful for the defence of railway stations, and might also be placed upon trucks, protected by sand-bags or iron shields, and run backwards and forwards along the line. It is along the lines of railways that the majority of non-official civilians are to be found, and the railway employés constitute a large portion of the Volunteer force of our Eastern Empire. Their strength would be increased tenfold, were they supplied with machine-guns, and railway Volunteers are just the men who would soonest learn how to manage this sort of weapon. Finally, small river steamers, each provided with one or more machine-guns, would render great service, without incurring any practical risk themselves. Imagine a small steamer with a couple of machine-guns coming on a body of rebels trying to cross a river! The moral effect, too, of the knowledge that such implements of destruction existed, were always on the move, and might at any moment appear, would be very great. It may be argued that the rebels might capture some machine-guns, and turn them against us. It would, however, be the easiest thing in the world at a moment's notice to remove or injure some of the parts, and they could not be replaced by the natives, unprovided as they would be with machinery devoted to their construction. The conclusion, therefore, at which we arrive is that some description of machine-gun would largely increase both our offensive and defensive power in India; and that some hundreds of them should be at once sent to that country. The question appears to us to be one which the Government of India would do well to take seriously into consideration without loss of time.

WHILE we have been essaying, and it is to be hoped not in vain, to bring under the notice of thoughtful men the exact condition of the Cruiser class of the Navy, and their alleged substitutes from the Merchant Service, a high official of the Constructor's Department has been eulogising their efficiency. "*Audi alteram partem*" is a motto which commends itself to the sense of fair-play inherent in all Englishmen, and we gladly turn to the pages of the article alluded to, with the hope that the acknowledged skill of the professional man has checkmated the dangers looming in the eyes of the journalist. The *Hecla*, after having passed through the official mill, is the type chosen, and is, according to the lecturer, fit to be employed in a Naval war on remote stations for the protection of British commerce. She was constructed by the well-known firm of Harland and Wolff, of Belfast, for the Atlantic trade, and her dimensions are as follows:—Length, 410·3 feet; breadth, 39·0 feet; depth of hold to spar deck, 28·9 feet; tonnage under deck, 2,245; horse-power, 300; pressure, 80 lb., wrought with the usual compound engines of superposed cylinders. Both the latter are elevated beyond the light water-line, the high pressure is wholly above the level of the spar deck. They are, as well as the engine-room, protected from the weather by an iron house, formed of about $\frac{3}{16}$ in. plating. We are informed that in an emergency the engines and boilers can be efficiently protected by a "pad of coals," amongst which shells would harmlessly explode, or, if desired, armour-plating can be attached to the exposed parts. Coming from such an authority, the statement passed unchallenged; but had any one present been asked by what means the cylinders above the spar deck were to be made secure, without adding seriously to the top-weight, it is doubtful if a satisfactory explanation could have been rendered. Here, then, we have the most vital part of the machinery placed above the protecting influence of the "pad of coals," or ordinary side armour. But another important question arises with respect to the latter method of protection. To be partially effective, it must extend from the upper edge of the sheer-strake to a depth of three feet below the light water-line, and right across the ship, before and abaft the engine spaces or bunkers. Then comes the question of stability, a feature in which this particular class of ship are so deficient, that previous to the introduction of water ballast, it was customary to insert several hundred tons of cement and iron in the bilges. As no vessel of the type has yet been armoured, it would be interesting to ascertain if, under such conditions, the centre of gravity of the hull and corresponding metacentre, when "burned out," have been calculated by the Department? The armament is alleged to consist of five 64-pounders and one 40-pounder, on truck carriages. From our own practical knowledge, as well as that derived from the experience of distinguished officers who have seen much service, we concluded that pivot guns forward and aft were indispensable to a ship whose specialty was to engage an enemy in chasing or retreating; but we are of opinion that, owing to the fineness of the lines, they cannot be mounted on the *Hecla*. It is astounding that a gentleman whose opinions of warfare or of seamanship are derived from books only, should stand forth as the exponent of a system which, amongst other anomalies, requires a shell like the *Hecla* to be fought broadside-on. The case ought to command the earnest attention of Naval officers, indicating, as it clearly does, that seamanship, unless connected with mechanical skill, must give place to the dictum of the engineer, for we cannot believe that English seamen will approve of an innovation on all their preconceived ideas of tactics. To fight such ships broadside-on would be suicidal. Indeed, we believe firmly that the commander who in future naval combats adopts the tactics of keeping his bows on to his enemy, and skilfully manœuvres so as to use his end-on advantages, will be sure to win the day. We need not enter into an elaborate calculation of the value of the cosine to prove this opinion to be correct. It is, we believe, generally admitted throughout the service, and was acted upon by more than one ship during the bombardment of Alexandria. It is alleged that the distinguished officer who superintended the trial trip of the *Hecla* did not consider her to admit of easy handling in narrow waters. Strange that ships which can be manœuvred and docked in all weathers and at all hours of the night on the Mersey and the Hudson should receive such a character from officers of another service. One more remark, and we have done. Have the advocates of this singular conversion calculated the number of working days it will take to collect, alter, and equip the proposed Fleet? And should war come on us suddenly, as it did with Austria and France, and trembled in the balance at Berlin, by what means do they propose to protect the grain-carriers from the cruisers of an enemy in the interim? To such an extent does the national existence depend on their safety, that it requires no ordinary strength of mind to contemplate the reverse with equanimity. It is not encouraging to find an officer of a great Department of State treating so very serious a subject too lightly, especially when it is borne in mind that the future, not only of England, but of the world, depends on the result. Since the commencement of this series of articles, two disastrous collisions have shown in a remarkable manner the correctness of our views. The *City of Brussels* and the *Cimbria* ranked high in the *rôle* of the Mercantile Marine (the last is quite of a modern type), and both at the time, so far as spare buoyancy is concerned, were in a singularly favourable situation. The first-named was known to be a large consumer of fuel, so much so, indeed, as to render it highly probable she had not, on foundering, a day's consumption on board. But as vessels of her class run with the precision of a mail train, and have Queenstown under their lee, this apparent cutting fine excites no anxiety amongst professional men, who can point to one of the class having been burned out at sea. The list of cargo has not, so far as we are aware, been published. It most likely consisted of bulk grain in two compartments, and cotton, tobacco, and sundries in the others, thus leaving a large per-centage of surplus buoyancy. The *Cimbria* carried a living freight on all decks, only leaving the lower hold for cargo and spare coals, the total weight of which will be known to the public at the inquiry now pending. We trust those who are interested in the subject on which we have written will carefully analyse our objections in all their bearings, in lieu of hurriedly pronouncing a crude system perfect. It would be interesting to learn by whom the plan was formulated. Is it due to the nautical element of the Board, or did they listen to the counsels of the Constructive Department, and believe its accomplished head could, as a magician would of old, metamorphose the patient camel into the fiery war-horse? We await the final issue of this most important question with great interest, feeling assured that the comfort, the honour, if not the existence, of Englishmen, depend on the solution.

SO unanimous is the expression of opinion throughout the Army as to the great advantages of the Regimental over the miserable system known by the name of "Unification," that it may, we believe, be taken as a foregone conclusion that the latter will receive its death-blow when the report of Lord Morley's Committee appears. If the ruling powers at Whitehall Yard had their way, they would, no doubt, endeavour to obtain a new lease of life for the present regulations, placing, as these regulations do, powers in their hands of which they would otherwise be deprived. Dr. Crawford, however, is a high-minded official, and his one desire would seem to be to promote the best interests of the service. He naturally would prefer to have the whole of his medical officers working directly under his orders, instead of seeing a large proportion of them taken from under his control, and placed under the command of Regimental Lieutenant-Colonels. But, as events have proved beyond doubt, "Unification," though a splendid idea in theory, breaks down completely when put to a practical test on active service; and as the Army Medical Department is maintained for the good of the service, our Medical organisation ought to be such as to prevent anything like friction in the field. It is the duty of Lord Morley's Committee to ascertain which system will work best. Already the weight of evidence is strongly opposed to "unification," which was the direct cause of all the mischief which occurred in Egypt. An "Eye-Witness," who was present in Egypt, writing in the *Pioneer* of Allahabad, says:—"These latter remarks I would apply also to the Army Medical Department. The same tendency to wish to be thought 'soldiers,' rather than medical men (the word 'Doctor' is tabooed now), is perhaps stronger in this department than in any other. The abolition of the old system of Regimental Doctors has not been justified in its wisdom in the late campaign. Red-tape and officialism are out of place where valuable lives are concerned,—doubly so when they have been risked in the country's service. Yet both these noxious growths were found to prevail with the Force in Egypt. To them was in a great measure due the early breakdown in the general and detailed working of our hospital system. Proof of misapplication of medical comforts, especially in the matter of spirits and wines, can be accumulated from those who were credited with, but never obtained, the comforts with which they ought to have been supplied. Some curious stories were told, both by officers and men, who went through the hospitals of Ismailia, Alexandria, and Cairo, of the neglect to which they had to submit through the adherence to red-tape, which distinguished some of the Medical Staff in these establishments. Also of the way in which wine, brandy, and such-like stimulants were put down by hospital attendants as having been given to patients whose lips they had never passed. It is, perhaps, wisely that it has been decided not to make the inquiry now going on into the breakdown of the Hospital, Commissariat, and Transport Services in Egypt a penal tribunal. Let the sinners have one more chance to amend, but let the suggestions of reform, which experience (very cheaply gained) has shown to be imperative, be carried out." The views of this correspondent—one who knows well what the wants of an army are—will be accepted by every officer who served in Egypt. Our medical arrangements came to grief, not because the Medical officers were either unskilled or neglectful of their duties, but because, as we have for years contended, the system upon which these arrangements are based is as bad. Try as we may to do so, we cannot get over the fact that the regiment or battalion, to be effective, must be a properly organised unit in itself; and no army is in a condition to take the field which is built up on the principle that a departmental is equal in its advantages to a regimental organisation. The idea is opposed to all principles of common-sense, as we have sought for years to show. It is strange that the Medical Press, with one exception, has done its utmost to bolster up the present organisation, and would even now regard with satisfaction a decision on the part of the War Office Committee to retain it. We can only conclude that the Medical Press has been satisfied to express the views of Whitehall Yard. It must not be forgotten, though, that Whitehall Yard has much to lose by a change of system. It is now vested with full authority. But as was found in Egypt, the powers with which it is charged are too extensive to insure the smooth working of the Medical machine on service; and as it is on service that most is looked for from those who are called upon to administer to the wants of the sick and wounded, it follows that changes must be introduced. Those changes can take but one direction, and we trust that no conciliatory attitude on the part of Lord Morley and his colleagues—such as the sanctioning of our doctors being *attached* to regiments, instead of being gazetted to them, and becoming recognised members of their staff—will leave us as badly off as ever. There is only one system which will work, and that is the one which existed prior to 1872, by which each regiment possessed in peace time two medical officers, both gazetted to the regiment and wearing its uniform. Let the departmental organisation be what it may, the regimental system cannot be worked by halves, and it is earnestly to be hoped that the Committee now sitting will recognise this, and frame its report accordingly.

Official contradictions, as a rule, mean that the report circulated is true, in part or in whole, but that it is inconvenient that the facts should have been made public. When there is no truth in the report, it is seldom contradicted. Hence, we take the official contradiction of the fact that Vice-Admiral H.R.H. the Duke of Edinburgh is about to dispose of his reversionary interest in the Grand Duchy of Saxe-Coburg-Gotha at what it is worth. We consider that our information is more accurate in this instance, as in hundreds of other cases, than that of our traversers.

We hear that Prince George of Wales is to be appointed to the *Alexandra*, to complete his time as Midshipman, before passing the final examination for his Sub-Lieutenant's commission. This is only following the same course as was adopted with his Royal uncle, who went from a frigate to a line-of-battle ship, and thence to a corvette.

Rear-Admiral Gore Jones stated on Friday last at the Royal United Service Institution that the pressure of the carbonic-acid gas in the reservoir of the Lay torpedo was maintained by the insertion of a *red-hot shot!* We wonder where Admiral Jones studied chemistry. Then, again, how is the shot inserted, against a pressure of 900 to 1,000 pounds to the square inch, and what size shot could be inserted through an aperture one inch in diameter? This assertion of the gallant Admiral reminds us of similar reckless statements made by him regarding the conduct of Naval officers, and can only be accounted for by the fact that, when he was Naval Attaché at Washington, he was in the habit of visiting the American Torpedo School at Newport, and when there, of so prying into everything going on, that we understand the students determined to be on an even keel with him, and, when asked by the gallant Admiral as to how the pressure was kept up in the reservoir of the Lay torpedo, practised the little joke of the *red-hot shot*, which the gallant Admiral swallowed, and now retails as a fact, and as a grave objection to the torpedo. Prodigious!

Captain John Fisher, C.B., late of the *Inflexible*, had the honour of dining with her Majesty at Osborne on January 22.

The Chinese Government has just placed the order for the construction of a third ironclad with the Vulcan Company of Stettin. No details as to the construction of this vessel have as yet been made public; but it is known that she will be of moderate dimensions, thickly armoured, and will carry a few guns of large calibre.

The workmen in the Royal Dockyards are petitioning the Admiralty for an increase of wages, on the ground that the value of labour in private yards has increased, as also the price of all the necessaries of life. The officers, seamen, and Marines of the Fleet could claim an increase of pay on the same grounds. It is our painful duty to publish letters this week exposing the "corruption" which grows up in an underpaid service. The Admiralty have directed Admiral Brandreth and Mr. Campbell-Bannerman to inquire into these demands without delay, as a strike just now among the Dockyard hands would be serious. We hope their Lordships will not forget that all ranks in the Navy are more or less underpaid.

The German Admiralty have ordered the building of a new ironclad by a private yard at Stettin. This vessel, at present known as "E," will be of 5,200 tons displacement, with twin-screw engines of 3,900 horse-power. She will be built of steel, and carry her guns in a central battery, protected by compound armour, 12 inches thick. Her armament, as at present proposed, will consist of eight of the new 9½-inch Krupp guns, 35 calibres long, which will discharge steel shells weighing 215 kilos., and which are capable of penetrating an iron plate 16 inches thick. Two smaller guns will be mounted, as bow and stern chasers.

The officer of the German Navy who, as we reported last week, has received a year's leave of absence to enable him to proceed to China, has been granted this favour for the purpose of instructing the native seamen how to work the Schwartzkopf "fish" torpedo.

Next year's German Navy estimates ask for a special grant of 4,050,000 marks, for torpedo purposes.

It would be interesting to know what system, if any, is pursued by the Admiralty in removing the names of useless ships to "Harbour Service" in the *Navy List.* Obsolete ironclads, such as the *Caledonia, Zealous,* &c., have been so removed, while the *Erebus,* a far more antiquated vessel, dating from Crimean days, is retained. Strange are official ways.

The Admiralty have awarded the two Naval pensions of £65 a year for Commanders vacant by the deaths of Retired Captains David Aird (Dec. 22, 1882), and Walter Reid (Jan. 1, 1883), to Retired Captains Richard B. Creyke and George H. Clarke, from those dates respectively.

The German Government has decided to greatly strengthen the fortifications on the North Sea and Baltic coasts, which will shortly present one continuous line of defences. A commission of engineer officers, appointed for the purpose of surveying the points most likely to be assailed by an enemy, has recommended the construction of a large number of armoured turrets, and Government has ordered the immediate erection of the same at the following points:—Pillau, two forts; Memel, one; Danzig, eight; Warnemünde, one; Travemünde, one; Wismar, two; besides which, isolated forts will be placed in the intermediate spaces. The North Sea coast defences will also be greatly increased, although not to such an extent as those on the Baltic, and hostile squadrons will have great difficulty in finding an undefended landing-place in the future.

Admiral Lord John Hay leaves England next week in the *Lively*, to relieve Lord Alcester in the command of the Mediterranean station, his Lordship returning home in the same vessel.

Captain W. R. Kennedy, of the *Lord Warden*, has, during the past week, made the tour of his district, and has minutely inspected the Coastguard and Naval Reserves thereto belonging. The Reserves were found to be as fine a body of men as ever trod a plank, very efficient at their drills. The Shetlanders were simply splendid, and the whole well deserved the encomiums passed upon them by Vice-Admiral H.R.H. the Duke of Edinburgh. The physique of these men is far superior to that of the Guards. They went through all their drills with steadiness and precision, throwing an amount of energy into their work quite refreshing to behold, and very different to the old "Dockyard stroke," so often observed in the service. At Wick, Peterhead, and Lerwick the men have fixed batteries on shore; but at Inverness, Aberdeen, and Dundee they are drilled on board ship. The whole, nevertheless, are in splendid order, reflecting the highest credit upon the officers and instructors. The Reserve, too, is most popular. Double the number of men could be enrolled, and should be. As it is, we hear that there are sufficient Reserve men on the east coast of Scotland alone to thoroughly man half-a-dozen first-class armour-clads at short notice, and, from all that is said, we should think Naval officers would have no hesitation in fighting an action, with these fine fellows behind them, within 24 hours of the time they were on board ship. This is very satisfactory information, and all the more so that we need have no fear that they will be allowed to deteriorate while under the able command of Captain W. R. Kennedy. This energetic officer, accompanied by Mr. R. Deveson, the District Paymaster, reached Lerwick last Monday, and covered over 1,000 miles of ground in the course of the week. At Fort Charlotte, Lerwick, he inspected the Naval Reserves. There were on parade, under command of Mr. Johnston, 163 men. The inspecting officer on his arrival was received with a general salute. The inspection was afterwards commenced. The men were first put through the manual and firing exercises, then, breaking into quarter-column, marched past with great steadiness and precision. Detachments were then exercised at great-gun drill. At the close of the inspection, Captain Kennedy expressed himself highly satisfied with the appearance of the men, and the efficient manner in which the various movements were executed. He would be glad to make a favourable report to the Admiral. The same routine was gone through at the other stations, in an equally satisfactory manner.

The Swedish Admiralty has asked Parliament for a grant of 838,000 crowns, for the purpose of building ironclad gunboats.

Another Naval scandal! Last year the *Malta* was selected to test various descriptions of anti-fouling composition, designed to protect the bottoms of iron ships. The trial was to last twelve months; it lasted thirteen. When the *Malta* was at length docked, she had a heavy list, owing to the weight of weed and barnacles on one side of her bottom. The other was nearly as bad. One patch, however, was perfectly clean. This composition was of an exfoliating nature. A ship coated with it could lie at anchor for months, and let what weeds grow on her bottom that could; but the moment that she got under way, and began moving through the water, the weeds dropped off, and so did the barnacles, and that so fast, that in a few minutes her bottom would be as clean as the day she was launched. In this manner, the patch on the bottom of the *Malta* covered with this composition came in clean, while the spaces covered by Messrs. Peacock, Hayes, and others, were foul beyond description. But these gentlemen complained, and a final trial was decided upon. To this trial Colonel Crease was admitted, although he had not competed in the previous one, and notwithstanding that, we believe, his and Hayes's are, to all intents and purposes, one and the same compositions. After some six months at work, the *Malta* was laid up with a damaged paddle. Weeds grew apace. She was then carefully hauled into dock. The examination of the bottom showed a few patches of grass on the exfoliating composition, which, however, dropped off when touched. The verdict was given for Messrs. Hayes and Crease, and a final trial between these two paints and compounds has been ordered. Now, it must be remembered that these compositions, or something manufactured by the same firm, has been long used in the Navy, to appreciate what follows. A correspondent this week supplies us with the fact that, not so very long ago, a wooden frigate was being fitted out to act as a store-ship on a foreign station, when every one connected with her was astonished to find her copper bottom covered with three coats of paint. Inquiry elicited the fact that an important official in the yard, and a relation of his in another yard, were acting as agents to the manufacturer of the paint! Is it likely that these gentlemen would report favourably to the Admiralty on any rival composition? We believe the Constructor's Department were cognisant of these facts, when the *Malta* trials were ordered. What a farce! No, what a crying shame and scandal!

The *Polyphemus* has been making experiments at Spithead with some improved arrangement for discharging torpedoes from the broadside ports when steaming at a high rate of speed. Dummy torpedoes, however, have been used, the Admiralty considering it too extravagant to be casually dropping Whitehead torpedoes about the Solent, especially as no one ever knows exactly where they part company. *Fiat experimentum in corpore vili* is a sound motto, which our Naval and Military authorities are often slow to adopt.

On proceeding out of harbour on Tuesday, the *Minotaur* saluted the flag of the Commander-in-Chief with seventeen guns; the salute, however, was not returned, as permission had not been previously obtained to fire it, in accordance with the Port orders, while the Court is at Osborne. The Admiral commanding the Channel Squadron must not, however, feel aggrieved, as the Heir Apparent himself failed some time ago to get his standard saluted in defiance of this order, though he specially requested it by signal.

The ships of the Reserve Squadron have been ordered to prepare for the coming summer cruise. The *Hercules* goes to Portsmouth by Feb. 10, and the *Penelope* to Chatham, to make good defects and complete all necessary repairs. Machine guns and shields are also to be supplied.

The official descriptions of the acts of gallantry for which the Victoria Cross has been awarded have often been so badly expressed as to deprive those acts, as far as mere words could do, of any special merit. The following extract from the *Court Circular* of the 20th inst., notifying the decoration by her Majesty of some men of the Royal Marines with the medal for conspicuous gallantry, is open to adverse criticism, on the ground stated above:—

"Osborne, Jan. 20.

"The following non-commissioned officers, bugler, and gunner of the Royal Marines arrived at Osborne yesterday, and were decorated by the Queen with the medal for conspicuous gallantry: Serjeant T. W. Holdstock, for having taken a wounded man to the rear under a heavy fire on August 5, 1882. Corporal H. Henry and Bugler T. F. M'Daniel, for following up with their half-company on September 13 a very superior force of the enemy, killing a great number and driving the remainder on to our cavalry. Colour-Serjeant White, 1st Company, for gallant conduct at Kassassin on August 28, having advanced up the canal bank, under a heavy fire, and shot the leading horses of two guns, which were doing mischief on our line, each time they attempted to advance, and thus prevented their advance up the canal bank. Gunner J. Judge, 6th Company, was wounded in the leg, on August 28, at Kassassin by a shell, and after having his wound dressed returned to his post, stating as his reason that there were so many wounded in the hospital that they had better not be troubled with him also."

In the first place, we are not told whether the recipients of the medals belonged to the Artillery or the Infantry branch of the Royal Marines; but the title of gunner happens to determine the point, in one case. In the second case, there is nothing whatever to show that Corporal Henry or Bugler M'Daniel did any more than the other men of their half-company, unless the "killing a great number and driving the remainder *on* to our cavalry" was done entirely or chiefly by the corporal and the bugler. Colour-Serjeant White's case is even more obscurely stated. Did he shoot the same "leading horses" of the two guns each time they attempted to advance, or did the Egyptians keep on harnessing fresh "leading horses" to these guns, for Serjeant White to shoot in succession? The guns were "doing mischief on our line!" Here we have the killing and wounding of British officers and soldiers mentioned in terms befitting an account of the pranks of truant schoolboys. As for Gunner Judge's returning to his post after his wound was dressed, the merit of the act might be measured mainly by the nature and severity of the wound, on which important point we are told absolutely nothing. The above remarks are not intended to disparage in the very least acts of bravery which, doubtless, deserved the Royal recognition they have received; and which deserved also to be recorded in clear and appropriate language. Fortunately, decorations for valour are more permanent and more widely known than the bungling statements in which they are officially announced.

The post which M. Gambetta occupied as president of the Committee for the Reorganisation of the French Army, has now been filled up. It was thought that an officer would have been named, but lo, and behold! it is a politician, a M. Martin Feuillée, while M. Margaine is to be vice-chairman. In the celebrated monologue of Figaro, that worthy relates how he applied for a place for which he was fit, adding, "a calculator was required; it was a dancing master who obtained it;" and it is probably on the same immortal principle that M. Martin Feuillée has been nominated by his colleagues. M. Gambetta was no soldier, but he had been actively mixed up with the Army in the field, and had made a study of it. The report is that this Committee, in addition to recommending the reduction of service in the Active Army from five to three years, intend proposing the creation of a special school for officers, and an Academy of War. In order to become an officer, it will be necessary, should the suggestions of the Committee be carried out, to pass a year in the ranks, then to enter a special school where the epaulette will be obtained. The Academy of War is intended for the formation of commanding officers, and no officer under the rank of lieutenant-colonel will be received. The Committee will also deal with the creation of an artillery force for the fortresses, a corps rendered necessary by the new system of attack and defence; the creation of an African army; and a volunteer corps of lads too young for service in the Active Army; and of able-bodied men who have served their time. We see that it is proposed to create twelve mixed companies for service in Tunis, companies not only composed of Frenchmen and natives, but of horse, foot, and artillery. For the first six companies raised, there are to be 10 officers in each, 132 French and 144 native foot soldiers, 18 French and 33 native troopers, and 52 French gunners. All this seems terribly complicated.

The cost of rearming the whole German Army with the Mauser rifle has been 132,000,000 marks.

The following is a list of the Purchase Captains retired on pensions of not less than £259 per annum, with the rank of Lieutenant-Colonel, to whose case we have several times referred. The list only includes those who were not less than 45 years of age, and those who had not less than 25 years' full-pay service, when they retired:—Lieutenant-Colonels G. G. Beazley, 83rd Foot, commuted; E. F. Browne, 35th Foot, G. L. Bryce, 14th Foot, T. Bourke, 18th Foot, and N. Campbell, 79th Foot, each £259; M. de L. McK. G. A. Clarke, 50th Foot, £263; F. B. N. Crawford, 80th Foot, £268; G. W. Davern, 17th Foot, F. Falkner, 50th Foot, E. Kerrich, 9th Foot, C. R. King, 50th Foot, W. A. Nash, 4th Foot, A. Randall, 13th Foot, J. Rawlins, 48th Foot, A. L. Reade, 62nd Foot, T. D. Rew, 19th Foot, W. L. R. Scott, 62nd Foot, W. Shaw, 102nd Foot, and H. H. Taylor, 5th Foot, each £259; J. F. Trydell, 51st Foot, £280; G. Turner, 12th Foot, A. F. Walsh, 10th Foot, and J. A. Wood, 64th Foot, each £259. The total amount required per annum to raise each of the above officers' pension to £300, the amount prayed for by them in the memorial, would be £970.

There has been a generous distribution of decorations in the French Army in the shape of the Legion of Honour, which, conferred on the officer or soldier, carries with it a pension. Among the recipients we notice General Brincourt, 41 years' service, 19 campaigns, 17 wounds, 2 citations; Brigadier Etienne, 27 years' service, 12 campaigns, 4 wounds, 3 citations; Colonel Trinité, 36 years' service, 15 campaigns, 2 citations; Major Raffin, 31 years' service, 24 campaigns, 1 wound; Major Dessèrier, 21 years' service, 17 campaigns, 2 wounds; Major Mirachaux, 28 years' service, 29 campaigns, 3 wounds; and column after column of nominations and promotions, and numbers of heroes who have seen over a dozen campaigns. For instance, we find Perrin, archivist of the 3rd Class, down at 33 years' service and 27 campaigns. However, the "campaign" often means nothing more than service in Algeria, and not necessarily being under fire.

The Russian General Staff has issued a new map of Central Europe, comprising Poland, Germany, and Austria, on a scale of 25 versts to the inch. The map is in six sheets, and embodies the latest military information, including the new roads and railways that have been constructed during the last few years on both sides of the Russo-European frontier.

The Secretary of State for India has authorised the appointment of a Staff officer to the Army Hospital Native Corps for the Bengal Army, on a salary of 350 rs., rising to a maximum of 700 rs., a month. The Staff Officer is always to be drawn from the Sub-Medical Department.

The forthcoming withdrawal of the 2nd Battalion 18th and 53rd Regiments from Egypt, and the arrival home of the 104th from Malta, will still leave six Territorial Regiments with both battalions abroad, viz., the 35th and 107th, the 1st and 2nd Battalions 18th, the 44th and 56th, the 47th and 81st, the 31st and 70th, and the 68th and 106th.

As, the *Standard* says, Colonel Sir Charles Pearson, Commandant of the Royal Victoria Hospital, Netley, has sent in to Lord Morley's Committee a most valuable report, giving his experiences of the working of the present system of Medical administration. Few men have had better opportunities of judging of the advantages and disadvantages of unification than Sir Charles Pearson. It may interest our readers to know that he, like all other unprejudiced persons, holds strongly to the belief that our existing system is most defective, and that the present unsatisfactory state of affairs is in a large measure due to the ill-judged interference some years ago with the Regimental system.

Two technical engineers, who were sent by Herr Krupp from Essen to St. Petersburg to examine a 11-in. gun that cracked there recently, have reported that the fracture in the coil was due to the gunpowder used, which was altogether unsuited for the ordnance. The gun had fired several shots with gunpowder supplied by Krupp's agent without being injured at all, and it was only after the discharge of a Russian shot with Russian gunpowder that the fracture took place. The shot was the only Russian projectile that did not burst after striking the target, and hence the engineers were able to examine it, with a result that exonerated the makers from the charge of having spoilt the gun with a faulty projectile. In consequence of the bad quality of the native gunpowder, which is substantiated by a commissioner of experts appointed by the Russian Minister of War, it is understood that a supply will be obtained from abroad for the heavy ordnance, probably from Essen. Krupp will also receive the order for the supply of steel projectiles for the 250 guns of 11-in. calibre owned by Russia, amounting in the aggregate to 10 million roubles, or a little more than a million sterling. Recently, a small order was given him for 1,539 shot, at the rate of about £20 a piece, or, in all, to the value of £31,500. The fact of such an order being given, and the negotiations for the monster one of a million sterling having arrived at a final stage, supports pretty conclusively the statement we made a few weeks ago, during the war-scare, that Russia had no intention of fighting Germany just yet. Whether she wishes to renew her aggression in Armenia is a very different matter. Well-informed persons at St. Petersburg affirm a conflict with Turkey, or with Turkey and England combined, to be more likely than a German war, but consider both to be improbable for the moment. Nevertheless, the German Military and Naval authorities are taking every precaution to avoid being caught unawares.

We have reason to believe that the recommendations of the Committee which recently assembled at the War Office, under the presidency of Sir A. Hayter, Bart., M.P., to consider the position and prospects of the officials of the Pay Department, are now before the new Secretary of State for War for his decision. As, therefore, the grievances of the Department are attracting the attention of the highest authority, we forbear from comment at present, further than to point out that the labours of the Department in Egypt still remain unrewarded, except in the person of the Chief Paymaster, although various small supplementary gazettes have appeared since the "Honours Gazette" of November 17. It is rumoured that the War Office opposes the idea of honours being given to any officers not actually at the front in the late campaign. If this rule is to be enforced, the names of many officers, both Staff and Departmental, whose position at the base, and along the line of communications, necessarily prevented them from being near the enemy, ought to have been erased. Amidst such a lavish distribution of rewards, one would anticipate some consideration for the old combatants, many with previous war service, who have been driven to join a Department, solely to avoid being put on the shelf in the prime of life. The Department is now, as it has been for many months, some thirty below its strength. How can we expect candidates to come forward, after the treatment its officers have received? It indicates more than ever the absolute necessity of the Department being represented, as all others are, by one of its own officers in Pall Mall.

The amount appropriated to the Russian Minister of War during 1882 for extraordinary expenses reached 2½ millions sterling, being the lowest sum granted since 1876. In that year, the extra grant amounted to 5 millions sterling; in 1877, 43 millions; in 1878, 40 millions; in 1879, 13 millions; in 1880, 5 millions; and in 1881, 3 millions sterling. A large portion of the extra expenditure incurred last year was due to the development of the military power of Russia beyond the Caspian.

As an indication of the views of Government respecting the permanent occupation of the advanced posts on the Sind frontier, we notice in the Lahore paper a statement that orders have been issued to all regiments proceeding to Quetta in relief to take with them their recruits, drill instructors, and schoolmasters; while men of these classes belonging to corps remaining on the frontier are to be sent to join their respective regimental head-quarters.

Under the title of "Sidelights on the Campaign in Egypt," an "Eye-witness" has contributed a couple of most interesting letters to the *Pioneer*, of Allahabad. The writer, who was present in Egypt throughout the operations as a Special Correspondent, speaks of things as he found them, and the account he gives of what he saw whilst with the Army in the field has created considerable discussion in India. His letters bear the impress of truth, and as he is known to have considerable experience of warfare, his opinions are worthy of consideration. It is to be regretted that the criticisms of this writer are not likely to be generally read by the public at home, for they furnish much food for reflection:—

"An Eye-witness" says:—"The overwhelming success which attended our military operations in Egypt has thrown a deceitful gloss over the mismanagement with which they were conducted, and induced not a few organs of public opinion to condone the shortcomings of the responsible chiefs of the Army and its administrative departments. We have attributed to the perfection of our own organisation, and the capacity of one man, what was in reality due to the absence of military capability on the part of the Egyptian leaders, and the unwarlike quality of the bulk of their men. The very troops over whose defeat we are exulting, as though we had overthrown the hosts of Germany or France, are the same whose fighting record is one long roll of defeat at the hands of Greek Cretan insurgents; the despised Servian; the warriors of Abyssinia, with whose quality we are ourselves acquainted; and who, during the Russo-Turkish war, were carefully preserved from contact with the enemy, so small was their fighting value. In making these remarks, I have no intention to disparage the services of the army we sent into Egypt. The patience of the officers and men under fatigue and privation will remain as proud a recollection as any deed of valour. Exposure to the scorching sun by day, the chill night air, driving dust-storms, bad water, and indifferent food, frequently scantily supplied, were all borne uncomplainingly, or with that easy-natured grumbling which treated mishap and misfortune as inevitable under the circumstances. Where censure is due, and was fairly earned, was in the higher ranks. To begin with, the Army in Egypt was an attenuated body, with hydrocephalus head. In point of size, the Staff of all kinds was inordinate and overgrown. The consequence was a dissipation of authority and responsibility, resulting in negligence in the execution of orders and performance of duties. For the management of a corps of less than 25,000 men, *fifteen* Generals were sent out to Egypt. Round each individual of this galaxy, from Sir Garnet Wolseley to the youngest Brigadier, revolved a host of attendant satellites, all qualifying for decorations, promotion, or favourable mention, and paying particular regard, in the case of the head-quarters staff, to their own personal comfort and well-being. . . . . . Every one with a son or nephew to advance had found a place for him; and where places were not to be found in the ordinary course, they were created. In addition to the ordinary staff of a Commander-in-Chief, Sir Garnet was surrounded by a swarm of men sent out for 'general' or for 'special' service. It was no longer a case of 'take care of Dowb,' but of a staff which was one huge 'Dowb' taking care of itself."

The writer goes on to point out the shortcomings of our Military system, and to show what an overrated business the last campaign has been, and how little prepared we are, notwithstanding all the assurances of the Army reformer to the contrary, to undertake in sober earnest the work of a European war. It really is time that the nation aroused itself from its lethargy. The stories circulated with regard to mismanagement in Egypt may be exaggerated, but where there has been so much smoke, there must have been some amount of fire also.

Nothing has yet been decided, the *Madras Mail* remarks, about the grant of batta to the Indian Contingent engaged in Egypt, and it is to be feared that there is but little chance of the decision being liberal. "All the British troops serving with the Indian Contingent were placed on English pay, while native troops—officers and men—were on Indian pay. It would therefore seem, and be, unfair to give batta to the Indian troops, without extending the grant to the whole army; which is hardly likely to be done."

We are in a position to confirm the statements which appeared in the *Standard* that the Canadian military authorities some years ago proposed a scheme by which the Imperial Army could be reinforced by 10,000 men from the Canadian Militia, fully trained and fit for service, and that their proposal has been long "under consideration" at the War Office. Valuable as such an accession of hardy, fully-grown men would be in the event of a great war or other emergency, valuable as even the offer of it must prove, we look on this as only the earnest of better things. We trust that it is the first evidence of an irresistible desire for the Imperialisation of the Army, and that before long, not only Canada, but the various Australian States, and even the minor dependencies, will claim a share in the defence of that mighty Empire of which they are important and influential portions. As a first move towards the realisation of the projects we have sketched, why should not the (late) 100th Regiment resume the character under which it was re-formed twenty years ago, as a Canadian regiment. With its depôt always in Canada, its recruits obtained in that country, and its officers, in most cases at least, being Canadian gentlemen, it would form a link of loyalty and friendship with the old country of inestimable value.

In a letter addressed to us by the Principal Veterinary-Surgeon of the Indian Contingent in Egypt, which appears elsewhere, it is inferred that we, in an article which appeared some time ago in our columns, brought a charge of neglect of duty or mismanagement against the Veterinary officers who served under Mr. Anderson's orders in Egypt and Afghanistan. We certainly did not desire to do anything of the kind; on the contrary, we consider that the officers employed, both in Afghanistan and Egypt, deserved the greatest amount of credit for having overcome as well as they did the serious difficulties against which they had to contend. It was against the short-sighted policy of the Government of India that we protested. As we have shown on many occasions, the Government of India have countenanced the most reckless waste of public money, rather than recognise the necessity of a properly-organised staff of Veterinary-Surgeons. They by their action have placed the greatest possible difficulties in the way of the authorities at the War Office, in the attempt they have for some time past been making to improve the Veterinary arrangements of the Army. The blame for all shortcomings rests with them, and we should have been the last to condemn individuals for errors, which are, directly or indirectly, the outcome of official parsimony or, what, perhaps, is worse, official ignorance.

A distinguished correspondent, himself a Grand Cross of two orders of knighthood, suggests that as certain personages are so very anxious to meddle with —and muddle—everything relating to the Army, they might fairly take up the medal question, and endeavour to introduce reform in that direction, by influencing officers to wear their decorations in evening dress. Our correspondent thinks, and we are disposed to agree with him, that officers who possess decorations and war medals, and refuse to wear them in public because they have left the service or are not in uniform, are committing a breach of etiquette, if, indeed, they are not offering a direct insult to their Sovereign. He says, "It is customary for those of us who are Grand Crosses to wear the badges of honour which show our rank. Then why should it be considered snobbish for a Companion to appear in his insignia when the knights wear theirs? The good-taste is on the part of those who are proud of their honours; those really guilty of snobbishness,—of course, unintentionally—are those who, though possessed of decorations, are ashamed to be seen wearing them. In my opinion, there is every reason why officers *should* be encouraged to wear the decorations in miniature in evening dress, and it is impossible to put forward any argument to show that they should not." The rank of our correspondent has induced us to give his views the prominence they deserve.

No one will feel surprise at the decision of the War Office to reduce the expenses of the Chatham command, for it has long appeared an anomaly that a Major-General should be told off to carry out the duties of this district,—which consists at the present time of but two Line battalions, six batteries of Royal Artillery, and twelve companies of Royal Engineers, and does not include a single Regimental District. In comparison to the responsibilities of the Major-General commanding the Northern District, with his four cavalry regiments, five Infantry battalions, and twenty-six Regimental Districts, the officer commanding at Chatham must have held a sinecure appointment. It will be evident to anybody that either the Northern District is far too extensive, or that at Chatham has been much too small; and now that the War Office has taken up the matter, we trust it will make an attempt to rearrange other commands so as to distribute work a little more evenly all round.

A marriage was solemnised on Monday at the English Church, Rue d'Aguesseau, Paris, of some interest, that of Major A. S. Gilbert, 4th Battalion Princess of Wales's Own Yorkshire Regiment, and the Princess Melvina Rundhir Singh Ahluwalia, daughter of his Highness the late Rajah Rundhir Singh, G.C.S.I., of Kapurthala, by his marriage with Henrietta Melvina Hodges, daughter of the late Mr. R. Hodges, of Loodiana. The Kopurthela Contingent did good service in the Mutiny, the Rajah Rundhir Singh himself commanding. For his services, he received from the British Government a large concession of territory in the province of Oudh. The Rajah, a Sikh by birth, was considered one of the most enlightened of Indian Princes. He had a Christian church erected in commemoration of the birth of his daughter, Melvina, whom he had baptised in the Christian faith, and established a Christian mission, a hospital, and alms-houses in his State. The Rajah died at Aden, *en route* for England, in 1869.

The French, being unable to reconcile themselves to the loss of Alsace and Lorraine, have, ever since the signing of the Treaty of Frankfort, indulged in the innocent, if rather childish, practice of tinting the two severed provinces with black in their maps. An order has been issued by the authorities that this practice is to be abandoned, from January 1, 1883. The French Press has taken up this matter very warmly, showing that Germany, in her official maps, is no observer of frontier lines as settled by treaty, but coolly annexes large portions of French territory. Italy does the same. According to Italian maps, Nice and Savoy were never ceded to France; Monaco does not exist under a French protectorate, and the Italians possess Corsica, Tunis, and, of course, Malta. Then why should France be bullied for acting in a less indiscreet way? Even Belgium and Switzerland have aspirations which are betrayed in school maps, in order to excite the patriotic covetousness of the rising generation, and France is to be prohibited from mourning over lost provinces!

We find in the *Progrès Militaire* a very curious statement with regard to the efficiency of the French Army. That paper publishes the following note from a General:—"In my brigade I have only 23 officers to do duty in 28 companies. After having told off officers for special service, I can dispose of hardly more than two per battalion." The *Avenir Militaire* regrets that the General did not furnish some more particulars on this deplorable state of affairs, and publishes a letter from Tunis, which shows that most of the battalions composing the Army of Occupation have a maximum effective of 280 men, or 70 men per company. If such is the situation of troops on service who ought to be on a war establishment, says the writer, what must the companies on a peace establishment at home be? It must be remembered that the strength of a French company on a war footing is fixed at 250—close on the strength of the battalions in Tunis. We may add that the French have now in Tunis no less than 63 battalions—59 of infantry and four of Zouaves—and yet all these battalions do not represent a force of 30,000 men. The French are beginning to find out that they have too many companies; and, in fact, they have 1,000 more than the Germans.

It appears that the French military authorities treat the decisions of the Chambers rather lightly. This was shown the other day when the War Minister asked for a supplementary credit of £12,000 for the columns operating in Algeria, "in consequence of the number of officers detached on Staff service having been exceeded." In other words, this means that the War Department has employed a greater number of officers on Staff service than is permitted by the laws of 1875 and of 1880. The War Office and the Parliament have been wrangling over this matter for some time. A number of officers are employed as military attachés, aides-de-camp to the President of the Republic, military commandants of palaces, of the Senate, and of the Chamber. The Parliament insisted that these officers should not form a separate corps, but should be rated either as Staff or regimental officers, and it refused to vote any money for them. After a first refusal, General Farre once more brought the matter forward, but without success. The War Office gave up demanding credits, but it kept on the officers in question, and paid them out of the surplus on other chapters of the military estimates. In this way the intentions of Parliament have been avoided, and money is now required for Staff officers in the field, whose claims must, of course, be settled.

The London correspondent of the Press Association writes:—"Mr. Goschen's story about the battle of Tel-el-Kebir is so striking and so good, that it deserves repetition, and ought to go down among the good things of our military annals. It was told admirably well. There was a gallant young Naval officer, Com. Rawson, who was appointed by Lord Wolseley to guide the Highland Brigade in that dark night by the light of the stars. Com. Rawson brought the brigade to the point, the action commenced, and Com. Rawson fell mortally wounded. The news was brought to Sir Garnet Wolseley on the battlefield of Tel-el-Kebir, and in the very flush of victory, with all the great events on his mind at the moment which was the crowning day of his own fortunes, and when he knew what he had done for his country, he had time, nevertheless, to think of the wounded friend, and he galloped off the field to see Com. Rawson and bid him farewell. And what were the words with which the wounded man received him? 'General,' he said, 'did I not lead them straight?' This is what still distinguishes the military career. While one turns with all Sir Wilfrid Lawson's agony of mind from the field of battle where war has shattered her slain, and refuses to gloat over the defeat of Arabi's unstable Egyptians, one cannot help admiring and praising that admirable devotion to duty even in the hour of death, which, admirable in itself, gives us some of the finest examples of civic virtue."

Experiments made on board H.M.S. Snake at the mouth of the Tyne by the Admiralty, in conjunction with the manufacturers of the carriages and fittings of the new 18-ton gun (9·2-in. bore), have proved satisfactory, but some slight alterations in the fittings have been ordered.

The new armour-plated ship Mars, which the authorities have ordered to be built at Chatham, will be of such a peculiar shape that it has been found impossible to lay her keel down on either of the building slips, so that it will be necessary to build her in one of the docks. No visitors are allowed to enter the building in which the plans are being prepared.

Messrs. Burnett and Co., Army agents, &c., have removed their offices from Surrey Street, Strand, where they have carried on business for nearly a hundred years, to more central and commodious premises, at No. 123 Pall Mall, S.W.

NOTES FROM ALDERSHOT.

(FROM AN OCCASIONAL CORRESPONDENT.)

Little of an interesting nature has taken place here during the week. The 103rd Royal Dublin Fusiliers—15 officers, 751 men, 54 women, and 88 children—left the Camp on Tuesday last, for Dover, there to be stationed until further orders. A strong draft from the 26th Scottish Rifles (Cameronians) will leave the Camp early next month, for Bombay, on board the Jumna, to join the 90th Regiment. The 104th Royal Munster Fusiliers, now at Malta, and held in readiness to return to England, will, on arrival, be stationed at Aldershot. It is stated that it is the intention to form the 3rd (Duke of Connaught's) Brigade into a Brigade of Rifles. The 3rd Batn. Rifle Brigade is already in the North Camp, and if this idea be carried out, the 87th Royal Irish Fusiliers will be withdrawn, the 26th Scottish Rifles, from the 1st Brigade, taking their place, and a rifle battalion from another station (probably the 83rd Royal Irish Rifles) moved to Aldershot for this purpose, which would complete the brigade, there being scarcely room for more than three battalions in the North Camp at present, owing to the rebuilding of that camp. After considerable delay, a successor has been found to Major Douglas, for the appointment of Superintendent of the Camp Fire Brigade, Serjeant-Major J. Maguire, Foreman of Works, Royal Engineers, having been promoted to the rank of Quartermaster in the Army to fill the post. Although this officer is much beyond the age limit (40 years), a special exception has been made in his favour, because of the abilities he possesses for a position of this kind. Another Court of Inquiry was held here on Saturday, to inquire into and report upon an accident which occurred to a Serjeant-Major of Royal Artillery; president—Lieutenant-Colonel Rawlins, R.H.A.; members—a field officer (Cavalry), and an officer of the Commissariat and Transport Staff. Major E. H. G. Ravenhill, 85th King's Shropshire Light Infantry, has also been ordered to attend the Veterinary Class for a course of instruction. Deputy-Surgeon-General J. Ekin, C.B., sanitary officer of the Division, made an inspection of the whole of the barracks and tents in the command during the week. An inspection of the whole of the hospitals will be made by him during the ensuing week. The Divisional Steeplechases will be held on Thursday and Friday, April 12 and 13. A capital programme has been already issued; and the Spring Race Meeting at Aldershot bids fair to be a successful one. Lieutenant-Colonel M. H. Hale, 26th Scottish Rifles, has been appointed a member of the Special Committee on Martini-Henry Arms and Ammunition. Quartermaster-Serjeant G. Palmer, Military Staff Clerk in the 3rd Brigade office, has been selected for the position of Garrison Serjeant-Major, and will shortly be appointed.

ARMY NOTES.

We (*Standard*) understand that the question of batta for the troops employed in the late campaign in Egypt has been for some time past under the consideration of the Treasury, but that as yet no decision has been arrived at, although the Admiralty, India Office, and War Office are all in favour of a grant being made to compensate officers and men for the serious losses sustained by them whilst engaged on active service. The decision of the Treasury, in whose hands the matter rests, will be communicated to Parliament early in the Session. Meanwhile, pressure is being brought to bear upon their Lordships to induce them to provide the necessary funds.

The *Times* says:—"The War Office has at length come to a decision respecting the command of the Chatham District, vacated by Sir E. Wood when he left for Egypt. The command will, it is stated, no longer be a separate one. The garrison at Chatham and Sheerness, as well as the forts on the Medway, will be included in the South-Eastern district, the head-quarters of which are at Dover, whilst the garrison at Gravesend and Tilbury, and all the forts on the Thames will be absorbed in the Woolwich District."

The *Standard* telegraphs from Cairo, on the 21st inst.:—"Col. Hicks arrived yesterday, and will proceed to the Soudan this week as chief of the Staff under Nyazi Bey." The same correspondent says:—"The hospital ship Carthage will leave here shortly, and her fittings will be removed to the Ramleh Palace, where the Permanent Military Hospital for the Army of Occupation is established."

The Arcadia, steamer, Capt. Cruickshanks, from Liverpool, left Algiers on the 19th inst. for Alexandria, having on board Lord Napier of Magdala and his son.

Col. R. R. Gillespie, C.B., half-pay, late 106th Foot, who was employed as Assist.-Adjt. and Qrmr.-Gen. of the 1st Division, Egyptian Field Force, has been offered and has accepted a Brigade command in India, and left England on Wednesday to assume his official duties on the Staff of the Bombay Army.

Some doubts having been expressed as to the application of Clause 166 of India Army Circulars of 1882 to commandants of native regiments who had not taken up either the duties or the staff pay of their commands until long after the date of the order notifying the appointments, or until after the date of G. G. O. No. 209 of 1882, it has been ruled that the mode of calculating the tenures laid down in that clause is to be adhered to in all such cases, as it has in fact been applied in similar cases which have already cropped up in the Bengal and Bombay armies.

The Marquis of Hartington has recently decided that when officers of the Indian Army are employed on the Staff out of India, they should not be allowed the English pay of their rank from Indian revenues; and his Lordship has also ruled that officers holding any appointments under her Majesty's Government, out of India, civil or military, the salaries of which are payable from strictly Imperial (Home) revenues, are in future to be considered as having been lent for Imperial purposes, and will, therefore, be exempted from payment of contributions towards pension, as now required from officers whose services are lent for other than Imperial purposes.

Col. D. B. Young, Controller Military Accounts, Bombay, succeds Col. W. T. Chitty, Bombay S.C., Controller Military Accounts, Bengal, in March next, on the latter's retirement from the service.

Brigdr.-Gen. H. C. Wilkinson, C.B., who commanded the Cavalry Brigade of the Indian Contingent during the Egyptian expedition, has returned to India from England and gone to Jubbulpore.

Col. J. W. McQueen, C.B., commandant of the 5th Punjab Infantry, will succeed Col. Black as Military Secretary to the Punjab Government.

The *Standard* says:—"In consequence of the difficulty which arose in connection with the Vote of Credit of £3,015,435 11s. 5d., obtained by the War Office on account of extra expenditure occasioned by the war in South Africa, the Lords of the Treasury have expressed the opinion that means should be found to enable the officials of the Comptroller and Auditor-General of Accounts to check all accounts of special expenditure, whether provided out of Supplementary Grants or Votes of Credit; and in future, no account for War-Office expenditure will, we understand, be submitted without the officials of the Comptroller and Auditor-General having compared the expenditure with the accounts and vouchers from which it has been abstracted."

It is believed that the proposal of the Simla Army Commission to classify all station commands in India, and grant pay for the same, is likely to be brought into force on April 1.

The *Times* states that as soon as the Duchess of Connaught is convalescent, she, with the Duke, will leave Windsor for Germany, to stay several weeks.

The Marquis of Hartington, addressing his constituents at Darwen on Saturday, said he was glad to have been able to reverse the policy of the late Government in India. The Afghan War was totally unnecessary, and if we wanted a barrier on our North-west frontier, we should be friendly with the Afghan people, and not interfere with them. He denied that the Government had adopted to the full their opponents' policy in Egypt. They did not interpose until after British honour and interests had been interfered with, and it was fully intended to retire when the country was reorganised.

The *Standard* announces that "her Majesty has sanctioned the issue of the bronze star which the Khedive proposes to grant to the officers and men who formed part of the British Expedition under Sir Garnet Wolseley's command. The issue of the decoration will, however, be restricted to the officers, petty officers, and seamen of the Royal Navy and officers, non-commissioned officers and men of the Army who served in Egypt between July 11 and September 13. Those who landed in Egypt subsequent to the action at Tel-el-Kebir are not to be considered to have any claim to the star."

An order has been issued from the Horse Guards by the Commander-in-Chief to the effect that all men serving with the colours who have got six years' service may now be transferred to the Army Reserve. Transfers to the Reserve have been suspended since the Egyptian campaign commenced, and there is therefore an accumulation of men who have served six months (more or less) over their time waiting for their discharge.

The Cairo correspondent of the *Standard* telegraphs:—"Col. Hicks will be accompanied on the Soudan Staff by several English officers. The party leave at the beginning of next week, taking three Nordenfelt guns, with native artillerymen."

The *Standard* correspondent, telegraphing from Durban, says:—"I learn that the Boer army which has been sent against Mapoch is by no means progressing well. The force under Mapoch not only holds its own, but it has, up to the present, had the best of the fighting, and there are no prospects of an early closing of the campaign. The Boers are becoming greatly discontented. Provisions for the force are becoming scarce, and the troops are suffering from bad medical attendance. Matters generally in the Transvaal are going on unsatisfactorily. Commandeering is now general throughout the State. Everywhere business is paralysed."

An exhibition of war trophies, relics, and articles of kindred interest, in connection with the late and other recent campaigns, as well as articles and implements of interest used in actual warfare, is to be held in Humphreys' Hall, Albert Gate, next month, in aid of the Egyptian War Fund.

The *Standard* says, "Col. Sir C. Pearson, K.C.M.G., C.B., Commandant of the Royal Victoria Hospital, Netley, better known to the public as the gallant defender of Ekowe during the Zulu Campaign, has, we learn, sent in to Lord Morley's Committe, at the War Office, a valuable report, giving his experiences of the present system of Army Medical administration."

A special morning and evening performance will take place on Thursday next, Feb. 1, at Hengler's Grand Cirque, Argyll Street, Regent Street. The gross receipts will be entirely devoted, by Mr. Charles Hengler, to the Egyptian War Fund. The performance will be under the immediate patronage of several commanding officers of the Household Cavalry and Foot Guards, in addition to which several notable and distinguished personages are expected.

The Franco-English Tunisian Esparto Fibre Supply Company, Limited, has been incorporated, with a capital of £250,000, to work a concession, dated June 12, 1881, granted by his Highness the Bey of Tunis, to M. Duplessis, a French subject, for the exclusive right during a period of 99 years of collecting and exporting the esparto grass grown in the territories of Bouhedma, Majoura, Aicha, and Hadaje.

The Army.

5th Dragoon Guards. Lieut.-Col. Sir J. D. Bourne, Bart., is about to retire.

7th Dragoon Guards. Lieut.-Col. Campbell, C.B., is about to retire upon half-pay from the command of the regiment.

8th Hussars. Capt. Abbott has applied for permission to retire, having lost his promotion by being placed on half-pay, having been invalided home from India from the effects of a railway accident, followed by sunstroke. Lieut. P. L. Clowes is the senior sub.; he served in the Afghan War.

9th Lancers. By latest accounts from Grenada, Mr. Goldsworthy, C.M.G., late of the regiment, had arrived from St. Lucia, and taken up the appointment of Lieutenant-Governor.

10th Hussars. Lieut. Alexander is ordered home from India to join the depôt.

12th Lancers. Capt. Dean will be seconded on appointment as Military Secretary to the Governor of Madras.

ROYAL ARTILLERY.

Major-Gen. E. K. Money, Col. on the Retired List (late Bengal), died on Sunday last at Bromley, Kent, aged 68. He entered the Army in 1831, and obtained a lieutenancy in 1840. He served in the Afghanistan Campaign of 1842, under Gen. Pollock, taking part in the forcing of the Jugdulluck Pass, the action of Tezeen, the forcing of Huftkotul Pass, and the recapture of Cabul. He was in command of the Artillery at Rangoon, and was present at the battle of Budleekeserai and throughout the siege of Delhi. In 1846 he was promoted to a captaincy; he became major in 1858, lieut.-col. in 1861, col. in 1865, and major-gen. in 1872.

Col. T. Nicholl (late Bengal) will, it is understood, succeed Major-Gen. Napier Campbell in the important appointment of Inspector-General of Ordnance, India.

Capt. G. R. C. Young, on the Half-pay List, died at Park House, Wimbledon, on the 18th inst., aged 55 years. The deceased was youngest son of the late Mr. G. Young, Lincluden House, Dumfries, N.B.

Our Woolwich correspondent writes:—"A new and powerful field-gun, designed to supersede the 16-pounder as the weapon of the Field Artillery, has been proved at the Royal Arsenal butts this week, and passed a satisfactory trial. It weighs the same as the 16-pounder, namely, 12 cwt., but is a breechloader, and, like all the modern guns, has an elongated chase or barrel. The construction is in all respects identical with the latest designs of the Royal Gun Factories; the metal is steel, in concentric coils, and the breech-plug is filled with the De Bangé obturator, as the most effectual preventative of the powder gases escaping in that direction. The several advances made in the art of gunnery since the 16-pounder was produced by the Experimental Committee in 1870 have enabled Col. Maitland, superintendent of the Royal Gun Factories, to bring out this new gun of the same weight to fire a projectile 6 lb. heavier, and it will consequently be known in the service as the 22-pounder. The 16-pounder fires only 3 lb. of powder behind the shot, but the 22-pounder can with safety take 7½ lb., and with this charge it has this week registered the remarkable velocity of 1,775 ft. per second, which is 420 ft. higher than the best performance of the gun which it is to outrival. Such a velocity implies a very extensive range, and the gun will probably do effective work with shrapnel shell at a distance of three miles. The 16-pounder has been a much abused gun almost from the time when it was brought out, and of late years has been regarded as the embodiment of everything that is odious in the sight of a scientific artilleryman. Its supersession by the 22-pounder will gratify the gunners, and place the British Artillery at a decided advantage over the artilleries of the Continent. A number of the new guns are to be at once manufactured at Woolwich."

ROYAL ENGINEERS.

Col. Sir Howard Elphinstone, V.C., K.C.B., left London for Berlin on Tuesday morning, to represent their Royal Highnesses the Duke and Duchess of Connaught at the funeral of his late Royal Highness Prince Charles of Prussia.

Major Cumming, Assistant-Secretary to the Government of India, in the Military Works Branch, on being promoted Superintending Engineer, Burmah, is succeeded by Capt. J. E. Broadbent, Personal Assist.-Inspector-Gen. of Military Works, Simla.

The *Standard* says:—"The campaign in Egypt having brought prominently to the notice of the War Office the value and importance of a properly organised Railway Corps for service with an army in the field, the Secretary of State for War has under consideration a proposal by which these duties would be taken over by the corps of Royal Engineers. The idea is to form separate companies for railway work. Lord Hartington will, it is believed, give details of the new organisation when introducing the Army Estimates."

The *Times* says:—"Col. Sir O. St. John, K.C.S.I., goes to Cashmere in the spring as Resident to the Maharajah, whom he will join at Srinuggur."

Grenadier Guards. Capt. L. N. F. Ames-Lyde, late of the regiment, died at Ayot St. Lawrence, Herts, on the 17th inst., aged 32 years. Lieut. the Hon. G. F. H. Somerset, A.D.C. to the Governor of Bombay, has been granted 90 days' Afghan privilege leave.

6th Royal Warwickshire Regiment. A telegram from Australia announces the death of Major C. B. Phillips, of Barnham Hall, Suffolk, and late of the regiment. He served with the 39th Foot in the Crimea (medal with clasp and Turkish medal), and a few years after retired from the Army. Major Phillips died on the voyage to Australia. An exchange of battalions has been sanctioned between Capts. Harwood and Scott, Capt. Harwood joining the 2nd and Capt. Scott the 1st Batn.

9th Norfolk Regiment. Lieut. Thompson, 2nd Batn., is ordered home to join the depôt.

11th Devonshire Regiment. Capt. Browne, 2nd Batn., has been appointed station staff officer of the Pachmarhi Depôt, vice Capt. the Hon. W. Roche, 24th Foot.

13th Somersetshire Light Infantry. Capt. Palmer has been posted to the 1st Batn. on promotion, and ordered home from India to join head-quarters at Dublin.

15th East Yorkshire Regiment. The 1st Batn., at Londonderry, is under orders of readiness to proceed to England, and will take the place of the 69th at Sheffield.

17th Leicestershire Regiment. Brevet Lieut.-Col. Travers, 1st Batn., has been confirmed in command of the Mysore troops, and will forthwith resign his commission in the Queen's service, that being the only condition exacted by the Secretary of State.

18th Royal Irish Regiment. Lieut.-Col. Anderson, half-pay, late of the regiment, has been appointed Professor of Military Surgery at the Royal Military College.

21st Royal Scots Fusiliers. An exchange has been sanctioned between Cols. Templeman, 1st Batn., and Gildea, A.D.C., 2nd Batn., Col. Gildea being ordered home from India to take Col. Templeman's place at the head of 1st Batn. at Dover.

22nd Cheshire Regiment. Capt. and Pymr. Chisholm-Batten has been granted leave from India to England for twelve months, on private affairs.

25th King's Own Borderers. Capt. Becker, 1st Batn., is in readiness to embark, to join the service companies in India, and will do duty with the draft for the 88th.

26th Scottish Rifles (Cameronians). Major Brunker has resigned his appointment as D.A.A. and Q.M.G. at Portsmouth.

28th Gloucestershire Regiment. An exchange has been permitted between Major Collingwood and Brevet Lieut.-Col. Murray, of the other battalion, the 61st.

32nd Duke of Cornwall's Light Infantry. Orders have been received at Devonport directing the regiment to be in readiness to proceed to Londonderry.

36th Worcestershire Regiment. Major A. F. Stewart, late of the regiment, died at 4 Carisbrooke Road, St. Leonard's-on-Sea, on the 20th inst.

40th South Lancashire Regiment. Major T. J. Kelly, late of the regiment, has been appointed commandant of the Gendarmerie Depôt at Cairo. Capt. J. P. Greenway, late of the regiment, died recently at Calcutta.

41st Welsh Regiment. The colonelcy is vacant by the death of Gen. Sir Richard England, G.C.B., K.H., which occurred at St. Margaret's, Titchfield, on the 19th inst. The deceased was born May 13, 1793, and entered the Army, Feb. 25, 1808; became lieut., June 1, 1809; capt., June 11, 1811; major, Sept. 4, 1823; lieut.-col., Oct. 29, 1825; col., June 28, 1838; major-gen., Nov. 11, 1851; lieut.-gen., June 4, 1856; col., 41st Regt., April 20, 1861; and gen., July 6, 1863. He served at the attack on Flushing in 1809, and in the operations in Sicily in 1810-11, joined the Army in Paris in 1815, commanded the 75th Regt. several years, was for some time Commandant of Kaffraria, and was employed throughout the Kaffir War of 1836-37 (medal), commanded the Bombay Division in the Afghan War of 1842 (medal), commanded the 3rd Division in the Crimea in 1854-55, including the battles of Alma and Inkerman, affair of June 18, and the siege duties against the Russian forts which covered the south side of Sebastopol from their first investment till Aug. 2, 1855 (medal with clasps, G.C.B., 1st Class of the Medjidie, Grand Officer of the Legion of Honour, and Sardinian medal).

46th Duke of Cornwall's Light Infantry. The *Standard* says:—"Col. Richardson, C.B., who was severely wounded whilst in command of the 2nd Batn. Duke of Cornwall's Light Infantry at the battle of Tel-el-Kebir, by a bullet, which entered his mouth and damaged his jaw, is so far recovered, that there is every prospect of his returning in due course to the active duties of his profession."

ROYAL MARINES.

Capt. E. Wheeler, R.M.A., has been ordered to embark in H.M.S. Jumna on the 5th prox. for passage to Port Said to replace Capt. Shakespeare, R.M.A., whose services have been applied for by Major-General Sir H. E. Wood, in connection with the re-organisation of the Egyptian Army.

Capt. J. B. Leefe, R.M.A., who has been studying at the Staff College, will proceed to Aldershot in April next to complete the course prescribed by the Staff College Regulations.

An exchange of divisions has been sanctioned between Lieuts. E. A. Wylde, R.M.L.I., Plymouth Division, and W. P. Drury, R.M.L.I., Chatham Division.

Medals for long service and good conduct have been awarded to the under-mentioned:—Serjts. J. Goodman, 11th Compy., J. Davidson, 19th, H. Ashton, 21st, and W. Townsend, 22nd; Corpl. E. E. Rees, 42nd; Pte. G. Skinner, 8th; and J. Morris, 6th, R.M.L.I.

55th Border Regiment. Capt. Charlton is about to retire upon half-pay, with the view of serving in the Militia.

56th Essex Regiment. Major G. Spencer has resigned his appointment as military secretary to the Right Hon. Sir E. Grant Duff, Governor of Madras.

60th King's Royal Rifle Corps. Capt. Hope-Edwardes, 4th Batn., has been granted leave from India to England for fifteen months, on private affairs.

61st Gloucestershire Regiment. An exchange has been sanctioned between Brevet Lieut.-Col. Murray and Major Collingwood, 28th Regt. Col. Murray remains in England, and Major Collingwood goes to India in his place. Lieut. Beville has been granted leave from India to England for six months, on medical certificate.

63rd Manchester Regiment. Lieut. Codrington, a candidate for the S.C., has been appointed to the 23rd Bengal N.I. (Pioneers) on probation.

66th Berkshire Regiment. Capt. Pigott has been appointed D.A.A. and Q.M.G. at Portsmouth, vice Major Brunker, 26th Regt., resigned the appointment.

67th Hampshire Regiment. Qrmr. Hampton has been granted leave from India to England for twelve months, on urgent private affairs.

68th Durham Light Infantry. Lieut. Kenyon-Slaney has been granted leave from India to England for twelve months, on private affairs.

69th Welsh Regiment. The regiment is under orders to proceed from Sheffield to Ireland.

77th Middlesex Regiment. Major Jervis-White has been granted leave from India to England for nine months, on urgent private affairs.

78th Seaforth Highlanders. Lieut. Hume joins the depôt, instead of Lieut. Davidson.

79th Queen's Own Cameron Highlanders. Capt. Baynes has been appointed garrison adjt. at the Citadel of Cairo.

83rd Royal Irish Rifles. Lieut. Harris, a candidate for the S.C., has been appointed to the 23rd Bombay N.I., on probation.

87th Royal Irish Fusiliers. Lord Castletown, of Upper Ossory, in the Peerage of the United Kingdom, died at 32 Hertford Street, W., on Monday. Born in 1809, he was educated at Eton, and served several years in the 87th.

88th Connaught Rangers. The regiment marched from Mooltan on the 3rd inst., *en route* to Ranikhet and Jubbulpore. Capt. Wood has been posted to the 2nd Batn. (the 94th), on promotion, and ordered home from Bengal to join head-quarters, at the Curragh.

89th Royal Irish Fusiliers. Lieut. Harrison has been granted leave from India to England for twelve months, on medical certificate.

96th Manchester Regiment. Major Wynter is about to retire.

97th Royal West Kent Regiment. Major Smith, having completed his term of service with the depôt at Maidstone, will shortly join head-quarters at Dublin.

100th Leinster Regiment. Capt. Wood has been posted to the 2nd Batn. (109th), at Birr, on his recent promotion, and is ordered home from India to join head-quarters.

103rd Royal Dublin Fusiliers, consisting of about 18 officers, 750 non-commissioned officers and men, 54 women, and 88 children, under command of Lieut-Col. Frankland, left Aldershot on Tuesday by a special train for Dover, where it has taken over quarters.

104th Royal Munster Fusiliers. The regiment on arrival home from the Mediterranean is to take over quarters at Aldershot.

Veterinary Department. First-class Vet.-Surg. J. Anderson, late Principal Veterinary-Surgeon with the Indian Contingent in Egypt, writes to us from Ambala on Dec. 12, 1882:—"On my return from Egypt, in reading over some old files of your paper, in that of Oct. 7, 1882, I met with the following remarks, in an article on the working of the Veterinary Department in Egypt. After expressing great satisfaction with the British arrangements, I find the following:—'We wish we could say as much for the veterinary arrangements of the Indian Contingent;' also, in another portion, the words, 'In fact, in Egypt we had Afghanistan repeated.' Now, this would seem to imply that both in Egypt and Afghanistan the veterinary arrangements were a failure, such being far from the case. I had the honour of serving in both campaigns as inspecting veterinary-surgeon, and cannot allow for a moment that the veterinary arrangements were in any way defective in Egypt; indeed, I can prove by my statistics that they compare most favourably with those on the British side during the late campaign,—and I shall be happy to furnish you with details, should you care to take up the subject. It was greatly to be deplored that, for the benefit of the British force, the Indian Contingent should have been deprived of the services of four out of the five executive veterinary officers who were sent from India, but this can hardly be fairly charged to the Indian Government; rather, it was the undue zeal displayed by the British authorities to secure the safety of the British troops, at the expense of the Indian Contingent. From Aug. 21 to Sept. 8, the Veterinary Department of the Indian Contingent in Egypt consisted of myself and a few salootries (native farriers). On the latter date, Vet.-Surg. Evans arrived with H Baty. 1st Brig., R.A., and on Sept. 11 Vet.-Surg. Savage's services were placed at my disposal, as a special arrangement, on glanders being detected in the 1st Troop 6th Bengal Cavalry, and it is to the very able, zealous, and devoted manner in which these two officers carried out my instructions that I owe the success achieved under so many disadvantages. There was never the smallest danger of the outbreak of glanders spreading to any other corps or regiment through the troop of 6th Bengal Cavalry infected with the disease, so stringent were the precautionary measures observed while they remained at Ismailia. Their removal to Suez by march route was, I consider, a most injudicious step, against which I protested at the time. Glanders, however, could not possibly have been introduced into Egypt from India, as it is well known that the disease was rife in the Egyptian Cavalry, and there existed far more danger to the British horses of contagion from the Egyptian sources of disease, than from a troop of Bengal Cavalry entirely segregated. The statement that the Indian cattle were infected with rinderpest is also incorrect. Not a single case occurred amongst the Indian cattle. It did appear amongst a small herd of Aden and Syrian slaughter cattle, purchased at Ismailia; but the whole herd, numbering 36 head, were fortunately destroyed by Vet.-Surg. Savage, and the disease was thus entirely stamped out at Ismailia, as far as the Indian Contingent was concerned. I, while in Egypt, thought that the Aden cattle might have brought the disease with them; but on my return to India, during our stay at Aden, I made careful inquiries on the subject, and learned that no cattle disease had been known there for years. So it is obviously unjust to accuse the Indian cattle of introducing and spreading rinderpest in Egypt. The source of the disease, on this occasion, was not the Indian, but, perhaps, the Syrian, or more probably still, the cattle brought from Odessa, where the disease was known to be raging. Cattle plagues have been know in Egypt from time immemorial, so the 'Egyptian Bondholders can have no cause to thank the Indian Government' for introducing into their country the diseases glanders or rinderpest. Your paper is so well known for fairness to all sides, that I am sure you will not hesitate to acknowledge that the Indian Veterinary arrangements have received but scant justice in the article under my notice. P.S.—Since writing this letter, I have remembered that all cattle, sheep, and goats embarked at Bombay for Egypt were previously inspected by Vet.-Surg. Woodruff, A.V.D.—J. A."

Royal Malta Fencible Artillery. The representatives of the regiment who were engaged in the Egyptian Campaign, and who, under Major Portelli, have been on a visit to England, have now returned to Malta. The men, who remained in London much longer than they had expected, stayed at Wellington Barracks, and were attached to the Scots Guards.

The Auxiliary Forces.

MILITIA.

Royal Scots Fusiliers. Lieut. Fergusson, 4th Batn. (Royal Ayr and Wigtown Militia), has been appointed extra A.D.C. to Sir James Fergusson, Governor of Bombay.

York and Lancaster Regiment. After a long delay, the War Office has at length found a lieutenant-colonel for the 3rd Batn., the command having been conferred upon Lieut.-Col. J. G. Wilson, commanding the North York Rifle Volunteers. Col. Wilson joins the regiment with the best testimonials. He served for some years in the 84th Regiment, from which he retired as captain, and being a keen soldier, he will, no doubt, succeed in pulling the regiment together. The appointment is said to have given great satisfaction to the regiment, as well as in the county of York, on account of Col. Wilson's popularity and soldier-like qualifications.

The *Standard* says :—" The Field-Marshal Commanding-in-Chief has placed on record his sense of indebtedness to the Militia officers who came forward in August last and volunteered to do duty with the depots of their regiments during the absence of the Line Battalions in Egypt. Many of the officers have been employed continuously for nearly six months at great personal inconvenience, and in his Royal Highness's opinion it is a lasting proof of the devotion of Militia officers as a body when men are to be found who will make such great sacrifices in the interests of the State."

The Secretary of State for War has approved of the Militia Brigades and Battalions of Great Britain being called out for training in the year 1883. The dates and places of meeting will be left to the discretion of the General officers commanding the several districts.

THE VOLUNTEERS.

1st London Artillery. A more deplorable spectacle than that witnessed last Saturday evening, on the occasion of an inspection of the 1st London Artillery Volunteers, it has hardly ever fallen to our lot to chronicle. It is no secret that the condition of the regiment has for a long time been so bad, that its disbandment has been repeatedly anticipated; but, notwithstanding the attention of the authorities has been directed to it, both in the Press and from other quarters, it has evidently been no one's business to investigate the causes. The facts in connection with the parade were, briefly, as follows:—It was called for an inspection by Lieut.-Col. Baylay, R.A., in the absence, on service, of Lieut.-Col. Duncan, R.A., and a distribution of certificates of efficiency. A large muster was requested, and it was distinctly asked that punctuality would be observed. At six o'clock the representatives of the six batteries were formed up. Three of the batteries had nine men in all, and, not including the band, the parade which Col. Baylay was called upon to inspect comprised 12 officers, 3 serjeants, and 22 men! Under these circumstances, it was anticipated that the parade would have been dismissed, but the farce of an inspection was gone through, and, subsequently, those members entitled to them received their certificates. A more painful part of the proceedings was the presence, in plain clothes, of a considerable number of members who have recently been discharged, and others still belonging to the corps. These were requested by the porter, acting under instructions from Col. Wegg-Prosser, to leave the building; but they stolidly refused, and the remarks made by them during the proceedings evidenced that they were under the impression that the corps was practically non-existent, and that they had been the victims of high-handed measures. It need hardly be said that Col. Baylay left the hall immediately on the conclusion of an inspection which must have been very painful to him. Whose duty is it to look to the remnants? Unless something is done at once, Gen. Higginson will soon have one corps the less in his command. There were other matters calling for strong condemnation on the same evening, but we refrain from mentioning them.

18th Middlesex (Paddington) Rifles. The annual distribution of prizes took place on Tuesday evening at St. James's Hall. Mrs. Ives, wife of the commanding officer, distributed the prizes. The principal regimental prizes were the Regimental Challenge Cup, won by Capt. W. Gange; the Kindersley Challenge Cup, by Colour-Serjt. J. Crook; the Shakespeare Challenge Cup, by Serjt. Gomme; and the Commanding Officer's Skirmishing Prizes, by Colour-Serjt. Rowland and Pte. E. Smith. Col. Ives expressed his satisfaction that greater attention was being paid at present to shooting than was the custom in former times. He advocated the use of the repeating rifle, and hoped the military authorities would take that important subject into consideration at the earliest possible moment. The 18th Middlesex continued to maintain its position as the second or third strongest regiment in the county, and as they were now about to be joined as a Volunteer battalion to the Rifle Brigade, one of the finest body of troops in the world, he hoped and believed that the men of the corps would do everything in their power to show themselves worthy of the honour conferred upon them.

4th Lancashire (Manchester) Rifles. This battalion will go into camp for a week at Llandudno at Whitsuntide.

"A Staff Officer" writes to us :—"Some of your Volunteer readers are anxious to have the Easter Review at Aldershot. Now, I know Aldershot well, having been on the Staff there for years, and I can assure my friends of the 'citizen army' that Aldershot is not the place to suit them for their Easter outing. There is little or no proper accommodation in the town, and that there is is bad. The lodging-house keepers, &c., are bad enough at most times, but at such a season they would make hay whilst the sun shone, and the Volunteers would be pretty well 'bled.' I can imagine no place more unsuited for a Volunteer review, and those Volunteer Colonels who support the idea of Aldershot as the scene of operations allow their soldierly zeal to get the better of their discretion. As I understand the question, in a force like the Volunteers something more is wanted than a day's manœuvring. If the review was held later in the year, and the men could be encamped for a few days, it would be a splendid thing to make Aldershot the field of operations; but as a soldier who has studied Volunteer organisation, and admires the force for the excellent qualities it has displayed, I assert that Aldershot is quite unsuited to the requirements of the force at a time like Easter."

The adjourned meeting of Metropolitan commanding officers of Volunteers was held on Tuesday. The report of the committee appointed to ascertain the most suitable place for the proposed Review was presented. It was moved by Lord Ranelagh, and seconded by Col. Ray, that the report be adopted and approved, and that the thanks of the meeting be presented to the committee for their services. The motion was agreed to unanimously. Col. Comyn moved—"That a committee be requested to continue their services, and to co-operate with the authorities of Brighton in protecting the ground from the public." The motion was agreed to. Col. Laurie moved—"That it is desirable that a general head-quarters should be established at Brighton, and that the chairman be requested to organise the arrangements, and to nominate his staff." The motion was carried. It was moved by Col. Warner—"That the meeting to consider the Easter Monday Review be summoned in future within the first fortnight in January, and that the hour of meeting in general be 4 p.m." The motion was agreed to. The proceedings then terminated.

Friday's Gazette.

ARMY.

WAR OFFICE, Pall Mall, January 26, 1883.

1st Dragoon Guards—Lieut. A. H. M. Edwards, from the 3rd Batn. Seaforth Highlanders (Ross-shire Buffs, the Duke of Albany's), to be Lieut., vice J. C. Dewar, promoted.

3rd Dragoon Guards—Lieut. C. H. Farquharson, from the 3rd Regt. Royal Guernsey Militia, to be Lieut., vice H. C. Gribble, killed in action.

5th Dragoon Guards—Lieut. G. H. L. Buchanan, from the 5th Batn. the Royal Fusiliers (City of London Regt.), to be Lieut., vice E. Hegan, promoted.

6th Dragoon Guards—Lieut. C. L. Crutchley, from the 3rd Batn. the Queen's (Royal West Surrey Regt.), to be Lieut., vice T. R. F. B. Hallowes, promoted; Lieut. H. P. C. O'Farrell, from the 5th Batn. the Connaught Rangers, to be Lieut., vice P. H. H. Massy, promoted.

7th Dragoon Guards—Lieut. R. P. Horsbrugh, from the 3rd Batn. the Loyal North Lancashire Regt., to be Lieut., vice W. Kirke, transferred to the 2nd Dragoon Guards.

5th Lancers—Lieut. W. H. Goodair, from the 4th Batn. the Loyal North Lancashire Regt., to be Lieut., vice A. Hughes-Onslow, transferred to the 10th Hussars.

10th Hussars—Lieut. the Hon. J. H. G. Byng, from the 7th Batn. the King's Royal Rifle Corps, to be Lieut., vice R. B. W. Fisher, promoted.

15th Hussars—Lieut. P. W. Bewicke, from the 3rd Batn. the Durham Light Infantry, to be Lieut., vice M. Allfrey, promoted.

17th Lancers—Lieut. G. F. Milner, from the 4th Batn. the Prince of Wales's Leinster Regt. (Royal Canadians), to be Lieut, vice H. Fortescue, promoted.

21st Hussars—Lieuts. B. T. Mahon, from the 4th Batn. the Connaught Rangers, to be Lieut., vice S. W. Richmond, promoted; W. M. Doyne, from the 3rd Brig. North Irish Division R.A., to be Lieut., vice H. M. Beavan, resigned.

Line Battalions.

The Northumberland Fusiliers—Lieut. C. E. Keith-Falconer, from the 4th Batn. the Royal Sussex Regt., to be Lieut., vice J. W. Malet, promoted.

The King's (Liverpool Regiment)—Lieut. G. L. Holland, from the 5th Batn. the Royal Inniskilling Fusiliers, to be Lieut., vice O'D. C. Grattan, promoted.

The Norfolk Regiment—Lieut. A. G. Ferguson, from the 2nd Batn. the Queen's Own Cameron Highlanders, to be Lieut., vice G. S. Ommanney, appointed a probationer for the S.C.

The Devonshire Regiment—Lieut. W. V. Eccles, from the 3rd Batn. the Hampshire Regt., to be Lieut., vice J. H. Smith, appointed a probationer for the S.C.

The Prince Albert's (Somersetshire Light Infantry)—Lieuts. R. P. E. Sullivan, from the 4th Batn. the Princess of Wales's Own (Yorkshire Regt.), to be Lieut., vice B. Palmes, promoted; J. J. Palmer, from the 3rd Batn. the King's (Shropshire Light Infantry), to be Lieut., vice H. Gillon, transferred to the 3rd Dragoon Guards.

The Bedfordshire Regiment—Lieuts. J. F. Campbell, from the 5th Batn. the Royal Munster Fusiliers, to be Lieut., vice H. W. Campbell, transferred to the Suffolk Regt.; F. B. M. Henniker, from the 4th Batn. the Essex Regt., to be Lieut., vice F. C. Hamilton, appointed a probationer for the S.C.

The Royal Irish Regiment—Lieuts. J. E. Cullinan, from the 2nd Brigade, South Irish Division, R.A., to be Lieut., vice C. F. Burton, transferred to the Royal Fusiliers (City of London Regt.); C. W. Garraway, from the 4th Batn. the King's (Liverpool (Regt.), to be Lieut., vice C. A. Wedderburn, deceased; A. H. Morris, from the 4th Brigade, Northern Division, R.A., to be Lieut., vice J. H. Lothian, deceased.

The King's Own Borderers—Lieuts. W. E. A. Blakeney, from the 1st Batn. the King's (Shropshire Light Infantry), to be Lieut., vice F. M. Turner, appointed a probationer for the S.C.; A. H. Magee, from the 7th Brigade, North Irish Division, Royal Artillery, to be Lieut., vice H. V. Cox, appointed a probationer for the S.C.

The East Surrey Regiment—Lieuts. H. E. Whiffin, from the 3rd Batn. the Suffolk Regt., to be Lieut., vice G. F. D. Hamilton, appointed a probationer for the S.C.; W. H. Ellis, from the 5th Batn. the Royal Inniskilling Fusiliers, to be Lieut., vice H. W. Priestley, appointed a probationer for the S.C.; S. R. Master, from the 5th Batn. the Sherwood Foresters (Derbyshire Regt.), to be Lieut., vice R. F. H. Anderson, appointed a probationer for the S.C.; W. H. Gorman, from the 5th Batn. the Royal Irish Regt., to be Lieut., vice C. A. G. Cumine, promoted; D. R. Young, from the 3rd Batn. the East Yorkshire Regt., to be Lieut., vice W. J. H. Frodsham, promoted.

The Duke of Wellington's (West Riding Regiment)—Lieut. A. Blewitt, from the 3rd Batn. the Princess of Wales's Own (Yorkshire Regt.), to be Lieut., vice L. E. B. Booth, promoted.

The Hampshire Regiment—Lieut. W. H. Johnson, from the 3rd Regiment, Royal Guernsey Militia, to be Lieut., vice D. G. Shaw appointed a probationer for the S.C.

P. M. C.

ON account of Orders recently issued regarding Mess Expenditure, Messrs. PELLATT and CO. (formerly APSLEY PELLATT and CO., of Holland Street, Blackfriars—the original firm—established in the year 1759, by the father of the late Apsley Pellatt, Esq., M.P.), Falcon Glass Works and China Manufacturers, Manufacturers, by special appointment, to H.M. the Queen and the Royal Family, &c., Contractors to H.M.'s Government, the Lords of the Admiralty, the Indian Stores, &c., have decided on supplying all Regiments with their Manufactures on their wholesale-trade terms, which Prices are very much below those usually paid by Officers' Messes. This Firm have made Mess Contracting the speciality of their business for upwards of 150 years, and have, at the present time, upwards of 140 Regiments on their books, including the most prominent of H M.'s Service. For the past 18 months, Messrs. Pellatt and Co. have obtained the commands of every regiment giving their orders on arrival home from foreign service, without a single exception. On receipt of patterns from any Regiment, Messrs. Pellatt and Co. return estimates for the exact matching of goods. Several Regiments have favoured us in this way of late, many being Native Indian Regiments, and the estimates returned have always shown such a great saving, as to secure the future commands and greatest satisfaction of the Mess.—All Communications and Patterns should be sent to the Offices and Show Rooms, addressed,

PELLATT and CO., Falcon Glass and China Works, 17 St. Bride Street, Ludgate Circus, London, E.C.

NOTICES TO CORRESPONDENTS.

A MILITIA OFFICER writes under a misconception. If he knew all facts, our correspondent would agree that the best interests of the service had been promoted.

Y. Z.—Although the Admiralty encourage anonymous communications, we do *not*. All contributions must be accompanied by the name of the writer, not for publication, but as a guarantee of good faith. You had better enclose your card when you next write, that we may know who you are, and what reliance we can place on your statements. This precaution is absolutely necessary to protect all ranks in the Navy from malicious slander.

CONSTANT READER.—Certainly not.

The ARMY AND NAVY GAZETTE this week contains four pages extra.

The NAVAL AND MILITARY STATIONS are published by the ARMY AND NAVY GAZETTE on the first Saturday in each month.

Army & Navy Gazette.
LONDON, SATURDAY, JANUARY 27, 1883.

WE understand that Mr. W. H. White, one of the Chief Constructors of the Navy, has accepted an engagement with Sir W. Armstrong and Co., of Newcastle, and will leave the Admiralty to take up his appointment in the course of a few weeks. Mr. White was trained at the Royal School of Naval Architecture, South Kensington, and at the final examination in 1867 was awarded the diploma of Fellow, Class I. He has since been employed at the Admiralty, first as draughtsman, then as Professional Secretary and Assistant-Constructor, and recently as Chief Constructor. He is also well known as an author and lecturer on professional subjects. The loss of his services to the Admiralty, after an expensive scientific and technical training at a Government establishment, and sixteen years' practical work in Naval design, which have brought him to the period of life when his services would be most valuable, and when the nation ought to expect much useful work in the designs of ships for the Royal Navy, will perhaps cause their Lordships to turn their attention to the very low rates of salary paid to professional officers in the service, as compared with the remuneration received by their compeers in the private trade. The Director of Naval Construction is paid £1,500 a year, and the Engineer-in-Chief of the Navy only £1,000. Mr. White's salary was £600. It is reported that in his new post he is to receive from £2,000 to £3,000 per annum. The managers of large private firms—shipbuilding and engineering—receive salaries ranging from £1,500 to £4,000 a year. Surely if it pays private employers to do this, it cannot be economical for the Government to give low salaries, which must of necessity fail to attract or retain the best men, and only such should be employed in high positions in the service. The salaries of the Chief Constructors at the Dockyards are from £600 to £850, and of the Chief Engineers from £500 to £650, or only from one-third to one-quarter the pay given for similar work in the private trade. It is a remarkable fact that in the Civil Service all the large salaries are drawn by the clerical branch, and professional knowledge and talent are at a discount. We have given the salaries of the officers at the heads of the shipbuilding and engineering departments of the Admiralty and Dockyards. The Chief Constructors at the Admiralty have salaries rising from £600 to £800, and the second Engineer Officer at the Admiralty from £600 to £700; the Constructors at the Dockyards get £400 to £500, and the Assistant Chief Engineers, £250 to £400. Compare this with the Clerical branches,—The Accountant-General of the Navy gets £1,500; Director of Stores, £1,000; Director of Contracts, £1,200; Director of Victualling, £1,000; Secretary, £1,700; Assistant-Secretary, £1,200; and a number of other clerks from £900 to £1,000. When the expense of the Navy is brought into prominence, and the Treasury bars the granting of suitable salaries to professional officers on the score of increase in the Estimates, it is important that attention should be drawn to the grooves in which the money runs; and it will not require much investigation to see that far too large a sum is paid for simple clerical work, which could be efficiently performed by men at much lower salaries, and some of the money thus saved might, both with justice and advantage, be devoted to providing suitable remuneration to professional officers, who have spent their lives in the study of those professions on the successful application of which the construction and efficiency of our Steam Navy solely depend.

We understand that, in deference to the wishes of Lord Wolseley, Major and Brevet Colonel H. Stewart, C.B., A.D.C., 3rd Dragoon Guards, will be selected shortly for the Lieutenant-Colonelcy of a cavalry regiment, in further recognition of his services in Egypt.

The following officers join the Staff College on Wednesday next for the two years' course, viz., Major O. G. Bolitho, 3rd Dragoon Guards; Brevet Major R. C. B. Lawrence, 5th Dragoon Guards; Captains F. Beaufort, G. C. Wynne, and P. H. Hammond, Royal Artillery; Lieutenants L. Darwin and G. A. Wisely, Royal Engineers; Lieutenant the Hon. F. W. Stopford, Grenadier Guards; Captain R. S. H. Moody, 3rd Foot; Lieutenant A. J. Watson, 12th Foot; Captain G. Evans-Gordon, 49th Foot; Lieutenant J. S. Talbot, 53rd Foot; Lieutenant E. J. Sharp, 57th Foot; Lieutenant P. H. N. Lake, 59th Foot; Captain M. C. Boyle and Lieutenant L. W. G. Butler, 60th Rifles; Captain R. J. F. Banfield, 69th Foot; Lieutenant W. J. Eastman, Royal Marine Artillery; and Captain H. A. Sawyer and Lieutenant B. Briscoe, Bengal Staff Corps.

We have reason to believe that Colonel W. G. Andrewes, A Brigade, Royal Horse Artillery, will succeed to the command of the Horse Artillery at Bangalore.

Some strange things have come to light since the close of the Egyptian Campaign, and if all that is said be true by those who were present, it would appear that at least occasionally we owed more to good luck than to good guidance. Of course, we could not mention names, and we are content to let those wear the cap whom it fits. On one occasion, it would appear that an officer in command of a considerable force was so little conversant with the duties and necessity of outposts, that the first intimation he had of the approach of the enemy was the bursting of his shells in his camp. A very simple lesson was thus taught to this negligent commander, who, for the remainder of the campaign, pushed his outposts farther to the front. Again, at the battle of Tel-el-Kebir, he was advancing in line, and was ordered by his Divisional Commander to form his force in the attack formation as daylight was appearing. This simple movement would have been promptly carried out by the officer commanding one of our Metropolitan Volunteer corps, but it was quite beyond the capacity of the officer in question. He was going to throw his battalions into quarter-column, apparently ignorant of the simple fact that the manœuvre could be performed quite as easily from line as from column. Had it not been for the determined refusal of one battalion commander to have his men packed together for the benefit of the Egyptian gunners, great loss might have accrued and considerable delay. Fortunately, at this juncture a second Staff officer appeared upon the scene, and backed the battalion commander up, telling the officer who brought the order that the movement could be done easily from line. There is another report current which, if true, is equally strange. It is stated that for at least three weeks the officer commanding the forces in Egypt had no warrant authorising him to assemble a court-martial. Amongst other strange things, too, is the absence of crime in the Egyptian Expeditionary Force. We are extremely gratified, though considerably astonished, to hear from the lips of Lord Wolseley himself that there were only three prisoners tried by court-martial, and that one of these was a Frenchman. What was this Frenchman; was he a private soldier, a camp follower, or a regimental messman? We hope it was this self-same Frenchman who, being sent to England with, we think, more than two other prisoners, assisted them to break into the spirit-room on board ship, where he drank himself to death. We must admit, to our sorrow, that it was more the action of an English than of a French "Tommy Atkins." When we read Lord Wolseley's speeches on the subject, the story of Nelson putting the spy-glass to his blind eye forces itself irresistibly upon us.

Colonel A. H. Williams, B Brigade, R.H.A., succeeds to the command of the Artillery at Aldershot, vacant by the appointment of Colonel W. E. M. Reilly, C.B., to the War Office.

We would suggest to the authorities that, as there seems some difficulty in supplying a satisfactory field gun and carriage to the Artillery, as is evidenced by the various patterns now supplied to batteries, that competition should be invited from private firms at home and abroad for that most important and essential adjunct to an army.

There are two Cavalry and twenty-six Infantry regiments without Paymasters, viz.:—1st Dragoon Guards and 7th Hussars; 1st Battalion 3rd Foot, both battalions 6th Foot, 1st Battalion 8th Foot, 2nd Battalion 11th Foot, 2nd Battalion 12th Foot, 2nd Battalion 13th Foot, both battalions 15th Foot, 2nd Battalion 19th Foot, 1st Battalion 22nd Foot, 2nd Battalion 24th Foot, 31st Foot, 39th Foot, 52nd Foot, 55th Foot, 56th Foot, 61st Foot, 69th Foot, 78th Foot, 85th Foot, 86th Foot, 91st Foot, 106th Foot, 1st West India Regiment, and Royal Malta Fencible Artillery.

Lord Wolseley, in replying to the address presented by the Blackburn Gospel Temperance Mission on the 18th inst., recounted the triumphs of temperance and "total abstinence" in the military expeditions he had commanded. His lordship's efforts to promote the interests of temperance are undeniable. Lord Wolseley, however, omitted to state that during the Ashantee Campaign a taste of the Navy rum, kindly provided by the "senior service," helped a favoured regiment on an occasion when, but for the ration, many of them would have broken down completely. Teetotalism is a great thing, of course, but there are occasions on service, especially in tropical climates, where spirits, diluted with water, will do more to infuse new life and vigour into the human frame than any amount of tea, coffee, cocoa, or other total-abstinence beverage. It surely is for a General in Lord Wolseley's position to lead the public, not to mislead them, and we are sure to find that there is a disposition on his part to do the latter.

General J. E. Goodwyn, C.B., now Colonel of the 28th Regiment, will, it is understood, be offered a transfer to his old regiment, the 41st, the colonelcy of which is vacant by the death of General Sir Richard England, the vacancy in the 28th being filled by the appointment of General J. W. S. Smith, C.B.

The whole service will be glad to hear of the good luck which has befallen Colonel R. R. Gillespie, C.B., late Assistant-Adjutant-General of the York District, who has been selected for a brigade command on the Staff of the Bombay Army. Colonel Gillespie was General Willis's Assistant-Adjutant-General in Egypt, and the devotion he displayed caused his name to become a household word throughout the expedition. It is no exaggeration to say that a more hard-working and popular officer never served with an Army in the field, and General Hardinge, the Commander-in-Chief of the Bombay Army, is to be congratulated upon having secured the services of one who is recognised as one of the most rising soldiers in the service.

The adjourned meeting of Commanding Officers of Metropolitan Volunteer Corps, last Tuesday, endorsed the report of the Committee respecting Brighton as the site of the Easter Manœuvres, notwithstanding a vigorous protest from Lieutenant-Colonel Du Plat Taylor and, it is believed, other officers, who were in favour of Aldershot. We understand it is probable that the marching columns will this Easter be twice as strong as those which took the road from Petersfield last April.

Brevet Colonel E. Maitland, the senior officer on the old Royal Artillery List, is the last officer of the Royal Regiment who, under the new Regulations, can ever be promoted to the rank of Regimental Colonel, which rank will then be allowed to die out.

No progress appears to have been made by the authorities towards amalgamating the North and South Mayo Regiments of Militia, of five and six companies respectively, as was intended nearly two years ago. The Militia, it is well known, are, however, now the neglected portion of her Majesty's land forces.

The question of officers is one which has perplexed many Volunteer Lieutenant-Colonels. In one Metropolitan regiment there have been several retirements lately, and the reasons assigned by the retiring officers for withdrawing from the service are interesting, as showing the causes which influence men in tendering their resignations. Two, we are told, "had just married, and were unable to devote time to the duties;" two were "unable to find time to attend school of instruction;" and two "found that their military duties interfered with private engagements, dinner-parties, &c." Thus six officers are lost to the service from circumstances of a purely private nature, and it may fairly be presumed that under the three headings enumerated may be classed fully two-thirds of the resignations which are announced under "Volunteers," week by week in the *London Gazette.*

Lieutenant-Colonel C. Campbell, C.B., who is retiring upon half-pay from the command of the 7th Dragoon Guards, will, most probably, join the staff of the Intelligence Department.

There is a great fight just now among Cavalry Colonels for one of the only pieces of patronage open to them, the Inspectorship of Yeomanry at York, which becomes vacant on April 3 next, when Colonel Thesiger's five years expire. The Cavalry officers on the Active Half-Pay List are Colonels A. Nugent, late Scots Greys; A. C. H. Stewart, late 2nd Life Guards; J. K. Fraser, late 1st Life Guards; H. H. Steward, late 2nd Dragoon Guards; J. E. Swindley, late 15th Hussars; E. Harnett, 7th Dragoon Guards; J. G. Graham, late Royal Dragoons; Lord Ralph Kerr, C.B., late 10th Hussars; W. E. Marsland, late 5th Dragoon Guards; J. Gunter, late 4th Dragoon Guards; J. Fryer, C.B., late Carabiniers; T. W. Sneyd, late 2nd Dragoon Guards; A. S. M. Browne, late 3rd Dragoon Guards; and T. Phillips, late 18th Hussars. The only one of these who has held a five-years' appointment since vacating his regimental command is Colonel Steward, who was for the full period Lieutenant-Colonel of the Canterbury Brigade Depôt.

We believe an endeavour is about to be made to find suitable employment for Brevet Lieutenant-Colonel G. R. A. Denne, 4th Dragoon Guards, the officer whose case has been the subject of general comment, and who certainly deserves to be put right, after his recent services in command of his regiment in the march from Tel-el-Kebir to Cairo.

Lieutenant-Colonel E. A. Anderson, half-pay, late 18th Royal Irish, having been for twenty years an Instructor in Military Surveying at the Royal Military College, it would have been difficult to find an officer better qualified to fill the vacant Professorship. Yet a correspondent writes to protest against Colonel Anderson's appointment, because, as he says, "he has not passed the Staff College." Surely, experience is the best possible qualification, and this Colonel Anderson undoubtedly possesses.

Lieutenant G. A. Wisely, Royal Engineers, has resigned his appointment as Aide-de-Camp to Major-General Sir Robert Biddulph at Cyprus, in order to enter the Staff College, and is succeeded by Captain H. L. Sapte, 35th Regiment.

The Military authorities have evidently overlooked the hardship of Militia officers who may be living in the South of England being obliged to travel to their regiments in Scotland to be examined, say, in tactics, instead of undergoing the ordeal at the depôts nearest their residences. It is hoped this will be remedied, on being duly represented.

The Army will doubtless be relieved to hear that the War Office has been conspicuous by the absence of the Secretary of State for War since his appointment.

The Navy.

ADMIRALTY, January 17, 1883.

Royal Marine Light Infantry.—Lieutenant John Allen Bartlett has been permitted to resign his commission (January 16).

ADMIRALTY, January 19, 1883.

Assistant-Paymaster Edward Thomas Dixon has been promoted to the rank of Paymaster in her Majesty's Fleet, with seniority of January 17, 1883.

ADMIRALTY, January 22, 1883.

Captain William Codrington, C.B., has been appointed a Naval Aide-de-Camp to her Majesty, from the 8th instant, in the place of Captain Robert Gordon Douglas, promoted to Flag rank; Inspector of Machinery James Roffey, C.B., has been promoted to the rank of Chief Inspector of Machinery in her Majesty's Fleet, with seniority of January 6, 1883; Chief Engineer David Robb has been promoted to the rank of Inspector of Machinery in her Majesty's Fleet, with seniority of January 6, 1883.

In accordance with the provisions of her Majesty's Order in Council of February 22, 1870, Commander Albert Mainwaring Ducat has been placed on the Retired List, from the 18th instant.

ADMIRALTY, January 23, 1883.

In accordance with the provisions of her Majesty's Orders in Council of February 22, 1870, and April 30, 1877, Chief Engineer William Glasspole has this day been placed on the Retired List of his rank.

ADMIRALTY, January 24, 1883.

In accordance with the provisions of her Majesty's Orders in Council of February 22, 1870, and November 29, 1879, Lieutenant Mountjoy Squire has this day been placed on the Retired List, with permission to assume the rank and title of a Retired Commander.

APPOINTMENTS.

Captain—Joseph E. M. Wilson, to the Impregnable, vice Bradshaw.

Lieutenant—Oliver A. Stokes, to the Britannia, vice Login.

Navigating Lieutenant—William Way, to the Pembroke, additional for the Orontes.

Midshipman—John F. Lea, to the Northumberland, additional.

Chaplains—Rev. Benjamin C. Pidcock, to the Alexandra; Rev. Francis C. Lang, M.A., to the Hercules, vice Mayow; Rev. Thomas Austin, M.A., to the London, vice Gace; Rev. Thomas Roberts, to the Penelope, vice Austin.

Chief Engineers—Charles Platt, to the Asia, additional, for the Inconstant; John H. Sampson, George Whitting, Samuel J. Bird, and Robert Hall, to the Vernon, additional.

Surgeons—John Lyon, M.D., to the Repulse; James Porter, M.D., to the Wye, vice Lyon; Thomas Loane, M.D., to the Northumberland, vice Sparrow: Alexander J. J. Johnstone, to Haslar Hospital, vice Loane.

Assistant-Paymaster—John P. McP. King, to the Hector, vice Dixon.

Engineers—Henry G. Burr, to the Lord Warden, additional for the Elbe; Henry Onions, to the Asia; Alfred Lawton, to the Asia, additional, vice Walmesley; George Tyrer, to the Defence, additional for the Redwing, vice Lawton; Henry Coller, to the Pembroke, additional for the Raven, vice Monk; Harry W. Wilkins, to the Repulse, additional for the Ariel, vice Coller; Thomas H. Harrup, to the Asia, additional for the Canada, vice Wilkins; Joseph W. Allen, to the Pembroke, additional for the Opal; Thomas Hughes, to the Pembroke, additional; William Hudson, to the Wasp, vice Babb; George Harding, to the Excellent, additional, vice Hudson; Wm. White (a.), to the Asia, additional for the Colossus.

Carpenters—James R. Elliott, to the Pembroke, additional for the Orontes; John Murphy, to the Revenge, vice Young.

Assistant-Engineer—Alfred W. Gibbs, to the Asia, additional for the Rupert.

Clerk—James Murray, to the Euryalus, additional.

Assistant-Clerks—Samuel M. Fennell and Basil J. Brotherton, to the Alexandra, additional; Alfred R. Parker, to the Euryalus, additional.

Gunner—John M. McDonald, to the Cambridge, vice Nidder.

Boatswains—Richard Skuse, to the Royal Adelaide, vice Cruze; John A. Mahoney, to the Pembroke, additional for the Orontes; James Bates, to the Monarch, vice Tucker.

Promotions.

Inspector of Machinery—James Roffey, C.B., to be Chief Inspector of Machinery.

Chief Engineer—David Robb, to be Inspector of Machinery.

Retirement.

Commander—Albert M. Ducat, physically unfit for further service.

Coastguard.

Chief Boatmen—G. Bridgland, North Yarmouth, to be chief boatman-in-charge, Aldborough; William Coaker, Camber, to be chief boatman-in-charge, Cuckmere; Gabriel Brown, Sidmouth, to be chief boatman-in-charge, Osmington; Thomas Walton, Portland, to the Hercules, Yealm, vice Segrue, pensioned.

Commissioned Boatmen—William Hazell, Orford Haven, to be chief boatman, Kessingland; Richard Miller, Bournemouth, to be chief boatman, Chideock.

Achilles, Capt. Morant, has been undocked, and will make a trial of machinery in Keyham Basin this day.

Alexandra, Capt. Harry Rawson, C.B., will take on board the electric engine and machine belonging to the Shannon, which has been forwarded to Malta.

Amethyst, Capt. Bowden-Smith, senior officer on the South-East Coast of America, was at Monte Video on Jan. 1, was about to proceed to Bahia Blanca and the Falkland Islands, and would return to Monte Video about April 1. The Rifleman was at Monte Video, and would proceed to Buenos Ayres, on being relieved by the Rambler at Bahia Blanca, Jan. 1, and was to return to Monte Video. Firefly, at Falkland Islands, Jan. 1, awaiting arrival of senior officer.

Cleopatra, Capt. Hippisley, was at Shanghai on Dec. 20. She arrived there from Chefoo on Oct. 26, and remains for the winter as senior officer.

Cockchafer, Lieut. and Com. G. W. Hill, proceeds on a four days' cruise in the Channel, to see that everything is right prior to starting for her station.

Comus, Capt. J. W. East, was to leave Esquimault on Dec. 30 for Payta, calling at San Francisco.

Condor, Com. E. F. Jeffreys, is to leave Malta for Alexandria on Feb. 1.

Dido, Capt. C. E. Domvile, has left Charleston for Bermuda, with H.R.H. the Princess Louise (Marchioness of Lorne) on board.

Dryad, Com. C. Johnstone, has been ordered to Trincomalee from Rangoon.

Espoir, Lieut.-Com. E. H. Gamble, proceeded out of Devonport Harbour on Jan. 24 for a preliminary steam trial, which was satisfactory. The mean results were as follows:—Pressure in boilers, 61·5 lb.; cylinders, high, 26·5; ditto, low, 11·1; revolutions per minute, 118·8; indicated horse-power, 388. At the conclusion of the trial, powder was taken on board in the Sound. She proceeded yesterday on her three-hours' full-speed trial.

Euryalus, Capt. Hastings, C.B., flagship of Rear-Admiral Sir William Hewett, V.C., Commander-in-Chief on the East Indies station, was at Trincomalee last Saturday.

Helicon, Lieut. and Com. Alfred L. Winsloe, flying the flag of Admiral Lord Alcester, Commander-in-Chief of the Mediterranean station, was at Malta up to the 24th inst. The Alexandra, the Temeraire, the Sultan, the Carysfort, the Dragon, the Iris, the Hecla, the Condor, the Antelope, and the Cygnet were then in port. The Alexandra was preparing to pay off on Jan. 31. The Sultan would be docked Jan. 22; proceeds to Gibraltar about Feb. 1, to join the Channel Squadron; mails accordingly. The Temeraire would be undocked on Jan. 20; leaves for Corfu on Jan. 29; mails to Corfu after Jan. 24. The Invincible, at Naples. The Carysfort will be docked after the Hecla. The Hecla would be docked on Jan. 17. The Dragon, refitting for the East Indies. The Condor leaves on Feb. 1 for Alexandria. The Antelope, awaiting orders. The Cygnet is preparing to pay off on Jan. 21. The Cruiser will pay off on Jan. 31. The Coquette, on passage to Malta from Alexandria, will pay off on Jan. 31. The Inflexible, at Syracuse, will remain on the coast of Sicily until about Feb. 12, and then return to Malta. The Superb was to arrive at Malta on Jan. 29. The Monarch (senior naval officer) and the Falcon, at Port Said. The Bittern, at Ismailia. The Beacon, at Suez; mails to Suez. The Orion (senior naval officer) and the Decoy, at Alexandria; mails to Alexandria.

Invincible, Capt. R. H. M. Molyneux, left Malta on Jan. 22 for Naples.

Jumna, Capt. Singleton, arrived at Portsmouth on Jan. 24 from Bombay, with invalids and time-expired men. When the vessel was coming through the Suez Canal, a military convict jumped overboard, and escaped to the shore under cover of the darkness. His name is Clifford, and he was a private in the Hampshire Regt., coming home under a sentence of seven years' penal servitude. At Port Said, however, telegraphic information was received that he had been recaptured. On the outward voyage a seaman named Fisher, captain of the maintop, was washed overboard from the starboard gangway by a heavy sea. A boat was launched, and the man was rescued in an exhausted condition.

Minotaur, Capt. J. Fellowes, flagship of Vice-Admiral Sir W. Dowell, arrived in Plymouth South on Jan. 24 from Portsmouth.

Sapphire, Capt. Fullerton, was taken out from the north basin, Keyham, on Jan. 24, and will be docked to have her valves examined, previous to commission trials during the first week in February.

Tamar, Capt. T. H. Royse, left Portsmouth on Jan. 24 with troops for Gibraltar and Malta, calling in Plymouth Sound to embark boys for passage.

Thalia, Capt. Brackenbury, C.M.G., which sailed from Malta for the China station on Sunday last, with new crews for the Victor Emanuel and Curaçoa, will, it is understood, on return from her present service, be despatched to Zanzibar, to replace the storeship London, and to assist in the suppression of the slave traffic.

NAVAL NOTES.

Another of the large armour-plated ships at Chatham, the Conqueror, is now so far completed that she was enabled to leave on Monday for the purpose of making a thorough trial of her engines at the measured mile off the Maplin Sands. The Conqueror differs from the other armour-plated vessels which have been built at Chatham, inasmuch as her armour is of steel, instead of iron, some of the plates in the more exposed parts being 14 in. thick, and it is believed they would be able to resist the shots from the most powerful guns. The ship, when finished, will have cost over £400,000, the estimated cost of the hull alone being £274,000. According to the official programme, she is to be completed and ready for sea by the end of the present financial year.

The transport Nepaul left Portsmouth on Saturday with Capt. Henry H. Rawson, C.B., Com. Campbell, Lieut. the Hon. Maurice Bourke, R.N., and the officers and crew for the new commission of the Alexandra, now at Malta.

The agent for the Austrian Lloyd's Company at Corfu has begun an action against the British Government for the loss of a lighter and cargo sunk by the steam launch of the Inflexible. Damages to the amount of £1,000 are claimed. It appears that the launch was going to land some officers after dusk, when she fouled a hawser and had her funnel torn out, and the bow lights knocked overboard. The officer in charge put her alongside the steamer to which the hawser belonged, with the intention of asking the master of the steamer to haul in the hawser, as it was dangerous to navigation. In rounding the stern of the steamer, however, he came into collision with the lighter, which carried no lights. The lighter was sunk, and the solitary individual on board her was picked up alive by the launch. The lighter, which had a mixed cargo, has since been raised and everything recovered. A curious feature in the case, which will probably last three months, is that the British Vice-Consul appears as claimant against his own Government, he being the Austrian Lloyd's agent, and owner of the lighter. The Inflexible is expected to arrive at Syracuse next Monday.

Lord Ashley, hon. commander of the London Brigade, Naval Artillery Volunteers, presided at the annual distribution of prizes of the Brighton batteries at the Royal Pavilion, on Thursday evening, when the company included Sir Henry Peel (hon. lieut.), Mr. Marriott, Q.C., M.P., the ex-Mayor, and several of the aldermen, besides many other friends. Lord Ashley spoke of the discipline, gentleman-like feeling, and good work which had always characterised the members of the corps, and said that through the indomitable energy and perseverance of the commanding officer, Lieut. Wright, thoroughly backed up, as he had been, by the whole of the officers and men under his command, they had succeeded in getting the best drill-shed, recreation-room, and boathouse, he should think, of any corps in the service. A ball followed the presentation of prizes.

A serious accident happened on Saturday last to the Opal, being brought forward for commission at Sheerness. It seems that in the afternoon the officers of the yard assembled in the engine-rooms to test her boilers, &c., before she was submitted to the usual preliminary steam trial in the steam basin. During the operations, one of her condensers, containing about 2½ tons of water, exploded with a loud report, the top being blown out. There was a pressure at the time of 30 lb., the condenser being registered to stand a test of 60 lb. Fortunately the water was cold, and the mechanics escaped with nothing more than a thorough drenching. Had the water been hot there must have been a great loss of life. The explosion caused a severe shock, one or two of the workmen being knocked down by the concussion. A party of fitters and other mechanics were at once set to work to commence to repair the damage, and in order that there may be no unnecessary delay in the commissioning of the Opal, the authorities of Sheerness Dockyard have decided to patch up the condenser chest and cylinder which were injured. In other respects the Opal is in a forward state, the repairs to her hull being almost complete. She is ordered to be ready for commission by March 1, to relieve the Briton.

Mr. W. H. White, F.R.S.N.A., M.I.N.A., one of the Chief Constructors at Whitehall, has resigned his position, to take up the appointment of manager to the firm of Sir William Armstrong and Co., at an annual salary of £2,000. Passing from Devonport Dockyard in 1864 to the Royal School of Naval Architects at South Kensington, he succeeded at his final examination at the end of a three years' course in obtaining first place and a first scholarship, when he proceeded to the Admiralty as a draughtsman. He has remained at Whitehall sixteen years, and has held the posts of Professional Secretary to the Council of Construction and Instructor on Naval Architecture at Greenwich College. As Mr. Rendell left Elswick to go to the Admiralty, and Mr. White now leaves the Admiralty to go to Elswick, the influence of the firm at the Admiralty will indeed be great. No doubt Elswick will soon monopolise all the Government contracts.

Advices from China report that the Russian North Pacific Squadron, consisting of the ironclad Duke of Edinburgh, flagship of Rear-Admiral Kopitoff, cruisers Africa, Plastoun, and Vestnik, arrived at Hong Kong on Dec. 12, from Nagasaki, *en route* to Singapore, *viâ* Manila. The French transport Annamite, with naval and military reliefs for Cochin China, had arrived at Singapore, *en route* to Saigon.

The Conqueror has completed her official trial trip at the measured mile off the Maplin Sands. The trials were of a very successful character, and gave perfect satisfaction to the numerous officials on board. The engines worked considerably above contract power—4,500 horse—although the boilers were not at full pressure. The vessel is to return to Chatham to be immediately got ready for sea.

The Ajax is being brought forward for commission, and will shortly hoist the pendant.

Obituary.

Capt. William H. M. Molyneux, R.N., died on Jan. 17, at Queen's Gate Terrace, South Kensington, aged 42. This officer was born in 1841; he entered the Navy as a cadet in April, 1854; became sub-lieut. in March, 1861; lieut. in April, 1862; was promoted to the rank of commander in Oct. 1875, and post capt. in Oct. 1881, while acting as commander of the Achilles, since which time he has not served afloat. Capt. Molyneux was Cor. Mem. of the Royal United Service Institution.

Com. the Hon. Robert Francis Boyle, R.N., died on Saturday last, at Purley Lodge, aged 64. He was the youngest son of the third Earl of Shannon. He entered the Navy in 1833, became a mate in 1839, and was promoted to the rank of commander in 1843. He retired in 1870 with the rank of commander.

Surg. Jephson J. Connell, M.D., R.N., serving on board H.M.S. Cleopatra, died at the Shanghai General Hospital on Dec. 5, of small-pox. Surg. Connell entered the Navy in 1876, after having won many prizes as a medical student. He was appointed to the Shah, flagship in the Pacific, and went in her to South Africa to take part in the Zulu War, where he distinguished himself in several engagements with the Zulus; among others, at Ginghilovo. He was afterwards invalided from the front, and returned to England in the Shah. He was next appointed to the Victory, and in August, 1880, he joined the Cleopatra, and proceeded in her with the other vessels of the Detached Squadron, which accompanied the Royal Princes to the Colonies, having been previously decorated with the Zulu medal and clasp for his services in Zululand. His funeral took place on Dec. 6 at the New Cemetery, with full martial honours. He was highly esteemed and beloved by all who knew him, and many a weather-beaten seaman could not repress a tear as the coffin was lowered to its last resting-place.

THE CHANNEL SQUADRON.

H.M.S. Minotaur, flagship of Sir William Dowell, K.C.B., &c., arrived in Plymouth Sound from Portsmouth on January 24, and will there be joined by the remainder of the Channel Squadron. The Western Division has had extensive repairs effected, more especially to the boilers, which, being supplied with salt-water from common jet-injection condensers, have required a large number of tubes to be drawn to enable them to be thoroughly cleaned. This shows that the recent abolition of the office of Inspector of Machinery to the Squadron, who was the engineering adviser to the Admiral commanding, has not been attended with economy, but very much the reverse. The loads on the safety-valves of the Agincourt and Northumberland have been reduced from 25 to 20 lb. per square inch, and in the Achilles from 20 to 15 lb. The Northumberland is completed, and has had a satisfactory steam trial in the basin at Keyham. The Achilles will be steamed in the basin this day, and moves into Hamoaze on January 30. During her refit, a condensing apparatus has been fitted to her 40 horse-power fire-engine, which is also used for working the steam-capstan, and its efficiency has thereby been much increased. The Agincourt has had two new funnels, and will make a steam trial in the basin on Monday, January 29. The Northumberland will go out of harbour on February 1, Achilles on the 2nd, and Agincourt, flagship of Sir F. W. Sullivan, K.C.B., second-in-command of the Channel Squadron, on February 3, each ship making two hours' trial of her machinery and anchoring in the Sound at its conclusion. At the end of next week, therefore, the Channel Squadron will again be complete and ready for cruising, but not for service, as these ships are useless as fighting machines.

TORPEDOES.

An amusing incident was witnessed last Friday week at the Royal United Service Institution. A lecture had been delivered by Lieut. Sleeman on "Torpedoes," and the discussion had commenced. The inventors of nearly all the different kinds of torpedoes extant were present, and the theatre of the institution was crowded. The Lay Torpedo was the one selected by the lecturer for special praise. He had worked many kinds of torpedoes during the Russo-Turkish War, and had recently manœuvred the Lay torpedo in the Bosphorus, in the presence of the Sultan and a committee of Naval experts, including Admiral Hobart Pasha, and claimed to be able to speak authoritatively on the whole subject. This displeased Rear-Admiral Gore Jones, who rose in his seat, and objected *in toto* to the statements of the lecturer. Admiral Jones claimed to have greater experience of the Lay torpedo than Lieut. Sleeman, from the fact of his having been Naval Attaché at Washington when this invention was brought out. He had seen the torpedo tried dozens of times, had never known it answer, but had often seen it fail. "The mere fact that the pressure of the carbonic-acid gas in the reservoir had to be maintained by the insertion of a red-hot shot was sufficient to condemn the invention," in the opinion of Admiral Jones. Capt. Markham also claimed to be an authority on the question at issue, on the ground that he had written a history of the war between Chili and Peru, and had therein stated that the loss of the Huascar was due to the failure of the Lay torpedo to act at the critical moment. Capt. Harvey, who was at the seat of war at the time, traversed this assertion, stating that, to his certain knowledge, there was no Lay torpedo on board the Huascar at the time. Capt. Markham could not brook being contradicted. Capt. Harvey explained, and endeavoured to cool the blood of our Arctic explorer, by assuring him that he had no interest in praising the invention of a rival, but that, at the same time, he could not stand by and see the invention of a brother-inventor run down owing to a misapprehension. The facts were simple. Months before the final Naval combat in the Pacific, and while Col. Lay was in Russia, the Peruvian Government bought a Lay torpedo in America, and sent this instrument to the Pacific, in charge of an ex-officer inordinately fond of strong beverages. No sooner was it placed on board the Huascar, than it was tried against a Chilian troopship. The account of the whole affair was duly published at the time in the columns of the *Army and Navy Gazette*. The inebriated operator steered the torpedo straight for a few hundred yards, then placed the key at the firing-point down, and brought the instrument round. When the torpedo was seen advancing towards the Huascar, he deserted his post, in a paroxysm of fright, and but for the presence of mind of a Peruvian officer, who fended off the torpedo, the Huascar would have been hoisted by her own petard. As it was, she was discovered by the Chilian Fleet, and had to cut the cable of the Lay torpedo and make off. Capt. Markham objected to this version of the affair. He had written a history of the war, and should know best. On the other hand, Capt. Harvey, convinced of his own knowledge of the accuracy of his facts, stuck to his guns. The debate waxed hot, when Admiral Boys threw oil upon the troubled waters, and by timely interference restored harmony to the meeting. But the first meeting of the season was not fated to end in peace. The statements of Admiral Jones were called in question by officers and gentlemen of many nationalities, English, American, Swedish, Russian, and Belgian, among others. It was elicited from Admiral Jones that he had spoken of experiments carried out prior to and during the year 1876. At that time, as one of the speakers most aptly remarked, the Lay torpedo was in its infancy, and, like all children, had to get over the numerous infantile ailments all flesh is heir to, and inventions as well. The Lay torpedo had gone through the measles and many other diseases. It had emerged from its sickly childhood, and had entered upon robust manhood. The torpedo which Admiral Jones had seen in 1876, and which could then only attain a speed of seven knots, had been so improved, that it now travelled through the water at a speed of 12 knots; and a still further improved instrument, just built, would attain a speed of 14 knots. Another gentleman stated that the Russian Government had laid in a supply of 12-knot Lay torpedoes, and to his certain knowledge, were only waiting for the completion and success of the last built instrument to order some 500 more. Many other officers spoke in favour of a controllable torpedo, such as the Lay; and then Lieut. Sleeman rose, and responded on the whole case. He compared his previous statements with those of Admiral Jones, and maintained that the progress made during the last six years with the Lay torpedo had evidently been lost sight of by, or had never come to the knowledge of, the gallant admiral, for, though in its infancy many failures had attended the launching of this invention, it had, nevertheless, made many successful runs in America, prior to Admiral Jones vacating the post of Naval Attaché, and he regretted that the gallant admiral should have been so unfortunate as only to have witnessed the unsuccessful runs. In conclusion, it is only fair to add that no one present could have left the theatre without feeling that some animus pervaded the remarks of Admiral Jones, and this is probably due to the fact that, when Naval Attaché at Washington, he did not, by all accounts, get on very well with the American authorities, and still less so with the officers belonging to the Torpedo School.

The *Home News* says:—"We regret to announce a further reduction in the official rate of exchange. The Secretary of State for India, in conjunction with the Lords Commissioners of the Treasury, has decided that the rate of exchange for the adjustment of Indian pay and allowances, and of retrenchments, family remittances, and claims for messing money, shall be 1s. 7¾d. per rupee during the financial year commencing on April 1, 1883. This is 1 per cent. lower than the present rate. Since the par quotation was abandoned 12 years ago the official value of the rupee has only once been lower, and that was in the year 1879-80, when it fell to 1s. 7½d. It will afford but little satisfaction to the victims to reflect that this reduction brings out, more clearly than before, the inequality of the present Local Rules, whereby some officers receive their furlough pay at par, while all others are mulcted 17 per cent. of their income because they happened to do continuous duty in India between the years 1868 and 1871. We wish we could see any likelihood of this very substantial grievance being redressed."

HEADACHES AND DISORDERED STOMACH.—"After suffering for nearly two-and-a-half years from severe headache and disordered stomach, and after trying almost everything, and spending much money without finding any benefit, I was recommended to try your Fruit Salt. Before I had finished one bottle, I found it doing me a great deal of good, and now I am restored to my usual health. Others I know that have tried it have not enjoyed such good health for years.—Yours truly, ROBERT HUMPHREYS, Post Office, Barrasford." CAUTION.—Legal rights are protected in every civilised country. Examine each bottle, and see the Capsule is marked "ENO'S FRUIT SALT." Without it, you have been imposed upon by worthless imitations. Sold by all Chemists, price 2s 9d and 4s 6d. Directions in Sixteen Languages,—How to Prevent Disease. Prepared only at ENO'S FRUIT SALT WORKS, Hatcham, London, S.E., by J. C. ENO'S Patent.

"SPECTACLES: THEIR USE AND ABUSE," a Pamphlet by Henry Laurance, F.S.S., Oculist Optician, should be read by all suffering from weak and defective vision; valuable and special instructions are given to those using and requiring Spectacles. It shows how sight is seriously injured by the indiscriminate purchase of Spectacles without regard to their proper adaptation, and traces more cases of blindness and defective vision from this than any other cause. Sent post free. Mr. Henry Laurance, F.S.S., Oculist Optician, personally adapts his Improved Spectacles at his residence, 3 Endsleigh Gardens, Euston Square, daily (Saturdays excepted), 10 to 4. Sir Julius Benedict writes:—"I have tried the principal opticians in London without success, but your spectacles suit me admirably. The clearness of your glasses as compared with others is really surprising." Dr. Bird, Chelmsford, late Surgeon-Major W.E.M., writes:—"I could not have believed it possible that my sight could have been so much improved and relieved at my age, 82. I can now read the smallest print, although suffering from cataract on the right eye." Similar testimonials from Ven. Archdeacon Palmer, Clifton; the Rev. Tidd Pratt, Bracknell, Berks; Rev. O. Thorpe, Peckham; Rev. Mother Abbess, Mill Hill, Hendon; Lieut.-Gen. Macmullen, Brentwood, &c.

MEMORIAL BRASSES.—Messrs. JOHN HARDMAN and Co., who pay special attention to Military Brasses, have lately executed for her Majesty the Queen several important works for St. George's Chapel, Windsor. Designs are prepared for approval, with estimate of cost. —Offices, 13 King William Street, Charing Cross.

ARGOSY BRACES.

For RIDING, *For* BICYCLING, *For* TRAVELLING,
For ROWING, *For* HUNTING, *For* POLOING,
For WALKING, *For* SHOOTING, *For* TUG-OF-WAR.
For TENNISSING, FOR EVERY-DAY LIFE.

THE ARGOSY BRACES are for sale by every Hosier and Outfitter throughout **EUROPE, INDIA,** and all **BRITISH POSSESSIONS.**

They will wear longer than any other Suspenders, and as they contain no india-rubber, are particularly suitable for hot climates.

The characteristic feature of these Braces consists in the employment of pulleys and cords instead of the fixed attachment at present in use. The effect of this is that the strain varies with the movement of the body, and never becomes excessive on any one part. The advantage is obvious. These Braces may always be worn with comfort, and buttons are not pulled off. Insist on having only the **ARGOSY BRACE.**

Kept in three sizes: No. 1, Boys; No. 2, medium Men's; No. 3, large Men's. Prices from 1s 6d (advancing 6d per pair) to 8s 6d.

⁂ Be very careful to get the right size, when perfect comfort is guaranteed. Size of waist required.

Retail of every Hosier and Army Outfitter throughout the Civilised World, or of

J. E. KILLICK and CO., 137 Strand, London, W.C. (opposite Gaiety Theatre).

ARMY AND NAVY CO-OPERATIVE MEMBERS ARE SUPPLIED AT

BENETFINK & CO.'S

ELECTRO-PLATE, CUTLERY, and FURNISHING IRONMONGERY GALLERIES, which are the **MOST SPACIOUS** and **COMMANDING** in the **WORLD, COVERING** an **AREA** of **OVER 60,000 SQUARE FEET.**

THE MIDLAND COUNTIES WATCH COMPANY,
OF VYSE STREET, BIRMINGHAM.

Let every reader of this send for our beautiful, new, Illustrated Catalogue, containing List of Testimonials (from all parts of the world), and over 500 fine, copper-plate Engravings of Watches, Jewellery, and Electro-plate, sent gratis and post-free on application to any part of the World.

GENTLEMEN'S FINE SILVER, flat crystal glass, 25s.
LADIES' FINE SILVER, flat crystal glass, 25s.
YOUTH'S FINE SILVER, flat crystal glass, 25s.
LADIES' GOLD LEVERS, in exquisitely chased cases, 70s.
GENTLEMEN'S GOLD LEVERS, engine-turned cases, 80s.

The Rev. Robert Cass, Settle, Yorkshire, writes, February 19, 1880:—The Lady's Gold Lever Watch received from you for 70s, in size, workmanship, and beautiful appearance, resembles a watch usually sold at £10. It gives entire satisfaction."

From Mr. J. J. Harris, Schoolmaster, 2-18 The Royal Irish Regiment, Aldershot, September 22, 1880:—"I am very much pleased with everything I have had from your Company. The watch (25s) has proved to be an excellent one, and is a marvel of cheapness. It is fully equal to, or indeed superior to, many I have seen purchased by Regimental Clubs for treble the money."

These Watches are frequently sold for treble the money. Cheques or P.O. payable to

Mr. A. PERCY, VYSE STREET, BIRMINGHAM.

On receipt of which, any watch will be registered post free to any part of the United Kingdom, and for 2s 6d per watch extra to any part of the postal world.

Our Indian Agents are Messrs. King, King, and Co., Bombay, and Messrs. King, Hamilton, and Co., Calcutta, through whom remittances and orders may be sent, and catalogues obtained.

ASK FOR

WORCESTER.—To be LET or SOLD, the prettiest place within miles of Worcester, BARBOURNE HOUSE, one mile from Worcester Cross. This large, beautiful, and most complete FAMILY RESIDENCE, £120 per annum.—Apply to EVERILL and DAY, 51 Foregate Street, Worcester.

ALL BUT NEW OFFICERS' UNIFORMS, for the Army, Navy, Militia, and Yeomanry, may be obtained of LEWIS MOSES, 65 (late 464), New Oxford Street, W.C., at one-fourth their original cost; or on hire. Swords, cloaks, belts, sashes, saddles, &c. for nearly every regiment in her Majesty's Service. Uniforms and apparel purchased.

TO WIDOWS of DECEASED OFFICERS of HER MAJESTY'S 73RD REGIMENT of FOOT.

WILLIAM BEWLEY TAYLOR, Esquire (previously called WILLIAM BEWLEY MEEKE), who served as an Officer in the above Regiment, and who died on October 18, 1855, bequeathed, by his Will a Legacy of £4,000, to Trustees, upon trust, to distribute, half-yearly, the Income arising from the Investment thereof (after payment of Trust expenses), in equal proportions, amongst such Four Widows of Deceased Officers of the said Regiment, not having Incomes of more than £200 per annum respectively, as such Trustees, in their discretion, should select. There are now VACANCIES for TWO RECIPIENTS of Quarter Shares of the Income of the Invested Legacy.

Applicants desirous of participating in the benefit of "The Bewley Taylor Military Fund" may address their communications, stating age and present circumstances, with the dates and places of the deaths of their respective husbands, and such other particulars as are deemed applicable for the consideration of the Trustees, to Mr. H. J. WARE, Solicitor, 6 New Street, York.

GREY WHISKERS.

PICKARD'S EAU MAGIQUE is warranted to permanently change Grey Hair, Whiskers, or Moustaches to a natural brown or black, as desired, in a few hours, without trouble. Pickard's Eau Magique is daily acknowledged to be the best and cheapest preparation, as it gives such natural shades, and will not wash away; perfectly harmless. Cases, 1s 6d, sent secretly, packed for 22 stamps.

T. PICKARD, 3 Oxford Street, London, W.

HOLLOWAY'S OINTMENT and PILLS need only a single trial to make known their capabilities. No external sore or internal inflammation can long withstand the cooling, purifying, and healing influences exerted by these twin medicaments. Be the mischief recent or chronic, great or slight, painful or simply annoying, it will succumb before the curative virtues of these perfect remedies, which can be rightly applied by any person who will attentively read their accompanying directions, which are propounded in the plainest language, void of technical terms, and printed in the most legible characters. To the man of business, confined to his counting-house, and harassed by engagements, these Pills are invaluable; for the man of pleasure, addicted to free living, they are peerless.

THE VERSMANN'S

PATENT

GERMAN MOSS LITTER.

This Litter is specially prepared from a moss-peat found in Germany, and introduced into this country by the Patentee, Dr. VERSMANN, Ph.D. After a most severe and extensive trial in public and private stables, cowsheds, and kennels, it is pronounced by the highest practical and scientific authorities to be the best and cheapest litter known.

ITS ADVANTAGES ARE:

1. Cheapness, it being not more than one-half the cost of straw.
2. Absorptiveness, as absorbing all the urine, and rendering drains and flushing of stables unnecessary.
3. Prevention of decomposition and generation of bad odours.
4. Affording an excellent soft and elastic bed, particularly agreeable and beneficial to the feet and limbs of horses.
5. Horses do not eat it as they do straw litter. therefore they do not require to be racked up or muzzled to prevent indigestion or broken wind.
6. It is easily managed in the stable, and does not soil or stain horses.
7. It has a wonderful influence on the growth of the hoofs and in maintaining the feet in health.
8. It is extremely portable, being compressed into bales weighing each about 3 cwt., ¾ cwt. to 1 cwt. being sufficient to litter a horse for a month or six weeks.
9. It is not inflammable, and therefore offers but little danger from fire.
10. It is essentially a sanitary litter.
11. The manure is much more valuable than that of straw, and occupies considerably less space.

It will be found of immense advantage to Veterinary Infirmaries, in Stud Farms, Dairies, Kennels, &c.

Address—

The Versmann's Moss Litter Company,

LIMITED.

63 QUEEN VICTORIA STREET, LONDON, E.C.

CAUTION.—Proceedings will be taken against persons infringing the Company's patent.

KEATING'S COUGH LOZENGES.—An ever-increasing sale of 60 years.

KEATING'S COUGH LOZENGES.—Convenient to keep handy in the pocket.

KEATING'S COUGH LOZENGES.—Are universally recommended by the Faculty.

Testimonial (Original may be seen).

DEAR SIR,—Having tried your Cough Lozenges in India, I have much pleasure in testifying to their beneficial effects in Cases of Incipient Consumption, Asthma, and Bronchial Affections. So good a medicine ought to be known to be appreciated. I have prescribed it largely with the best results.—"W. B. G.," Apothecary, H.M.'s Indian Medical Service. Sold in tins, 1s 1½d, by all Druggists.

At the Preliminary Examinations of 1882, 20 Candidates were sent in, and 15 passed.

G. FAITHFULL, Storrington, Sussex, January 0, 1883.

ROYAL SCHOOL for DAUGHTERS of OFFICERS of the ARMY.

Patron—Her Most Gracious Majesty the QUEEN.
Chairman—Major-General J. T. BOILEAU, R.E., F.R.S.

The Daughters of all Officers in her Majesty's Army, inclusive of the Royal Marines, and of officers who have sold out or otherwise retired from the Service, provided those children were born prior to such retirement, are eligible. The ages of admission are from 10 to 15. Each donation of £5 5s entitles to one life vote. Each subscription of 10s 6d entitles to one vote at all elections during the year. Further CONTRIBUTIONS to meet the current expenses are earnestly solicited by the Committee.

By order, G. W. FORSTER, Secretary.
Office, 22 Cockspur Street, London.

OFFICERS' BAGGAGE, &c.—Officers are respectfully informed that Baggage, Luggage, and all kinds of Personal Property are stored at most moderate charges at the

STORE WAREHOUSES, BAKER-STREET BAZAAR, W.

The Warehouses, having been built expressly for the safe keeping of goods, are peculiarly convenient and are kept warm at an even temperature during the winter. Removals effected.

Separate lock-up rooms for large or small quantities.

JOHN HANES, Manager,
Store Warehouses, Baker-Street Bazaar, W.

FALKNER'S "REAL MALT" WHISKEY.

LONDON, 40 CHARING CROSS.
DUBLIN, 83 GRAFTON STREET.

FURNISH your HOUSES or APARTMENTS throughout on MOEDER'S HIRE SYSTEM.

The original, best, and most liberal.
Cash prices.
No extra charge for time given.

Illustrated priced catalogue, with full particulars of terms, post free.

F. MOEDER, 248, 249, 250 Tottenham Court Road; and 19, 20, and 21 Morwell Street, W. Established 1862.

LEFT-OFF CLOTHES, Old Uniforms, Epaulettes, Books, Jewellery, Miscellaneous Property, &c. Mr. J. Norton, 5 Wych Street, Strand, continues giving the highest price in the trade for the above. The utmost value remitted by Post-Office order the same day for all Parcels forwarded. All letters punctually attended to.

N.B.—Mr. Norton has always on hand a large stock of present Regulation Uniforms, equal to new, at very low prices.

SHAVING a PLEASURE.

EDWARD SMITH'S 1s HOLLOW-GROUND RAZOR is pronounced by all the most wonderful razor ever introduced. It has during the past two years stood every test, and thousands have been sold retail only, at No. 3 Cheapside. It never requires grinding or setting, and is complete in case for 1s 1d; post free, 1s 3d. Complete list of razors, &c., on application. N.B.—A liberal allowance to Serjeants and others taking a quantity.—EDWARD SMITH ("The City Toy Shop"), 3 Cheapside, London.

ARMY EXAMINATIONS.—Captain W. H. JAMES, F.G.S., P.S.C., late R.E., and the Rev. Dr. FROST, LL.D., 19 Lexham Gardens, W., formerly at 28 Kensington Square, W., PREPARE Gentlemen for the Army, *viâ* WOOLWICH, SANDHURST, and the MILITIA. A Special Class for the STAFF COLLEGE. Captain James passed from the Staff College in 1877 with honours, first in mathematics, &c. During the past fifteen years, over 500 Pupils have passed from this Establishment. Fifty-two successes last year, eighty this year. In the recent WOOLWICH Examination four passed, viz., 4th, 17th, 22nd, 27th, and a fifth pupil qualified, out of seven sent up.

LIEUTENANTS of MILITIA.—At the March Military Competitive Examination, EIGHT obtained commissions, viz.:—Richards (4th), Grant (12th), Wimberley (14th), Cass (28th), Shadwell (30th), Woodwright, Legge, Vignoles (Cavalry).

At the last Examination (September) TEN passed, viz.:—Holland (2nd), Blewitt (8th), Whiffin (14th), Gorman (19th), M'Mahon (20th), Morris (25th), Barthorp (28th), Cochrane-Baillie (33rd), Edwards (36th), another was 41st, and Goodair, 42nd, received a cavalry commission.

At the April Further Literary Examination, Three passed, viz.:—4th, 37th, 86th. This October Four passed, viz.:—5th, 10th, 14th, 26th, being all sent in on both occasions.

STAFF COLLEGE Successes:—1881: 1st, 4th, 16th. 1882: 1st, 7th, 10th, 15th, 22nd, 23rd, 26th.

Captain JAMES prepares Officers for the Promotion Examination. No failure up to date, and 46 have passed since December.

ARMY EXAMINATIONS.—Special Preparation, by JOHN GIBSON, M.A. (First-class Classics, Camb., 1874, formerly Master at Westminster), assisted by Two Resident University Graduates and Visiting Professors. In June, 1882, out of 4 Pupils sent up, 2 passed, and a third scored over 4,100 marks at his first trial. In November, 1882, out of 4 Pupils sent up, one took the 14th place on the list, and another scored over 4,300 marks. All the Pupils sent up were First trial Candidates, and 2 of the successful ones had only read 2 months with Mr. Gibson; the other, 4 months. In the last 2 Preliminary Examinations, 5 passed, out of 7 sent up.

N.B.—The next Preliminary Guide, containing the Answers to the Questions set in the February Examinations, will be published about the middle of February. Address, Bromley, Kent.

MATHEMATICS.—A Cambridge Wrangler VISITS and RECEIVES PUPILS in London; teaches by Correspondence; and supplies, on moderate terms, Solutions of the most Recent Examination Papers, including Sandhurst, Woolwich, I. C. S., London B.A., and B.Sc.—G. HEPPEL, M.A., 180 The Grove, Hammersmith.

THE ROYAL ACADEMY, Gosport.

PATRONS.
Her Most Gracious Majesty the Queen.
His Royal Highness the Prince of Wales.
His Royal Highness the Duke of Edinburgh.
His Royal Highness the Duke of Connaught.
His Royal Highness the Duke of Albany.

A Class will be formed in January for special preparation for the next Examination for Naval Cadetships.—Rev. EDWARD BURNEY, M.A., Head Master.

ARMY, *viâ* Sandhurst, Woolwich, or Militia.—PROSPECTUSES, together with reliable Information of Tutors recently successful, sent (gratis), by Messrs. ASKIN, 38 Sackville Street, London, W. References kindly allowed to the Chaplain-General to the Forces and others.

ARMY EXAMINATIONS.—PREPARATION in FRANCE by B. ARNETT, M.A., Cantab., J. J. RIX, B.A., Cantab., and F. BREITENSTEIN. Rigeard, Chartres, France.

WOOLWICH, SANDHURST.—MORGAN JENKINS, M.A. (Wrangler), assisted by an experienced Staff, prepares resident and non-resident Pupils. References to parents, many of whom have had more than one son successful at this establishment. Two passed (38th and 71st) in the recent list for Sandhurst.—50 Cornwall Road, Westbourne Park, W.

THE ARMY COLLEGE, ABINGDON, BERKS.

OFFICERS PREPARED for the Militia Military Competitive Examination ONLY. For particulars, apply to the Secretary, the Abbey, Abingdon, Berks.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS., 28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Four Open Scholarships or Exhibitions gained in 1881.—Address Rev. E. BARTRUM, Head Master.

ARMY EXAMINATIONS.—Dr. KAIM and H. ZOBEL, in conjunction with Captain GREENE, assisted by able and Experienced Masters, PREPARE CANDIDATES for Woolwich, Sandhurst, the Militia Competitive Military Examinations, and the Staff College.

The Pupils are received in the Families of the Principals, which will be a Special Advantage to those wishing to practise French, German, and Italian conversation.

Highest references; amongst others, Major-General Sir Evelyn Wood, V.C., K.C.B., Colonel the Hon. P. Methuen, C.B., Scots Guards, Assistant-Adjutant-General, Horse Guards.

For particulars, apply to H. ZOBEL, Poulton House, Hampton, Middlesex.

GROSVENOR SCHOOL, Twickenham.

BOYS receive thorough PREPARATION for Woolwich and Sandhurst, and pass DIRECT. Special arrangements for very young boys. Healthy neighbourhood, good table, public-school tone. Strongly recommended by many Officers high in the Service, to whom reference is permitted. Head Master, the Rev. L. MURRAY D'ORSEY, M.A.

ARMY EXAMINATIONS.—The Establishment formerly conducted by Dr. LAUMANN and Mr. ELDERTON at Fulham, is now carried on by the latter at MANOR COURT, Hanwell, where pupils are prepared for the above Examinations. Average number of pupils, 10; average number passed per annum, 8.

MILITARY EDUCATION, GERMANY.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

University Candidates for Sandhurst are received as non-resident pupils. In this competition two candidates (the only ones sent up) have passed into Sandhurst during the past year; Mr. W. A. Grant taking fourth place in July, and Mr. G. Barton-Smith second place in December.

In addition to the University candidate, two other pupils passed on the general list at the recent Sandhurst Examination,—Mr. C. D. Radcliffe (tenth place) and Mr. H. Marwood.

Special arrangements made for officers studying for the Staff College or other Military Examinations.

MILITIA COMPETITIVE EXAMINATION.

The standard originally fixed for this Examination having been much raised in September, 1881, no results previously obtained should be taken into account in considering the successes obtained by Militia pupils. Since the date named, there have been three competitions. At these trials Colonel WILKINSON and Lieutenant-Colonel SHAW have secured 24 COMMISSIONS for their pupils, although they have only prepared and sent up a very limited number for Examination. The names of all successful pupils have already been published.

Also, at the October Literary Examination, Lieut. C. J. Stanton took 4th place on the list.

The results obtained at other Examinations bring the general score up to FORTY-EIGHT SUCCESSES, achieved by pupils in the last 18 months; during that period the number of pupils on the strength of the establishment, resident and non-resident, has always been limited to 60.—Address, DARMSTADT, GERMANY.

SANDHURST, WOOLWICH, C. S., MILITIA, &c.—The Rev. A. PRITCHARD, M.A. Oxon., assisted by his Brother, Professor PRITCHARD (late R.M. Academy, Woolwich), and a large Staff of resident Assistant-Tutors, PREPARES for any of the above.

The next Term will commence Jaunary 3, 1883.

For particulars of all this year's successes and previous ones, address Rev. A. PRITCHARD, Hill Lands, Wargrave, Henley, Oxon.

OXFORD RESPONSIONS, and all UNIVERSITY MATRICULATIONS.—VACANCIES caused by successes last week at Oxford Responsions.

Address, Rev. A. PRITCHARD, Wargrave, Henley, Oxon.

MILITARY COMPETITIVE for MILITIA OFFICERS.—The Rev. A. PRITCHARD, who is assisted by a retired Field Officer of 8 years' experience as a Garrison Instructor, has, during the year 1882, gained five Commissions with the 14 Candidates who went up from him.

For particulars of marks, places, &c., address Rev. A. PRITCHARD, Wargrave, Henley, Oxon.

LIEUTENANTS of MILITIA desirous of competing for Line Commissions can be received by the Rev. WALTER BAKER, M.A., at Batcombe Rectory, Evercreech, Bath. They will be thoroughly prepared in all Military Subjects by Major Dickens (late 11th Foot), Staff-College Graduate, formerly Assistant Royal Engineer, S.E. District, and Colonel Palmer, late R.A., formerly Instructor at the R.M.A., Woolwich, and two of whose pupils obtained special mention from the Examiners at the last September Examination.

Great individual attention is given, as few pupils are taken, and each comes under actual *vivâ voce* instruction for 6½ hours a day. Since the introduction of the Military Competitive, out of Thirty-nine Lieutenants of Militia sent up, Twenty-four have been successful, several taking high places in the list. There are opportunities for healthy country amusements and games, a cricket and football ground, lawn-tennis courts (grass and asphalte), a private billiard-room, &c., and in all other respects a liberal and gentleman's establishment is kept.

A Large Staff of Experienced Tutors, all resident, assist in preparing for the Qualifying Examinations, and for the Sandhurst and Woolwich Competitions.

References to parents of successful pupils.

NAVAL CADETS, ASSISTANT CLERKS
HOPE HOUSE, SOMERSET PLACE, SOUTHSEA.

Principal—Mr. T. H. VICKERY.

In addition to the general course of study pursued at this long-established School, Pupils are specially prepared for the Examination required for the above.

At the late Competitive Examination in June, for Assistant-Clerkships in the Royal Navy, THREE of the Five successful competitors were Pupils of this Establishment, taking First, Third, and Fourth places. And THREE passed the test of qualification.

TO ARMY TRAINERS and MILITARY STUDENTS.

KELLY COLLEGE, Tavistock, Devon. Election of Foundationers in March, 1883. Priority, after Founders' Kin, to Sons of Deceased Naval Officers. For particulars, apply to the HEAD MASTER.

KINGSLEY COLLEGE,
WESTWARD HO!

HEAD MASTER—Rev. F. HEWSON WALL, LL.D.
VISITING COUNCIL.
Vice-Admiral Sir Wm. M. Dowell, K.C.B.
Robert Ellis, Esq., M.R.C.S., &c.
Rev. Roger Granville.
General W. N. Hutchinson.
Colonel Kennard, M.P.
Major-General Molesworth, R.H.A.
Sir George Stucley Stucley.
Rear-Admiral A. T. Thrupp.
Secretary, Ambrose Berkeley Wall, Esq., R.N.

The EXAMINATION for the following EXHIBITIONS will commence on April 3, 1883:—(1.) Two KINGSLEY Exhibitions, value £15 each. (2.) Two MOLESWORTH Exhibitions, value £10 each. (3.) Two ARLINGTON Exhibitions, value £7 10s each. (4.) Two ARLINGTON Exhibitions, value £5 each.

ARMY.—LINE and MILITIA.
IMPORTANT to STUDENTS.

Captain DUMARESQ DE CARTERET BISSON, M.A., Author of "Our Schools and Colleges" (graciously recognised by the Queen and H.R.H. the Commander-in-Chief), sends, free by post, a selected List of Prospectuses of all the most SUCCESSFUL ARMY TUTORS, and gives his Counsel on Military and Civil-Service Education free of charge. Reference kindly permitted to the late Secretary of State for War.—Address, Captain BISSON, No. 3 Berners Street, London, W.

ARMY,
CIVIL SERVICE, UNIVERSITIES, PUBLIC SCHOOLS.

MESSRS. BISSON, BORMAN, and CO. send, free of charge, PROSPECTUSES of the most SUCCESSFUL TUTORS for Woolwich, Sandhurst, Military Competitive, Staff College, Home and Indian Civil Services, Universities, Public Schools, &c.—3 Berners Street, W.

ARMY EXAMINATIONS, &c.—In the late Examinations, Mr. WATKINS, late Scholar, Christ's College, Cambridge, passed Messrs. Plomer, Panton, Carpendale, Brownlow (U.C.), and Voyle (I.C.), for Sandhurst, and Mr. Cronin took honours at the Academy; Mr. Brett qualified for Woolwich.

Twenty-two other Pupils have taken high places past year for the above, the Universities, Student Interpreterships, and Militia Examinations, Military and Pass.

A Class for Staff College.

Address, 90 Kensington Park Road, W.

LIEUTENANTS of MILITIA.—A COURSE of INSTRUCTION, including Fortification, Surveying, Tactics, Army Discipline Act, Drill, Queen's Regulations, &c., given by Major DAUBENY and A. PINHEY.—Apply to A. PINHEY (late R.A.), Burlington House, Spring Grove, Isleworth, W.

THE PRIORY, BALHAM, SURREY, adjoining Tooting Common.—Mr. BLACKWELL, B.A. (assisted by Graduates in High Honours), PREPARES Gentlemen for Woolwich and Sandhurst, and Militia Officers for the Military Competitive Examinations. At the Preliminary Examination for Sandhurst, held August 30 and 31, 1882, of four pupils sent up, three were successful. During the present year, pupils of Mr. Blackwell have passed the qualifying examination for Militia Officers who are candidates for commissions in the Army, &c.—Terms on application to Mr. BLACKWELL, the Priory, Balham. Reference may be made to the parents of present and former pupils.

MILITARY COMPETITIVE EXAMINATION.—Lieutenants of Militia PREPARED, at 37 Cambridge Gardens, W. At the last September Examination, the following, out of Twelve sent up, were successful:—

C. H. Farquharson	5th	J. F. Campbell	23rd
J. E. Cullinan	12th	C. L. Crutchley	31st
C. W. Garraway	16th	B. T. Mahon	38th

Apply to D. C. FEENY, B.A.

WOOLWICH, SANDHURST, and MILITIA.—Mr. S. H. WINTER PREPARES PUPILS for Military and other Examinations. More than 200 of his pupils have passed, many of them taking very high places.—Connaught House, the Common, Woolwich.

SANDHURST, WOOLWICH, and LITERARY EXAMINATIONS for MILITIA OFFICERS.—Candidates for the above Examinations are PREPARED by Mr. G. M. HICKS, M.A., who receives a limited number. Thorough teaching and individual attention. List of recent successes on application.—5 South Row, Blackheath, S.E.

MR. ST. JOHN BOULTBEE, the Priory, Croydon (late Captain Massie and Boultbee), assisted by a Staff of Graduates of the Universities of Oxford and Cambridge, RECEIVES a Limited Number of Pupils to PREPARE for the Competitive Examinations for Sandhurst, Woolwich, and for the Militia. The number of Pupils is limited to TWELVE. Five Pupils out of Six were successful at the last Sandhurst Examination (July, 1882).—Terms, References, and other information, sent on application.

ARMY TUITION, WEST of ENGLAND.—H. A. JAMES, B.A. Cambridge, and A. J. DE H. BUSHNELL, M.A., Oxford, have been nine years engaged in preparing Candidates for the Woolwich and Sandhurst Entrance and the Militia Literary Examinations. Since June, 1873, for Military Examinations alone, 91 Pupils have completed their preparation at Hillcourt. Of these, 76 have passed. The number in the house is limited to 15.—For terms and references, apply to HENRY A. JAMES, Hillcourt, Marle Hill, Cheltenham.

THE GRANGE, Cowes.—Rev. ARTHUR WATSON, M.A., Graduate in Honours, Cambridge, PREPARES for Public Schools, Naval, and other Examinations. 1st, 3rd, 4th, 5th, &c., places for Naval Cadetships, a First Class at Oxford, and other Honours have been gained. The NEXT TERM commences JANUARY 25.

LIEUTENANTS of MILITIA, Candidates for Line Commissions, are PREPARED by Lieutenant-Colonel COATES, Reserve of Officers, formerly of the Royal Military Academy, Woolwich, and Acting Brigade-Major at the Cape.

Colonel Coates has had much experience in coaching, and was, until quite lately, instructing at a large Army Coaching Establishment. His fees are about one-third less than those usually charged; and as he limits the number of his Pupils to Four, great individual attention is insured.

MADAME ISABEL BIZET MICHAU receives LADIES and GENTLEMEN for PRIVATE INSTRUCTION in the Valse, Highland Schottische, &c., by previous appointment, at her Residence, 59 Baker Street, Portman Square. The Young Ladies' Classes at Kensington and Baker Street are held as usual.

ARMY EXAMINATIONS.

MR. J. WINDER, M.A., Cranworth House, Eastbourne, Sussex, PREPARES TEN PUPILS for Woolwich and Sandhurst. At recent Examinations Candidates prepared by Mr. Winder obtained 6th and 22nd places for Woolwich, and 20th and 27th places for Sandhurst.

DR. J. COLLIS BROWNE'S CHLORODYNE.

ORIGINAL AND ONLY GENUINE.

From SYMES and Co., Pharmaceutical Chemists, Medical Hall, Simla, January 5, 1881.
To J. T. DAVENPORT, Esq., 33 Great Russell Street, Bloomsbury, London.

Dear Sir,—We embrace this opportunity of congratulating you upon the wide-spread reputation this justly esteemed medicine, Dr. J. Collis Browne's Chlorodyne, has earned for itself, not only in Hindostan, but all over the East. As a remedy of general utility, we much question whether a better is imported into the country, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are happy to say, are now relegated to the native bazaars, and, judging from their sale, we fancy their sojourn there will be but evanescent. We could multiply instances *ad infinitum* of the extraordinary efficacy of Dr. Collis Browne's Chlorodyne in Diarrhœa and Dysentery, Spasms, Cramps, Neuralgia, the Vomiting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Choleraic Diarrhœa, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power. We have never used any other form of this medicine than Collis Browne's, from a firm conviction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, as we are of opinion that the substitution of any other than Collis Browne's is a deliberate breach of faith on the part of the chemist to prescriber and patient alike. We are, Sir, faithfully yours, SYMES and Co., Members of the Pharm. Society of Great Britain, His Excellency the Viceroy's Chemists.

DR. J. COLLIS BROWNE'S CHLORODYNE is a Liquid Medicine which assuages Pain of every kind, affords a calm, refreshing sleep without Headache, and invigorates the Nervous System when exhausted.

DR. J. COLLIS BROWNE'S CHLORODYNE.

Dr. J. C. BROWNE (late Army Medical Staff), discovered a remedy to denote which he coined the word CHLORODYNE.

The General Board of Health, London, report that it acts as a charm, one dose generally sufficient.

Dr. Gibbon, Army Medical Staff, Calcutta, states:—"Two doses completely cured me of Diarrhœa."

DR. J. COLLIS BROWNE'S CHLORODYNE rapidly cuts short all attacks of

COUGHS, ASTHMA, COLDS,
BRONCHITIS,
EPILEPSY, SPASMS, COLIC,
PALPITATION, HYSTERIA, and is the true Palliative in
NEURALGIA, GOUT, CANCER,
TOOTHACHE, RHEUMATISM.
GREAT SPECIFIC for
DIARRHŒA,
CHOLERA, DYSENTERY.

IMPORTANT CAUTION.
The immense sale of this remedy has given rise to many unscrupulous imitations.

N.B.—Every bottle of genuine Chlorodyne bears on the Government stamp the name of the inventor,

DR. J. COLLIS BROWNE.

Sold in Bottles, 1s 1½d, 2s 9d, 4s 6d, by all Chemists.

Sole Manufacturer,
J. T. DAVENPORT,
33 Great Russell Street, W.C.

APPROVED SCHOOL-BOOKS in GLEIG'S SCHOOL SERIES.

SECRETARY.—Robert Watson Surtees, Esq.
OFFICES.—Leadenhall House, Leadenhall Street, E.C.

NOTICE.

The object of this Company is to purchase the well-known Duplessis Concession, which gives the sole right for 99 years to all the Esparto grown in the districts of Bouhedma, Majoura, Aicha, and Hadaje. This Concession was made by the Bey of Tunis in June, 1881, and subsequently received the support and confirmation of the French Government and the European Commission for the Regulation of the Tunisian Public Debt. Fearing the monopoly given by this Concession would result prejudicially to the British paper trade, Earl De la Warr questioned the Government on March 27, 1882. This resulted in a diplomatic correspondence between the two Governments.

The anticipated inconvenience to British interests being removed by the subsequent purchase of the Concessionaire's rights by Mr. Hough (the present Vendor), Earl De la Warr consented to become Chairman of the Company. It may be as well to mention that Esparto Grass grows wild and renews itself from the same root, consequently is inexhaustible, and that 190,000 tons are annually used in British paper-making. The projector's estimates of this Company's profits have been carefully examined, and 26 per cent. minimum dividend clearly established.

For full Prospectus, see issue of the daily papers of the 20th instant.

For Prospectus and Forms of Application for Shares, apply to the National and Provincial Bank, or any of its Branches; to the Solicitors and Brokers of the Company; and at the Company's Offices, as above.

·450, ·500, and ·577 bore DOUBLE EXPRESS £25
If fitted with Tolley's Patent "Giant-Grip" Action, specially designed to prevent the SLIGHTEST MOVEMENT at the moment of discharge. The strongest action extant ... £28
An inspection of above invited.

The shooting of our Rifles is under the personal supervision of a member of the Firm, and is not deputed to any subordinate, AS IS USUAL IN MOST CASES. By this means we are enabled to guarantee to our customers Rifles with a figure of merit that cannot be beaten.

[Extracts.]
From Capt. J. E. B., 45th Regiment: "I yesterday fired with the rifle without raising the back sight from 25 to 200 yards, and almost every shot struck its fellow, with the other barrel."
B. W. W., Assam, India:—"I must certainly give you credit for the splendid weapon that you have built me."
Capt. F. W. M., Mysore:—"I have never had a rifle (and I have had all kinds) which has given me such satisfaction."
Lieut.-Col. W. A., 22nd Regiment:—"The Express Rifle gives me perfect satisfaction."
Lieut. C. W. D., 92nd Highlanders:—"I have fired with it, and find it very accurate and well balanced."

C. F. SHOT GUNS, Hammer or Hammerless, £13 13s, £15 15s, £17 17s £20, £25, and £30.

We are constantly receiving a supply of above from our manufactory in Birmingham, at our London address, where one of the principals can at any time be seen.

EGYPTIAN NOTES.

(FROM AN OCCASIONAL CORRESPONDENT.)

Cairo, January 16, 1883.

THE last weekly return of the health of the Army in Egypt is, compared with others, satisfactory, to a certain extent, but it shows that the troops are still suffering more severely than the climate warrants. In fact, Cairo now is the perfection of a climate, what English May weather is in poetry, and the very reverse of what it is in real life. And if in this weather 12 or 13 per cent. of our men are going into hospital, what will happen when we get to the month of Khamseem winds and low Nile? Here are the figures:—

Artillery.—Out of 15 officers and 831 men, 1 officer and 158 men sick.

Cavalry.—Out of 33 officers and 1,060 men, 3 officers and 224 men sick.

Engineers.—Out of 8 officers and 247 men, 22 men sick.

Line.—Out of 177 officers and 6,971 men, 18 officers and 800 men sick.

Commissariat and Transport Corps, Ordnance Store, Medical Department, and Army Hospital Corps.—Out of 60 officers and 808 men, 1 officer and 103 men sick.

This in Cairo alone, while Alexandria returns show 85 officers and 2,565 men, of which 3 officers and 355 men are sick; and Ismailia, 4 officers and 151 men, of which 2 officers and 13 men are sick. Taking the whole, we find 28 out of 382 officers, or 7⅓ per cent., and 1,675 out of 12,633 men, or 13¼ per cent., on the sick list. Dividing them into different branches of the service, the Cavalry head the list, with 20·8 per cent., Artillery next with 18·8 per cent., Line 11½ per cent., Engineers nine per cent. Horses do not come much better off, for out of 2,284, 218 are returned as sick. The Hospital returns for Cairo alone show, nevertheless, a steady improvement, as the following figures will show:—

	Entries into Hospital.	Deaths.
1st to 15th November ...	1,063	28
15th to 30th " ...	893	27
1st to 15th December ...	767	10
15th to 30th " ...	606	10
1st to 15th January......	518	11

Taking the present death-rate at 20 per month, or 240 a year upon the present Cairo force of 10,210 officers and men, this gives a per-centage of 23½, which is not high; but the figures are deceptive, for they leave out of account the men who have been sent away to die elsewhere, in Alexandria or England. Looking at the entries into hospital, however, we find about 10 per cent. going in every month, and it is clear that this points to very serious general ill-health. The remedy is obvious. The climate of Egypt, though generally healthy, is a very difficult one in which to recover strength; the only real cure for fever is to leave the country, as soon as it is practicable. There are regiments here, more particularly the Cavalry, which bore the brunt of the campaign, which should at once have been transferred home. Helouan is, no doubt, a charming retreat for a poet or philosopher, but Tommy Atkins is neither, and he bores himself to death with ennui. The condition of the country does not warrant our saddling the Egyptian Government with the cost of 13,000 men; it is probably detrimental to our political interests, it certainly is so to the health of the soldier. I am glad to hear that some regiments have already received their orders to be ready to embark. The 18th Royal Irish, the 53rd (Shropshire), and the 19th Hussars are likely to be the first off. It does not sound hospitable, but we speed the parting guests with alacrity, not only for their own sakes, but because the diminution in numbers will give those who remain a better chance. Enough of disease. Let me speak of another epidemic,—that of decorations. A distinguished officer writes me, "I was under fire four minutes; I have received four decorations." Another equally distinguished officer writes me:—"I was throughout in every engagement, from that at Alexandria, on August 5, to that of Kassassin, but because on the eve of Tel-el-Kebir I was ordered not to move forward, I receive no clasp, no decoration, simply the medal." I hear of one other gallant young officer, who arrived at Ismailia a few hours before Tel-el-Kebir, followed his General to Cairo, and receives the clasp. I am glad the Interpreters are to receive the British medal, but I would like to say a word for that much-abused class, the Special Correspondents. They are placed under the Mutiny Act, in pursuit of their calling they run the risks of the ordinary soldier. The Khedive has honoured them with the Egyptian medal, foreign Governments have, I think, invariably accorded it,—one distinguished Englishman, indeed, the father or grandfather of the profession, is covered with decorations, which do not do him more honour than he does them—but as a general rule, the "Specials" are refused that little strip of ribbon which, because they have deserved, they are not ashamed to ask for boldly. I understand that a very august personage has asked for photographic groups of officers who fought at Tel-el-Kebir. I am sure that this very innocent request was never meant to give pain, but men who already think themselves overlooked are apt to be touchy, and it is a pity that the brief action of Tel-el-Kebir was again made, as it were, the test of merit. But in presence of one real grievance all others look small, and there is one man who has been so markedly overlooked, that one cannot be surprised to hear it asked what offence John Arbuthnot Fisher, of the Inflexible, has committed, that his services should be so completely ignored. I say "completely," because though he received the same distinction as was awarded to other Post-captains for his share in the bombardment of the Alexandrian forts, it cannot be pretended that his subsequent services were thereby recognised. Not even Wolseley himself as much merits the credit of the whole campaign, as does the one man who, with two or three hundred Marines and Blue-jackets, held a hostile town with the enemy at its gates until the military forces were able to arrive. Such services in a soldier would worthily have been rewarded by a peerage. With health ruined by work and responsibility, Captain Fisher has lost the finest Naval command in the world and gained a barren C.B.

NAVAL HONOURS AND REWARDS.

An analysis of the distribution of rewards and honours made by the Admiralty for the Egyptian War gives the following results:—The Commander-in-Chief of the assembled Fleet was created a Peer of the Realm, and was decorated with the Grand Cross of the Osmanieh. The senior Admiral of the Channel Squadron was made a K.C.B., and received the 2nd Class of the Osmanieh. The Commander-in-Chief of the East Indies station was made a K.C.S.I., and received the 2nd Class of the Medjidie. The Admiral who was sent out by the Admiralty to assist in seizing the Maritime Canal received a K.C.B.-ship, and the 2nd Class of the Medjidie. The second-in-command of the Channel Squadron has been decorated with the 2nd Class of the Medjidie. Lord Alcester's secretary receives the 3rd Class of the Medjidie, the secretaries of the other flag officers receiving the 4th Class of the Osmanieh. The senior Assistant-Paymaster in the Commander-in-Chief's office was promoted. Lieutenant Winsloe, whose seniority dates from September 30, 1874, acted at first as Flag-Lieutenant to Rear-Admiral Sir Francis Sullivan, and was promoted to the command of the Helicon after the bombardment, and is also awarded the 4th Class of the Osmanieh. He is the only Flag-Lieutenant who receives a foreign decoration. The captain of the Sultan was made a K.C.B. The captains of the Alexandra, Inflexible, Invincible, Monarch, Orion, and Captain Harry Rawson were each granted the C.B. and the 3rd Class of the Osmanieh. The captains of the Euryalus, Penelope, Superb, and Téméraire have become Commanders of the Bath, but receive no mark whatever of the Khedive's gratitude. Captain Murray, of the Agincourt, and the captains of the Achilles, Northumberland, Eclipse, Carysfort, Iris, Ruby, and Tourmaline receive the 3rd Class of the Osmanieh. Captain Fellowes, of the Minotaur, and the captains of the Hecla, Inconstant, Falcon, and Lord Charles Beresford, of the Condor, together with the commanders of the Agincourt, Minotaur, Penelope, Achilles, Inconstant, Invincible, Monarch, Sultan, Téméraire, and Commander Bickford, of the Transport Service, receive the 3rd Class of the Medjidie. Commanders Moore, of the Orion, and Morrison, of the Helicon, are the only officers who have been promoted and at the same time decorated. The senior receives the 3rd Class of the Medjidie; the junior the 4th Class of the Osmanieh. The commanders of the Euryalus, Condor, Dee, Salamis, and Thalia have received no recognition of their services at the hands of the Khedive. The senior Lieutenant of the Euryalus (seniority, September 23, 1873), Commander Purvis (promoted for wounds from Second Lieutenant of the Penelope), the third Lieutenant of the Hecla, the third Lieutenant of the Inconstant; Lieutenant Percy M. Scott, who deserves far more than he has received; Lieutenants Barlow and Frank Younghusband, of the Inflexible; the fourth and fifth Lieutenants of the Invincible (Smith-Dorrien and Poore), the third Lieutenant of the Monarch (Reid), the third Lieutenant of the Orion, the senior Lieutenant of the Ruby, the senior Lieutenant of the Sultan, the sixth Lieutenant of the Superb, and the fifth Lieutenant of the Téméraire, are decorated with the 4th Class of the Osmanieh or Medjidie; while the senior Lieutenants of the Agincourt, Minotaur, Achilles, Beacon, Bittern, Condor, Cygnet, Decoy, Dee, Don, Dragon, Eclipse, Falcon, Inconstant, Mosquito, Orion, Ready, Salamis, Seagull, Tourmaline, and Thalia receive no recognition whatever of their services. With but the two exceptions already noted, the officers promoted have in no case been decorated by the Khedive; that is to say, the Admiralty have not thought fit to confer a foreign decoration on any officer who has secured a step in rank, except in the case of Commanders Moore and Boardman. The result, as will be seen hereafter, is somewhat curious. We will take the promotions by ships. In the Alexandra, Commanders Thomas and Kane, Lieutenant Blaxland, Staff Commander Hosken, Sub-Lieutenants Abdy, Cave-Browne-Cave, Erskine, and Colville—Wyatt being passed over—Surgeon Maclean and Engineer Craddock. Fleet-Surgeons Shaw and Handbury, are made Companions of the Bath, and Chief Engineer Read is decorated with the 4th Class of the Osmanieh. Not one of the Marine officers receives any reward for his services. In the Minotaur, Sub-Lieutenant Morgan is promoted; in the Euryalus, Sub-Lieutenant Carus-Wilson is promoted; in the Penelope, the two senior Lieutenants, the Navigating-Lieutenant, and the Staff Surgeon are promoted; in the Achilles, no one; in the Beacon, the Commander and the Engineer; in the Bittern, the Commander and the Engineer; in the Carysfort, the senior Lieutenant; in the Condor, the Commander; in the Coquette, the Lieutenant and Commander and the senior Sub-Lieutenant; in the Cygnet, the Lieutenant and Commander and the Sub-Lieutenant; in the Decoy, the Lieutenant and Commander and the Sub-Lieutenant are promoted, and the second Commander of this gunboat is decorated with the 4th Class of the Osmanieh. Why? Lieutenant Festing was appointed to the command of the Decoy on August 7. He can only have joined her a fortnight or three weeks after, at the earliest. He was not in command at the seizure of the Maritime Canal, nor for a fortnight afterwards, at the least, and had no share in the hard work of the campaign. Why is he decorated? No one was either promoted or decorated on board the Dee, but on board the Don the Lieutenant and Commander and the Sub-Lieutenant were promoted. And yet, Lieutenant Harston, of the Dee, can reckon more sea time than Lieutenant Wilson, of the Don. From first to last, too, Lieutenant Harston has seen all the Lieutenants-in-Command of gunboats in Egyptian waters, promoted. He, alone, remains out in the cold. How has he incurred the displeasure of the Admiralty? The Dee did, on the whole, more work than the Don. Lieutenant Harston was in charge of the first two vessels of any sort sent into the Canal. The Dee and the Don carried the first reliefs to assist Captain FitzRoy at Ismailia. They landed 350 Marines at 4 p.m. of the day that town was occupied. Why should the officers of the Dee receive neither promotion nor foreign decoration, when the officers of the Don are promoted, and Lieutenant Festing, who was never under fire, is decorated with a foreign order? In the Dragon, the Commander alone has been rewarded with the 3rd Class of the Medjidie; the same in the Eclipse and Falcon. But in the Hecla the senior Lieutenant is promoted, and in the Helicon the Commander, Navigating Lieutenant, and senior Sub-Lieutenant have been promoted. The Inconstant has not been able to gain any promotions; but the Commander, Staff Commander, Chief Engineer, and senior Sub-Lieutenant of the Inflexible have gained a step in rank. Lieutenant Barlow, whose seniority dates from September 3, 1872, has been passed over. The only Lieutenants senior to this officer on the station are Lieutenant Festing, who commands the Decoy, whose seniority dates from September 5, 1867, and

Lieutenant de Sausmarez, of the Sultan, whose commission dates back to June 1, 1869. Both the latter officer and Lieutenant Barlow have well earned their promotion, but do not get it. In the Invincible, Lieutenants Forsyth (November 1, 1871), and Bradford (June 15, 1874), with Sub-Lieutenant Chads, were promoted, and Sub-Lieutenant Couper was decorated with the 5th Class of the Medjidie. In the Iris, the senior Lieutenant and the Navigating-Lieutenant were promoted. In the Monarch, the senior Lieutenant and the senior Sub-Lieutenant, as also the Surgeon, were promoted, while Mr. Drury St. A. Wake was decorated with the Medjidie of the 5th Class, as was also Mr. Stracey, of the Alexandra. We now come to the Mosquito. This small craft did good work in the Canal, notably at Chalouf, and in guarding the Egyptian gunboats at Suez. Lieutenant-Commander the Hon. Francis R. Sandilands and Sub-Lieutenant Story were promoted for these services. But not a soul on board has been awarded an Egyptian decoration! The Northumberland, beyond securing the promotion of her Commander by sending him to the Alexandra, has done nothing for her officers. Her Staff Commander receives the 3rd Class of the Medjidie, for pilotage services rendered during the war; the new year's *Gazette* promoted her senior Lieutenant. In the Orion, the Commander was promoted and decorated. Commander Edwards, of the Ready, who had charge of the seizure of the intermediate points in the Canal between Port Said and Ismailia, is promoted, but none of those under him are even decorated. The senior Sub-Lieutenant of the Ruby is the only officer promoted out of that ship, the Captain and senior Lieutenant being the only two officers decorated; and yet we were told that the Ruby had done such good work at Suez! Commander Boardman, of the Salamis, has been promoted by the new year's *Gazette*, otherwise none of the officers of that ship have derived any benefit from the Egyptian Campaign. Commander Mather Byles and Assistant-Paymaster Rogers, who displayed conspicuous gallantry at Chalouf, have been promoted in the Seagull. But not one of the officers of this ship, any more than those of the Mosquito, have been decorated by the Khedive. The services of Captain Walter Hunt-Grubbe were considered sufficiently brilliant by the Admiralty for "My Lords" to have this officer raised to the dignity of a Knight Commander of the Most Honourable Order of the Bath. They also promoted Commander Balfour, together with two Sub-Lieutenants and the Assistant-Paymaster of the Sultan. But not one of these officers has been decorated. Captain Cheetham, R.M.A., strange to say, has been selected by the Admiralty for the distinguished honour of being decorated with the Fourth Class of the Medjidie. Really, the Admiralty should be more careful. Such open-handed generosity to the Marines will spoil the corps, and make the Navy jealous. For they have actually bestowed the same class of this Order on Captains Baldwin and Gore, R.M.L.I., having previously bestowed the 4th Class of the Osmanieh on Majors Farquharson and Bourchier; they also patronise the Subalterns of the corps, decorating Lieutenants Marriott and Talbot, R.M.A., with the 5th Class of the Medjidie. *C'est vraiment incroyable!* The senior Lieutenant of the Superb was promoted after the bombardment, and besides her Captain, the sixth Lieutenant, Lieutenant Talbot, R.M.A., above mentioned, her Fleet Surgeon and Engineer have been decorated, and Sub-Lieutenant Tottenham has been promoted, as were also the senior Lieutenant and Sub-Lieutenant of the Téméraire, while the fifth Lieutenant is decorated. No one but the Captain of the Tourmaline is noticed in any way, and the same holds good in the Thalia, except that three of the officers borne on her books for transport service have been promoted. We have now gone through the whole of ships employed in Egyptian waters during the war. We have endeavoured, in some measure, to classify the honours and rewards showered upon the Navy by those who "labour hard" at the Admiralty to maintain the high character and *esprit de corps* of the service. But we freely admit that it is an impossible task. We find Gunners Davidson and Peavitt and Boatswain Hurrel decorated with the 5th Class of the Medjidie, but Chief Gunner Harding, of the Alexandra, who has won the Victoria Cross, is given no foreign decoration. The same treatment is received by the officers who have in every sense of the word "laboured hard," on board, on shore, and under fire, to maintain the high reputation of the Navy, and we fairly stand aghast when we view the selections made by the Admiralty, and remember how well have fared those officers in high places who have remained at home at ease. As to the Channel Squadron, the Admiralty have treated the officers of that force in the same manner that the Military authorities have treated the Brigade which remained at Alexandria under Sir Evelyn Wood. They have received nothing, and the officers and men of the Mediterranean and East Indies Fleets next to nothing, and what they have been granted has been bestowed upon them in such an ungracious manner as to deprive the gift of all real value. "Stick to your desks, lads, and never go sea, if you want to be a Captain in the Queen's Navee!" For we really fail to discover any principle governing the distribution of rewards and honours granted to the Navy for the Egyptian War, unless it be the desire of the Lords of the Admiralty to stint the Navy by every means in their power.

MR. KINGLAKE AND LORD RAGLAN.

Amongst the personages introduced to the reader by Mr. Kinglake in the seventh volume of his work on the Invasion of the Crimea, the highest position is naturally accorded to the Commander-in-Chief of the British Forces, Lord Raglan. The opportunity thus afforded to the historian of the war of vindicating its leader from the cruel aspersions that were cast upon him during its progress, has been seized on with avidity. No more willing champion than he, to do battle in defence of a General who felt coerced to submit in silence to misrepresentations of the gravest character. In the performance of this self-imposed task, Mr. Kinglake proves himself a master of invective. In unmeasured terms he denounces those who venture to arraign the conduct of the Commander-in-Chief, and at the same time with singular skill pictures the difficulties that surrounded the occupier of that exalted position, and draws attention to the many noble qualities which adorned his public and private life. In describing the sufferings of our Army during the winter, Mr. Kinglake pays a high tribute to the anxious care, the constant consideration for others, and the unflinching determination which marked the conduct of Lord Raglan at that crucial period. "If the soldier had to endure grievous hardships and bodily sufferings, his General's portion was care—care almost unceasing, yet repressed or concealed so far as was possible by a characteristic abhorrence of downheartedness, and in conformity also with that military policy of which we shall soon have to speak. Our men, of course, knew but little of the ugly statistics which were ceaselessly measuring the calamity, dividing the dead from the living, revealing the number of those who lay sick or wounded in the hospitals, and sorting out hour by hour the lessening remnant of strength; but to Lord Raglan, every day of his life the 'morning slate' told all." One of the complaints most frequently urged of Lord Raglan's conduct was that he did not visit his divisional camps, and especially his field hospitals. This charge, according to Mr. Kinglake, was one most easy of explanation. Lord Raglan at all times neglected the "ostentation of care;" he used to ride almost always with but a single aide-de-camp, and it chancing that the wrapper he wore in those days had so much of the cloak formation as to conceal the loss of an arm, he was but little observed in passing, and not often recognised. Moreover, every time that he moved from his quarters, he had before him the object of transacting real business, unconnected with imposture or show, and the greater part of his toil was toil at the desk—toil engrossing many hours of each day with, besides, no small part of each night. And yet Lord Raglan did not trust to his pen when he thought that words from the lips might perhaps have a better effect; he was habitually in oral conference with his Generals and men of other rank, or of no rank at all, whom he had summoned to head-quarters for the purpose; and still further it may be observed, that for one of the most trying and momentous of all his duties, that is, for the maintenance of our difficult and even perilous relations with the French, he made little use of the pen, trusting rather to personal intercourse.', Among minor charges of the above nature which were made against Lord Raglan, was one of grave nature indeed, which, according to Mr. Kinglake, was founded by "the great journal." It was that "in the midst of the winter sufferings, Lord Raglan was neglecting his Army." Such was the charge. "And he who amongst all living men was unsurpassed in his sense of duty, unsurpassed in his thoughtfulness for others, he who made every day of his life a day of well-applied toil, he who was giving his all of strength and working power to the Queen and the country he served, was destined to sink under his burden, scarce finding, scarce seeking, an interval between public care and death,—he, he and no other, was the chief held up to indignation as one who continued to while away his time in ease and tranquillity among the relics of his Army." The relations which existed between the Duke of Newcastle and Lord Raglan from February, 1854, down to nearly the close of the year, present a subject of remarkable interest. The Secretary of State for War and the General commanding the British Forces had been on very friendly terms, based upon mutual confidence. Although the natural gifts possessed by the former could scarcely stand comparison with those of the latter, one strong point of resemblance existed, inasmuch as both were indefatigable men, each of them devoting his whole care and energy to the work in hand. After April 10, when Lord Raglan left England, communications in writing constantly passed between them. Each possessed a distinctive "style," but both wrote with ease, precision, and in words transparently clear. Simple grace of diction belonged to Lord Raglan, while the smooth, unobstructive flow of the Duke's sentences was, perhaps, equally admirable. These happy relations remained unimpaired down to almost the very close of the year, in fact, to December 15, on which eventful day "the Minister sought advice from the General upon a matter so secret, so delicate, so momentous, as to make it apparently certain that the Duke of Newcastle must have been reposing in Lord Raglan the most absolute confidence that one man could well place in another." He was, in fact, asking Lord Raglan to advise him upon the choice of a General who, to meet the event of his being killed or disabled, should be secretly named his successor. "Of course," observes Mr. Kinglake, "to advise usefully on such a subject, a judgment as perfect as mortal judgment could be was beyond measure needed, and (because of the susceptibility of Generals who might feel humiliated by the terms of the meditated dormant commission) the subject was so delicate, and required such absolute secrecy, that to treat it was like handling dynamite." "And yet on this same 15th of December we are within three days of a time when the spirit of our War Minister will be seen undergoing a change, and within one week of the day when, although not recalling Lord Raglan, he will, in that hour of adversity, withdraw from him all his old confidence." Some of the most interesting passages in Mr. Kinglake's volume have reference to the marked change of feeling towards Lord Raglan which was gradually manifested by the Duke of Newcastle, and by the members of the Queen's Government. The reasons why the Ministers—and the more so in this adverse time—should not be deserting their General were abundantly apparent, and are marshalled by Mr. Kinglake with remarkable perspicuity. The members of the Government had adjured him, whether approving or not, to invade a province of Russia; and although, perhaps, doubting their prudence, he had answered them with the Alma campaign. Step by step they had followed, and step by step had approved the joint strategy of the Alliance, greeting even what was termed "the flank march" with vehement, unmeasured praise. They now saw their General hampered and gravely imperilled, yet still under the ægis of victory, for "Inkerman" had not been reversed by any later engagement. If before, in imagination and with the glow of just pride they had followed the chief into action, they now saw his spirit sustain itself under a heavier kind of trial, and radiate into the hearts of his soldiery with a power which guarded his camp against the approach of despair. It is true there was need that the General, whilst able to lead, should be one who could also administer; but no Member of the Government could help knowing that if Lord Raglan were the Lord Fitzroy Somerset of the Wellington campaigns, he was also the Lord Fitzroy Somerset of later days, pre-eminent in our State departments for his mastery of official work. The Cabinet knew that Lord Raglan had a closer, a more accurate acquaintance with the labyrinth of our Army administration than any other man living, and that in the transaction of military business under normal conditions he was unsurpassed; but, moreover, they had now also learnt that when normal conditions failed, and a sudden emergency arose, he could meet it at the instant with admirable vigour, breaking through all the trammels of custom, and converting himself for the moment into a second War Minister, so that not one day should be lost in providing for the wants of his men. The Cabinet, moreover, believed with unvarying confidence that for the performance of one truly momentous duty —namely, that of upholding the Anglo-French Alliance by the maintenance of good relations with General Canrobert—the chief at the head of our Army was peculiarly, matchlessly qualified. Here, then, continues Mr. Kinglake, there seemed to be found in one richly gifted commander an almost ideal assemblage of those many and various conditions which a Ministry, watching over their General in a time of trouble and peril, must have yearned to see him fulfil. What honour, but also what policy and common-sense dictated, was plainly that to such a commander, whilst engaged in mutual strife with the enemy on a distant shore, the Queen's Government should give an unstinted and thoroughly loyal support, taking care not to harbour a thought of assenting to any outcry against him, without first hearing his answer to what the accusers might say. In this case, the Queen's Government quailed under selfish apprehensions, and failed to do so.

AFGHANISTAN AND EGYPT.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—In your issue of Nov. 11, "Veritas" solicits your advocacy on behalf of those who were duly recommended for good service in Afghanistan, but who have not yet received any mark of their Sovereign's favour. To take a case in point:—Might I ask, is it or is it not true that a brigade of 3,000 men of all arms marched through about 300 miles of a perfectly wild and hitherto quite unknown country, at the conclusion of the Afghan Campaign last year? Did or did not the Viceroy bring this feat especially to the notice of the Secretary of State for India, in March last? Up to the present moment, not the slightest notice has been taken by the home authorities of the services of the soldiers, European and native, who underwent, we may safely say, considerably more fatigue, deprivation, and danger in their hazardous march, than is generally imagined. The official detail of the march appeared in the *Gazette of India* published in March last, wherein the Viceroy styles it, "an honourable evidence of the hardships which British and Native soldiers can endure, and of what the skill and intelligence of British officers can accomplish." These are brave words, but the good deed was done in a remote province of her Majesty's dominions, and, apparently, its lustre has been lost in the glare of the Egyptian Campaign, with its high personages and brigades of Guards. I feel sure that no one more than our beloved Queen Empress would be surprised to hear that not one little word of thanks has yet been accorded to the Sepoys and soldiers who for two months toiled through unknown, rugged mountains, utterly cut off from all base of supply. Let us hope that the omission is merely an oversight, and that the "Bosdar Column" may at least be—thanked.—
I am, &c., X.

TARDY JUSTICE.

A late mail from India announces the fact of an act of tardy recognition of services rendered at Cabul in September, 1879, by a party of the Queen's Own Corps of Guides. We refer to the grant of 100 acres of land to the heir of the late Jemadar Jewund Sing. As those services have perhaps by this time escaped the recollection of our readers, it may not be out of place to bring to notice the conduct of the Corps of Guides. In no way can it be better done than by the publication of the report made at the time to Lieutenant-General Sir F. Roberts, his letter to his Excellency the Commander-in-Chief in India, and the reply from Government:—

"Cabul, November 20, 1879.

"SIR,—As President of the Commission of Inquiry, to which office Lieut.-Gen. Roberts did me the honour to appoint me, I hope I may be excused in bringing prominently to his notice the conduct of the escort of the Queen's Own Guides throughout the attack in the Residency on Sept. 3. The commission of which I was president have recorded the following remarks in their proceedings:—'The conduct of the escort of the Queen's Own Guides does not form part of the inquiry entrusted to the commission; but they have, in the course of their inquiries, had the extreme gallantry and the bearing of these men so forcibly brought to their notice, that they cannot refrain from placing on record their humble tribute of admiration. They do not give their opinion hastily, but they believe that the annals of no army and no regiment can show a brighter record of devoted bravery than has been achieved by this small band of Guides. By their deeds they have conferred undying honour not only on the regiment to which they belong, but on the whole British Army.' The report of the Inquiry has gone to the Foreign Office, but perhaps the Lieut.-Gen. may be pleased to take some steps with a view to some substantial notice being taken of the conduct of the escort.—I have, &c., "C. MACGREGOR, Col."

From Lieut.-Gen. Roberts to the Adjutant-General in India:—

"Cabul, November 20, 1879.

"SIR,—I have the honour to forward for the consideration of his Excellency the Commander-in-Chief a letter from Col. Macgregor, whom I appointed President of a Commission of Inquiry into the cause and circumstances of the late outbreak in Cabul. I am myself quite of the same opinion as that officer as to the extreme gallantry of the behaviour of the escort of the Queen's Own Guides, who, though only 75 in number, disputed their position with more than 100 times their number, for 12 long hours, and who, to the last man, died fighting to the end. I would respectfully submit that conduct such as this is deserving of some public and substantial acknowledgment, and would, therefore, suggest for his Excellency's consideration that all the men of the escort be gazetted to the Order of Merit, and the Queen's Own Guides be permitted to bear on their colours the words, 'Residency, Cabul,' in commemoration of the gallantry of their comrades on September 3, 1879.—I have, &c., "F. ROBERTS, Lieut.-Gen."

Telegram from Military Secretary, Punjab Government, to Col. Jenkins, C.B., commanding Corps of Guides:—

"The Lieutenant-Governor desires you will communicate to the Corps of Guides, his Excellency the Viceroy's sincere regret, as well as his own, at the loss which the regiment has recently sustained in the deaths of Lieut. Hamilton, Jemadars Jewund Sing and Mehtab Sing, and most of the men of Sir Louis Cavagnari's escort at Cabul, in bravely resisting the attack made upon the Embassy by overwhelming numbers. This small body of Guides have not only upheld the credit of their distinguished corps, but have, by their heroic conduct, earned the gratitude of Government.—Sept. 13, 1880."

The special correspondent of the *Daily News* (Mr. Archibald Forbes), in his letter to that paper dated Peshawur, Sunday, November 17, 1878, writes as follows:—

"The services of this Punjab Frontier Force, of which the Guides may be called the 'Corps d'Elite,' are scarcely known at all to the mass of stay-at-home Britons. I wonder no soldier of the force who could use a pen as well as a sword has ever undertaken the task of writing the chronicles of the Guides. The number of their hill campaigns has been legion, and no bloodless campaigns either. Deeds of valour have been done by them, officers and men, that, under circumstances of greater publicity, would have earned not a few Victoria Crosses. But wounds are more abundant trophies of hard fighting among the Guides than are decorations or brevets. A casual paragraph in the corner of one of our home papers is for us at home all the record of one of their little campaigns, wherein the meed of praise and reward is the inverse ratio to the hard fighting and arduous marching," &c.

It is a remarkable fact that though the Corps of Guides served through the second phase of the late Afghan Campaign (returning with General Sir Donald Stewart), not one officer received a brevet or C.B. for services during that portion of the campaign, though names were forwarded for recognition. One officer, however, well earned and received the Victoria Cross.

Gen. Todleben, now residing at Meran, is reported to be rapidly declining in health.

EPPS'S COCOA.—GRATEFUL AND COMFORTING.—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.*—Made simply with boiling water or milk. Sold only in packets, labelled—"JAMES EPPS and Co., Homœopathic Chemists, London."—Also makers of Epps's Chocolate Essence.

Reviews.

Egypt. By Baron de Malortie. (William Ridgway.)

"Maximi semper in rebus humanis momenti Ægyptus fuit," may well be considered applicable to the present position of affairs in that perplexed and ill-governed kingdom. "Egypt" has been the subject selected by many authors to write upon, and that such should be the case affords no reason for wonder. The author of the work now published is of the same opinion, regarding it as almost presumptuous to venture on an addition to the many volumes that treat so exhaustively every phase of the history of what Mariette Bey termed "the most privileged of all countries." Although forcibly impressed with this feeling, fortunately for all readers who love to dream over the ancient glories of the land of the Pharaohs, and speculate on its future, Baron de Malortie has not been deterred from offering some observations on the leading subject of the day—observations which are rendered exceptionally valuable, at a moment when the shifting of the Oriental question from Constantinople to Cairo intensifies the paramount interest attached to the future of Egypt. This single volume can scarcely claim to be regarded as more than "a few condensed chapters," but yet withal it throws a further light upon an intricate subject, and introduces its readers to the inner life of a few of the most prominent of Egyptian rulers,—Mehemet Ali, Ismael, and Mehmet Tewfik. In the preface to Baron de Malortie's work, he rapidly glances at the several minor questions which lead up to the important one—the future of Egypt, and the nature of the rôle that England will be called upon to play. In the author's opinion, the question is a simple one. "England has been left alone, to fight the battle of civilisation. They must now leave her the settlement. And, after all, who is to blame? To whom is due the crippling of Egypt, the undermining of the Khedivial authority? Who has fanned the dissensions of which the present crisis is the consequence and the climax?" Still further, he upholds that whatever may have been the shortcomings of the native rulers, they are trifling compared with the blunders of their patrons, and have almost invariably been the result of foreign meddling and advice. To substantiate this sweeping assertion, by referring to and examining the particulars of the reigns of Mehemet Ali and his successors, presents the main object of Baron de Malortie's work. Mehemet Ali has been already pronounced the most remarkable man of his age, excepting Napoleon; whilst his creative genius is considered the greater of the two. The filial veneration entertained for his memory resembles that of the Russians for Peter the Great, or of the Prussians for the Great Frederick; and still he has been accused by more than one commentator of having had no objects but a selfish craving for power and riches, of having decimated the population, and of having ruined his country, increased the misery of the Fellaheen, and of having been a vulgar adventurer and a bloodthirsty tyrant. These are severe comments on this exceptionally great man. In the opinion of the author of this work, his genius may have been exaggerated, his aims less lofty than is generally supposed; but the only just conclusion which can be arrived at, after a careful consideration of his wonderful career, is that his primary aim was not selfish ambition, but the good of his country, whatever may have been the means he adopted to accomplish it. The year 1769 is the date of the birth of the great Mussulman reformer. By a mere accident, he obtained, when very young, an opportunity of distinguishing himself, availed himself of it, and soon became the chief of the Mamelukes and master of Egypt. A considerable difference of opinion exists as to whether Mehemet Ali was a true and loyal subject of the Sultan,—that he was so at one period is admitted, that he did not continue to be so, is pointed out as the result of a treacherous act performed towards him, which caused him to waver in his loyalty, and to determine to secure at once the independence of Egypt, which, according to Prince Puckler-Muskau, "he required for the immutable preservation of himself, his family, and the great work of his whole life;" and surely, the author submits, having acquired it *de facto*, he might justly have indulged in the hope of seeing it recognised *de jure* by the Powers, who elsewhere had constantly acted in this spirit." Before lending attention to the question of independence and of the settlement of the succession, Baron de Malortie gives further consideration to the first struggles of Mehemet Ali for the establishment of power, to the reforms which he introduced, and generally to the work of regeneration undertaken by him in every direction, and thus concludes the portion of his work which treats of Mehemet Ali:—"One of the greatest figures in history, there is none more apt to inspire the historian; and with all his faults and semi-barbarian ways, his genius overshadows the hosts of Continental pigmies by right divine, of whom so many manage to wreck their civilised inheritance, whilst he, the parvenu amongst crowned heads, was even expected to create a nation. Let those who have better deserved of their country first cast the stone. Posterity will sit in judgment, and Mehemet Ali's work will plead his cause." *(To be continued.)*

Street's Indian and Colonial Mercantile Directory.—A new edition of this highly useful work has been just published by the compilers. We have already had an opportunity of stating our opinions as to features in Messrs. Street's publication, which must recommend it without question, and not only to mercantile men, but equally so to the members of all the professions, and to the public generally. We observe some recent information in the new edition which is not included in those already published. These lend an additional value to the work, which is altogether one deserving of marked approbation.

The Afghan Campaign of 1878-80. By Sydney Shadbolt. (Sampson Low, Marston, and Co.)—Messrs. Sampson Low and Co. have now published the second volume of this important military work. Its contents form a portion of the historical division, its most attractive feature being a rapid but highly interesting sketch of one of the most eventful wars of the period. The author deals with this portion of the work with remarkable skill and perspicuity, starting from the closing months of 1875, and leading his readers with him through all the details and vicissitudes of the war, until the moment when the arrival of Sir F. Roberts's despatches were received announcing the crushing defeat of the forces of Ayoub Khan, an event which brought to a close the second Afghan War. In addition to "the sketch of the war," this volume contains a great deal of military information, which will be properly appreciated. Records of service tend as much, perhaps, as anything to keep up the prestige of the Army, and are always welcome. Mr. Shadbolt deals with this portion of his work in a manner which shows the great amount of care and time which he must have devoted to its completion. He has also found room to notice "The Staff," "British Regiments," the Army Medical Department, the Indian Native Regiments, and the Indian Medical Department. We do not intend to allow this striking and ably written work to pass with a cursory notice such as this, but hope to return to it shortly with the intention of learning still further particulars of the events which marked the progress of the Afghan War.

The sketches and drawings painted by Mr. Sutton Palmer during the last season, and illustrating some of the beauties of Surrey scenery, have attracted considerable attention to Messrs. Dowdeswell's Gallery in New Bond Street. The best evidence that can be given of opinion as to their merit as works of art is afforded by the fact that by far the greater portion of the sketches at once commanded ready purchasers, and have been disposed of. The collection is a very charming one in itself. It becomes additionally so, inasmuch as each drawing represents scenery more or less familiar to most persons. There is no occasion to particularise any single sketch which may best observe attention. The sixty-two specimens classed together form a unique little gallery of Surrey scenery which will remain open till the close of the season.

MILITIA TRAININGS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—I have often wondered whether the authorities really are aware of what goes on at a Militia training, for surely, if they are, they deserve the severest censure. One hears a Militia training called "playing at soldiers," but playing the fool would often be nearer the mark. Now, of what does a Militia training consist? Marching past in open and quarter column, and at the double; advancing in review order; having a sham fight, to fire away so many rounds of blank ammunition; marching through the town to show themselves off, in short, anything that has any swagger about it, whilst the practical part of the work is almost laid aside. In Artillery Militia, it is even worse; for not only do they engage in all the foregoing pursuits, but as far as Artillery work goes, they hardly get the chance of learning any. To call them Royal Artillery is positively an insult to that corps. A friend of mine, who is an old soldier, told me that it would be very amusing, if it were not humiliating, to watch the performances of a certain instructor of Artillery in a Militia regiment during the training, his chief occupation being that of putting on and pulling off spurs, and strapping and unstrapping a sabretache to his sword-belt. This official really wanted instruction himself, for he was quite unable to instruct others. Why should this be so? Why do not the authorities put a stop to all this foolery? For surely they must know that it goes on. The sooner the Militia force is thoroughly reorganised or disbanded for ever, the better. Keeping it up as it now is, is a mere waste of public money. I would suggest that, in Artillery Militia regiments, the Artillery instructor should be appointed from the Royal Artillery, if even only for the training. Gold lace and fine names will not make efficiency, and the sooner the authorities recognise this, the better.—I am, &c., DEF.

Field-Marshal Lord Napier of Magdala has arrived at Malta from Algiers.

The Queen decorated the following non-commissioned officers and men with the medal for distinguished service in the field, at Osborne, on Wednesday:—Pioneer Thomas Winnett, Grenadier Guards—Twice wounded at Tel-el-Kebir, but remained with his company in the front line till ordered to fall out. Colour-Serjt. C. Walkeley, York and Lancaster Regt.—Saved Serjt. Smith, at Tel-el-Kebir, from being bayoneted by a wounded Arab. Serjt. Donald Gunn, Queen's Own Cameron Highlanders—Continued fighting at Tel-el-Kebir after having been severely wounded. Pte. John Wilton, Derbyshire Regt.—Assisted, with another soldier, Lieut. Hancock in dislodging four or five of the enemy from a house near Meks. He forced his head and shoulders through the ceiling and exchanged shots with the enemy; but was shot by an Arab in the arm, since amputated. Qrmr.-Serjt. Michael Sadler, Queen's Own Royal West Kent Regt.—Served in Mounted Infantry; specially recommended. Pte. John Harris, Duke of Cornwall's Light Infantry—Served in the Mounted Infantry; wounded at Kassassin on Aug. 28 in carrying Lieut. Edwards, of the Royal Welsh Fusiliers, to the rear.

Tuesday's Gazette.

◆

ARMY.

WAR OFFICE, PALL MALL, January 23, 1883.

6th Dragoon Guards—Lieut. W. G. H. Stirling, from the 5th Dragoon Guards, to be Lieut., vice R. P. Sandeman, promoted.

5th Lancers—Serjt. Henry Costello, from the 14th Hussars, to be Lieut., vice E. C. W. Gilborne, promoted.

6th Dragoons—Lieut. C. Sandes, from the 10th Hussars, to be Capt., vice H. L. Ellis, seconded.

8th Hussars—Lieut. C. Jackson has been appointed a probationer for the S.C. (Aug. 31, 1882).

ROYAL ARTILLERY.

Lieut.-Col. and Col. J. Hanwell has retired upon retired pay with the hon. rank of Major-Gen. (dated Dec. 15, 1882); Lieut.-Col. and Col. C. V. Arbuckle (late Bengal) has retired upon a pension, with the hon. rank of Major-Gen. (dated Dec. 17, 1882); Majors F. Lodge (late Bombay) on the Seconded List, has retired upon a pension, with the hon. rank of Lieut.-Col. (Nov. 24, 1882); W. P. Platt retires upon retired pay; Capt. W. Martin retires from the service, receiving a gratuity.

Lieut.-Col. and Col. E. Keate to be Col., vice H. A. Smyth, promoted; Majors and Brevet Lieut.-Cols. W. H. Noble, on the Seconded List, to be Lieut.-Col.; W. Kemmis, on the Seconded List, to be Lieut.-Col.; H. Bond to be Lieut.-Col., vice E. Keate, promoted (all four dated Nov. 1, 1882); Major and Brevet Lieut.-Col. W. M. B. Walton, C.B., to be Lieut.-Col., vice T. L. Still, retired; Capt. C. F. B. Grey to be Major, vice Brevet Lieut.-Col. H. Bond, promoted (both dated Nov. 24, 1882); W. E. Sharp to be Major, vice Brevet Lieut.-Col. A. D. Davidson (late Madras), retired (Nov. 25, 1882); S. C. Halliday, from the Seconded List, to be Major, vice Brevet Lieut.-Col. W. M. B. Walton, C.B., promoted (Nov. 30, 1882); Capt. and Adjt. W. Whateley to be Major, vice F. P. W. Freeman (late Bengal), retired (Dec. 9, 1882); Capt. H. H. Pengree, from the Seconded List, to be Capt., vice C. F. B. Grey, promoted (Nov. 24, 1882); Lieuts. C. H. Rickards to be Capt., vice W. E. Sharp, promoted (Dec. 9, 1882); L. A. McClintock to be Capt., vice W. Whateley, promoted (Dec. 13, 1882); W. Tylden to be Capt., vice P. F. P. Hamilton, seconded for service as an Instructor at the School of Gunnery (Dec. 27, 1882); Capt. and Brevet Major F. N. Innes, from the Seconded List, to be Capt., vice W. J. Clarke, seconded for service as an Instructor in the Royal Carriage Department; Capt. J. C. Dalton, from the Seconded List, to be Capt., vice F. Beaufort, placed upon the Seconded List; Lieut. E. A. Burrows, from the Seconded List, to be Lieut., vice J. Adye, seconded for service on the Staff (all three dated Jan. 1); C. H. L. F. Wilson to be Lieut. upon the Seconded List, for service in the Bombay Ordnance Department.

The dates of promotion of the under-mentioned officers are altered as stated against their names:—Majors F. Roberts, H. M. J. Feilden, J. H. G. Browne, M. J. Clarke, C.M.G., E. F. Cambier, W. R. Rudge, W. S. Langley, and H. Roberts (all eight dated Nov. 1, 1882); Capts. T. T. Vaughan and M. O. Hopkins (both dated Nov. 25, 1882).

Coast Brigade—The name of the Capt. promoted in the *Gazette* of Dec. 19, 1882, is "Duvall," and not as therein stated.

Royal Engineers—Col. C. P. Carey has been placed upon retired pay, with an annuity and the hon. rank of Major-Gen., dated Dec. 5, 1882, and not upon half-pay as stated in the *Gazette* of Dec. 5, 1882; Major and Brevet Lieut.-Col. H. R. Mead (late Madras) to be Lieut.-Col., vice Col. W. Chrystie, retired (Jan. 8).

Grenadier Guards—Lieut. J. F. Bagot has been seconded for service on the Staff (Nov. 1, 1882); Lieut. E. C. Ellice resigns the appointment of Instructor of Musketry.

REGIMENTAL DISTRICT.

Lieut.-Col. and Col. J. T. Dalyell having completed five years' service in command of the 1st Regimental District (the Royal Scots, Lothian Regt.), is placed on half-pay (Jan. 23).

LINE BATTALIONS.

The Royal Scots (Lothian Regiment)—Capt. A. W. Sheringham to be Major, vice W. B. Macdonald, whose promotion has been cancelled (Dec. 20, 1882); Lieuts. G. F. C. Trench has been appointed a probationer for the S.C. (Dec. 8, 1882); F. C. Logan-Home has been appointed a probationer for the S.C. (Dec. 21, 1882).

The Queen's (Royal West Surrey Regiment)—Lieut. J. W. G. Tulloch has been appointed a probationer for the S.C. (Oct. 11, 1882).

The Northumberland Fusiliers—Lieut. J. W. Malet to be Capt., vice J. S. Cramsie, retired (Oct. 11, 1882).

The Norfolk Regiment—Capts. F. W. James to be Major, vice T. Farley, retired (Jan. 10); J. W. M. Cotton has been placed on retired pay, with the hon. rank of Major (Dec. 30, 1882).

The Suffolk Regiment—Lieut. A. J. Watson resigns the appointment of Instructor of Musketry.

The Prince Albert's (Somersetshire Light Infantry)—Lieut. G. G. W. Hayward resigns his commission.

The Prince of Wales's Own (West Yorkshire Regiment)—Lieut. C. H. Law, from the Dorsetshire Regt., to be Capt., vice P. Crosbie, retired.

The East Yorkshire Regiment—Lieuts. H. St. L. Wood is seconded for service on the Staff; C. A. Kemball has been appointed a probationer for the S.C. (Oct. 26, 1882).

The Leicestershire Regiment—Capt. F. W. Reader has been seconded for service as an Adjt. of Auxiliary Forces (Jan. 15).

The Princess of Wales's Own (Yorkshire Regiment)—Lieut. C. J. Spottiswoode to be Capt., vice E. A. Bruce, promoted (Sept. 29, 1882).

The Royal Welsh Fusiliers—Lieuts. C. C. H. Thorold, Adjt., to be Capt., to complete establishment (Oct. 25, 1882); H. E. Baker to be Capt., vice C. J. Gilbert, retired (Dec. 4, 1882).

The South Wales Borderers—Lieut. A. T. D. Neave to be Adjt., vice Lieut. G. K. Moore, who has resigned the appointment (Aug. 17, 1882).

The Cameronians (Scottish Rifles)—Supernumerary Major H. M. E. Brunker to be Major, vice R. I. Ward, promoted; Major G. H. Wilson retires on retired pay, with the hon. rank of Lieut.-Col.

The East Lancashire Regiment—Capt. C. R. Hornby has been placed on retired pay, with the hon. rank of Major (Dec. 29, 1882).

The Duke of Wellington's (West Riding Regiment)—For, "Capt. H. Burton has been placed on retired pay, with the hon. rank of Major, dated Jan. 1, 1883," as notified in the *Gazette* of Jan. 9, read, Capt. and Brevet Major H. Burton has been placed on retired pay, with the hon. rank of Lieut.-Col. (Jan. 1).

The Royal Sussex Regiment—Supernumerary Lieut. G. Duberly, who has ceased to be a probationer for the S.C., to be Lieut., vice C. M. Crawford, transferred to the East Yorkshire Regt.

The Hampshire Regiment—Lieut. M. E. O'Donoghue has been appointed a probationer for the S.C. (Oct. 28, 1882).

The South Staffordshire Regiment—Lieut. G. W. Moloney resigns his commission.

The Prince of Wales's Volunteers (South Lancashire Regiment)—Lieut.-Col. and Col. W. D. Shipley has been placed on retired pay, with the hon. rank of Major-Gen. (Jan. 17); Lieut. J. E. F. Jacob to be Adjt., vice Capt. H. K. Cavaye, who has vacated the appointment (Aug. 9, 1882).

The Welsh Regiment—Capt. E. R. B. Ingram has been seconded for service as an Adjt. of Auxiliary Forces (Jan. 1).

The Black Watch (Royal Highlanders)—Serjt. Thomas Souter, from the Queen's Own Cameron Highlanders, to be Lieut., vice A. M. Carthew-Yorstoun, promoted.

The Essex Regiment—Supernumerary Major A. G. Spencer to be Major, vice Brevet Lieut.-Col. W. R. White, promoted (Sept. 6, 1882).

The Queen's Own (Royal West Kent Regiment)—Capt. E. P. Elmhirst retires from the service, receiving a gratuity, with permission to retain his rank, and wear the prescribed uniform; Lieut. J. S. Stewart, from half-pay, to be Lieut., vice H. W. Ozanne, promoted.

The King's Own Light Infantry (South Yorkshire Regiment)—The seconding for service on the Staff of Lieut. H. Earle, dated Oct. 21, 1882, is cancelled.

The King's (Shropshire Light Infantry)—The promotion to the rank of Capt of Lieut. I. W. T. S. Smythe is antedated to Sept. 5, 1882, in succession to Capt. F. Langford, retired; Lieut. C. H. Collette to be Capt., vice E. H. G. Ravenhill, promoted (Sept. 30, 1882).

The King's Royal Rifle Corps—Major N. W. Wallace retires on half-pay.

The Prince of Wales's (North Staffordshire Regiment)—Supernumerary Capt. J. P. Miller to be Capt., vice T. Currie, appointed Adjt., 4th Batn. (Dec. 14, 1882).

The York and Lancaster Regiment—Major W. F. Thacker retires on retired pay, with the hon. rank of Lieut.-Col.

The Royal Irish Rifles—Capt. C. Haggard has been seconded for service as an Adjt. of Auxiliary Forces (Jan. 1); Lieut. R. F. R. Formby has been appointed a probationer for the S.C. (Dec. 11, 1882).

The Prince of Wales's Leinster Regiment (Royal Canadians)—Major J. B. Kersteman retires on retired pay, with the hon. rank of Lieut.-Col.; Capt. J. L. J. Gordon has been seconded for service as a probationer for the Army Pay Department (Jan. 14).

The Royal Dublin Fusiliers—Lieut. C. C. Oates to be Capt., vice W. G. Matthews, retired (Jan. 10).

2nd West India Regiment—Lieut. C. L. Dale to be Capt., vice W. S. G. Trist, deceased (Oct. 12, 1882).

Staff—Capt. J. C. M. Pigott, Princess Charlotte of Wales's (Berkshire Regiment), to be a Deputy-Assist.-Adjt. and Qrmr.-Gen., vice Major H. M. E. Brunker, the Cameronians (Scottish Rifles), who resigns that appointment (Jan. 27).

Royal Military College—Lieut.-Col. E. A. Anderson, half-pay, to be a Professor, vice Col. W. Paterson, half-pay, whose period of service in that appointment has expired (Jan. 1).

Chaplains' Department—The Rev. C. A. A. Craven, M.A., Chaplain to the Forces of the First Class, has been placed on temporary half-pay on account of ill-health (Dec. 20, 1882).

Medical Department—Brig.-Surgs. H. R. L. Veale, M.D., has been granted retired pay, with the hon. rank of Deputy-Surg.-Gen. (Jan. 2); J. S. Comyn, M.B., has been granted retired pay, with the hon. rank of Deputy-Surg.-Gen. (Jan. 15); Surgs.-Major H. C. Herbert, M.D., to be Brig.-Surg., vice J. H. Beath, M.D., C.B., granted retired pay (Dec. 9, 1882); R. O. Hayden to be Brig.-Surg., vice F. M. Skues, granted retired pay (Dec. 16, 1882); D. A. S. Thorburn, M.D., retires from the service receiving a gratuity.

ORDNANCE STORE DEPARTMENT.

Deputy-Comy.-Gen. of Ordnance C. M. Molony to be Comy.-Gen. of Ordnance, vice W. M. King, retired; Assist.-Comy.-Gen. of Ordnance M. I. T. Ingram to be Deputy-Comy.-Gen. of Ordnance, vice C. M. Molony (both dated Dec. 23, 1882); Conductor of Stores W. H. Ward to be Qrmr., vice J. Ashworth, deceased (Dec. 17, 1882).

The Queen has been graciously pleased to approve of Qrmr., with the relative rank of Lieut., G. Harris being granted the hon. and relative rank of Capt., and of Conductor of Stores R. Weir being promoted to the rank of Qrmr., in recognition of their services during the recent operations in Egypt (Jan. 10).

BREVET.

Capt. H. Burton, the Duke of Wellington's (West Riding Regt.), to be Major (Jan. 1).

MEMORANDA.

Major-Gen. R. J. Feilden, C.M.G., has been placed on retired pay, with the hon. rank of Lieut.-Gen. (Jan. 5).

The promotion to the rank of Major-Gen. of Col. F. W. Hastings, R.A., dated Oct. 1, 1882, which was notified in the *Gazette* of Oct. 3, 1882, is in succession to Lieut.-Gen. H. L. Gardiner, R.A., placed upon the Retired List, and not as therein stated.

Col. H. A. Smyth, R.A., to be Major-Gen., in succession to Lieut.-Gen. S. E. Gordon, C.B., placed upon the Retired List (Nov. 1, 1882).

Major and Brevet Lieut.-Col. G. F. Beville, Bombay S.C., to be Col. (Sept. 7, 1882).

Major and Brevet Lieut.-Col. F. L. H. Lyon, retired, R.A., has been permitted to commute his retired pay (Jan. 1).

Major and Hon. Lieut.-Col. W. St. G. Burke, late R.E., has been permitted to commute his retired pay (Jan. 3).

Major T. P. Norton, retired, R.M.L.I., to have the hon. rank of Lieut.-Col. (Dec. 31, 1882).

Capt. and Hon. Lieut.-Col. H. Vaughan, retired, R.A., has been permitted to commute his retired pay (Nov. 29, 1882).

The under-mentioned Lieut.-Cols., Royal Artillery, to be Cols.:—D. J. Welsh, J. Stewart, E. L. Hawkins, W. B. Cumberland (all four late Bengal), J. Ritchie (late Bombay), C. Hunter, G. B. Traill, half-pay, C. H. Barnes (all three late Bengal), T. B. Berthon, P. H. Harcourt (both late Bombay), M. Elliot (late Bengal), C. E. Newport (late Bombay), R. R. Franks, R. Aislabie, C. G. Robinson (all three late Bengal), (all dated Dec. 31, 1882); H. Percival, R.A., to be Col. (Jan. 1).

The under-mentioned Deputy-Commissaries and Hon. Capts. of the Bombay Establishment to have the hon. rank of Major on retirement (Sept. 16, 1882):—J. Clabby, C. Pain, C. McMillan, J. Henderson, and G. Hall.

The under-mentioned Assist.-Commissaries and Hon. Lieuts. of the Bombay Establishment to have the hon, rank of Capt. on retirement:—P. Mulkere (Oct. 11, 1882) and E. McKenzie (Sept. 16, 1882).

The under-mentioned Deputy-Commissaries and Hon. Lieuts. to have the hon. rank of Capt. (Sept. 16, 1882):—J. Keane and G. McArthur, Bengal Establishment, and J. Bingham, Bombay Establishment.

To have the hon. rank of Lieut. (Sept. 16, 1882):—Assist.-Commissary A. Forsyth; Deputy-Assist.-Commissaries W. Cummings, G. Mortimer, W. James, and Fitz-Gibbon, all of the Bengal Establishment; Assist.-Commissary M. Hanley, and Deputy-Assist.-Commissary J. Hamilton, both of the Bombay Establishment.

INDIAN LOCAL FORCES.

Col. W. M. Cafe, V.C., Bengal Infantry, to be Major-Gen. (Nov. 28, 1882).

RESERVE OF OFFICERS.

Capt. R. Johnston, 9th Batn. the King's Royal Rifle Corps, to be Lieut.

(Where not otherwise stated, the foregoing commissions and announcements bear date January 24, and the current year must be understood.)

THE SERVICES AND EDUCATION.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—It is reported that the Admiralty have decided "to reserve to themselves the right of nominating one-fifth of their Engineer students for entry, who will be appointed to the Marlborough or to the College at Devonport, on passing a test examination; that the candidates so nominated will be selected by the Board from the sons of officers of the Navy, Army, or Royal Marines who have been killed in action, or have been lost at sea on active service, or killed on duty, or who have died of wounds received in action, or injuries received on duty, within six months from the date of such action or injury, or from the sons of officers who have performed long and meritorious services; and that, except as regards competitive examination, these candidates will be subject in all respects to the ordinary regulations." This is unquestionably a step in the right direction, and the services are deeply indebted to the Naval authorities for so valuable a concession. Having had considerable experience of the working of the United Services College at Westward Ho, I may venture to offer a few remarks on the importance of this question to both services, and to suggest that a similar concession might be equitably granted by the War Office to candidates for commissions in the Army and its various Departments. I have no hesitation in asserting that the present system of unlimited competition bears harder upon the officers of the Army than on any other branch of the community, to such an extent, indeed, as to amount to positive injustice, which I feel confident the public would gladly see removed, when the nature of it is explained, and clearly understood by them. The officers of the Army are compelled, by the exigencies of the service, to be abroad during many and, in most cases, the best years of their lives. Many of them have families to bring up, educate, and send into the world, and yet there is not, to my knowledge (at all events, there was not in my time), at any foreign station garrisoned by our troops a school of any kind on which an officer can rely for imparting to his sons the preliminary training and education necessary in the present day to qualify them to enter a public school, with a fair chance of competing successfully with those boys who have had the advantage of receiving their juvenile tuition in a competent preparatory institution at home. We have found at Westward Ho that the great majority of the sons of officers whose parents have been kept so long abroad as to deprive them of all proper opportunity of giving their children the indispensable preliminary training referred to are very backward, and much behind their more fortunate competitors who have had such superior advantages, so much so, that I may certainly class the former as being from one to one and a half, and even in some cases two years, educationally below the others, thus causing them to start at the most critical period of their scholastic career very unfairly weighted in the race; and too many of them unable to make up for this disadvantage in time to enable them to meet the competitive examinations with any chance of success, before they become disqualified by the regulations regarding age. The parents of these boys are employed on the public service, and in the discharge of professional duties which deprive them of advantages available for others who are not so hampered; their emoluments are insufficient to enable them to send their sons home to a preparatory school, and as a consequence, they have often the mortification of seeing them eventually beaten in the struggle, and thus thrown out of all chance of entering a profession to which they themselves have so freely devoted the best energies of their lives, their health, and in many instances much of their private means also. Is this fair? is it not opposed to all ideas of justice that these officers should be punished for doing their duty? and is not this a case in which some relaxation of the present hard-and-fast line might be made? Let the test examination be as severe and as thorough as may be considered necessary to qualify for admission, but let it also be known what the subjects indispensable for qualification will be, what number of marks will qualify, and any other rules or regulations that must be complied with for qualification, so that parents may know what will be required, and, so far as they may be able to do so, give their sons such preparatory home teaching (in default of other means being available) as will materially, if not altogether, remove the disabilities under which they at present labour. If the Secretary of State for War should think fit to make a similar reservation as regards nominations to commissions, to be appropriated in a similar manner to those reserved by the Admiralty, he would confer an immense boon on the services, and I will venture to say that the Army will suffer no deterioration thereby.—I am, &c., H. C. B. DAUBENEY, General.

Amusements.

◆

The PROMENADE CONCERTS at Covent Garden terminated on Monday night, in order to allow certain structural alterations required by the Board of Works to be made in the theatre, prior to the commencement of the Royal Italian Opera season. Two entirely new staircases have to be built, and a 9-in. brick wall is to be erected, so that the proscenium may be protected from the foundation to the roof. With the Alcazar and Criterion closed for similar considerations of public safety, and the Alhambra not yet rebuilt, Drury Lane Theatre has been placed in a position of great advantage, and Mr. Augustus Harris has deemed himself justified in announcing morning and evening representations of "Sindbad" every week till further notice.

The revival of "Caste" at the HAYMARKET has been attended with much greater success than accompanied the production of any of the previous Robertsonian comedies. This is not only explained by the stronger interest of the plot, but by the general excellence of the interpretation as now given. In playing for the last time, as it is significantly announced, Polly Eccles and Captain Hawtree, Mrs. Bancroft and Mr. Bancroft have resumed with the utmost spirit and completeness their original impersonations. Mrs. Stirling has also added, by her singularly effective portraiture of the Marquise de St. Maur, another histrionic triumph to the very many associated with her name. Miss Gerard gracefully and pathetically illustrates the hopes and fears of Esther Eccles, Mr. Conway represents her faithful husband, George d'Alroy, Mr. Brookfield gives a new but agreeable version of the good-hearted, industrious gas-fitter, Sam Gerridge, and Mr. David James makes a really fine study of that bibulous pot-house orator, Old Eccles. Memories of a former cast will, of course, occasionally suggest themselves, but there can be no doubt about the general excellence of the present representation.

At the LYCEUM, the comedy of "Much Ado About Nothing" reached on Saturday night last its 100th consecutive performance, never till now recorded in theatrical history.

At the VAUDEVILLE, "The Rivals," with Mr. Thomas Thorne as Acres, was acted on Thursday evening for the 50th time under the present management.

The ADELPHI programme now commences with "Love and Money," the drama being followed by a revival of "Dora," originally produced here June 1, 1867. Mr. Charles Warner now plays Farmer Allan, and Miss Sophie Eyre the heroine.

"The Comedy of Errors," thrown into the form of three acts, and recommended by the exuberantly funny and admirably-finished acting of Mr. John S. Clarke, as Dromio of Syracuse, promises to become one of the most notable successes ever achieved at the STRAND THEATRE. With so much good acting, and the advantage of highly-picturesque accessories, this interesting revival takes a prominent place among the attractions of the present season. With "Toodles" as an after-piece, in which Mr. J. S. Clarke reigns supreme, the Strand audience may now enjoy the merriest of evenings.

ACTIVE SERVICE cannot wear out the teeth that are brushed night and morning with ROWLAND'S ODONTO, the purest and most fragrant dentifrice ever made. All dentists allow that neither washes nor pastes are as efficacious for polishing the teeth and keeping them sound and white as a pure and non-gritty tooth-powder; such ROWLAND'S ODONTO has aways proved itself. Ask any dealer in perfumery for ROWLAND'S ODONTO, and avoid spurious imitations, theirs being the only original and genuine Odonto.

Printed and Published for the Proprietors, at the Office, No. 16 Wellington Street, Strand, London.—SATURDAY, January 27, 1883. Letters on business and Remittances should be made to Mr. RICHARD JAMES WOOD.

ONE of the most interesting of the many Blue-books which emanate from time to time from the War Office, is the General Annual Return of the Army. The volume consists of one hundred pages of closely printed matter, all of which is valuable as showing what has been done in the period which the Returns cover. The Return for the year 1881 has just appeared, and we propose to give from it such details as we consider will be useful. Figures, as a rule, are misleading, but the figures furnished in this case are so exhaustive, that they can scarcely be said to come within the general category. Table 1 gives particulars of the effective strength of the Army, by arms, on each day of the month during the year 1881, and the average strength during the year. From this we find that the average strength of the Cavalry of all ranks was 17,099,—Household Cavalry, 1,282 ; Cavalry of the Line, 15,817. Artillery, 33,397,—Royal Horse Artillery, 5,405; Field and Garrison Artillery, 27,992. Royal Engineers, 5,510. Infantry, including Departmental Corps, 132,792, divided as follows:—Foot Guards, 5,869 ; Infantry of the Line, 119,605 ; Colonial Corps, 2,340; Commissariat and Transport, 2,420 ; Ordnance Store Department, 591; Army Hospital Corps, 591,—or a total of all arms of 188,798. Table 2 shows the effective strength of the Regular Army by ranks, and the average strength during the year. The figures are:—Officers, 7,612; serjeants and farriers, 12,629; trumpeters, buglers, and drummers, 3,393; rank and file, 165,164. Table 3 gives particulars of the distribution of the Army in England, Scotland, Ireland, and abroad. From this we find that in England and Wales, the number of all ranks was 61,631; in Scotland, 3,790; and in Ireland, 26,325. Total on home service, 91,926; whilst the number employed on foreign service was 96,852. Table 8 gives details of the effective strength, according to returns received on January 1 in each year, from 1862 to 1882. This shows that the greatest number provided for in the period under review was in 1863, when the Army consisted of 222,781 of all ranks; the smallest in 1876, when the number fell as low as 183,432. On January 1, 1882, we had 189,133. It appears from Table 10, "effectives, establishments, number wanting to complete, and supernumerary, in rank and file on January 1 in each year from 1862 to 1882," that in 1862 we wanted to complete 4,303. The smallest number under this head was in 1868, when we required 619, the largest number wanted being in 1871, 9,280. On January 1, 1882, we had 2,254 supernumeraries. Table 11 is devoted to recruiting and casualties, and shows the "increase and decrease of non-commissioned officers and men of each arm of the service, reported during the year 1881." We ascertain from this that the number who joined the Army during the year was 26,258 men of all arms, of whom 1,695 were enlisted for long and 24,563 for short service. Of the long-service men, 615 were for the Infantry of the Line, 486 for the Artillery, 208 for West India and Colonial Corps, 145 for the Household Cavalry, 117 for the Cavalry of the Line, 55 for the Foot Guards, 34 for the Royal Engineers, 16 for the Ordnance Store Department, 15 for Commissariat and Transport Corps, and 4 for the Army Hospital Corps. The deaths are put down at 2,570, discharges at 14,209, desertions at 4,394, transfers to Army Reserve at 6,108, transfers to Auxiliary Forces at 253, given up as deserters 141, and "other causes," 717. Table 13 is an interesting one, furnishing, as it does, reliable data of the working of the Territorial System. It is drawn up with the view of showing the number of "recruits raised in Recruiting Districts and Regimental and Sub-Districts during the year." The largest number of men passed into the service was, it seems, obtained in London, which is put down as having produced 2,010 recruits, Dublin having given only 232. In the Regimental Districts, Warrington—depôts of 8th, 40th, and 82nd Regiments—heads the list with 1,485, only 64 of whom were for the regiments connected with the brigade. Of the remaining double brigades, the 51st and 65th, at Pontefract—depôts, 51st, 65th, 84th, and 105th Regiments—stands second with 565, only 121 of whom were for the brigade; Lichfield—depôts of 38th, 64th, 80th, and 98th Regiments—comes next with 495, only 158 for local brigades; then Hamilton—depôts of 26th, 71st, 74th, and 90th—with 306, only 53 for local brigades; Hounslow coming last with 272, 89 being for local brigade. Of the single brigades, Warwick (6th Regiment) stands first, with 881, 79 for the local brigade; Ashton-under-Lyne (63rd and 96th Regiments) coming next, with 867, 156 for local brigade; then Belfast (83rd and 86th Regiments), with 606, 220 for local brigade; Maidstone (50th and 97th Regiments), with 504, 182 for local brigade; York (14th Regiment), with 489, 63 for local brigade; Glencorse (1st Regiment), 476, 119 for local brigade; Winchester (37th and 67th Regiments), 470, 82 for local brigade; Naas (102nd and 103rd Regiments), 433, 252 for local brigade; Leicester (17th Regiment), 429, 163 for local brigade; Guildford (2nd Regiment), 426, 134 for local brigade; Tralee (101st and 104th Regiments), 422, 204 for local brigade; Bury (20th Regiment), 382, 151 for local brigade; Bristol (28th and 61st Regiments), 373, 190 for local brigade; Halifax (33rd and 76th Regiments), 345, 171 for local brigade; Bury St. Edmunds (12th Regiment), 339, 76 for local brigade; Yarmouth (9th Regiment), 315, 120 for local brigade; Taunton (13th Regiment), 310, 87 for local brigade. These are the only districts which have given more than 300 men. No less than six have produced less than 100. They are the Ayr (21st Regiment), 91, 32 for local brigade; Richmond, Yorkshire (19th Regiment), 87, 17 for local brigade; Stirling (91st and 93rd Regiments), 88, 39 for local brigade; Berwick-on-Tweed (25th Regiment), 65, 2 for local brigade; Bodmin (32nd and 46th Regiments), 40, 20 for local brigade, and Fort George (79th Regiment), 12, 11 for local brigade. We have given these figures at length, showing as they do how imaginary the benefits are of the Territorial System, of which we have heard so much. The returns published as to Artillery recruiting place York at the top of the list, with 177 men; Colchester comes next, with 130; Portsmouth following, with 64; Liverpool, with 61. The smallest numbers are Cork, with 20, and Dublin, with 11. The total number passed into the Artillery is put down at 643. The grand total passed into the Army is 75,499, made up as follows:—In Regimental Districts, 18,227; for Artillery, 643; at Recruiting Districts (London and Dublin), 2,242; at Regimental Head-quarters, 4,387. The most significant feature of the return is, that out of 18,277 men obtained through the Regimental Districts, only 5,506 were for the local brigades. In face of this fact, what, we ask, has become of our much vaunted Territorial System of recruiting? Table 14 gives particulars of the ages of the recruits who joined the Army during 1881. It shows that 933 men were under 17 years; 77 under 18 years; 3,901 under 19 years; 9,508 under 20 years; 3,713 under 21 years; 2,426 under 22 years; 1,650 under 23 years; 1,764 under 25 years; and 249, 25 years and upwards. Of the 25,863 men obtained during the year, 2,568 became non-effective within three months—viz., 16 from death; 996 from desertion; 1,049 from discharge (under section 78, Army Discipline and Regulation Act, 1879); 194 discharged for fraudulent enlistment, or for making false answers on attestation; 118 invalided or discharged as medically unfit, and 195 discharged for other causes. The number of men who re-engaged whilst serving was 1,752, in addition to which 479 men enlisted for short service were permitted to re-engage to complete 12 years' service, and 265 for periods of less than 12 years. The number of men discharged on permanent pensions was 4,320, those granted temporary pensions being 1,718. The net loss by desertion is stated to have been 2,578. The total transferred to the First Class Army Reserve was 6,073. The number of recruits who have joined the service since the date of the Army Enlistment Act of 1870 is as follows:—

		Long Service.	Short Service.
1870	24,594	22,192	2,402
1871	23,568	14,393	9,175
1872	17,791	7,530	10,261
1873	17,194	7,340	9,854
1874	20,640	7,784	12,856
1875	18,494	5,349	13,145
1876	29,370	5,501	23,869
1877	28,728	4,091	24,637
1878	28,325	2,573	25,752
1879	25,927	1,988	23,939
1880	25,622	1,880	23,742
1881	26,258	1,695	24,563

It is as well, perhaps, to point out with reference to the above figures that the Army Enlistment Act of 1870, under which recruiting for short service was first authorised, was promulgated to the Army by Army Circular, dated August 10, 1870. By General Order 39 of 1871, all recruits for the Foot Guards and Infantry, except boys and lads, were ordered to be enlisted for short service. General Order 34 of 1874 defined the proportion in which recruits for long and short service respectively were to be allowed to enlist for the several arms. Under General Orders 51 of 1874 and 53 of 1875, recruits for the Royal Artillery and Foot Guards were allowed to be enlisted for long and short service indiscriminately. Under Army Circular, 1874 (Clause 67), short service in the Cavalry, Artillery, and Engineers was set down at 8 in the ranks and 4 years in the Reserve, and in the Infantry and Army Service Corps, 6 years in the ranks and 6 years in the Reserve. Under General Order 18 of 1878, all enlistments for Infantry of the Line, except men specially enlisted and boys under 16, were to be for short service. Of the 25,499 recruits passed in the Army in 1881, 4,387 are classed as Head-quarter recruits, 6,653 as having been obtained through Brigade or Regimental Depôts, 7,569 by Staff of Auxiliary Forces, 4,160 through pensioners, 2,087 by Line recruiting parties, and 643 through Artillery Sub-Districts. There were altogether 1,752 re-engaged in 1881, viz., 3 after 8 years' service, 316 after 9 years' service; 513 after 10 years' service; and 920 after 11 years' service. The total number of discharges during the year was 14,320. The number of men passed into the Army between 1862 and 1881 inclusive, has been 401,632. As evidence of the extent to which desertion is carried on, it may be stated that the number of deserters has been 83,731 in the 20 years, the per-centage of deserters to recruits being 21; the net loss from desertion in the period, 51,681, and the per-centage of net loss to recruits, 13. The number of general district and regimental courts-martial at home and abroad in 1881 was as follows:—General, 179; district or garrison, 7,795; regimental or detachmental, 8,649; total, 16,623,—a proportion per 100 of 91. The number of minor punishments inflicted by order of commanding officers at home and abroad in 1881 was:—At home, 127,585; abroad, 97,096. Of the 181,742 men borne on the roll of the Army on January 1, 1882, the details of height are as follows:—Under 5 ft. 5 in., 10,797; under 5 ft. 6 in., 24,814; under 5 ft. 7 in., 37,500; under 5 ft. 8 in., 36,791; under 5 ft. 9 in., 28,782; under 5 ft. 10 in., 19,608; under 5 ft. 11 in., 11,263; under 6 ft., 5,799; 6 ft. and upwards, 3,492; not reported, 2,896. The chest measurements were as follows:—Under 33 in., 2,995; 33 to 34 in., 5,105; 34 to 35 in., 19,978; 35 to 36 in., 31,932; 36 to 37 in., 40,504; 37 to 38 in., 34,291; 38 to 39 in., 23,928; 39 to 40 in., 12,275; 40 in. and over, 7,704; not reported, 3,030. The nationalities of non-commissioned officers and men were as follows:—English, 124,457, a proportion of 701 per 1,000; Scotch, 13,729, a proportion of 78 per 1,000; Irish, 36,955, a proportion of 208 per 1,000; born in the Colonies, 4,312, a proportion of 12 per 1,000; foreigners, 1; and not reported, 2,049. Religious denominations are returned as follows:—Church of England, 116,595, a proportion of 649 per 1,000; Presbyterians, 13,480, a proportion of 76 per 1,000; Wesleyans, 6,470, a proportion of 36 per 1,000; other Protestants, 1,336, a proportion of 6 per 1,000; Roman Catholics, 41,502, a proportion of 232 per 1,000; Mahommedans, Hindoos, Jews, &c., 244; not reported, 2,145. The Jews are represented by one man only in the Cavalry of the Line. The number of men who could neither read nor write is put down at 7,474, a proportion of 37 per 1,000; the number who could read, but could not write, at 5,759, a proportion of 32 per 1,000; the number who could only read and write at 38,570. Of the better educated, the holders of 4th-class certificates are returned at 53,023; 3rd-class certificates, 28,200; 2nd-class certificates, 26,957; 1st-class certificates, 929; not holding certificates, 18,000; not reported, 2,830. We have gone into the statistics furnished in this Blue-book at considerable length, as they cannot fail to prove most instructive to all those who are interested in the Army, and desire to know how our present system is working.

IN the early years of the great Revolutionary War, the French gave much attention to the application of aerial navigation to military reconnaissance. With this object, they formed an institution at Meudon for the careful and systematic instruction and training of a special corps of fifty aeronauts. The pupils at this new school were obliged to make at least one ascent daily, unless absolutely prevented by the weather. They must, therefore, have soon gained varied experience and great confidence. The balloons used at Meudon were not fire-balloons, like Montgolfier's, but were filled with hydrogen gas, obtained probably by the decomposition of water. In 1794, a balloon, with qualified aeronauts, was sent from that institution to each of the three great armies of the French Republic. That attached to the "Army of the North," called the "Entreprenant," ascended twice during the battle of Fleurus, on June 26, 1794, and remained up about four hours each time. The decisive victory gained by the French on that occasion is attributed in a great measure to the timely and valuable notice of the movements of the Austrians signalled by the aeronauts, by means of flags. The Austrians had heard of this novel kind of reconnaissance, and began firing at the balloon, either on its first or second ascent, almost as soon as it became visible to them. Some of the first shots went dangerously near, but the balloon soon rose out of range, and was kept at a safe altitude of about a quarter of a mile. The descriptions of the operations of the "Entreprenant" at Fleurus are discrepant in several particulars, but not to such an extent as to throw any doubt on the reality or importance of its services. There does not seem to be any record preserved of the work of the "Céleste" and "Hercule," the balloons which accompanied the armies of the Sambre and Meuse and of the Rhine respectively. A balloon was sent also with the French Army to Egypt in 1798, but it does not appear to have been used. It was brought back to France after the capitulation of Cairo, and was afterwards utilised in scientific investigations. Balloons have been sometimes employed in reconnaissance in later times, notably at Solferino in 1859, and by the Federal Army, near Washington, in 1861. During the Franco-German War, balloons often played an important part, particularly those that left Paris during the siege. We have read interesting descriptions of some balloon ascents made a couple of years ago by some officers of the Royal Engineers, and we expected that a system of instruction and practice in aeronautics would be founded on their experience, but we have been miserably disappointed. One balloon, indeed, was sent to Egypt, not with the Expeditionary force, but after it. It might have rendered valuable service, and made the campaign even shorter than it was, but unfortunately it arrived too late. A little of that restless energy which now finds vent in tearing the British Army into bits, and then trying to put the bits together in such a way that they cannot and will not fit, might be usefully expended in organising the application of balloons to the purposes of war. But such work lacks the chief charm for our Army reformers, that of breaking-up something valued and good, in order to reorganise it. We can hardly do better than to follow the example set by the French ninety years ago, by forming a small special corps, instructed at first by experienced aeronauts, and constantly practised in their work. There would be some obvious advantages in forming such a corps from the Royal Engineers. The scientific education of the officers, and the discipline and training of the men, would be about the best preparation; and besides, those who, after a fair trial, were found unsuited to such lofty pursuits, could return to their earthy duties with their views enlarged and their lungs expanded.

THE questions asked in the House of Commons by Mr. Gorst and Mr. Dixon-Hartland, a few days before the prorogation of Parliament, point to the feeling that is abroad with regard to the status of officers of the Royal Marine Corps when embarked. Mr. Gorst's question referred to the fact that, for some days a Captain in the Royal Navy, commanding her Majesty's troopship *Tamar*, was called upon to land at Alexandria, to dispose of prisoners in a battalion of Royal Marines 900 strong, commanded by a Lieutenant-Colonel. In reply, the Secretary to the Admiralty admitted that, as far as he was aware, such was the case, and that it was so, on the grounds that the battalion had not then been placed under the Army Discipline Act; but that the anomalies which arise under such circumstances, and in certain other cases, have for some time past been under the consideration of the Board of Admiralty, with a view of ascertaining whether any modification of existing arrangements is necessary. The question of the other honourable Member was based on the more general grounds of giving Marine officers, when serving with those of the Royal Navy afloat, the same rights under the Naval Discipline Act as they possess when serving under the Army Discipline Act; and to this Mr. Campbell-Bannerman also replied, that the Admiralty were fully alive to the complicated question the honourable Member had raised. The Army Discipline Act provides that a commanding officer may award certain punishments, and lays down provisions for his guidance; but it does not define that the commanding officer shall have arrived at any particular rank, in order to possess these powers. Now, with regard to her Majesty's ships in commission, there can be but one commanding officer of the ship and of all on board of her. A Major or Captain of Marines in command of a detachment afloat is subservient to the Captain of the ship, but at the same time is in a different position in relation to his men than are any of the Naval officers, other than the Captain of the ship, that is to say, he is their commanding officer and their representative on board; and it would be as just to argue that a Lieutenant-Colonel in command of a regiment on shore was not its commanding officer, because there was a General in command of the Brigade to which his regiment was attached, as to take from the senior officer of Marines his rights as commanding officer of his detachment, because he has the Captain of the ship superior to him. No better mode of lessening the authority of such an officer over his men could be devised than that of depriving him of the power of awarding punishment. A Lieutenant-Colonel, a Major, or a Captain must lose considerable caste in the eyes of those under his command, when he is compelled to proclaim his impotence by threatening a defaulter with, "I'll take you before the Captain." The Queen's Regulations and Admiralty Instructions provide that the Captain is responsible for all punishments inflicted in the ship, and then names certain ranks, including Marine officers, to whom the Captain may, if he sees fit, delegate the authority to punish within the prescribed limits. This permission to delegate authority is taken advantage of by some few Captains of ships, and the Marine officer is thereby put into his proper place; the trust is not abused, good-feeling exists, and the officer knows that he has greater authority over his men; but where the permission is not given, and the Captain, Major, or Lieutenant-Colonel of Marines has to stand by while justice is being administered by the Captain of the ship only, a feeling arises that he is a nullity on board, he loses heart in the well-being of his detachment, and the service suffers. It is satisfactory to know that this important matter is being considered by the Admiralty, and it is to be desired that, as their Lordships have already seen fit to permit the Captain of a ship to delegate his authority to others, the Queen's Regulations and Admiralty Instructions may be so revised that the power now only given at the option of another, shall be authoritatively placed in the hands of the commanding officer of the detachment. The records of the punishments awarded by the officer commanding the detachment of Marines should be submitted to the Captain of the ship at noon each day for approval, or otherwise.

From Germany we hear that the desire to confer a large territory on the son-in-law of the Crown Prince, the hereditary Prince of Saxe-Meiningen, was the cause of the negotiations in regard to the Grand Duchy of Saxe-Coburg-Gotha, which, however, have fallen through.

The *Polyphemus* is no failure! So said Mr. Campbell-Bannerman, in the House of Commons. We shall shortly publish a full analysis of her recent trials at Portsmouth, and thus enable the service and the public to learn how little confidence they can repose in official statements emanating from the Admiralty. As we go to press, we learn that the Admiralty, cognisant of this fact, has ordered further trials to be made, before the *Polyphemus* returns to Chatham to be pulled to pieces to enable her boilers to be shipped.

The Channel Squadron, consisting of the *Minotaur*, flagship of Vice-Admiral Sir W. M. Dowell, *Northumberland*, *Agincourt*, and *Achilles*, is under orders to leave Devonport this day on a cruise, which is likely to extend to the end of May. The following is the amended programme:—Arosa Bay, Vigo, Lisbon, St. Vincent (Cape de Verd), and Gibraltar, where they are due to arrive on May 5.

Sir Edward Reed is said to be a candidate for his old post at the Admiralty, about to be vacated by his brother-in-law, Mr. Nathaniel Barnaby. This announcement has created a feeling akin to consternation in Naval circles, the return of Sir E. J. Reed to the Admiralty being looked upon throughout the service as about the very greatest misfortune that could befall both the country and the Navy. We hear, however, that Sir E. J. Reed is too much engrossed in land speculations in Florida, out of which he hopes to make half a million or so of money, to trouble the Admiralty for the post. We hope this is true.

It appears that in the face of the existing system by which Admiralty officials receive commissions from Admiralty contractors, there is no chance of the real interests of the Navy being studied. And yet our ironclads must have clean bottoms. Why are they foul? The merchant steamer *Lemuria* was coated in July last with the British anti-fouling composition and protective paint. She made two voyages to the West Indies without going into dock to be cleaned. Last Friday she was docked in Liverpool, and on examination was found perfectly clean, as clean as the patch on the *Malta* was after her thirteen months' trial. She has now been recoated, and has again proceeded to sea. The steamer *Westergate*, coated in June, 1882, has been two voyages to the East Indies, and on her return from the second was found so clean, that she is now on her third voyage, without having put into dock. The *Rugby* was also coated in June, 1882, and is still clean and running. Captain G. L. Eratt, commanding steamship *Lady Lycett*, owned by the Mercantile Steamship Company (Limited), says, under date, July 3, 1882:—"This is to certify that I have used the British Anti-fouling Composition for ships' bottoms on the above steamer in the Red Sea, Persian Gulf, Indian Ocean, Southern States of America, and mostly round the world, and can with confidence recommend it. I have been using it for nearly three years, and can testify to the great value of its anti-fouling properties, only docking once in twelve months, and mostly finding the ship's bottom free from shells and grass." Messrs. Stumore, Weston, and Co., of 34 Leadenhall Street, E.C., write, under date November 9, 1882, relative to their Tower line of steamers, as follows:—"We beg to state that we have used your patent composition upon several of our steamers, and that in all cases they remained perfectly free from fouling. Please be ready to coat a steamer for us next month, in Antwerp." And yet this anti-fouling composition has been thrown out of the competitive trials at Portsmouth! Admiralty jobbing again.

Sir E. J. Reed has written his usual letter to the *Times*. A similar letter has for several years appeared just before the opening of Parliament. Last year we were spared the infliction, but this year Sir E. J. Reed is more verbose than ever. He commences with a peroration on the Engineers of the Navy. He would abolish the old, and instal the new Navy in its place. That is to say, Sir E. J. Reed desires to see Engineers made executive officers, and placed in command of our men-of-war. He evidently thinks that, since he found it so easy to step in a single stride from editor of the *Mechanic's Magazine* into the office of Chief Constructor of the Navy, Engineer officers would find it just as easy a task to step from the engine-room on to the bridge, and when there handle the ship in as seamanlike a manner as the best naval officer who ever trod a plank. Because Sir E. J. Reed was placed in a position which enabled him to superfically educate himself in the profession of the naval architect at the expense of the public, and because he found it easy to produce designs of ships through the ideas and work of others who invested those designs with what little "artistic merit" they possessed, he must not run away with the idea that an engineer suddenly placed upon the bridge of a man-of-war would find the same facilities at his disposal whereby to gull the public into the belief that he was a seaman. The mere fact that Mr. E. J. Reed fought against the turret system, and adhered to the broadside principle of fighting guns in all his designs, is proof sufficient that he did not grasp the requirements of the day, or the change wrought in Naval tactics by the introduction of armour and ram bows. It is entirely due to the manner in which Sir E. J. Reed wasted the public money when at the Admiralty, in constructing what he has called an "endless variety of ships" on the broadside principle, that the Navy at this day is in such a pitiable condition. So the less that is heard of "Sir E. J. Reed on the Navy," the better shall we be pleased. And the sooner the Engineer branch of the service ceases to follow his lead, the sooner may they expect to attain their proper position in the Navy. We are extremely glad to see that the *Times* has this year broken the trammels which shackled it to Sir E. J. Reed in times past, —has, in fact, cut the painter and let him go adrift, with a good shove and smart dressing-down for God-speed. We are of the same mind as Sir E. J. Reed as regards the state and condition of the Navy; but whereas he tries, year after year, to shift the blame from his own shoulders to those of others, we as persistently place the saddle on the right horse, and again remind Sir E. J. Reed that he is, in a great measure, to blame, not only for the loss of the *Captain*, but also for the present inefficient state of our armour-clad Navy.

The *Skylark*, one of the original 60-horse-power gunboats, is to be supplied with new boilers, and once more to do duty as a tender to the flagship at Portsmouth. This wonderful old craft has been several times virtually condemned. She was attached to the *Excellent* for some years, and when her boilers broke down, she was taken out for target practice in tow of another gunboat. After lying by for some time, she was extensively repaired, and resumed her connection with the gunnery ship; only, however, to be once more discarded on account of her increasing infirmities. Subsequently, she was again repaired and improved upon at Cowes, a wheel on the bridge taking the place of the old tiller, and so on; but the same boilers were left in her, and on taking the place of tender to the *Duke of Wellington*, it was soon discovered that she absolutely would not stem the tide, while the engineer in charge protested against getting up steam at all, fearing an accident,—and not without reason, for the boilers proved to be in a perfectly outrageous condition. Now she is to have new ones, which every one who had anything to do with her must have known to be a necessity years ago, but it is extraordinary to what lengths of folly dockyard officials will go, rather than recommend new boilers!

Thanks to the exertions of some of the officials at Haslar Hospital, and their wives, the monotonous round of life in the wards is now broken once a week by an excellent entertainment, consisting of songs, recitations, &c., and a magic lantern. The performances take place in one of the large central wards, and are very much appreciated by the patients, some of whom occasionally contribute materially to the success of the entertainment.

The lieutenants in command of tenders to First Reserve Ships will certainly benefit by the substitution of such vessels as the *Elk* and *Avon* for the ricketty old "sixties," which have in many cases been retained long after they should have been broken up; but the measure is probably only a temporary one.

The Spanish Naval authorities are reported to have got themselves into trouble. Some time ago, they constructed, at Cartagena, a building-slip on an improved plan, and a large vessel-of-war was immediately laid down on the same. This vessel is now ready for launching; but all attempts to move her have, as yet, failed. In this dilemma the Spanish Government decided to send a dockyard engineer to various foreign naval establishments, where similar slips are in use, there to study the working of the same, and, if necessary, to procure powerful machinery capable of launching the vessel by main force.

Lord Alcester and staff leave Malta for England on or about February 15.

When we announced some months back that the Admiralty was about to arm merchant steamers, the Navy was incredulous. The idea, in the opinion of officers holding the highest commands, was ridiculous. One even went the length of asking why we allowed "such damned nonsense" to appear in our columns? What will these officers, who may to-morrow themselves be Lords of the Admiralty, say to the following facts? In accordance with a scheme prepared by the Lords of the Admiralty a few months back, for utilising in time of war or other emergencies the merchant ships which may be available for armed cruisers, supplies of guns suitable for their armament are now being dispatched from Woolwich Arsenal to Bombay, Hong Kong, Cape Town, and Sydney, at which ports they will remain in store until required for their intended purpose. Her Majesty's ship *Wye*, under the command of Captain Miller, is now at Woolwich, loading for Bombay, and a considerable portion of her cargo will consist of these reserve guns, with their carriages, and equipment of ammunition, projectiles, and fittings, while another large freight has been embarked at the docks in the *Lord of the Isles* steamer (Shaw, Bushy, and Co.) for Hong Kong. The guns are designedly of uniform pattern and simple description, being the type known as the Palliser converted 64-pounder muzzle-loading rifled gun. The Admiralty surveyors have inspected and taken measurements of many large steamers of various sizes, and the alterations which will, in each case, be requisite for the mounting of guns and construction of magazines, are already planned. In case of war, all suitable vessels which may be at hand can be requisitioned by the representatives of the Government, the guns, &c., put on board, and the officers and sailors transformed on liberal conditions of service into valuable auxiliaries of the Royal Navy. Such is the official Admiralty plan, and a costly one it will prove to the country.

The Good-Service Pension of £150 for Captains vacant by the retirement on January 26 of Captain Richard Bradshaw, R.N., C.B., has been awarded to Captain Frank Thomson, from that date.

The Admiralty have ordered the abolition of the engineers' mess in the *Bacchante*, and Admiral Soady recommends that the old engineer officers' mess-place should be turned into a study for the junior officers, placed under the charge of the naval instructor. This is a very good suggestion, which could be acted upon with great advantage to the service, so long as we continue to send youngsters afloat in our sea-going men-of-war. But we hope this old habit will also be abandoned shortly, in favour of the German training-ship system. The sub-lieutenant should be the junior executive officer on board our men-of-war. Then a general mess could be substituted for the present sub-divided system, and warrant officers would do the boat work and quarter-deck duties which now fall to the lot of the midshipman. We do not believe Sir E. J. Reed's pet project of making engineer officers seamen, and of giving them the command of our ships, possible. It is far more probable that in the future, naval cadets will have to study the profession of the engineer, and add the duties now performed by officers of that branch of the service to those of the seaman; and in this event, the course of study and training undergone by the junior executive officers of the Navy will have to be very considerably lengthened, when they would be unable to join for active service before the age of 21. But even then, practical mechanical engineers would always be a necessity in a steam Navy.

Austrian Admiralty and dockyard officials have their little troubles, as well as their British colleagues. The distance between Vienna, the seat of the Admiralty and of the constructing and administrative departments, and the dockyard at Pola, is several hundred miles. The consequence is that there is hardly any personal intercourse between the Vienna and Pola officials, and grievances, great or small, have to be reported to head-quarters by letter, and stand but a poor chance of redress.

From Malta we learn that the *Alexandra*, *Cruiser*, *Cygnet*, and *Coquette* were paid off on January 31, and were recommissioned the next day.

The Admiralty have forwarded to us a copy of Fleet Circular No. 45, containing "Instructions for Persons in charge of Machinery of Steamboats on Detached Service," further experience having shown that the existing Instructions require modification in certain particulars, and that other Instructions are desirable. The Circular is too long for us to insert this week, but we cannot help asking who the *Persons* are that their Lordships allude to. It is evident that no Executive officer had anything to do with drawing up the document before us. We were always under the impression that Machinery was at all times in charge of officers, petty officers, or men, but not of *Persons*. Civilian Government of a Military service is only known in England. In no other country would it be tolerated. Most likely the *person* who drew up the Circular was rather dubious as to whom it was for, never having seen a ship or a sailor or engineer afloat in his life.

The inhabitants of Lewis are a God-fearing and peaceable race. There are 1,600 of the young men enrolled in the Naval Reserve, and not long ago 1,100 of those men were inspected by his Royal Highness the Duke of Edinburgh, when he expressed his admiration, not only of the manner in which they went through their exercises, but also of their splendid physique. They are now in sad distress, and on the verge of starvation, owing to the failure of the potato crop throughout the island of Lewis, and the failure of the fishing season. The Lord Mayor of London has taken their cause in hand, and has opened a subscription at the Mansion House, to relieve the distress and destitution pervading the island, and appeals to the public for subscriptions to carry out this good work. We hope the Navy will respond, and that each ship in the service will contribute its mite to help suffering brother-seamen.

Commander Curzon Howe, one of the most popular officers in the Navy, joined the *Sultan* on January 26, in lieu of Commander Kingscote, superseded at his own request. There is now no longer any fear of the disturbance which took place on board the *Sultan* on Christmas Day, owing to the unpopularity of one of the officers of the ship, being repeated. On the occasion in question, Captain Hunt-Grubbe conducted divine service, the newly appointed chaplain not having joined. At the conclusion of the service, Captain Hunt-Grubbe wished the ship's company a merry Christmas, which was answered with one accord by the men with "The same to you, Sir Walter!" and three cheers. Captain Hunt-Grubbe then retired to his cabin, and the Commander gave the order to pipe down, which was received with hisses. Commander Kingscote is, we believe, an excellent officer, but he unfortunately managed to make himself very unpopular on board the *Sultan*.

Lieutenant the Hon. Hedworth Lambton, and not Lieutenant Winsloe, as stated last week in error, in our analysis of the honours and rewards bestowed upon the Navy for the Egyptian War, is the only Flag Lieutenant who has received a foreign Order. Lieutenant Lambton received his decoration from the hands of the Khedive, at the same time as Lord Alcester. It was the *Ready*, and not the *Don*, that was placed under the orders of Lieutenant Harston, of the *Dee*, when he took the Marines up to reinforce Captain FitzRoy, at Ismailia. We also omitted to mention the services rendered by the officers appointed for transport duty, and, amongst others, the valuable services rendered by Lieutenant Stephen Thompson, who was mentioned in despatches for his work in the Sweet Water Canal, at the fire at the Cairo Railway-station, and also at Alexandria. This officer has received no reward for his services. We should also like to see the Admiralty recognise the services of the masters of the transports. These officers of the Mercantile Marine have well earned at least the war medal.

Major John Ignatius Morris, Gunnery Instructor of the Plymouth Division of Royal Marines, was called to the Bar at the Inner Temple on Friday January 26.

By a special ukase, signed by the Emperor of Russia on New Year's Day (Old Style), the pay of most of the officials connected with the Naval service at Cronstadt has been raised from 10 to 50 per cent., while the pay of a large number of subordinate officers has been doubled. Although rumours of the intention of the Government had been prevalent some time, the measure was, to a large extent, unexpected, and consequently when a special courier arrived with the order and the Governor announced it at once, universal jubilation prevailed throughout Cronstadt the rest of the day.

Canteen-stores have quite recently been established in the principal German barracks. At these, the wives of the officers, as well as of the men quartered in the barracks, are able to purchase all the necessaries and many of the luxuries of life at prices far below those charged by the retail shopkeepers of the towns. The Government have also made over large tracts of land to each cavalry barracks. This land is being manured and worked by the soldiers, and hay, corn, and vegetables are being cultivated. This has greatly incensed Eugene Richter and his Radical supporters, who this week asked questions of the German War Minister on the subject, as well as on the reported increase of the German Artillery. The reply he received was to the effect that the co-operative stores had been established for the benefit of the Army, as also the farms. That it was hoped thereby to increase the comfort of the troops, while preventing the men from associating with the members of the Social Democratic party, who use every opportunity of corrupting the morals and political belief of the soldiers. That, so far as the Artillery was concerned, no increase was actually in progress, as it was the best artillery in the world, one he would not exchange for that of any other European military Power. But the organisation of this arm was being developed with a view to enabling a rapid increase being made in case of war.

On the publication of the beatification despatch and subsequent *Gazette* for services in the recent campaign, considerable surprise was felt amongst Commissariat officers at the slight notice taken of them in the first and the few of their number rewarded in the latter, the more so in comparison with the proportion granted to the Ordnance Store Branch. In the Commissariat, with those attached, no less than eighty officers were employed, in the Ordnance Store, twelve; yet in despatches only four officers of the former were mentioned, and four have since been promoted; while in the Ordnance, five were mentioned in despatches, and with the *Gazette* of December 23, 1882 five have received promotion. The Commissariat, we feel sure, do not begrudge the Ordnance their luck, but it shows that some system is wanting by which claims can be properly recognised and regulated. There are two officers who may be selected out of the many deserving of notice from the Commissariat, viz., Quartermasters Steele and Barrell. Quartermaster Steele had and still has charge of the Commissariat Reserve stores at Woolwich, where all supplies of preserved meats, hospital comforts, &c., are received, not only in connection with the requirements of active service, but also for general issue to stations at home and abroad, and where also, during the recent campaigns, enormous supplies of hay have been received for compressing, necessitating constant supervision. Although we have reason to believe this officer was promised some sort of recognition, up to the present he has been overlooked. Quartermaster Barrell, who had not returned long from the Cape Campaign, was ordered to Ismailia at 24 hours' notice, by the overland route, where, under the superintendence, at first, of an Assistant-Commissary-General, who was soon invalided, he had the charge of all receipts and issues for the two divisions at the base of supplies. A more responsible duty it is hardly possible to contemplate. To him was left the entire duty of winding up and squaring the accounts, which, we believe, was most satisfactorily carried out. Nothing has yet been done for this officer. Two regimental Quartermasters, two Army Hospital Quartermasters, and now one of the Ordnance Store Department have received recognition by promotion, yet the duties respectively performed by them must have been in importance mere child's-play as compared with those of Quartermasters Steele and Barrell. It is, therefore, to be trusted that it is not yet too late to reward them, although half the pleasure and value is lost through such delays, which also tend to cause despondency and a feeling of want of support from their superiors, amongst a body of officers whose services, when well performed, are invaluable to senior Commissariat officers, no matter how able the latter may be.

In an article which appeared in a contemporary on Mounted Volunteers, a few words of the concluding paragraph—"and it will be impolitic for the War Office to suppose that any spasmodic movement of the Volunteers will supply the place of the Yeomanry, a force which, practically, is our Militia Cavalry"—completely refuted any arguments previously brought forward against the fullest possible encouragement on the part of the authorities of this proposed addition to our Volunteer Army. Presuming, for a moment, that there is any intention, as is suggested, of "taking up Mounted Vounteers and letting down Yeomanry Cavalry," there can be no fuller argument against it than the fact that more than 23 years ago it was feared in many quarters that the establishment of the Volunteers would injure that of our oldest Constitutional force, the Militia; but the result has been that they have gone on side by side increasing in efficiency, and with a friendly rivalry,—so much so, that the value of a brigade or battalion is frequently judged by the number of its officers who have gained "p.s." at a school of instruction. The Volunteers have extended themselves beyond being only riflemen, and are now largely composed of brigades of Artillery and companies of engineers, yet they have not extinguished any branch of the Militia. It will serve the Yeomanry Cavalry, without whom England would hardly seem herself, to have a fresh incentive to efficiency; but it will not serve them, if their friends (?) cry out when there is no intention to do them injury. We welcome this new addition to our Volunteer Forces, as we do everything that is in their favour; and we learn with pleasure that an association of officers of high standing and long experience in her Majesty's service has been formed for the better equipment of the force, and supplying them with uniforms and accoutrements on a more satisfactory basis than hitherto. We congratulate Lord Mount Edgecumbe and Lord Valletort on having, by their good example, given the order, "Prepare—to mount."

When the "History of the Egyptian Campaign" comes to be written, we shall expect to find many strange disclosures. There never was a war, perhaps, in which English troops were engaged in which there was more mismanagement and more injustice. Our Indian contemporaries tell some wonderful stories as to the way in which honours have been given. We consider it desirable to reproduce a couple of paragraphs, showing as they do how little trouble was taken by the Commander-in-Chief of the expedition to acquaint himself as to the claims of the officers whose names he submitted for recognition. The *Civil and Military Gazette* has the following:—"Another instance of the random manner in which officers were decorated, and otherwise brought to notice, on the termination of the Egyptian Campaign, is that of the appointment of Provost-Marshal to the Indian Contingent. Major Marsh, 18th B.C., was originally appointed by his Excellency the Commander-in-Chief as Provost-Marshal to the Contingent; but he remained at Suez throughout the campaign, which necessitated General Sir Herbert Macpherson appointing a Provost-Marshal in his stead, and Captain Irwin, 20th Punjab Infantry, was selected for the post. This latter officer performed all the duties of the appointment to within four days of the Contingent leaving Cairo, when Major Marsh appeared; and, curious to say, received from the Khedive the decoration of the 4th Class of the Osmanieh, for having been Provost-Marshal to the Indian Contingent. It is believed that the decoration was given on the nomination of Sir Garnet Wolseley, who simply must have gone by the original official list of Staff Officers, in which, later on, there were several changes made. In congratulating Major Marsh on his unforeseen luck, it is hard not to sympathise with Captain Irwin; and it is hoped his case may be taken notice of by those who have the power to rectify matters." The *Pioneer* writes:—"The question whether an officer who has been gazetted to brevet rank can be deprived of his brevet, is probably exercising the minds of the authorities. In the reckless and random distribution of rewards for the Egyptian Campaign, Major J. A. Armstrong, Royal Engineers, is one of the officers upon whom the Queen has been graciously pleased to confer the brevet rank of Lieutenant-Colonel, 'in recognition of his services during the recent operations in Egypt;' although, strange as it may seem to those who do not know how these sort of things are done by General Wolseley, this officer was not in Egypt, but in India, during these operations. He was originally detailed to accompany the Indian Division; but in the end, Captain and Brevet Major W. G. Nicholson took his place,—and, hardly necessary to add, did not get a brevet. In future gazettes of this nature, it would save trouble and disappointment if the rewards were given to the office, in place of to the officer." We quite agree that these are cases which call for inquiry.

It is nearly six months now since Colonel H. Brackenbury, C.B., vacated his appointment as Director of Criminal Investigations in Ireland, in the hope of getting out to Egypt. Having failed to secure an appointment, Colonel Brackenbury was posted to the command of a garrison battery of Artillery in India, and everybody not conversant with the ways of the War Office, naturally presumed that the officer had long since gone out to India, to assume the active duties of his command. But, lo and behold! the gallant gunner is still in England, and, if all accounts be true, is likely to remain so. Now, we have nothing to say against Colonel Brackenbury, personally. He has proved himself to be a valuable officer, and his professional zeal is proverbial, but we do most strongly object to the system which is fast being introduced into the service, by which a favoured few are allowed to do pretty well as they like, simply because they have friends occupying influential positions at the War Office; whilst the unknown majority are knocked about from pillar to post, and are subjected to all manner of pains and penalties, if they only make one small slip. We should be sorry to go as far as a distinguished General did at a recent banquet, and assert that the War Office, under the new *régime*, is becoming a "veritable hotbed of jobbery and corruption;" but this we do say, that the system which is gradually being introduced will do far more to ruin the Army as a profession than ever Purchase did. Under the Purchase system, a man knew what to expect when he entered the service. At present, the "few favoured" are gradually being allowed to have everything their own way.

His Royal Highness the Field-Marshal Commanding-in-Chief, at the request of the President of the London Committee of Deputies of British Jews, issued the other day an order approving of every facility, consistent with the maintenance of military discipline, being accorded to non-commissioned officers and men of the Jewish persuasion for the observance of the festival of the Passover, which commences on the evening of April 26. If we are to rely upon the facts furnished in the Annual General Return of the Army for 1881, much fuss has been made in this instance needlessly, for under the head of "Jews," in the table of religious denominations, in the volume in question, we find that the Hebrew race is represented in the ranks of the Army by one man. What a proud individual he must feel himself! In order to insure the strict observance by him of all the religious ceremonies of his creed, the country has been put to the expense of having an order printed and sent to every regiment in the Service. In face of this consideration for the one solitary Jew who has the proud honour of wearing her Majesty's uniform, who will say that the Jews are a despised people?

In consequence of the increasing demand for Commissionaires in London, and the recent establishment of Divisions in the principal manufacturing towns, there are additional openings for well-educated men about to be discharged to the Reserve, especially at Manchester, Liverpool, Edinburgh, Glasgow, and Nottingham. Full information as to the conditions of entry may be obtained on application at the Offices of these Divisions, and at the Head-quarters of the Corps, 419 Strand, London.

EGYPTIAN NOTES.

(FROM AN OCCASIONAL CORRESPONDENT.)

Cairo, January 23, 1883.

The following will show the number of sick among the forces in Egypt, and the proportion they bear to the total strength:—

	Total Force.	Sick List.	Per-centage.
Artillery, Cairo	844	150	17·8
Cavalry, ,,	1,092	228	20·9
Engineers, ,,	258	26	10
1st Brigade, ,,	3,302	352	10·6
2nd ,, ,,	3,865	438	11·3
Sundries, ,,	879	89	10·1
Alexandria Brigade	2,681	346	12·9
Ismailia	158	14	9·5
	13,079	1,643	12·6

To proceed to Alexandria, for treatment in Carthage:—Lieutenants Hunter Blair, Gordon Highlanders; Powell, Royal Sussex Regiment; Lyster, 3rd Battalion King's Royal Rifle Corps; W. H. Dunne, 1st Battalion Gordon Highlanders; P. S. Marling, King's Royal Rifle Corps; E. K. G. Aylmer, 19th Hussars; and F. H. Thompson, 1st Battalion Cameron Highlanders.

The following officers of the Commissariat and Transport Staff will be held in readiness to embark for England:—Assistant-Commissary-General Dunne, Assistant-Commissary-General Richardson, Deputy-Assistant-Commissary-General McComb, Captain Burrell, D.A.C.G., and Quartermasters Collett, Cossey, and Phillips.

Leave of absence has been granted to Lieutenant W. A Scott, 1st Battalion Cameron Highlanders, to March 21, 1883, on medical board; Captain Wauchope, C.M.G., to March 1, 1883, and Surgeon Forrester, A.M.D., to February 6, 1883, as very special cases; Captain Ward, King's Royal Rifle Corps, pending his name appearing in the *Gazette*, on retirement from the service.

The services of Captain A. O. Green, R.E., are placed temporarily at the disposal of the Quartermaster-General's Department, for surveying.

Captain Burke, 7th Dragoon Guards, having been invalided, is permitted to proceed to England by mail steamer, at his own expense.

Lieutenant A. Butler, transferred from the 1st Battalion Shropshire L.I. to the Norfolk Regiment, will leave for India.

Captain Evans Gordon, Berks Regiment, will leave by the first mail, *viâ* Brindisi, to join the Staff College.

NOTES FROM ALDERSHOT.

(FROM AN OCCASIONAL CORRESPONDENT.)

Another quiet week has passed. Save route-marching, which is carried out by brigades and regiments, nothing but the ordinary camp routine is going on. Sir Daniel having now returned from leave of absence, and resumed command of the Division, we may shortly look for signs of returning activity. Lieutenant-Colonel Weldon, Madras S.C., the inventor of the new range-finder, is attached to the Division during the time the experiments with his instrument are being carried out. Lieutenant C. H. Blount, Royal Artillery, is ordered from Woolwich to Aldershot. Surgeon J. T. Carey, M.B., has arrived here for duty. Major A. Hill, Royal Engineers, is ordered here. The dismounted portion of the 24th Company, R.E., is in readiness to proceed to Shorncliffe. War games were played in the School of Garrison Instruction, South Camp, on Wednesday, by the 84th York and Lancaster Regiment, and on Thursday by the 85th Shropshire L.I., both regiments being assisted by officers of Cavalry and Artillery. A divisional assembly and dance took place at the Officers' Club on Thursday last; a large number of the officers and ladies of the Division and many of the neighbouring gentry were present. It has been notified in Division Orders that G.O. 241, of 1882, "Discharges" (which orders "that if a Warrant officer or a non-commissioned officer, serving in his second period of service, be reduced to the ranks by sentence of a court-martial, or by order of a Commander-in-Chief, his discharge shall be forthwith proceeded with," in consequence of his having been so reduced), being under revision, pending the issue of fresh instructions on the subject, all cases arising out of the General Order in question will be forwarded to the Assistant-Adjutant-General's Office, for transmission to the Horse Guards, for the decision of H.R.H. the Field-Marshal Commanding-in-Chief. The above-mentioned General Order has been, since its issue, the subject of much adverse comment among those ranks affected by it; but it was felt that when its unnecessary harshness became known in the right quarter, it would be either rescinded altogether, or considerably modified. The Divisional Draghounds (Veterinary-Surgeon J. P. Adams, master), met on Thursday, at the North Horns. The inclement weather of the past fortnight has been much against the Drag Hunt, several meetings having been abandoned in consequence. The Beagles of the 87th have been hunted during the winter in the vicinity of the Camp. A meet took place on Wednesday, at the Aldershot Wharf Bridge, at 2 p.m., and some excellent sport was obtained during the afternoon. Under instructions from the Horse Guards, it has been notified that H.R.H. the Field-Marshal Commanding-in-Chief has directed that the officers commanding corps, regiments, and battalions are to state, in the copies of registers transmitted for the information of the Registrar-General, under the provisions of the Registration of Births, Deaths, and Marriages (Army) Act, 1879, the birthplace of the subject of the entry, to enable him to send to the Registrar-General of Scotland, or of Ireland, copies of so much of such register as refers to officers or soldiers who were Scotch or Irish subjects of her Majesty. Many rifles used during the Egyptian campaign having been more or less damaged, a report has become necessary on the subject, and on Monday last a court of inquiry, consisting of a field officer of infantry, a captain Royal Artillery, and an Ordnance Store Officer, assembled at the Ordnance Store Depôt, to examine and report upon the damaged rifles in possession of the 84th. It is stated that the Martini-Henry breech-action is very liable to get out of order on service, and that this was evident during the recent operations. The Remington breech-action is, in this respect, said to be superior to the Martini, being simpler, better adapted for rough usage, and the cartridge less liable to jam through sand and grit getting into the breech. The new residence for the General Commanding the Division, situated in the Guards' Enclosure, close to the North Camp, and which has been in course of construction during the past twelvemonth, has now been completed, and on Tuesday last a board of officers assembled to inspect and report upon its fitness for occupation. The building is a very handsome one, in the early Queen-Anne style. Colonel Williams, R.H.A., has been appointed to succeed to the command of the Royal Artillery at the station, vice Colonel W. E. M. Reilly, C.B. The vexed question of "Which is the best valise equipment for the Infantry soldier?" still disturbs the official mind. In 1879, Sir T. Steele's Committee assembled at Aldershot, "To compare and report upon the relative merits of the present regulation valise equipment, that invented by Surgeon-Major Oliver, M.D., and that lately brought forward by Lieutenant-Colonel Barrett, 19th Regiment." This committee carried out a series of experiments and trials, and ultimately reported against the Oliver and Barrett equipments, because of the "gravest faults" in both. They recommended "that in any present issue of equipment, the Regulation valise equipment be adhered to," but suggested considerable alterations. It is but right to say that Surgeon-General D. R. McKinnon, P.M.O., one of the members of the committee, did not agree with the others that the old valise equipment should be retained. He considered the principle faulty, and that the principle of the Oliver, as modified, was far superior. It was also well known throughout the Division at the time that Dr. Oliver's friends were not at all satisfied with the manner in which the trials were carried out, and protested that the doctor was not receiving fair treatment. More than three years have since elapsed, and the valise-equipment question has not yet been advanced beyond the experimental stage, and seems to be as far from being settled as ever. A new valise equipment (the old one reconstructed) is about to be issued to two battalions of Infantry here, for experimental trial and report. Has Dr. Oliver's magazine equipment, pronounced at Aldershot by practical soldiers the best set of accoutrements for general service yet produced, been really weighed in the balance, and found wanting? Those who are behind the scenes say it has not.

In the *Court Circular* of the 25th ultimo, we were told that among the recipients of the medal for distinguished conduct at the hands of her Majesty, on the 24th, Pioneer Winnett, of the Grenadier Guards, was thus decorated because, though twice wounded, he remained "with his company in the front line." As the whole Brigade of Guards was in the second line, we cannot see how the pioneer could be in the front line with his company.

General Lord Wolseley will preside at a festival dinner to be held at Willis's Rooms on May 26, in aid of the Annuity Fund of the Cabdrivers' Benevolent Association.

Under the patronage of the Committee of the Egyptian War Fund, a war exhibition of trophies, relics, and articles of kindred interest, in connection with the late and other recent campaigns, together with articles and implements of interest used in actual warfare, in aid of the Egyptian War Fund, will shortly be opened at Humphreys' Hall, Albert Gate, S.W.

Major-Gen. W. Gordon, C.I.E., Bengal S.C., who has recently vacated the command of the Peshawur District, is about to return home on two years' leave of absence.

The gold medal of the United Service Institution of India for the year will be given for the best essay on "The Volunteer Force of India, its Present and Future." Candidates must be Government gazetted officers, and the essays are to be sent in by May 1.

According to the *Pioneer*, there is no foundation for the statement now being circulated that Government has further reductions of the native army in contemplation. The reductions made last year were intended to be quite final.

THE YORK AND LANCASTER REGIMENT.

(SECOND BATTALION.)

Amongst the regiments which have recently rendered good service in Egypt, the gallant 84th, or York and Lancaster, hold a foremost position as a fine old English regiment, which has distinguished itself in all parts of the world, having fought in Europe, Asia, Africa, and America. On January 4, 1759, orders were issued that a battalion which was then being raised should be placed on the establishment from December 25, 1758, and commanded by Lieutenant-Colonel Eyre Coote. The regiment was to be completed at once, levy-money at the rate of £3 a man being allowed for 992 men. This regiment was to be employed to assist the forces of the "United Company of Merchants Trading in the East Indies," as the old East India Company was then styled, in the vigorous prosecution of the war in those parts. Although the men were to be raised in any part of Great Britain, and also by drafts from other regiments, some time elapsed before the regiment was completed to the full strength of twelve companies; and in April, the inhabitants at Southampton protested against the men being billeted on them for so long a time. The regiment arrived in India and joined the camp at Conjeveram on November 23, 1759, and greatly distinguished itself at Wyndewash on January 22, 1760, where the English, under Eyre Coote, gained a decisive victory over the French, under Lally. The following year they were engaged in the siege of Pondicherry, from which place Coote wrote on January 3, describing the havoc wrought by the most terrible gale he ever witnessed, which, on the previous night, had wrecked nearly all the Fleet with great loss of life, and stating that supplies were urgently needed. On the 16th, however, Lally surrendered, and the following morning the grenadiers of the 84th took possession of the Villanoor gate, and the same evening they occupied the citadel. Coote then proceeded to Bengal, leaving the regiment under the command of Major Gordon, who followed in August with four companies, the remainder proceeding between August and September in three detachments, one of which was lost on the voyage. In June, 1763, another war broke out between the Company and the Nabob Meer Cossim, in consequence of which a force was despatched under Major Adams, consisting of the 84th, 150 of the Company's European Infantry, two troops of cavalry, one regiment of native cavalry, 10 companies of sepoys, and 12 guns. The enemy's force consisted of 8,000 cavalry, 30,000 infantry, and 30 guns. A general engagement took place on August 15 at Sootee, where, after four hours' hard fighting, the enemy was defeated with great loss, all the guns being taken, and 150 boats laden with grain. Cossim then retreated to a chain of hills called Outahnulla, near Monghier, and, after an obstinate resistance, the English gained possession of their fort and position on September 5. It was said that Cossim had over 60,000 men engaged on this occasion. After his defeat he retreated to Patna with his main body, leaving a garrison at Monghier, which was invested by Adams on October 4, and a week later the garrison, consisting of 2,000 men, surrendered. Patna was next besieged on November 1, and taken by storm on the 6th. Thus in four months the enemy, which was considered better armed and disciplined than any seen in India before, was entirely defeated in four actions, with the loss of two forts and nearly 500 guns. On December 9, 1763, a Royal Warrant was issued ordering the regiment to be disbanded, their services being no longer required. They were accordingly sent to England in detachments during the autumn of 1764 and spring of 1765, most of them arriving at Portsmouth, from whence they were sent to Andover, Falmouth, Brentford, and London, where the men were paid off, and the officers were placed on half-pay. After a lapse of ten years the regiment was revived, in consequence of the American War, by Lieutenant-Colonel McLean (whose commission and those of the other officers were dated June 13, 1775), who was authorised to raise a regiment of two battalions from the Highland emigrants in Canada, and the men of the 42nd and Montgomery's Highlanders who had settled in North America after the peace of 1763. The regiment was dressed and equipped the same as the 42nd Highlanders, clothing and accoutrements being sent out to them from England in August, 1776. By Royal Warrant, dated December 25, 1778, General Sir H. Clinton, K.C.B., was appointed Colonel, and the regiment was confirmed in the title of Royal Highland Emigrants, which had been previously assumed under local authority; and on April 1, 1779, the regiment was ordered to be placed on the establishment as the 84th Foot, consisting of two battalions, of ten companies of 70 men each. A portion of the regiment took part in the action at Eutaw Springs on September 8, 1781, where two guns were captured, Colonel Washington and 60 men taken prisoners, and 800 wounded. During 1781, and the two following years, the regiment was employed in Nova Scotia and at Charleston, South Carolina. In August, 1782, a detachment of two companies was sent to Jamaica, in consequence of an expected attack by the French. At the peace of 1783, the regiment was again disbanded, most of the men becoming settlers and receiving grants of land, non-commissioned officers being allotted 200 acres, privates, 50 acres, together with one year's rations, and they were also allowed to retain their arms and accoutrements. The outbreak of war in 1793 again called the regiment into existence, a letter of service being issued to Lieutenant-Colonel Bernard, half-pay, 86th Foot, on November 2, authorising him to revive the 84th Regiment, which was completed and inspected at York on February 23 of the following year. In 1796 they were sent to the Cape of Good Hope, and in January, 1799, to India, where they remained on active service until 1818, during which period they were employed in Madras, Bombay, Goa, Kurrie, Surat, Bassein, Bangalore, Trichinopoly, Bellary, and Isle of France. During their service in India, a 2nd Battalion was raised at home in April, 1808, six companies being formed at Preston, and in June they were sent to York, and increased to ten companies; in September they moved to Hull, in December to Ipswich. In July the following year they were sent to Colchester, and then to Harwich, from whence they sailed on July 29, forming part of an expedition under General the Earl of Chatham and Admiral Sir R. Strachan to the Island of Walcheren. They arrived on the 31st, disembarked on August 2 at Fer Veer, and took part in the siege of Flushing, which was taken on August 15, after a severe bombardment. Owing to a want of co-operation between the two commanders, the expedition ended disastrously,—

> "Lord Chatham, with his sabre drawn,
> Was waiting for Sir Richard Strachan;
> Sir Richard, longing to be at 'em,
> Was waiting for the Earl of Chatham."

At the end of the year they returned to England, and disembarked on December 26. Meanwhile, a detachment of 300 men who were left behind in England marched to the Isle of Wight, and embarked for India, to join the 1st Battalion. In June, 1810, they proceeded to Ireland, and the following month sailed from Cove, and landed at Passages, in the north of Spain. They served with distinction throughout the Peninsular War, especially at the Nive on December 11, 1813, at which battle the regiment was engaged in a hollow road where the French possessed the high bank, and the colonel, with a great number of men, was killed. After four years' hard fighting, they again landed at Cove in September, 1814, and were quartered in Ireland until December, 1817, when the battalion was broken up, except a depôt of 400 men, who were sent to Chatham in April, 1818, and the following December, being joined by six companies of the 1st Battalion from India, they marched to Dover, where the headquarters of the regiment had already arrived from India. The 2nd Battalion from this time ceased to exist. The regiment remained in England until the close of the year 1821, when they were sent to Ireland, and in the spring of 1827 sailed for Jamaica, from whence they returned to England in 1838. In January, 1809, the title of "York and Lancaster" was conferred on the regiment, and in February, 1818, they were authorised to bear on their colours and appointments the words "Peninsula" and "Nive," which were formerly granted to the 2nd Battalion, "in consequence of the distinguished service of the late 2nd Battalion in France and Spain, and at the Battle of the Nive." By another letter, dated "Horse Guards, November 27, 1820," they were granted permission to bear the Union Rose as a badge on the colours; and in December, 1826, they were authorised to bear the word "India" on their colours, in commemoration of their services in that part of the world from 1796 to 1819. From 1839 to 1841, the regiment was quartered in Ireland, and in the following year went to India, where they remained until 1859, having served with great distinction throughout the Indian Mutiny, for which they were authorised to assume the word "Lucknow" in 1863. The remainder of their services may be briefly summed up:—From 1859 to 1863, England; 1863-65, Ireland; April, 1865, to March, 1867, at Malta; April, 1867, to January, 1870, in Jamaica, and the remainder of the year at Halifax, Nova Scotia; in 1871-72, Ireland; July, 1873, Jersey; July, 1874, to 1880, in England; and Ireland, from February, 1880, to August, 1882, when they went on active service to Egypt. The services of the 84th, like many of the older regiments, have not been unbroken, but they are fortunate in being able to trace their direct succession from their first formation in 1758. Other regiments have not been so lucky, as owing to the reduction of the Army at various periods after some of the great wars, gaps were caused, which were filled up by the remainder being renumbered. Certain regiments have thus had their places occupied by others, but that of the 84th is one of the exceptions. Now that the names of engagements in old campaigns have been granted to regiments which took a distinguished part in them, but whose claims have been overlooked in the past, the York and Lancaster may justly hope to add to their roll at least some of those highly-prized honours of which they have hitherto been deprived. There should be no difficulty or hesitation in granting some recognition for campaigns which include the names of Sootee, Outahnulla, Patna, Wyndewash, and Pondicherry. The regiment is now associated with the two greatest counties in the kingdom, and under their new title, the gallant old 84th will assuredly never fail to maintain the high character they have ever held in the past, and earn fresh laurels as the Second Battalion of the York and Lancaster Regiment.

The Army.

3rd Dragoon Guards. The *Irish Times* says:—"His friends in Ireland will, we are sure, be glad to learn that Col. Herbert Stewart, C.B., 3rd Dragoon Guards, who was made a Queen's Aide-de-Camp in recognition of his Egyptian services, and is now borne on the list of his Excellency the Viceroy's Aides-de-Camp, has been specially noted at the Horse Guards for some reward, and will most probably be offered a regimental command or a lucrative Staff appointment, Lord Wolseley having brought him prominently to notice as an officer well deserving of the favourable consideration of the Military authorities." "Fair-Play" writes:—"In your issue of last week, you notice a rumour which is very prevalent in the Cavalry and the London Clubs at present, viz., that Col. H. Stewart, A.D.C., is shortly to be selected for a vacant lieutenant-colonelcy of cavalry, owing to the pressure brought to bear on the authorities by his patron, Lord Wolseley. Without wishing in the smallest degree to detract from the glory of Col. Stewart's brilliant services, or from the perspicuity of Lord Wolseley, who, doubtless, thinks he sees in Col. Stewart the qualities of 'a born cavalry leader,' I venture to ask you to give prominence to the real facts of the case. Col. Stewart has 19 years' service, out of which he has passed 10 years in the infantry. He first entered the cavalry (3rd Dragoon Guards) on Oct, 18, 1873, as capt. Since that time, he has spent several years away from his regiment, on Staff employment. He was on the Qrmr.-Gen.'s Staff in Bengal till Dec., 1873. He was on Staff employment in South Africa from April 6, 1879, till May 25, 1880, and since that date he has been employed on the Viceroy's Personal Staff in Ireland, and in the Egyptian Campaign. It will, therefore, be seen at a glance that the gallant colonel has but a very short and broken experience of cavalry regimental work; and surely it would be most unfair, and highly injurious to the best interests of the cavalry, to pitchfork him into the command of a regiment over the heads of old and experienced majors of cavalry with longer service than Col. Stewart, and who have passed the whole of their time in the Cavalry branch."

7th Dragoon Guards. The regiment is under orders to return home from Cairo. Capt. Burke has been invalided home from Egypt, and is succeeded as cavalry brigade-major by Capt. Banks. Lieut. Aspinwall has succeeded Capt. Banks as A.D.C. to Brigdr. Arbuthnot.

6th Dragoons. Lieut.-Col. Curtis obtains command of the regiment by the retirement of Col. Gore, Major Bennett becoming second lieut.-col., and Capt. M'Kean, major.

10th Hussars. An Indian contemporary hears that Brevet Lieut.-Col. Combe, Deputy-Assist.-Qrmr.-Gen., Oude Division, will shortly be transferred to the Adjutant-General's Department.

12th Lancers. Capt. Dean has been appointed Military Secretary to Sir James Fergusson, Bart., Governor of Bombay, and not to Mr. Grant Duff, Governor of Madras, as at first stated.

17th Lancers. Lieut. Ricardo has leave from India to England for 12 months, on medical certificate.

19th Hussars. Brevet Lieut.-Col. Taylor has taken up his duties with the Egyptian Cavalry at Cairo.

ROYAL ARTILLERY.

A correspondent at Simla writes to an Indian contemporary:—"Lieut. J. M. Grierson, R.A., has left Simla to rejoin his battery at Nowgong. This young officer has already made a name for himself. He entered the British Army—after studying for several years at a Cadetten Schule in Germany—when only 17 years of age. Not long after he was promoted to the general staff. Having been ordered to this country, he soon obtained work in the Intelligence Branch of the Qrmr.-Gen.'s Office. During the present season he took part in the Egyptian Expedition, and edited for some time the *Egyptian Gazetteer*, published at Cairo. He has received the Order of the Medjidie, sent to him at Simla a couple of days previous to his departure. Besides German, which he speaks like a Deutscher, he has a thorough knowledge of Russian, Arabic, Spanish, and a few other languages. If appearances do not deceive, this young officer has a great future before him."

Christmas was celebrated in Ceylon amongst the military by the usual allowances from the canteen funds being devoted to the provision of a bountiful dinner, supplemented by gifts from the officers. The 6th Baty. 1st Brig., Eastern Division, however, added to the festivities of the season by giving their annual ball on New Year's night. The baty., since it has been stationed in Colombo, has done much in catering for the amusement of their friends. The efforts of the hosts to make the evening an enjoyable one were crowned with success. Amongst the numerous guests present were H.R.H. the Duke of Mecklenburg, son of the reigning Grand Duke, his aide-de-camp, H.S.H. Prince Plesse and two other members of his suite, the German Consul, Major Phillpotts, commanding R.A., Lieut. S. J. d'Ostrorog, R.A., Lieut. Massy, R.E., Surg.-Major Major, A.M.D., and Mrs. Major, several officers of the Royal Dublin Fusiliers and Ordnance Store Department, Rev. C. Boyd, military chaplain, and Major Currie, brigade-major. Serjt.-Major Driver is deserving of special mention for the manner in which he carried out the arrangements and officiated as host.

Lieuts. C. S. B. Parsons, R.H.A., and H. M. L. Rundle have taken up duty with the new Egyptian Army at Cairo.

ROYAL ENGINEERS.

Orders received at Chatham direct the 2nd Compy. of Royal Engineers to proceed to Portsmouth, the 6th Compy., from the Curragh, proceeding to Chatham.

The *Standard* says:—"Her Majesty has approved the appointment of Major H. Trotter, C.B., Royal (late Bengal) Engineers, as Military Attaché at Constantinople. Major Trotter was employed on special service under the Foreign Office during the Russo-Turkish Campaign, and has lately been acting as Vice-Consul at Kurdistan."

Brevet Major H. C. Chermside, C.M.G., and Lieut. A. M. Mantell have taken up duty with the Egyptian Army at Cairo.

1st, or Royal Scots. The head-quarters, 1st Batn., are under orders to leave Malta this month for Barbadoes.

2nd Queen's (Royal West Surrey Regiment). The 1st Batn., at Portland, is under orders to proceed to Ireland.

6th Royal Warwickshire Regiment. Capt. Stracey, 2nd Batn., has leave from India to England for 12 months, on medical certificate.

8th King's (Liverpool Regiment.) Capt. and Adjt. F. J. Whalley, 2nd Batn., died at Meean Meer on the 2nd inst., aged 31 years. The deceased entered the Army, June 8, 1872; became capt., May 18, 1881; and adjt., July 1, 1881.

14th West Yorkshire Regiment. The 1st Batn. is under orders of readiness to proceed from Bradford to Ireland. Major Hutchison, 2nd Batn., has passed the higher-standard examination in Hindostanee.

15th East Yorkshire Regiment. The Secretary of State for War has approved of Brevet Lieut.-Col. C. Grove being appointed Deputy-Assist.-Adjt.-Gen. at Head-quarters, War Office, vice Lieut.-Col. Lascelles, from the 31st inst. Lieut. Hamilton, 2nd Batn., has been appointed temporary Aide-de-Camp to the Governor of Bombay.

18th Royal Irish. The 2nd Batn. is to leave Egypt in the course of a few days for Malta.

22nd Cheshire Regiment. The 1st Batn., at Jersey, is under orders for Portland, to relieve the 1st Batn. 2nd Queen's.

23rd Royal Welsh Fusiliers. The 2nd Batn. is under orders to leave Pembroke Dock for Ireland.

24th South Wales Borderers. The 1st Batn., at Manchester, is about to be moved to Ireland.

27th Royal Inniskilling Fusiliers. Major-Gen. U. Williamson, colonel on the Retired Full-pay List, late of the 27th Inniskillings, died on the 30th ult., at his residence, Summer Hill, Mallow, county Cork. He entered the Army in 1826, and obtained a lieutenancy in 1831. He served with the 27th Inniskillings in the Caffre War of 1834-5, for which he obtained a medal. He was promoted to a captaincy in 1840, became major in 1848, lieut.-col. and col. in 1854, and major-gen, in 1859.

35th Royal Sussex Regiment. Col. Hackett completed five years' service in command of the regiment yesterday, and is about to be placed upon half-pay.

36th Worcestershire Regiment is under orders of readiness to leave Ireland for Pembroke Dock.

37th Hampshire Regiment is in readiness to leave Ireland for Devonport.

43rd Oxfordshire Light Infantry. Lieut. Porter has leave from India to England for 15 months, on medical certificate.

ROYAL MARINES.

Capt. and Brevet Major R. W. Heathcote, R.M.L.I., has been selected by the Secretary of State for War for the appointment of Superintendent of Gymnasia in the Southern District.

On the application of H.R.H. the Field-Marshal Commanding-in-Chief, the Admiralty has approved of Major J. M. Moody, R.M.L.I., performing the duties of Assistant-Adjutant-General for Recruiting, London District, during the temporary absence of Col. Prevost.

51st King's Own Light Infantry. An Indian contemporary says:—"It is not yet known whether Lieut. Fraser will be tried by court-martial or not. This officer levanted on July 3 last, taking with him moneys belonging to several regimental funds and to the officer commanding his company, and was captured at Singapore. Surely there has been time enough for the authorities to decide what shall be done with him, and it cannot be necessary to keep him longer in suspense?"

53rd King's Shropshire Light Infantry. The regiment is to leave Egypt early this month for Malta. Lieut. Turner has taken up duty with the new Egyptian Army.

60th King's Royal Rifle Corps. Col. Grenfell, A.D.C., and Brevet Major Smith have taken up their duties on the staff of the Egyptian Army at Cairo. Capt. Ward is retiring from the service. The 2nd Batn. is under orders to leave Winchester for Aldershot.

64th North Staffordshire Regiment. The regiment is orders to move from Ireland to Manchester.

65th York and Lancaster Regiment. The regiment is under orders of readiness to return home from Aden, when it will be stationed at Dover.

66th Berkshire Regiment is under orders to move from Gosport to Aldershot.

70th East Surrey Regiment. Lieut. Porter has leave from India to England for twelve months, on medical certificate.

72nd Seaforth Highlanders. The Queen inspected the regiment at Parkhurst on the 26th ult. Her Majesty, who was accompanied by H.R.H. Princess Beatrice, and attended by Gen. Sir Henry Ponsonby and Capt. Bigge, arrived from Osborne about 11.45 a.m., and was received by the battalion drawn up in line with a Royal salute. The regiment then marched and doubled past, and finally advanced in review order, and gave a second Royal salute. Her Majesty was pleased to express to Lieut.-Col. Stockwell, C.B., her high approval of the appearance of the regiment. Before leaving, her Majesty ordered to be presented to her Lieut.-Col. Murray, Lieut. Monro, and Lieut. and Adjt. Egerton, three officers of the battalion who had been severely wounded in Afghanistan. Serjt.-Major Jacobs, now serjt.-major of the depôt, and Pymr.-Serjt. Lander, both of whom have the medal for distinguished conduct in the field, together with a bar for a further act of gallantry, were also presented to her Majesty. A draft for the 2nd Batn., at Lucknow, of 1 serjt., 2 corpls., and 80 men, with Lieuts. Milne and Jamieson, is under orders to embark on the 24th prox. Lieut. Barlow has joined, on exchange with Lieut. Milne.

73rd Royal Highland (Black Watch). The regiment is about to be moved from Portsmouth to Aldershot.

74th Highland Light Infantry. The regiment is under orders to return home from Egypt.

77th Middlesex Regiment. Lieut.-Col. Gatacre has rejoined head-quarters for duty from officiating Assist.-Qrmr.-Gen., Burmah Division. Major Jervis-White comes home, on nine months' leave on private affairs. Major Tickell, Lieuts. Wilson, Harvest, and Sapte arrived with a large draft from the 1st Batn. (late 57th), Major Tickell proceeding to Port Blair, to command the detachment there. Capt. Westmacott is under orders for the depôt. A section of E Compy. (Capt. Schuyler's) won the "All Comers" volley prize at the Volunteer encampment at Ensein. Lieut. Savile has rejoined at Rangoon from undergoing a course of instruction at the Hythe School of Musketry.

79th Queen's Own Cameron Highlanders. Lieut. Davidson has taken up duty with the new Egyptian Army at Cairo.

80th South Staffordshire Regiment is about to be moved from Ireland to Jersey.

81st Loyal North Lancashire Regiment. The regiment is under orders of readiness to return home from India, when it will be stationed at Gosport.

87th Royal Irish Fusiliers. This regiment has presented a very valuable and expensive chalice to the Rev. F. Collins, their chaplain during the late campaign in Egypt, as a token of their affection and as an expression of their admiration of his conduct at the storming of Tel-el-Kebir. The chalice, we understand, has been sent out to Egypt, where Mr. Collins is still stationed with the Army of Occupation.

89th Royal Irish Fusiliers. Capt. Boyle has been appointed temporary aide-de-camp to the Governor of Bombay.

101st Royal Munster Fusiliers. The regiment is under orders to return home from Nova Scotia, when it will be stationed at Aldershot.

105th King's Own Light Infantry (South Yorkshire Regiment). The regiment is under orders of readiness to move from Ireland to Bradford.

106th Durham Light Infantry. The half-battalion at Malta leaves that station this month for Gibraltar. Capt. J. H. Gaitskell, late of the regiment, died at Brighton on the 25th ult.

Commissariat and Transport Department. Deputy-Commissary-Gen. W. Robinson, C.B., has assumed the duties of senior Commissariat officer in the Southern District. Deputy-Assist.-Commissary-Gen. Hope taken over the command of No. 2 Company from Capt. and Deputy-Assist.-Commissary-Gen. Thomas. Qrmr. Nicholls has been posted to No. 2 Company; this company is about to be formed into a second depôt. Commissary-Gen. Sir E. Morris, K.C.B., visited Woolwich on Monday last, and inspected the mules at the station, of which a large number are about to be sold, to tho relief of those having charge of them, being too small for draught work. Assist.-Commissaries-Gen. Dunne and Richardson are on the road home from Egypt.

Pay Department. Major Chauncy, pymr. to the 2nd Batn. Coldstream Guards during the recent campaign in Egypt, has resumed duty at the 22nd Regimental District, Chester. Assist.-Pymr. C. F. H. Beardmore, recently in temporary charge at Chester, has proceeded to the District Office, Portsmouth. Major Whittington, on return from Egypt, has rejoined the 20th Regimental District, Bury. Major Playfair, from Cyprus, has rejoined the 38th Regimental District, Lichfield. From Cairo we are glad to hear that Capt. A. Gleig, pymr. 53rd Regt., has sufficiently recovered from his severe fall from horseback to enable him to resume his duties and accompany the regiment, ordered to Malta.

The Auxiliary Forces.

MILITIA.

Bedfordshire Regiment. The orders for the 3rd and 4th Batns. for the annual training have been issued by the War Office:—3rd Batn. to assemble at Bedford, May 7, and train at Shorncliffe; 4th Batn. assemble at Hertford (date not fixed), and train at Colchester.

King's Royal Rifles. The 5th Batn. (Huntingdon Militia) is to assemble and train at Huntingdon on May 7.

The King's (Shropshire Light Infantry). Lieut. E. A. Phillips, second son of the late Rev. J. Phillips, formerly rector of St. Lawrence's, Ludlow, Salop, died at Delhi on the 3rd inst.

"A Militia Subaltern" writes:—"A number of vacancies for Line commissions will shortly occur, on account of the number of officers who volunteered for service in the Egyptian Army. This would allow of the usual thirty commissions offered half-yearly to Militia officers being increased at the March Military examinations. Could not the Government, therefore, consider the advisability of doubling the usual number, and give an opportunity to many well-qualified gentlemen of entering the Line?"

THE VOLUNTEERS.

1st Surrey Artillery Volunteers. Their Serene Highnesses the Duke and Duchess of Teck honoured with their presence an afternoon performance held last Saturday at the Globe Theatre, in aid of the Shooting Fund of the G Baty. of this regiment, of which the Duke has been hon. col. for over 16 years. The piece selected was Byron's comedy, "Cyril's Success," the principal parts being played by members of the Apollo Dramatic Club. The acting of Lieuts. S. W. Tyler, J. P. Clayton, and E. C. Henning, and Messrs. Borrodale, Churchyard, and Hamilton-Knight was excellent; whilst that of Mrs. R. E. Tyler, Miss J. P. Clayton, and Miss Ridley added not a little to the success of the piece, eliciting warm and well-merited applause from a large and appreciative audience. The arrangements of the committee, with Lieut. Clayton as president and Mr. Dewsnap as secretary, were admirable. Mr. Brook acted as treasurer, through whose indefatigable zeal we are glad to hear the fund will be materially increased. This performance will be repeated on the 10th inst., for the benefit of the widow and children of the late serjeant-major of the regiment.

Tuesday's Gazette.

◆

ARMY.

WAR OFFICE, PALL MALL, January 30, 1883.

4th Surrey—Henry White Copus, gent., to be Qrmr.

1st Westmoreland—Capt. G. E. Moser resigns his commission.

1st Wiltshire—James Kelland, gent., M.B., to be Lieut.

2nd North Riding of Yorkshire—Lieut. J. H. H. Burton resigns his commission.

3rd West Riding of Yorkshire—Capt. T. H. Thwaites to be Major.

(Where not otherwise specified, the foregoing commissions and announcements bear date January 31, and the current year must be understood.)

MILITIA TRAININGS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—I was highly amused at reading the letter of your correspondent, "Dee," on the subject of "Militia Trainings." I am afraid that the ignorance he alleges the authorities are in as to what goes on at a Militia training, applies also to himself, for surely if he were aware of the real circumstances of the case, he could not, in all fairness, have written the letter he did. I have had the honour to belong to a Militia regiment for 20 years, and as far as my regiment is concerned, I beg to deny most emphatically that it is "playing the fool," as your correspondent so politely expresses it. If "playing the fool" means four parades a day, then I should not care to play at soldiers. The remarks as to my own regiment, I have no doubt apply with equal force to every other regiment in the Militia. Your correspondent seems to think that all the work done by a Militia regiment during the twenty-eight days' training consists in marching-past in open and quarter column at the double, advancing in review order, a sham fight, and peacocking through the town. He omits entirely all mention of spring or setting-up drill, musketry instruction, to say nothing of the form of the attack, which in my regiment is done every afternoon. As regards the Militia Artillery, I think it would be only fair to the adjutant of the regiment, and to the authorities, and to the public, that "Dee" should name the regiment in which the adjutant amuses himself by putting on and pulling off his spurs, and strapping and unstrapping his sabretache, which, by the way, is only worn on full-dress parades. I hope I have made it sufficiently clear that the remarks your correspondent "Dee" makes on the Militia are not founded on fact.—I am, &c.,

One who Knows.

Sir,—Your correspondent in last week's issue, who comments upon the manner in which Militia trainings are carried on, writes very much to the point, yet, oh, I wish I was a Militiaman! There are lots of us here (Dublin) who have been in India, South Africa, Egypt, &c., and to whom promotion cometh not; while our Irish "auxiliaries," whose regiments have not been called out for a long time, nor are likely to be, rise steadily and surely in rank, and take precedence in accordance as majors, colonels, &c., and all for imaginary services in a non-existent and mythical Militia.—I am, &c.,

T. Atkins.

Sir,—Your correspondent "Dee" has stated a few of the absurdities of these yearly farces, for, at least so far as the Artillery branch is concerned, I can safely say the greater part of the money they cost is simply thrown away; but it is not enough to point out the follies that are committed, without showing what remedies are possible. First, and above all, the regiments should never be trained in their county towns, where they are nearly always billetted in lodgings, which prevents any check on disorderly habits, and tends to make good men unsteady and bad men worse. Perhaps the authorities do not know, or are indifferent to, the lamentable want of efficiency resulting from this system, which in most cases has been perpetuated in deference to the wishes of the local authorities, whose only care in the matter is to have money spent in their town; and it is sometimes put forward, most erroneously, that the regiment would not be as popular with recruits if trained elsewhere. So far from that, I believe it would make it more popular. Young fellows like a little soldiering, which they can only get in camp or garrison. Artillery brigades in particular should be trained in the best garrisons they could be sent to, instead of being kept at infantry drill for four hours per diem, and about half a battery sent once a week for a couple of hours' practice at some distant fort—most of the day being occupied in going and returning—and frequently even that one practice may be lost through bad weather, or a sudden order for a swagger parade, perhaps a rehearsal of the battalion drill for the inspection, which I sincerely hope will soon be abolished for the Artillery Militia. All this infantry work would not be so bad if useful details were attended to, non-commissions officers taught their duty on guard, and the gunners able to turn out smart and soldierlike as sentries. I find I have exceeded the bounds I intended to put to my "firstly," and must postpone the rest.—I am, &c.,

M. A.

OFFICERING THE MILITIA.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—I am glad to see that in your last issue a correspondent, signing himself "A Militia Major," has called your attention and that of your readers to one reason which makes the Militia service unpopular with Line officers of any standing, viz.:—"The effect that the recent promotion of captains and majors of the Line to majorities and lieutenant-colonelcies has had in lowering the relative positions of Militia majors and lieutenant-colonels with regard to them, inasmuch as the Militia lieutenant-colonels suddenly find themselves junior to numbers of Linesmen, who, a few weeks ago, were majors; and, in the same way, Militia majors find themselves junior to hundreds of men who, but quite recently, were captains." I entirely endorse all that "Militia Major" says. My wonder is that this is about the first time that I have seen any note of complaint raised on the subject of the great injustice to which we have been subjected. At the time these promotions were being made, I called the attention of one or two Members of Parliament to the injustice which would be done to us if a similar organisation were not given to the Militia, and I got a friend to ask a question in the House of Commons on the matter. I am not aware that any other Militia officer has bestirred himself, or called the attention of the authorities to the unfairness of the step. Had a number of Militia officers done so, I cannot think that we should not have received consideration. We could do without the increase of pay very well, if they gave us our proper rank. Surely it is a great anomaly that, in a territorial regiment composed of four battalions, there should be one form of organisation for the two Line battalions, and an altogether different one for the two Militia battalions; that in the 1st and 2nd battalions a major is only a senior captain, while in the two other battalions he is a field-officer. As a Militia officer only ranks as junior of his rank when with Army officers, it is quite possible that if brigaded with a Line regiment, one of these days I shall find myself commanded by Line majors, whom as young officers of Militia I assisted to train, being then senior major of my regiment, the said Line majors not having been born when I first held her Majesty's commission in the Line. Surely this is hard on us, the more so as the Government have made promotion less rapid for us, by instituting the custom of giving a certain number of C.B.'s and K.C.B.'s to Militia colonels. No better stopper on promotion could have been devised, as every colonel now hangs on, expecting some day or other to attach the coveted letters, C.B., to his name.—I am, &c.,

A Major of Militia and Ex-Linesman.

EGYPT AND CENTRAL INDIA.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—The announcement in the *Standard* that the Khedive intends conferring upon the troops who took part in the late campaign a bronze star, reminds me that the Maharajah Scindia expressed his wish to confer a similar honour upon the Army under Sir Hugh Rose, in Central India, in 1878. These troops had been marching and fighting for six months, and the campaign culminated in the reinstating of Scindia upon his throne. Scindia's wish was opposed by the Indian Government, so that we did not receive the star. Had the Army of Central India been commanded by a Wolseley, doubtless it would have received the reward. The two campaigns cannot be compared with each other. In one real hard fighting took place, in the other it was a regular case of "skittles."—I am, &c.,

Central India.

HALF-PAY MAJORS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—It is now some months since the unfortunate Infantry regiments serving in Egypt received, as a rule, one half-pay major on augmentation. The question I wish to ask is,—Are those regiments, who, in this month's *Army List*, under heading "Majors (9)," are they always to have that number? or is the 9th to be absorbed, and the regiment to lose a step? If such be the case, it is most unfair, especially as some of the regiments have already supernumerary captains. Not all the regiments I see, though headed "9," have that number. The two infantry regiments sent home have each nine majors, are they to be different to all other regiments on home service? Surely, Mr. Editor, if ever there was a just grievance, this is one. I believe I am right in saying that all these half-pay majors took half-pay at their own request; their regiments received the promotion. Why, therefore, should regiments on active service suffer for other's benefits? I hope and trust that our new Secretary of State for War will see fair-play, and that justice is done to whom justice is due.—I am, &c.,

Quid Pro Quo.

ROYAL CAMBRIDGE ASYLUM for SOLDIERS' WIDOWS, KINGSTON-ON-THAMES.
Supported by Voluntary Contributions.
LADY-PRESIDENT.
H.R.H. the DUCHESS of CAMBRIDGE.
PRESIDENT.
H.R.H. the DUKE of CAMBRIDGE, K.G.
CHAIRMAN OF COMMITTEE.
General H.S.H. Prince EDWARD of SAXE-WEIMAR, K.C.B.
OFFICE—40 CHARING CROSS, S.W.

This Asylum was opened in February, 1854, to provide a home for the widows of non-commissioned officers and privates of the Army of not less than 50 years of age.

There are 65 widows in the Asylum.

Each widow has a furnished room, and receives seven shillings weekly, besides a monthly allowance of two shillings and sixpence for coals.

The House is capable of containing 70 widows, and the Committee appeal to the public for funds to enable them to admit the additional number, the present subscriptions being insufficient.

The funded income of the charity yields only £830, with an additional £50 from the Princess Mary's Fund for Nurses, to meet an estimated expenditure of £3,000 per annum.

An annual subscription of half-a-guinea or a donation of five guineas, entitles to one vote at each election, with the right of nominating a candidate.

J. A. STEWART, Colonel, Secretary.

EGYPTIAN WAR FUND,
NATIONAL SUBSCRIPTION FOR THE RELIEF OF THE FAMILIES OF THOSE KILLED, OR WHO HAVE DIED FROM DISEASE, AND ALSO OF THOSE SOLDIERS, SAILORS, MARINES, &c., WHO HAVE SERVED IN EGYPT, AND HAVE BEEN DISABLED BY WOUNDS OR SICKNESS.

PATRONS.
Her Most Gracious Majesty the QUEEN.
H.R.H. the Princess of WALES.
H.R.H. the Duchess of CONNAUGHT.
H.R.H. the Princess MARY ADELAIDE, Duchess of TECK.
H.R.H. the Prince of WALES, K.G., K.P., &c.
H.R.H. the Duke of EDINBURGH, K.T., K.P., &c.
H.R.H. the Duke of CONNAUGHT, K.G., K.P., &c.
H.R.H. the Duke of ALBANY, K.G., K.T., &c.
H.R.H. F.M. the Duke of CAMBRIDGE, Commander-in-Chief, K.G., &c.
H.S.H. the Duke of TECK, G.C.B.

The principles of application of the Egyptian War Fund are:—1st. To afford immediate assistance to the families of the killed on a scale which, though perhaps temporarily small, may yet prevent a great deal of suffering. 2nd. To afford such permanent assistance to the families of the killed, or to disabled men, by either direct aid to the sufferers, or grants of money to cognate institutions, as may seem best. All branches of the Service are eligible, the sole conditions being service in the Egyptian Expeditionary Force.

Subscriptions are earnestly requested. Remittances can be sent to Lady Jane Taylor, 16 Eaton Place, S.W.; or to Cox and Co., Craig's Court, S.W.

Applications for assistance to be made to the HON. SECRETARY, EGYPTIAN WAR FUND, New Buildings, Little Park Street, Queen Anne's Gate, London, S.W.

SPORTSMAN'S EXHIBITION.—Under the patronage of his Highness the Maharajah Duleep Singh, his Grace the Duke of Grafton, his Grace the Duke of Beaufort, K.G., his Grace the Duke of Rutland, K.G., his Grace the Duke of Hamilton, his Grace the Duke of Montrose, his Grace the Duke of Athole, his Grace the Duke of Portland, his Grace the Duke of Manchester, his Grace the Duke of Sutherland, K.G., his Grace the Duke of Westminster, K.G., and all the principal noblemen and gentlemen connected with Sport and Pastime throughout Great Britain and Ireland.

SPORTSMAN'S EXHIBITION.—AGRICULTURAL HALL, February 2, 3, 5, 6, 7, 8, 9, and 10, 1883, comprising every requisite in connection with Coaching and Driving, Hunting and Riding, Shooting, Racing, Coursing, Yachting and Aquatics, Bicycling and Tricycling, Fishing, Cricket, Athletics, Lawn Tennis, Billiards, &c.—Admission, 1s.

SPORTSMAN'S EXHIBITION.—AGRICULTURAL HALL, February 2, 3, 5, 6, 7, 8, 9, and 10, 1883.—Admission, One Shilling.—Manager, JOHN H. RAFFETY, Agricultural Hall. Secretary, HARRY ETHERINGTON, 152 Fleet Street, E.C.

SPECIAL NOTICE.
TO THE NOBILITY AND GENTRY.
WM. PUGH (many years coat-cutter at Messrs. Poole's, Saville Row) having succeeded to the old-established first-class business of Jackson and Co., 5 CORK STREET, BOND STREET, respectfully solicits the patronage of the Nobility and Gentry.

Best trade only, at fixed, fair prices, and 10 per cent. allowed for prompt cash.

N.B.—All first-class tailors give credit, and it is only by the discount system noblemen and gentlemen who pay cash get the full value ready-money entitles them to.

P. M. C.

ON account of Orders recently issued regarding Mess Expenditure, Messrs. PELLATT and CO. (formerly APSLEY PELLATT and CO., of Holland Street, Blackfriars—the original firm—established in the year 1759, by the father of the late Apsley Pellatt, Esq., M.P.), Falcon Glass Works and China Manufacturers, Manufacturers, by special appointment, to H.M. the Queen and the Royal Family, &c., Contractors to H.M.'s Government, the Lords of the Admiralty, the Indian Stores, &c., have decided on supplying all Regiments with their Manufactures on their wholesale-trade terms, which Prices are very much below those usually paid by Officers' Messes. This Firm have made Mess Contracting the speciality of their business for upwards of 150 years, and have, at the present time, upwards of 140 Regiments on their books, including the most prominent of H.M.'s Service. For the past 18 months, Messrs. Pellatt and Co. have obtained the commands of every regiment giving their orders on arrival home from foreign service, without a single exception. On receipt of patterns from any Regiment, Messrs. Pellatt and Co. return estimates for the exact matching of goods. Several Regiments have favoured us in this way of late, many being Native Indian Regiments, and the estimates returned have always shown such a great saving, as to secure the future commands and greatest satisfaction of the Mess.—All Communications and Patterns should be sent to the Offices and Show Rooms, addressed,

NOTICES TO CORRESPONDENTS.

ESPIONAGE.—Yes; you are quite right. You can write to us with the fullest confidence, as it is the etiquette of the Press never, under any circumstances, to give up the names of correspondents. The letters from "Captain, R.N.," "Midshipmite," and others, are standing over.

QUERY.—1. He certainly should not be mounted. 2. Spurs are only worn when the officer is mounted, never for dismounted duty, or in mess dress.

The ARMY AND NAVY GAZETTE this week contains four pages extra.

Tuesday's *Gazette* contains a long list of Unclaimed Soldiers' Balances.

ERRATUM.—Owing to a printer's error in our last week's issue, in the paragraph anent Lord Wolseley and total abstinence, on page 73, column 2, 19 lines from bottom, for we are "sure" to find, should have read "sorry" to find, &c.

Army & Navy Gazette.

LONDON, SATURDAY, FEBRUARY 3, 1883.

ESPIONAGE in the Navy is bringing forth good fruit. The tables are being turned. We publish this week disclosures which of themselves should be sufficient to ensure a thorough investigation into the administration of the Navy. They prove conclusively that Naval reform and reorganisation are necessary. When an officer of distinction asserts that, in his opinion, corruption is rampant in our Dockyards; when simultaneously with this declaration we receive a communication from a "Manufacturer," asserting that he has himself "bled like a lamb" under the knife of our Dockyard slaughterers; and when another officer of rank asserts that a civil servant of the Admiralty actually administered three coats of paint or anti-fouling composition to the copper bottom of a wooden frigate, for the sole reason that the said official was the agent of the manufacturer of the compound, we think evidence sufficient of corruption and maladministration has been adduced to ensure a demand for inquiry into the administration of the Navy being made by the taxpayers of the country. But when, in addition to all this, another Naval officer, in whose veracity we have the most implicit confidence, comes forward and assures us that an Admiral in command of a foreign station did traffic in live stock, using his flagship to bring his sheep to market, and then forced the contractor to purchase them, and incur a loss by the purchase,—the Admiralty becoming cognisant of the transaction, but not in any way interfering,—we feel assured that Englishmen will admit that their cup of bitterness is full, and "e'en past Baring." For years past the Navy has been gradually more and more monopolised by the ruling clique at the Admiralty. Nominations have been looked upon as the perquisites of their families and of their friends. For an Englishman to get his son into the Navy has become most difficult, if not impossible. The lists of the higher grades in the service are full, and remain so. The Lieutenants' List is in such a deplorable state, that it has attracted the attention of Vice-Admiral H.R.H. the Duke of Edinburgh, who, in his report to the Admiralty on giving up the command of the Naval Reserves, could not refrain from adverting to the subject. But from this list, overcrowded as it is, the Admiralty only select for promotion their own relations, friends, or officers whose families have interest with the Government. The professional officers of the Navy remain under-paid to enable the civil servants at the Admiralty to draw exorbitant salaries, as we last week demonstrated. When France has 135,000 tons of armour-clad ships on the stocks, to be completed by 1885, England, whose Navy costs her far more than that of France costs the Republic, has but 53,000 tons of armour-clads building. In a word, the money of the taxpayers, voted by Parliament for the maintenance of the Navy, is being frittered away by the Admiralty, owing to the corruption which pervades most of its departments; and the country will do well to demand a day of reckoning as soon as Parliament assembles, and to instruct the representatives of the people not to be satisfied with the evasive answers of officials interested in the maintenance of the existing state of things. What is required is a Select Committee, empowered to thoroughly overhaul the whole of the business of the Admiralty, to compare its working with that of private firms in matters of contract, and to draw up a report embodying recommendations which shall embrace the reorganisation of all branches of the service, and the reform of all abuses in the Navy.

We have reason to believe that, before long, regulations will be drafted that will make Regimental District Depôts really working establishments, and that the character and qualifications of officers will be estimated not so much by the smartness of their regiments or depôts, as by the number of recruits they have converted into really trained soldiers, and by the number of men they have sent into the Reserve. Of course, there are prejudices and ignorance to be combatted in doing this, but the present Adjutant-General has such implicit faith in the good-sense of the officers of the Army, if they are properly appealed to, that he thinks he sees his way to many improvements, and believes the Commander-in-Chief will be well seconded by all the thinking-men of the Army in carrying out such reforms as his Royal Highness may consider necessary.

We have good authority for knowing that Lord Wolseley has reported so strongly against the Commissariat and Transport of the Army, as at present constituted, that an influential Committee is about to be appointed for the purpose of considering the advisability of its immediate reorganisation.

We learn from Canada that Lieutenant-Colonel De la C. T. Irwin, R.A., Commandant of the School of Gunnery, Quebec, has been selected to succeed Major-General T. B. Strange, R.A., as Inspector of Artillery and Warlike Stores for the Dominion of Canada, with head-quarters at Ottawa. The command of the Schools of Gunnery at Quebec have been conferred upon Lieutenant-Colonels H. W. Cotton and C. E. Montizambert, who have served on the Staff of the Schools as Majors for several years.

Owing to the more satisfactory state of affairs in South Africa, the restrictions which have been enforced as regards the granting of leave to officers serving in the Cape of Good Hope and Natal, are, we understand, about to be withdrawn.

We notice in the *Gazette* of Tuesday last that Lieutenant C. B. Pigott, 60th Rifles, whose first commission as Second Lieutenant is dated February 19, 1879, being thus under four years' service, has been promoted to a vacant troop in the 21st Hussars, "on account of good service performed during the campaigns in Africa and Egypt." We have no reason to suppose that Lieutenant Pigott is not deserving of advancement; but why should this officer be transferred to another branch of the service, and promoted over the heads of dozens of officers who are still subalterns in the Cavalry, have far more service, and are in every way as deserving of succeeding to vacancies as they occur in the branch of the service in which they originally elected to serve? Why was Lieutenant Pigott not given a company in some Infantry corps, if his merits entitle him to special promotion? Lord Salisbury said, when Purchase was abolished, stagnation, tempered by jobbery, would be the result, which appears to be true. A slur has been passed on the subalterns of the Cavalry by this promotion, which we cannot but consider unjust, unmerited, and unpardonable.

Lieutenant-Colonel J. F. Stephens, late of the 39th Regiment, and who formerly, when in the 99th, served in the Anglo-Chinese Army under Chinese Gordon, has been appointed an Assistant-Commandant of Gendarmerie under Baker Pasha, with a salary of £550 per annum.

There is a rumour current to the effect that Quartermasters are to be permitted to enter the Army Pay Department. We cannot, however, give credence to the report. The War Office would hardly like to return to the old Regimental system, when, in spite of ample security, so many Paymasters became defaulters; especially now that the responsibilities of Paymasters are so largely increased, without any security being demanded; nor do we think for one moment that the Treasury would sanction such a scheme. Should the War Office, however, break faith with the combatant officers who have entered the Department, we do not see why they would not have a fair claim to get the whole of their Purchase-money returned to them.

We understand that Major Lord Gifford, V.C., late 57th Regiment, now Colonial Secretary of Western Australia, who was lately offered the Colonial Secretaryship of Gibraltar, has signified his intention of accepting this appointment, his military training giving him a special fitness for the position.

The following appointments have been made to the Staff of the Army of Occupation in Egypt, viz.:—Lieutenant-Colonel C. F. Clery, half-pay, to Assistant-Adjutant-General at Alexandria, to be Assistant-Adjutant-General at Head-quarters, vice Colonel F. W. Grenfell, A.D.C., appointed to the Staff of the Egyptian Army; Brevet Lieutenant-Colonel R. W. T. Gordon, 93rd Highlanders, to be Assistant-Adjutant-General at Alexandria, vice Colonel Clery; Captain C. F. Carey, 74th Highlanders, to be Brigade-Major, 2nd Infantry Brigade, vice Colonel Gordon; Captain W. F. Kelly, 35th Regiment, to be Deputy-Assistant-Adjutant-General for Musketry; Captain J. H. Banks, 7th Dragoon Guards, to be Brigade-Major, Cavalry Brigade, vice Brevet-Major Beckett, 3rd Hussars, invalided, and Lieutenant J. H. Aspinwall, 7th Dragoon Guards, to be Aide-de-Camp to Brigadier-General Arbuthnot, vice Captain Burke, 7th Dragoon Guards, resigned the appointment.

An important point has lately been ascertained by compulsorily removed Colonels, viz., the War Office have in their calculations assumed that all Colonels placed on half-pay on completion of five years' regimental command would remain on half-pay for the remainder of their service as Colonels, on £200 15s. a year, as "those to decide (the Commander-in-Chief) could not decide whether they would or would not be re-employed again." Hence the very erroneous calculations of the War-Office clerk, and the very insulting additions to pensions in compensation which have been made in some cases we have heard of, one being as low as £5 12s. per annum to a Colonel of 40 years' service, who paid £6,260 for his commissions, served four campaigns, and was twice badly wounded!

As H.H. the Khedive is to give a Star for the late campaign, it is to be hoped the ribbon will be "Egyptian" also, green or red, and not that of the Humane Society and Blue Ribbon Army, as stated.

A Distinguished-Service Reward is vacant, by the death of Major-General R. Carey, C.B.

Surgeon-General J. S. Furlong, M.D., Principal Medical Officer in Ireland, attains the age of 60 years on Tuesday next, when he will be retired. Deputy-Surgeon-General D. Auchinleck, M.D., will be promoted Surgeon-General to fill the vacancy.

With reference to our paragraph of Saturday last respecting the Inspectorship of Auxiliary Cavalry, which becomes vacant at York in April next, we hear that there has been great talk and speculation at the Military Clubs as to the fortunate candidate to be selected. We gave last week the names of those Cavalry Colonels on the Active Half-Pay List, according to seniority as Colonel. We have prepared a list this week showing the length of service of each officer and the time he vacated his regimental command, together with particulars of subsequent employment:—

	First Commission.	Half-Pay.
Col. H. H. Steward	April 12, 1850 ...	June 26, 1877
(Re-employed at Regimental District, Oct. 17, 1877, to Oct. 17, 1882.)		
Col. A. C. H. Stewart ...	Oct. 14, 1856 ...	April 10, 1878
" J. E. Swindley	Jan. 15, 1847 ...	April 29, 1879
(On half-pay from March 1, 1864, to Dec. 4, 1866.)		
" A. Nugent	Dec. 17, 1852 ...	June 21, 1880
" J. G. Graham	June 19, 1855 ...	April 10, 1881
" E. Harnett...........	June 2, 1848 ...	April 23, 1881
" Lord R. Kerr, C.B..	Nov. 24, 1857 ...	May 31, 1881
" W. E. Marsland......	Feb. 17, 1857 ...	Jan. 31, 1882
(Re-employed Remount Depôt, Cyprus, from Aug. 26, 1882, to Nov. 9, 1882.)		
" J. Gunter	Feb. 18, 1853 ...	March 7, 1882
" J. Fryer, C.B.	March 9, 1860 ...	Mar. 17, 1882
" J. K. Fraser	April 16, 1852 ...	July 21, 1882
(Re-employed on Staff, Aug. 10, 1882, to Nov. 16, 1882.)		
" T. W. Sneyd	May 2, 1856 ...	July 21, 1882
" T. Phillips	Sept. 26, 1856 ...	Oct. 31, 1882
" A. S. M. Browne ...	Nov. 18, 1853 ...	Nov. 24, 1882

From the above, it appears that two or three officers were lucky enough to obtain appointments within a very short period of their relinquishing the command of their regiments, in one case within that of a few days. If the terms of the Royal Warrant are strictly adhered to, the officers who will be in the running for this desirable appointment will be selected according to their seniority on the Half-Pay List, which has hitherto been invariably adopted as the practice in making selections for Staff employment.

Surgeon-Major T. R. Lewis, A.M.D., has been selected to succeed Surgeon-Major J. P. H. Boileau, M.D., as Assistant-Professor of Pathology at the Army Medical School, Netley.

The retirement of Major-Generals J. S. Lightfoot, C.B., and R. J. Feilden, C.M.G., and the death of Major-General R. Carey, C.B., place three more officers supernumerary to the Establishment on the Establishment, viz., Major-Generals G. B. Harman, Sir D. C. Drury-Lowe, and D. J. Baillie. There are now twelve supernumeraries to be disposed of.

The following is an extract from General Orders issued at Cairo:—"Officers are reminded that invitations from H.H. the Khedive should be treated as commands, and unless officers are unable to avail themselves of such, it is not necessary to reply." The idea of officers not being able to "avail themselves" of a command strikes an outsider as a somewhat original form of expression.

The extension of the period of service of General Sir Arthur Borton, Governor of Malta, from June next to June, 1884, would act most prejudicially to so many officers of the Army, that we trust the suggestion may not be acted upon. We say this with no desire to detract from Sir Arthur Borton's personal merits. We cannot, however, close our eyes to the fact that by allowing General Borton an extension of his term of office, the War Office would be doing a most serious injustice. Rules have been established by which general officers, after five years of unemployment, are compulsorily retired. The effect of General Borton remaining at Malta would be to keep some other deserving soldier out of the appointment. This would of course affect a number of officers, directly or indirectly, and cause them to be retired before they would otherwise have to go; and seeing that Sir Arthur Borton is already over age, and has been allowed to remain on the Active List as a special privilege, it is only right that he should retire, when the period of his appointment expires, in strict accordance with the terms of the Royal Warrant. If he was under age, we should feel disposed to recommend that he should be given the extra year. As it is, his retention would be such an injustice to the General Officers as a body, that we cannot think that such a step can have been seriously contemplated.

The Navy.

◆

ADMIRALTY, January 26, 1883.

In accordance with the provisions of her Majesty's Order in Council of February 22, 1870, the under-mentioned officers have this day been placed on the Retired List of their ranks:—Captain Richard Bradshaw, C.B., and Commander Spencer Mansel Medley.

ADMIRALTY, January 27, 1883.

Deputy-Inspec'or General of Hospitals and Fleets Thomas Colan, M.D., has been promoted to the rank of Inspector-General of Hospitals and Fleets in her Majesty's Fleet, with seniority of January 25, 1883.

APPOINTMENTS.

Captain—Hilary G. Andoe, to the Pembroke, additional, for the Orontes.

Commander—F. A. Sargent, to the Clyde.

Lieutenants—S. A. Hungerford, to the Hibernia; Robert C. Evershed, to the Curaçoa, recommissioned.

Sub-Lieutenants—Philip B. Tyrwhitt, to the Agincourt (supernumerary); G. Barton, to the Achilles (supernumerary); Alexander L. Duff, to the Minotaur (supernumerary); Ernest C. T. Trowbridge, to the Northumberland (supernumerary).

Midshipman—Reginald H. S. Bacon, to the Royal Adelaide (supernumerary).

Chaplain and Naval Instructor—Rev. Ebenezer T. Fyffe, to the Sapphire.

Surgeons—James S. Wray, to the Euryalus, additional; Henry S. Jackson, to the Orwell.

Paymaster—Edward S. M. Power, to the Pembroke, additional, for the Orontes.

Engineer—R. J. W. East, to the Cambridge, additional, for the Bulldog.

Clerks—George Chalmers, to the Agincourt; James A. Clarke to the Belleisle.

Gunner—D. J. O'Connell, to the Vernon, as instructing gunner.

Cockchafer, Lieut. and Com. H. Hill, is to have a five days' trial in the Channel, and conclude with full-speed trial, before leaving for the China station.

Condor, Com. Jeffreys, will probably leave Malta early in February for Alexandria.

Espoir, Lieut. and Com. E. H. Gamble, was completed on Friday, and is now ready to start for her station.

Euryalus, Capt. Hastings, C.B., flagship of Rear-Admiral Sir William Hewett, V.C., was at Trincomalee, by last accounts. The Commander-in-Chief intends being at Calcutta on the anniversary of the Queen being proclaimed Empress of India, with several ships of the squadron, to make an imposing naval demonstration, provided cholera does not prevail.

Fly, Com. John Hope, was at Hong Kong on Jan. 30. The collision in the China Sea on Oct. 30 between the Fly and the American ship Sea Witch, the damages for which were settled by arbitration at Singapore, has been made the subject of a court-martial. Lieut. Knowling, of the Fly, who was in charge of the vessel at the time, Com. Hope being below, was charged with having hazarded the vessel by default. The court assembled on board the Victor Emanuel, and was composed as follows:—Capt. G. Robinson, Encounter, president; Com. Evans, Lily; Com. Hotham, Kestrel; Com. Jones, Victor Emanuel; Lieut.-Com. Lindsay, Vigilant; judge-advocate, Mr. W. W. Perry, Admiral's secretary. After hearing the evidence of Com. Hope and of the seamen on deck at the time, and Lieut. Knowling's defence, the court was cleared, and after a long private consultation, was opened, when the president said,—"The court find that the charge against the prisoner is proved, and adjudge him to be reprimanded." Full details next week.

Inflexible, Capt. Seymour, is cruising with the Invincible on the coast of Sicily, and is expected at Malta on or about Feb. 4.

Invincible, Capt. R. H. Molyneux, C.B., has arrived in the Bay of Naples from Malta.

Iron Duke, Capt. St. John, late flagship on the China station, arrived at Port Said on Saturday last, and proceeded on Sunday, *en route* home from China.

Lively, Com. F. R. Boardman, is ordered to take Admiral Lord John Hay, the new Commander-in-Chief of the Mediterranean Squadron, to Malta on Feb. 8. Admiral Lord Alcester, G.C.B., will return to England in the Lively.

Northampton, Capt. Digby, flagship of Vice-Admiral Sir J. E. Commerell, K.C.B., V.C., Commander-in-Chief on the North-America and West Indies station, was at Jamaica on Jan. 31, and would sail on Feb 1. The Tenedos, Fantôme, and Flamingo were with the flag. The Urgent was at Bermuda, waiting for the Dido to tow her to Jamaica. The following is the programme of the Commander-in-Chief's movements:—The Admiral will reach Port-au-Prince on Jan. 12, Nicholes Mole on Jan. 16, Puerto Rico on Jan. 19, and St. Kitts on Jan. 21, Antigua and the Leeward and the Virgin Islands on March 1, St. Thomas on March 14, and Bermuda on March 20.

Northumberland, Capt. Bosanquet, while making her steam trial off Plymouth Sound, on Thursday, collided with the Russian schooner Secundus, 289 tons, from Tarragona, for Cardiff, in ballast. The latter lost her jibboom, head gear, and topgallant-mast, and was towed into the Sound to repair damages.

Penelope, Capt. St. George C. D'Arcy Irvine, C.B., has arrived at Sheerness from Harwich, for the purpose of undergoing a thorough overhaul and repair, in readiness for her annual cruise with the Naval Reserve Squadron, of which the remaining ships have been ordered to their respective dockyards to refit.

Sapphire, Capt. Fullerton, is to go out of dock on Monday. She will leave Plymouth on Wednesday, for the preliminary trial of her machinery.

Sultan, Capt. Walter Hunt-Grubbe, K.C.B., has been docked at Malta, when it was ascertained that pieces of her bilge keel had been knocked off when she touched on an unknown reef off Aboukir Bay. She was to be undocked on Jan. 31, and will proceed for Gibraltar on or about Feb. 5.

Superb, Capt. Thomas Le H. Ward, C.B., arrived at Malta on Jan. 29.

Swiftsure, Capt. Aitchison, flagship of Rear-Admiral M. Lyons, Commander-in-Chief in the Pacific, was at Callao on Dec. 27; was to leave on Jan. 8 for Payta, Galapagos, Honolulu, and Esquimault. The Comus was at Vancouver on Dec. 22, was expected at Payta on Jan. 25, and will remain on the coast of Peru. The Thetis, which was at Valparaiso on Dec. 16, will remain on the coast of Chili until relieved by the Constance. The Gannet was at Coquimbo on Dec. 19, and will remain on the coast of Chili till relieved by the Heroine. The Mutine, on passage to Honolulu, will await the arrival of the Swiftsure there, and then proceed to Esquimault. The Kingfisher will remain on the coast of Peru. The Sappho, at Callao, was about to proceed to Panama. The Rocket, at Iquique on Dec. 13, is on passage to England. The Sylvia is still at Sandy Point, surveying the Straits of Magellan.

Thalia, Capt. Brackenbury, C.M.G., arrived at Port Said on Friday, Jan. 26, and left the following day for Suez, *en route* to Zanzibar.

Temeraire, Capt. Nicholson, C.B., was to leave Malta on Jan. 29 for Corfu.

Warrior, Capt. E. S. Adeane, Coastguard ship at Greenock, is ordered to Portsmouth to refit.

THE RUSSIAN ARAL FLEET.

Gen. Tchernayeff has signed the order for the abolition of the Aral Fleet, and for the future the Russian Naval arm will no longer be represented in Central-Asian waters. The Aral Fleet is associated with the most stirring period of the conquest of Turkestan, and at one time excited considerable controversy and alarm in this country. Its career may be said to have commenced in 1847, when a couple of two-masted schooners, the Nicolai and Michail, were conveyed in sections from Orenburg to Aralsk, a point on the Syr Daria, near the Aral Sea, occupied the same year, and were sent down the river to survey the sea. The following year, a larger vessel, the Constantine, was placed on the river, and Lieut. Butakoff—who died a few months ago at St. Petersburg—effected a complete survey of the Aral. This showed an advance upon Khiva across the sea to be impossible, on account of its shallowness, and accordingly the Russians turned their attention eastward, towards Bokhara, seeking to attain its border towns by means of the Syr Daria. In 1850, two steamers were launched at Aralsk—the Perovsky, 107 ft. long, and of 40 horse-power, armed with one 4-pounder and two 9-pounder howitzers; and the Obrutcheff, a screw iron barque, of 12 horse-power, 70 ft. long, without any armament. Both were constructed in Sweden, conveyed by railway in sections to Samara, and thence on the backs of camels to Aralsk, where they were put together by Swedish mechanics, and launched in 1853. Before long it was found that the Perovsky drew too much water for the shallow Syr Daria, while the engines of the Obrutcheff were too weak for its powerful current. Accordingly, in 1860, an order was given to the Windsor Works, Liverpool, for the construction of two new steamers of corrugated iron, with flat bottoms, and paddles in the stern; one, the Syr Daria, to be of 20 horse-power; and the other, the Aral, of 40 horse-power. The Syr Daria was 80 ft. long, and carried one 9-pounder howitzer; and the Aral, 105 ft. long, was armed with two 9-pounders. These were launched in 1862, but from faulty design were found to be of very little use, and had to be almost reconstructed on fresh lines at Aralsk. In company with these two vessels, arrived from Liverpool a corrugated-iron floating pontoon dock, a barge, and six iron shallops, followed by three iron barges from the Volga. Two years later, Tchernayeff having stormed Tashkent, at the head of the navigable section of the Syr Daria, the river flotilla was increased by the Samarcand, 150 ft. long and of 70 nominal horse-power, constructed by Cockerell, in Belgium. In 1870, the Tashkent, 105 ft. long and of 35 nominal horse-power, was conveyed from the Volga to the Syr Daria, and the Aral Fleet attained its full proportions; consisting of six steamers, ten barges, and 33 iron ferry and transport boats, of various dimensions. The personnel comprised 15 officers, 15 engineers, 322 seamen, and 275 riflemen. For several years it rendered great assistance to the Government in connection with the conquest of Bokhara and Khokand. Troops and stores for the expeditions were conveyed in waggons or on camels from Orenburg to the Aral, where they were shipped and towed up the Syr Daria to the various forts, terminating with Tchinay, near Tashkent. In 1872, the Aral Fleet was of great value in transporting munitions of war to Tashkent for the Khivan expedition. In connection with this, the Tashkent was sent across the Aral to the Oxus, to maintain communications with the column operating from the Caspian; but, running aground, all its crew were massacred by the Khivans. After the fall of Khiva, the shallows near the city were deepened, and the steamer Samarcand was placed on the Oxus, where she ran for several years, conducting surveying operations right up to the Afghan outposts. This may be said to have really closed the career of the fleet. Turkestan being conquered, no further need existed for its armaments, which were consequently placed in store at Kazala, and up to last year the vessels were solely used for transport purposes. The Samarcand having foundered during the ice-flow in the Syr Daria, and most of the other steamers being worn out, even this duty could no longer be performed by them. Simultaneously with this, corruption developed itself in the service, and when Tchernayeff passed Uri Kazala a few months ago he placed all the officers under arrest, broke several of them, and ordered the crews to return to Russia forthwith. In this manner ended the career of a fleet which had cost £63,000 to establish, and £15,000 a year to maintain. For the future, the transport service on the Syr Daria will be managed by a State-aided company, which will create a fresh flotilla, and work it on strictly commercial principles. This will be of no political importance until Russia occupies Bokhara and dominates the upper Oxus, which Tchernayeff has announced his intention of doing as soon as the present Emir of Bokhara dies. This event may shortly be looked forward to. In that case, the presence of Russian steamers in close proximity to Balkh, Maimene, and other outposts of Afghanistan will give Russia supreme influence to the foot of the Hindoo Koosh, unless British power be greater at Cabul than it is to-day. But the Russian steamers will hardly ever achieve the task for which the Aral gunboat fleet was founded,—to co-operate in an expedition against India by conveying troops up the Oxus, or ferrying them across it. The road of invasion lies to-day through Askabad and Herat, not Samarcand and Cabul, and hence the importance formerly possessed by the Aral fleet has been transferred to that of the Caspian.

THE MURDER OF PROFESSOR PALMER AND PARTY.

Information has been received from Suez that Col. Warren reports from Wady Sudr on Jan. 24 that a portion of Capt. Gill's journal had been discovered completed to Aug. 8, also official correspondence, a leaf of Professor Palmer's note-book, and Lieut. Charrington's journal dated Aug. 9, scattered over many miles of desolate waste. Vestiges of looted baggage, including two Naval swords, had also been found. Funeral service had been read at the place where the murder actually occurred, in the presence of Col. Warren's party and Mr. and Miss Charrington. Col. Warren further states that he was erecting, on a conspicuous hill overlooking the spot, a cairn 15 feet high, surmounted by a wooden cross, as a temporary measure, presented by Miss Charrington. Col. Warren adds that he had visited Bedouins of various tribes, and reassured them that the guilty alone will be proceeded against. They were quite quiet. He expected shortly to return to Suez.

ESPIONAGE IN THE NAVY.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—I was very much pleased with your leader about the Clyde court-martial. When all other papers were hounding down the unfortunate victim, you said all that could be said in his favour. He had, it is true, allowed things to drift into a very slack state on board the Clyde, and he was let in by a rascally gunner. It is very generally hoped throughout the service that something may yet be done to mitigate his severe sentence, especially as it is notorious that proceedings almost identical have been carried on by the highest authorities; while in our Dockyards, I am perfectly certain that the grossest corruption prevails.—I am, &c.,

Rear-Admiral.

Sir,—I had occasion to visit the Admiralty recently, and found that the letters you have published regarding their Lordships encouraging espionage in the Navy have produced some considerable effect, especially among the civilian element. There is no doubt that, provided you stick to it, you will be placed in possession of many interesting details of events as yet undreamt of by the public, but well known of at Whitehall.—I am, &c.,

C. B.

Sir,—I consider it to be the duty of every Naval officer to rally round you, and support your endeavours to secure the abolition of espionage in the Navy. To the pure, all things are pure. But the Admiralty is so impure, that its officials, seeing nothing but fraud in those around them, think the same state of things exists in the service afloat. Or is it that they hope to turn the attention of the public in the wrong channel, that they so persistently cry, "Wolf, wolf!" when actually in the wolf's lair? I remember well a ship being fitted out at one of our dockyards to act as a storeship on a foreign station, when much surprise was occasioned by the authorities giving the copper bottom three coats of anti-fouling composition! I found out, on inquiry, that an official in the yard, and a relation of his elsewhere, were agents for the manufacturers!—I am, &c.,

Paymaster.

Sir,—The Navy should be administered by men *sans peur et sans reproche*, not by men who, while exacting payment in full and compensation besides for losses incurred by themselves in the discharge of the public service, decline to admit similar claims, however just, except when they emanate from their own friends. Then, again, our Naval rulers should be men who have the courage to enforce obedience even among those officers on active service of their own rank. Some time ago, the Commander-in-Chief of a foreign station filled his ship up with a cargo of sheep, where mutton was cheap. These he took to another part of the station, and sold at his own price to the firm who contracted to supply the Fleet. The contractor actually lost by the transaction, but he bought the sheep, rather than lose his contract. The Admiralty were made aware that this took place, but winked at it. They are very blind, indeed, when it suits their convenience.—I am, &c.,

Royal Navy.

Sir,—As a fit of virtuous indignation has overtaken the Admiralty anent corruption in the Navy, perhaps they will stamp out the excrescence, first at Whitehall and in the Dockyards, before trying their 'prentice hand at private espionage afloat. Contractors to the Admiralty complain bitterly in private at the "black-mail" levied on them by Admiralty officials. Not a manufacturer but has to pay it. I myself have had to fee the Dockyard hands, to make sure of their work being properly done. They asked me for the money, saying, "It is hard enough to have to work for the Government at Government work, for such small pay; but we do not see why we should do extra work, to let an outsider make money, and get nothing extra ourselves." There was so much justice in this, that, knowing how hardly the Admiralty treat their subordinates, "I bled like a lamb." But it is not right, and it is the fault of the Admiralty.—I am, &c.,

Manufacturer.

ROYAL NAVAL ENGINEERS.

We have recently come across an old Admiralty Order in Council which should possess considerable interest for the Committee which, under the presidency of Sir Thomas Brassey, K.C.B., is now reported to be investigating the condition of the professional staff of the Admiralty and Dockyards, with a view of establishing them on a sounder and more efficient basis. The Admiralty Order is dated May 13, 1835 (nearly fifty years ago), and reads as follows:—

> "Whereas, since the introduction of steam-vessels in your Majesty's service, it has been found necessary to increase gradually this description of vessel in numbers, size, and power, in consequence of the various services which they are required to perform, whether as an armed force, capable of opposing those in use by foreign Powers, or to serve as packets at home and abroad, or for towing ships in or out of harbour; and whereas, the numbers that are required for these and other important purposes can only be kept up at very considerable expense—as well in their original cost as in frequent repairs of the machinery—the estimates for which can only be controlled by some person well skilled in the knowledge of every part of such machinery, we humbly submit, &c., that a Chief Engineer and Inspector of Machinery be appointed, at a salary of £650, equal to that of a Master Shipwright."

For about thirty years after this, the Shipwright and Engineer officers in the service held equal rank and status, and received equal emoluments. Then, however, in consequence of certain dominant influences at Whitehall, the Engineer Department began to be crushed down, and its interests subordinated, until at one period it appeared likely to be improved out of existence. The office of Chief Engineer of the yard was abolished, and an assistant appointed, who was subordinate to the Shipwright officer, then dubbed Master Shipwright, Engineer, and Storekeeper. This assistant had to carry out the details of the engineering work, for, unfortunately, steam-engines were still necessary evils in the construction of a steam navy, and the addition of the word "Engineer" to the title of the Shipwright officer, though giving control, did not carry engineering knowledge with it. This system, however, as may be readily imagined, was found to be so unsatisfactory and inefficient, that those who were responsible for the efficiency of the Navy forced an alteration. In 1875, therefore, the office of Chief Engineer was again established, but the subordination of ten years had produced the usual effect. There were no engineer officers of rank and influence remaining to make their opinions known and respected, so that the reorganisation was carried out almost entirely under the auspices of shipwright officers who held all the chief posts under the Admiralty. The consequence was that the Master Shipwright of the yard was given the vague and indefinite, though high-sounding, title of Chief Constructor, with a salary increased to a maximum of £850, whilst the newly-appointed Chief Engineers commenced at the absurdly low salary of £500, to rise by annual increments of £20 to a maximum of £650. The present salaries of the Chief Engineers of the Dockyard are considerably less than they would receive if they were performing ordinary duties afloat as Chief Engineers of flagships, where no Inspector is borne. We do not think the salaries of the Shipwright Department are too high; but surely, if a Chief Engineer in 1835 was worth £650 per annum, he certainly must be worth much more now; but, although the duties and responsibilities of the office have increased to an enormous extent, the salary of the office has been unjustly and unwisely diminished. How can we expect to get good men on such terms? Is it any wonder that we hear of so many mishaps and breakdowns, of priming boilers and inefficient machinery, when the whole of the Engineer Department is thus snubbed and kept down and practically ignored? A senior dockyard clerk who has no responsibility can rise to a maximum salary of £500, the same as that paid to the Chief Engineer of our largest dockyards on appointment, whilst if the clerk gets to be promoted to storekeeper he rises to £700 per annum. The Engineer Department is the only one in which the salaries have been reduced, as the following table, giving the relative salaries of certain dockyard officers, will clearly show:—

SALARIES IN 1860.

	Portsmouth.	Devonport.	Chatham.	Sheerness.	Woolwich.
	£	£	£	£	£
Master Attendant	480	480	480	480	480

2nd do. do.	250 to 350	250 to 350	—	250 to 350
Storekeeper	600 to 700	600 to 700	500 to 600	500
Chief Clerk	350 to 500	350 to 500	350 to 500	350 to 500

It needs no words from us to emphasize the injustice of such a state of affairs. The table tells its own tale clearly enough. We do trust, however, that the Committee will set these matters right. The efficiency of the Navy does and must of necessity depend on the condition of the machinery, and it is necessary that proper people should be obtained and retained to superintend and manage it. A few hundreds saved in salaries will be dearly paid for at the expense of thousands wasted in the purchase and repair of imperfectly designed or managed machinery. The total sum spent on the purchase and repairs of the machinery of the Fleet is not less than one million sterling annually, and it is evident to all who have a knowledge of business matters that the officers responsible for this expenditure should be highly qualified and well paid, in order that the country may be sure that this large sum of money may be spent in the most advantageous, efficient, and economical manner.

Reviews.

Egypt. By Baron de Malortie. (William Ridgway.)
[SECOND NOTICE.]

According to Baron de Malortie, the reign of Ismail can be summed up in one sentence,—"Great projects, great results, and great expenditure." On his accession to power, it became imperative to cast aside the ruins of Mehemet Ali's work, and recommence everything afresh. Discontent prevailed throughout the kingdom, and what has been termed by the commentators of the period an "almost crushing" task awaited Ismail Pasha, "le grand dilapidateur." His reign was remarkable in many respects, most so in the facts that, during its progress, the settlement of the succession and the establishment of primogeniture became accomplished, and greater still, the Suez Canal was completed. On the other hand, the people were encumbered by a gigantic debt, but still one the creation of which may be defended on many substantial grounds. As the author justly observes, whatever might have been his errors, he had made every effort to remedy his own mistakes. He gave up his private property, and even his throne, to facilitate a liquidation. And after all this sacrifice, what was it? Not only an iniquity, but also a political blunder As Baron de Malortie puts it, the international liquidators, before acting as they did, ought to have considered whether an Eastern country can do without the prestige of the master, and whether the financial genius of the Occident could replace the authority of "Effendina." The great merit in Ismail's reign was that he placed on sure grounds the succession in tail male, and thus preserved the kingdom from being convulsed by the intrigues of pretenders. The second important act of his reign was that of having obtained administrative autonomy, freeing Egypt once and for ever from the fatal interference of the Porte in her internal affairs. These were huge achievements, accomplished by the dint of perseverance and by the lordly indifference with which the Khedive regarded expenditure; but, unfortunately, he panted to gain further victories, to establish countless reforms which were calculated to benefit his country, and, in hastening to clutch them, stumbled and fell. The author here recapitulates and comments on the strenuous efforts made by Ismail to ensure for Egypt security of person and property and equality before the law, and also to raise the standard of the population, by means of public instruction. Having done so much, it became incumbent on him to crush the infamous slave traffic, which was openly carried on throughout the length and breadth of the kingdom. He determined to root it out with a strong hand, and made the most strenuous efforts to effect this object, quite regardless of the enormous expense it entailed upon his exchequer, and also regardless of the risk to his popularity amongst his own subjects which he knew must ensue. The small measure of success which attended his efforts towards carrying out his humanitarian views is made apparent, by the fact that notwithstanding the efforts of Baker, Gordon, and General Conte della Sala, not one of them could do more than check the evil at a given point, and close certain tracks, whilst all three admitted that it is impossible to stop the supply, so long as the demand for slaves is countenanced in the Ottoman Empire and in Egypt. Having reviewed what may be called the social and moral reform, the author draws attention at considerable length to the material improvements undertaken by Ismail, adding some interesting observations as to the extension of the territory for which he has been so loudly denounced. Before concluding the portion of his work which relates to Ismail, Baron de Malortie observes that it would be impossible to overstate the humanitarian object to which the Prince of Wales has certainly the merit of having given an impulse during his stay in Egypt. The final arrangements concerning Sir Samuel Baker's appointment and expedition were, we learn from Dr. Russell's "Diary in the East," entirely due to the initiative of his Royal Highness; while the good effected by Sir Samuel, by Colonel Gordon, and subsequently by Gessi Pasha, who died a victim to the cruel climate, are beyond all controversy. It is also to be remembered that Ismail, who was denounced, as stated by M. E. de Léon, in his interesting work, "The Khedive's Egypt," was not prompted in his course by purely philanthropic considerations; but that he contemplated a most material result, in the form of opening new fields for the commerce of the world. Few, if any, of those who have studied with impartiality or bias the reign of Ismail in Egypt will hesitate to admit that if he has made mistakes, he has suffered heavily for them; and that though he were unsatisfied in getting, he was ever most princely in bestowing.

(To be continued.)

ARMY NOTES.

Referring to the fact that the Bombay Army is still short of its complement of subalterns, the *Pioneer* says:—"Not only are officers in British regiments in that Presidency no longer permitted to apply for the Bengal Staff Corps, but a certain amount of touting is going on in Bengal with the object of showing intending probationers the great advantages of the Bombay Army. We are afraid, however, that it will be rather a shock to local sentiment to find that it is being notified in district orders in this Presidency that in future, on all applications for the Bengal Staff Corps it must be certified 'that the candidate has been offered and declined appointment to the Bombay and Madras Staff Corps.'"

"We [*Evening News*] have very good reason for believing that in the next issue of 'Dress Regulations' there will be a uniform for Reserve Officers. The exact details are not yet known, but it will probably be a kind of unattached uniform. This means for cavalry officers joining the Reserve that on retiring they must provide themselves with a new kit, if they wish to appear as soldiers at the Court of their Sovereign; and that if they are afterwards employed in their own arm of the service they must then provide themselves with cavalry uniform."

The *Times*' correspondent at Cairo telegraphs:—"The British sentries were removed from all the Palaces in Cairo on Monday, and their places were taken by Egyptian soldiers. The English guard was never more than a formal sentry at the Palace door, necessary for the sake of appearance, until native soldiers were obtainable. His Highness's ordinary personal guard has been throughout unchanged."

The *Standard* says:—"The Field-Marshal Commanding-in-Chief has appointed Gen. Prince Edward of Saxe-Weimar, K.C.B., to command the troops at the Review of Volunteers at Brighton on Easter Monday, March 26, forming the force of defence; and Major-Gens. G. W. A. Higginson, C.B., and M. G. Newdigate, C.B., to command one each of the two opposing forces to be employed in the operations. The selection of the various adjutants, aides-de-camp, and quartermaster-generals to accompany them will be left to the discretion of the above officers."

At the meeting of the general committee of the Empire Club, held on the 1st inst., at the Club House, Grafton Street, a large number of candidates were up for ballot. Amongst those elected were the Earl of Derby, K.G., &c.; Lord Stanley of Alderley; Admiral the Earl of Clanwilliam; Gen. Lord Wolseley, G.C.B., &c.; the Master of Elphinstone; the Earl of Northbrook, First Lord of the Admiralty; Rear-Admiral H.S.H. Count Gleichen, &c. The next election will take place on the 15th inst.

Their Royal Highnesses the Prince and Princess of Wales have graciously consented to be present at a grand military assault-at-arms, on April 16, in the Royal Albert Hall, which will be given by Lieut.-Col. Cleather, inspector of gymnasia, and the gymnastic staff of the Army under his command, by permission of H.R.H. the Field-Marshal Commanding-in-Chief, in aid of the Egyptian War Fund for the relief of the sick and wounded during that campaign. Lieut.-Col. Cleather is endeavouring to induce Lieut. Victor Balk, and the officers and members of the Swedish Gymnastic Club, who in July last gave him and his staff such a hospitable reception during the visit of the English military gymnasts to Sweden, to visit England for the occasion, when it is to be hoped the Government will assist in the reception and entertainment of the gallant Norsemen.

A new club—the Vine—has just been started, under most favourable auspices, on a double basis:—First, as a non-political society of gentlemen; second, to enable its members to obtain for their home consumption wines, spirits, and liqueurs, at the actual wholesale cost price. The proprietors are gentlemen of great experience in the wine trade, and from their long connection with the shipping and wholesale houses, are in a position to purchase wines, &c., on terms that only wine merchants of the highest standing can command. All working expenses, &c., being covered by the annual subscriptions, members will through the Club obtain for their own home consumption, wines, spirits, and liqueurs, at actual wholesale cost price, as invoiced to the proprietors. Thus any member consuming, say, only £20 worth of wine per annum will, in addition to enjoying the advantages of a good club, virtually receive back his subscription, by the saving of the profit he would otherwise have paid to the supplier, in the ordinary course of trade. To large consumers, the gain will be proportionately greater.

"TIME TRIES ALL THINGS."—Of the numerous preparations announced for promoting the growth of the hair few survive, even in name beyond a limited period, whilst ROWLAND'S MACASSAR OIL, with an unparalleled reputation of more than 80 years, is still considered by the public to be the best and safest preserver and beautifier of the hair ever yet produced. They who prefer it can now have the oil of a golden colour, without in any way losing its beneficial effects. Sold everywhere. Sizes, 3s 6d, 7s, 10s 6d, and 21s.

There is reason to believe, the *Daily News* says, that Gen. Sir Arthur Borton, Governor and Commander-in-Chief at Malta, will be granted an extension of his period of service until June, 1884. In the ordinary course of events, he should have retired in June of the present year.

STIMULANTS and insufficient amount of exercise frequently derange the liver. ENO'S FRUIT SALT is peculiarly adapted for any constitutional weakness of the liver. A world of woes is avoided by those who keep and use ENO'S FRUIT SALT.—"All our customers for ENO'S FRUIT SALT would not be without it upon any consideration, they having received so much benefit from it.—WOOD BROTHERS, Chemists, Jersey, 1878." CAUTION.—Legal Rights are protected in every Civilised Country. Examine each bottle, and see the capsule is marked "ENO'S FRUIT SALT." Without it, you have been imposed on by worthless imitations. Sold by all Chemists, price 2s 9d and 4s 6d. Directions in Sixteen Languages, how to Prevent Disease. Prepared only at ENO'S FRUIT SALT WORKS, Hatcham, London, S.E., by J. C. ENO'S Patent.

We learn from India that, in consequence of the late reduction of one cavalry regiment of the Punjab Frontier Force, the duties at Kohat and Edwardesabad will be given to one regiment, which will have its head-quarters at the latter place.

It is stated that in future field officers of the Indian Army granted furlough to Europe on private affairs will not be allowed any extension of leave, except with the previous consent of the Government of the Presidency to which they belong.

"SAPO CARBONIS DETERGENS" is a physician's name for a remedy prescribed for the past quarter of a century for every variety of skin disease. The public have also adopted the same, as a preventive of small-pox, scarlet fever, and measles. Purchasers should see that the Latin brand is on every tablet, and WRIGHT'S COAL TAR SOAP on each wrapper, without which none is genuine.

An Indian good-service pension has been conferred upon Col. J. Michael, C.S.I., Madras S.C., Secretary to the Government of Madras, Military Department. Col. Michael has performed valuable service for the Government of India, and was attached to the staff of H.R.H. the Prince of Wales during his Indian tour.

The weekly health returns show that 1,440 officers and men are sick, out of a total British force in Egypt of 12,976. This marks a general improvement in every corps, though the Cavalry still have over 20 per cent. and the Artillery over 14 per cent. of their number in hospital.

MEMORIAL BRASSES.—Messrs. JOHN HARDMAN and Co., who pay special attention to Military Brasses, have lately executed for her Majesty the Queen several important works for St. George's Chapel, Windsor. Designs are prepared for approval, with estimate of cost. —Offices, 13 King William Street, Charing Cross.

BIRTH.

VAN STRAUBENZEE.—On Jan. 3, at Meerut, North-West Provinces of India, the wife of Lieut.-Col. Van Straubenzee, C.B., Royal Horse Artillery, of a daughter.

MARRIAGES.

COLE—MCCLINTOCK.—On the 1st inst., at St. George's, Hanover Square, by the Rev. F. E. H. Payne, M.A., Captain F. B. O. Cole, late the Royal Fusiliers, to Maria, widow of the Rev. Robert Le Poer McClintock, Rector of Castle Bellingham, Ireland.

HANBURY—SANDES.—On the 30th ult., at St. Mary's, Wimbledon, by the Rev. W. Smartt, B.D., nephew of the bridegroom, assisted by the Rev. C. J. Meade, Vicar of St. Jude's, Peckham, Ingham Hanbury, Fleet Surgeon, C.B., R.N., to Josephine, youngest daughter of George Sandes, Esq., J.P., Listowel, County Kerry, Ireland.

Advertisements.

IF H. THOMASON will at once communicate with his Parents, it will be to his advantage.

HOLLOWAY'S PILLS.—WEARY OF LIFE. —Derangement of the liver is one of the most efficient causes of dangerous diseases, and the most prolific of those melancholy forebodings which are worse than death itself. A few doses of those noted Pills act magically in dispelling low spirits, and repelling the covert attacks made on the nerves by excessive heat, impure atmospheres, over-indulgence, or exhausting excitement. The most shattered constitution may derive benefit from Holloway's Pills, which will regulate disordered action, brace the nerves, increase the energy of the intellectual faculties, and revive the failing memory. By attentively studying the instructions for taking these Pills, and obediently putting them in practice, the most despondent will soon feel confident of a perfect recovery.

·450, ·500, and ·577 bore DOUBLE EXPRESS £25
If fitted with Tolley's Patent "Giant-Grip" Action, specially designed to prevent the SLIGHTEST MOVEMENT at the moment of discharge. The strongest action extant ... £28

An inspection of above invited.

The shooting of our Rifles is under the personal supervision of a member of the Firm, and is not deputed to any subordinate, AS IS USUAL IN MOST CASES. By this means we are enabled to guarantee to our customers Rifles with a figure of merit that cannot be beaten.

[Extracts.]

From Capt. J. E. B., 45th Regiment: "I yesterday fired with the rifle without raising the back sight from 25 to 200 yards, and almost every shot struck its fellow, with the other barrel."

B. W. W., Assam, India:—"I must certainly give you credit for the splendid weapon that you have built me."

Capt. F. W. M., Mysore:—"I have never had a rifle (and I have had all kinds) which has given me such satisfaction."

Lieut.-Col. W. A., 22nd Regiment:—"The Express Rifle gives me perfect satisfaction."

Lieut. C. W. D., 92nd Highlanders:—"I have fired with it, and find it very accurate and well balanced."

C. F. SHOT GUNS, Hammer or Hammerless, £13 13s, £15 15s, £17 17s £20, £25, and £30.

We are constantly receiving a supply of above from our manufactory in Birmingham, at our London address, where one of the principals can at any time be seen.

THE VERSMANN'S

PATENT

GERMAN MOSS LITTER.

This Litter is specially prepared from a moss-peat found in Germany, and introduced into this country by the Patentee, Dr. VERSMANN, Ph.D. After a most severe and extensive trial in public and private stables, cowsheds, and kennels, it is pronounced by the highest practical and scientific authorities to be the best and cheapest litter known.

ITS ADVANTAGES ARE:

1. Cheapness, it being not more than one-half the cost of straw.
2. Absorptiveness, as absorbing all the urine, and rendering drains and flushing of stables unnecessary.
3. Prevention of decomposition and generation of bad odours.
4. Affording an excellent soft and elastic bed, particularly agreeable and beneficial to the feet and limbs of horses.
5. Horses do not eat it as they do straw litter. therefore they do not require to be racked up or muzzled to prevent indigestion or broken wind.
6. It is easily managed in the stable, and doe not soil or stain horses.
7. It has a wonderful influence on the growth of the hoofs and in maintaining the feet in health.
8. It is extremely portable, being compressed into bales weighing each about 3 cwt., $\frac{3}{4}$ cwt. to 1 cwt. being sufficient to litter a horse for a month or six weeks.
9. It is not inflammable, and therefore offers but little danger from fire.
10. It is essentially a sanitary litter.
11. The manure is much more valuable than that of straw, and occupies considerably less space.

It will be found of immense advantage to Veterinary Infirmaries, in Stud Farms, Dairies, Kennels, &c.

Address—

The Versmann's Moss Litter Company,
LIMITED.
63 QUEEN VICTORIA STREET, LONDON, E.C.

CAUTION.—Proceedings will be taken against persons infringing the Company's patent.

KEATING'S COUGH LOZENGES.—An ever-increasing sale of 60 years.

KEATING'S COUGH LOZENGES.—The Best and Safest Remedy for COUGHS, ASTHMA, PHLEGM, and Tickling in the Throat.

KEATING'S COUGH LOZENGES.—Convenient to keep handy in the pocket.

KEATING'S COUGH LOZENGES.—Are universally recommended by the Faculty.

Testimonial (Original may be seen).

DEAR SIR,—Having tried your Cough Lozenges in India, I have much pleasure in testifying to their beneficial effects in Cases of Incipient Consumption, Asthma, and Bronchial Affections. So good a medicine ought to be known to be appreciated. I have prescribed it largely with the best results.—"W. B. G.," Apothecary, H.M.'s Indian Medical Service. Sold in tins, 1s 1½d, by all Druggists.

ROYAL INDIAN ENGINEERING COLLEGE, Cooper's Hill, Staines.

This College has been recently placed on a new basis, and the advantages afforded by it as a training institution for those who purpose adopting the Civil Engineering profession in India or elsewhere, are now offered to all persons desirous of following the course of study pursued there.

A number of Students, not exceeding 60, will be admitted to the College in September, 1883. Candidates for admission must, on July 1, 1883, be over 17 and under 21 years of age, and must give satisfactory proof of their having received a fair general education.

The Secretary of State for India will offer 13 appointments in the Indian Public Works Department for competition among the students entering the College in September, 1883, at the termination of their prescribed three years' College course, that is, in the summer of 1886. The Secretary of State for India will further offer two appointments in the Indian Telegraph Department among the same students after two years' course of study, that is, in the summer of 1885.

In the event of there being more candidates for admission than the College can receive, the preference will be given to qualified candidates according to dates of application for admission.

For all further particulars, apply by letter only to the Secretary, Public Works Department, India Office, S.W.; or to the President, Royal Engineering College, Cooper's Hill, Staines.

JULAND DANVERS, Secretary,
Public Works Department.

India Office, October 25, 1882.

MOEDER'S HIRE SYSTEM.
The original, best, and most liberal.
Cash prices.
No extra charge for time given.

Illustrated priced catalogue, with full particulars of terms, post free.

F. MOEDER, 248, 249, 250 Tottenham Court Road; and 19, 20, and 21 Morwell Street, W. Established 1862.

GREY WHISKERS.

PICKARD'S EAU MAGIQUE is warranted to permanently change Grey Hair, Whiskers, or Moustaches to a natural brown or black, as desired, in a few hours, without trouble. Pickard's Eau Magique is daily acknowledged to be the best and cheapest preparation, as it gives such natural shades, and will not wash away; perfectly harmless. Cases, 1s 6d, sent secretly, packed for 22 stamps.

T. PICKARD, 3 Oxford Street, London, W.

ARMY EXAMINATIONS.—Captain W. H. JAMES, F.G.S., P.S.C., late R.E., and the Rev. Dr. FROST, LL.D., 19 Lexham Gardens, W., formerly at 28 Kensington Square, W., PREPARE Gentlemen for the Army, *viâ* WOOLWICH, SANDHURST, and the MILITIA. A Special Class for the STAFF COLLEGE. Captain James passed from the Staff College in 1877 with honours, first in mathematics, &c. During the past fifteen years, over 500 Pupils have passed from this Establishment. Fifty-two successes last year, eighty this year. In the recent WOOLWICH Examination four passed, viz., 4th, 17th, 22nd, 27th, and a fifth pupil qualified, out of seven sent up.

LIEUTENANTS of MILITIA.—At the March Military Competitive Examination, EIGHT obtained commissions, viz.:—Richards (4th), Grant (12th), Wimberley (14th), Cass (28th), Shadwell (30th), Woodwright, Legge, Vignoles (Cavalry).

At the last Examination (September) TEN passed, viz.:—Holland (2nd), Blewitt (8th), Whiffin (14th), Gorman (19th), M'Mahon (20th), Morris (25th), Barthorp (28th), Cochrane-Baillie (33rd), Edwards (36th), another was 41st, and Goodair, 42nd, received a cavalry commission.

At the April Further Literary Examination, Three passed, viz.:—4th, 37th, 86th. This October Four passed, viz.:—5th, 10th, 14th, 26th, being all sent in on both occasions.

STAFF COLLEGE Successes:—1881: 1st, 4th, 16th. 1882: 1st, 7th, 10th, 15th, 22nd, 23rd, 26th.

Captain JAMES prepares Officers for the Promotion Examination. No failure up to date, and 46 have passed since December.

ARMY EXAMINATIONS.—Special Preparation, by JOHN GIBSON, M.A. (First-class Classics, Camb., 1874, formerly Master at Westminster), assisted by Two Resident University Graduates and Visiting Professors. In June, 1882, out of 4 Pupils sent up, 2 passed, and a third scored over 4,100 marks at his first trial. In November, 1882, out of 4 Pupils sent up, one took the 14th place on the list, and another scored over 4,300 marks. All the Pupils sent up were First trial Candidates, and 2 of the successful ones had only read 2 months with Mr. Gibson; the other, 4 months. In the last 2 Preliminary Examinations, 5 passed, out of 7 sent up.

N.B.—The next Preliminary Guide, containing the Answers to the Questions set in the February Examinations, will be published about the middle of February. Address, Bromley, Kent.

MATHEMATICS.—A Cambridge Wrangler VISITS and RECEIVES PUPILS in London; teaches by Correspondence; and supplies, on moderate terms, Solutions of the most Recent Examination Papers, including Sandhurst, Woolwich, I. C. S., London B.A., and B.Sc.—G. HEPPEL, M.A., 180 The Grove, Hammersmith.

THE ROYAL ACADEMY, Gosport.

PATRONS.
Her Most Gracious Majesty the Queen.
His Royal Highness the Prince of Wales.
His Royal Highness the Duke of Edinburgh.
His Royal Highness the Duke of Connaught.
His Royal Highness the Duke of Albany.

A Class will be formed in January for special preparation for the next Examination for Naval Cadetships.—Rev. EDWARD BURNEY, M.A., Head Master.

ARMY, *viâ* Sandhurst, Woolwich, or Militia.—PROSPECTUSES, together with reliable Information of Tutors recently successful, sent (gratis), by Messrs. ASKIN, 38 Sackville Street, London, W. References kindly allowed to the Chaplain-General to the Forces and others.

ARMY EXAMINATIONS.—PREPARATION in FRANCE by B. ARNETT, M.A., Cantab., J. J. RIX, B.A., Cantab., and F. BREITENSTEIN. Rigeard, Chartres, France.

WOOLWICH, SANDHURST.—MORGAN JENKINS, M.A. (Wrangler), assisted by an experienced Staff, prepares resident and non-resident Pupils. References to parents, many of whom have had more than one son successful at this establishment. Two passed (38th and 71st) in the recent list for Sandhurst.—50 Cornwall Road, Westbourne Park, W.

THE ARMY COLLEGE, ABINGDON, BERKS.

OFFICERS PREPARED for the Militia Military Competitive Examination ONLY. For particulars, apply to the Secretary, the Abbey, Abingdon, Berks.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS., 28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Four Open Scholarships or Exhibitions gained in 1881.—Address Rev. E. BARTRUM, Head Master.

ARMY EXAMINATIONS.—Dr. KAIM and H. ZOBEL, in conjunction with Captain GREENE, assisted by able and Experienced Masters, PREPARE CANDIDATES for Woolwich, Sandhurst, the Militia Competitive Military Examinations, and the Staff College.

The Pupils are received in the Families of the Principals, which will be a Special Advantage to those wishing to practise French, German, and Italian conversation.

Highest references; amongst others, Major-General Sir Evelyn Wood, V.C., K.C.B., Colonel the Hon. P. Methuen, C.B., Scots Guards, Assistant-Adjutant-General, Horse Guards.

For particulars, apply to H. ZOBEL, Poulton House, Hampton, Middlesex.

GROSVENOR SCHOOL, Twickenham.

BOYS receive thorough PREPARATION for Woolwich and Sandhurst, and pass DIRECT. Special arrangements for very young boys. Healthy neighbourhood, good table, public-school tone. Strongly recommended by many Officers high in the Service, to whom reference is permitted. Head Master, the Rev. L. MURRAY D'ORSEY, M.A.

ARMY EXAMINATIONS.—The Establishment formerly conducted by Dr. LAUMANN and Mr. ELDERTON at Fulham, is now carried on by the latter at MANOR COURT, Hanwell, where pupils are prepared for the above Examinations. Average number of pupils, 10; average number passed per annum, 8.

MILITARY EDUCATION, GERMANY.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

University Candidates for Sandhurst are received as non-resident pupils. In this competition two candidates (the only ones sent up) have passed into Sandhurst during the past year; Mr. W. A. Grant taking fourth place in July, and Mr. G. Barton-Smith second place in December.

In addition to the University candidate, two other pupils passed on the general list at the recent Sandhurst Examination,—Mr. C. D. Radcliffe (tenth place) and Mr. H. Marwood.

Mr. B. Smith, on this occasion, made the highest score in Mathematics, and Mr. Radcliffe highest marks in German, as well as second highest in Freehand Drawing, out of 440 candidates up for Examination.

Special arrangements made for officers studying for the Staff College or other Military Examinations.

MILITIA COMPETITIVE EXAMINATION.

The standard originally fixed for this Examination having been much raised in September, 1881, no results previously gained should be taken into account in considering the successes obtained by Militia pupils. Since the date named, there have been three competitions. At these trials Colonel WILKINSON and Lieutenant-Colonel SHAW have secured 24 COMMISSIONS for their pupils, although they have only prepared and sent up a very limited number for Examination. The names of all successful pupils have already been published.

Also, at the October Literary Examination, Lieut. C. J. Stanton took 4th place on the list.

The results obtained at other Examinations bring the general score up to FORTY-EIGHT SUCCESSES, achieved by pupils in the last 16 months; during that period the number of pupils on the strength of the establishment, resident and non-resident, has always been limited to 60.—Address, DARMSTADT, GERMANY.

SANDHURST, WOOLWICH, C. S., MILITIA, &c.—The Rev. A. PRITCHARD, M.A. Oxon., assisted by his Brother, Professor PRITCHARD (late R.M. Academy, Woolwich), and a large Staff of resident Assistant-Tutors, PREPARES for any of the above.

The next Term will commence Jaunary 3, 1883.

For particulars of all this year's successes and previous ones, address Rev. A. PRITCHARD, Hill Lands, Wargrave, Henley, Oxon.

OXFORD RESPONSIONS, and all UNIVERSITY MATRICULATIONS.—VACANCIES caused by successes last week at Oxford Responsions.

Address, Rev. A. PRITCHARD, Wargrave, Henley, Oxon.

MILITARY COMPETITIVE for MILITIA OFFICERS.—The Rev. A. PRITCHARD, who is assisted by a retired Field Officer of 8 years' experience as a Garrison Instructor, has, during the year 1882, gained five Commissions with the 14 Candidates who went up from him.

For particulars of marks, places, &c., address Rev. A. PRITCHARD, Wargrave, Henley, Oxon.

LIEUTENANTS of MILITIA desirous of competing for Line Commissions can be received by the Rev. WALTER BAKER, M.A., at Batcombe Rectory, Evercreech, Bath. They will be thoroughly prepared in all Military Subjects by Major Dickens (late 11th Foot), Staff-College Graduate, formerly Assistant Royal Engineer, S.E. District, and Colonel Palmer, late R.A., formerly Instructor at the R.M.A., Woolwich, and two of whose pupils obtained special mention from the Examiners at the last September Examination.

Great individual attention is given, as few pupils are taken, and each comes under actual *vivâ voce* instruction for 6½ hours a day. Since the introduction of the Military Competitive, out of Thirty-nine Lieutenants of Militia sent up, Twenty-four have been successful, several taking high places in the list. There are opportunities for healthy country amusements and games, a cricket and football ground, lawn-tennis courts (grass and asphalte), a private billiard-room, &c., and in all other respects a liberal and gentleman's establishment is kept.

A Large Staff of Experienced Tutors, all resident, assist in preparing for the Qualifying Examinations, and for the Sandhurst and Woolwich Competitions.

References to parents of successful pupils.

NAVAL CADETS, ASSISTANT CLERKS

HOPE HOUSE, SOMERSET PLACE,
SOUTHSEA.

Principal—Mr. T. H. VICKERY.

In addition to the general course of study pursued at this long-established School, Pupils are specially prepared for the Examination required for the above.

At the late Competitive Examination in June, for Assistant-Clerkships in the Royal Navy, THREE of the Five successful competitors were Pupils of this Establishment, taking First, Third, and Fourth places. And THREE passed the test of qualification.

TO ARMY TRAINERS and MILITARY STUDENTS.

ARMY EXAMINATIONS, &c.—In the late Examinations, Mr. WATKINS, late Scholar, Christ's College, Cambridge, passed Messrs. Plomer, Panton, Carpendale, Brownlow (U.C.), and Voyle (I.C.), for Sandhurst, and Mr. Cronin took honours at the Academy; Mr. Brett qualified for Woolwich.

Twenty-two other Pupils have taken high places past year for the above, the Universities, Student Interpreterships, and Militia Examinations, Military and Pass.

A Class for Staff College.

Address, 90 Kensington Park Road, W.

LIEUTENANTS of MILITIA.—A COURSE of INSTRUCTION, including Fortification, Surveying, Tactics, Army Discipline Act, Drill, Queen's Regulations, &c., given by Major DAUBENY and A. PINHEY.—Apply to A. PINHEY (late R.A.), Burlington House, Spring Grove, Isleworth, W.

WOOLWICH, SANDHURST, and MILITIA.—Mr. S. H. WINTER PREPARES PUPILS for Military and other Examinations. More than 200 of his pupils have passed, many of them taking very high places.—Connaught House, the Common, Woolwich.

SANDHURST, WOOLWICH, and LITERARY EXAMINATIONS for MILITIA OFFICERS.—Candidates for the above Examinations are PREPARED by Mr. G. M. HICKS, M.A., who receives a limited number. Thorough teaching and individual attention. List of recent successes on application.—5 South Row, Blackheath, S E.

MR. ST. JOHN BOULTBEE, the Priory, Croydon (late Captain Massie and Boultbee), assisted by a Staff of Graduates of the Universities of Oxford and Cambridge, RECEIVES a Limited Number of Pupils to PREPARE for the Competitive Examinations for Sandhurst, Woolwich, and for the Militia. The number of Pupils is limited to TWELVE. Five Pupils out of Six were successful at the last Sandhurst Examination (July, 1882).—Terms, References, and other information, sent on application.

ARMY TUITION, WEST of ENGLAND.—H. A. JAMES, B.A. Cambridge, and A. J. DE H. BUSHNELL, M.A., Oxford, have been nine years engaged in preparing Candidates for the Woolwich and Sandhurst Entrance and the Militia Literary Examinations. Since June, 1873, for Military Examinations alone, 91 Pupils have completed their preparation at Hillcourt. Of these, 76 have passed. The number in the house is limited to 15.—For terms and references, apply to HENRY A. JAMES, Hillcourt, Marle Hill, Cheltenham.

MADAME ISABEL BIZET MICHAU receives LADIES and GENTLEMEN for PRIVATE INSTRUCTION in the Valse, Highland Schottische, &c., by previous appointment, at her Residence, 59 Baker Street, Portman Square. The Young Ladies' Classes at Kensington and Baker Street are held as usual.

ARMY EXAMINATIONS.

MR. J. WINDER, M.A., Cranworth House, Eastbourne, Sussex, PREPARES TEN PUPILS for Woolwich and Sandhurst. At recent Examinations Candidates prepared by Mr. Winder obtained 6th and 22nd places for Woolwich, and 20th and 27th places for Sandhurst.

MILITARY COMPETITIVE EXAMINATION.—Lieutenants of Militia PREPARED, at 37 Cambridge Gardens, W. At the last September Examination, the following, out of Twelve sent up, were successful:—

C. H. Farquharson	5th	J. F. Campbell	23rd
J. E. Cullinan	12th	C. L. Crutchley	31st
C. W. Garraway	16th	B. T. Mahon	38th

—Apply to D. C. FEENY, B.A.

LIEUTENANTS of MILITIA, Candidates for Line Commissions, are PREPARED by Lieutenant-Colonel COATES, Reserve of Officers, formerly of the Royal Military Academy, Woolwich, and Acting Brigade-Major at the Cape.

Colonel Coates has had much experience in coaching, and was, until quite lately, instructing at a large Army Coaching Establishment. His fees are about one-third less than those usually charged; and as he limits the number of his Pupils to Four, great individual attention is insured.—Apply to Colonel COATES, Shepton Mallet, Somersetshire.

ROYAL SCHOOL for DAUGHTERS of OFFICERS of the ARMY.

"FOR THE BLOOD IS THE LIFE."

CLARKE'S

WORLD-FAMED

BLOOD MIXTURE.

THE GREAT BLOOD PURIFIER AND RESTORER.

For cleansing and clearing the blood from all impurities, it cannot be too highly recommended.

For Scrofula, Scurvy, Skin Diseases, and Sores of all kinds, it is a never-failing and permanent cure.

It Cures Old Sores.
Cures Ulcerated Sores on the Neck.
Cures Ulcerated Sore Legs.
Cures Blackheads, or Pimples on the Face.
Cures Scurvy Sores.
Cures Cancerous Ulcers.
Cures Blood and Skin Diseases.
Cures Glandular Swellings.
Clears the Blood from all impure matter,
From whatever cause arising.

As this mixture is pleasant to the taste, and warranted free from anything injurious to the most delicate constitution of either sex, the Proprietor solicits sufferers to give it a trial, to test its value.

Thousands of Testimonials from all Parts.

Sold in Bottles, 2s 6d each; and in cases, containing six times the quantity, 11s each—sufficient to effect a permanent cure in the great majority of long standing cases—BY ALL CHEMISTS and PATENT MEDICINE VENDORS throughout the world, or sent on receipt of 30 or 132 stamps by

The LINCOLN and MIDLAND COUNTIES DRUG CO., Lincoln.

LAMPLOUGH'S

PYRETIC SALINE

HAVE IT IN YOUR HOUSES AND TRAVELS, USING NO OTHER. This is the true antidote in Fevers, Eruptive Affections, Sea or Bilious Sickness, having peculiar and exclusive merits. *Officers and others proceeding to Egypt, India, and the Colonies should not fail to take a supply with them.*

EKOWE (with Col. Pearson).—"There was great demand for Lamplough's Pyretic Saline."—See *Blackwood's Magazine.*

LETTER FROM RAWUL PINDEE.—"Your Pyretic Saline will do more to prevent *fever* than all the quinine can cure."

Observe the GENUINE has my NAME and TRADE-MARK on a BUFF-COLOURED WRAPPER.

113 HOLBORN HILL, LONDON.

2/- TEA OF EXTRAORDINARY QUALITY,

As Supplied to Dukes, Earls, Barons, and the County Families of England.

THE unprecedented depression in the Tea Market now enables COOPER COOPER and CO. to offer such value in Tea as would, a few years ago, have been considered simply impossible, but is now a realised fact, for at

TWO SHILLINGS

A POUND,

COOPER COOPER and CO. are able to supply Tea of amazing strength and exquisite quality, while the choice kinds at Three Shillings a pound, which are coming to hand in lessening quantities year by year, COOPER COOPER and CO. have the greatest difficulty, after ransacking the markets of China and India, in procuring in sufficient quantities for their consumption. These choice and selected Teas COOPER COOPER and CO. have the honour to supply to many Foreign Princes, Potentates, Ambassadors, &c.

THE enormous success—without competitors and with no rivals—which has attended the sale of COOPER COOPER and CO.'s Teas is perhaps unparalleled in the annals of this or any other trade, and can only be accounted for by the way in which their business has been conducted, which has gained the patronage of all classes. COOPER COOPER and CO. number among their customers Princes, Dukes, Earls, Barons—in fact, a large per-centage of the entire Peerage—Church dignitaries of every grade, and ministers of all denominations, County Families from every county in Great Britain, and from all classes of the community. COOPER COOPER and CO. are also shipping their Teas every day to foreign parts. Paris would appear to draw its supplies from COOPER COOPER and CO.'s Stores, and in almost every large city, and especially in the seaport towns of Europe, Asia, Africa, and America—in fact, to the very ends of the earth—COOPER COOPER and CO.'s Teas and COOPER COOPER and CO.'s name are known.

COOPER COOPER and CO. have their own Agents in China and India, and are consequently able to sell their Tea at a price which is actually under that which wholesale merchants, brokers, &c., charge to ordinary dealers. They are enabled to do this as they have not the expense of travellers, and no bad debts to provide for, their terms being strictly for nett cash before delivery. They also save an immense amount by keeping no horses and vans—many houses having from 20 to 100 horses, vans, and two men to each, to deliver, sometimes, half-a-pound of tea miles and miles away, this overwhelming expense having all to come out of the quality of the Tea.

COOPER COOPER and CO. have, in fact, no expense but indispensable rent and labour, which in consequence of still-increasing business, amount only to a fraction on the price of the Tea they sell.

COOPER COOPER and CO. may mention that they include among the regular buyers of their Tea a great many London Tea Brokers, from the simple fact that it can be purchased cheaper and better from them than from the importers themselves.

COOPER COOPER and CO. sell their Teas for ready money only. They have thus no provision to make for bad or doubtful debts.

AND now a word about this year's crop. It is hardly satisfactory on the whole, but some of the choice crops secured by COOPER COOPER and CO. are simply delicious, COOPER COOPER and CO. are still enabled to sell the very best at Three Shillings a pound, and it is veritably a marvel of goodness—a "thing of beauty" and "a joy for ever." But the most astonishing thing of modern times is the Tea at Two Shillings a pound which COOPER COOPER and CO. are now selling. The rich and wealthy buy this Tea. Ladies drink it in their boudoirs and at their early drums, and, as one of our country patrons writes, "It is lovely."

COOPER COOPER and CO. may add that Indian Tea is becoming day by day a greater favourite among the best judges, and this year's crop has been prepared with greater care than ever. It is strong, pungent, with most agreeable flavour, and the better it is known, the more it will be liked. The Tea is 3s a lb., for the best.

COOPER COOPER and CO. charge threepence a package (of any size) for delivering their Teas at any of the Railway Stations in London, or any place within the limits of the London Parcels' Delivery Co., thus putting all on an equality; those who send for their tea, and those who require it sent.

COOPER COOPER and CO. do not pay railway carriage, but are willing to compound for the same on receiving the sum of 6d. in addition to the price of the Tea, to any Railway Station in England, on quantities of the value of £2 and upwards. Families residing in the country can thus, by clubbing together, have their Tea sent almost carriage free, as well as save about 9d a lb. in the cost.

Army Service Corps—Head Quarters, Winchester House, St. James's Square, S.W.

The *Daily Telegraph* says:—"It has been definitely decided at the War Office that the 2nd Batn. Royal Irish Regiment and the 1st Batn. Shropshire Light Infantry will embark at Alexandria for Malta next month. Half of the 2nd Durham Light Infantry and the Head-quarters half batn. Royal Scots, at Malta, proceed respectively to Gibraltar and Barbadoes."

"It does not seem to be generally known," the *Irish Times* observes, "that the new Knight of the Garter, the Duke of Grafton, is a General on the Retired List, a C.B., and an Equerry to the Queen. As Lord A. C. L. FitzRoy, his Grace served with the Coldstream Guards in the Crimea and was severely wounded, and has the medal with three clasps, the Sardinian and Turkish medals, and the 5th Class of the Medjidie. 'What has the Duke of Grafton done,' it is sometimes remarked, 'that he should have been picked out to receive the Garter?' Surely a man who has fought his country's battles and shed his blood in his country's cause, has some claim to honours?"

Obituary.

The late Major-Gen. Robert Carey, C.B., was the son of the late Sir Octavius Carey, C.B., and K.C.H. of Guernsey, and was born on Dec. 12, 1821, died Jan. 25, 1883, at the age of 61. He was educated at Rugby and Sandhurst; commenced service as an ensign in the 40th Regt. on Nov. 15, 1839, and shortly after proceeded with his regiment to the Afghan War—1841 and 1842—with Sir W. Nott's force; and was present in all the actions in the Bolan Pass, Khojack Pass, Quetta, Candahar, Killa Shuck, Zillo Khan, Baba Walla, Goaine, Ghuznee, Killa Azeem, relief of Khelat-i-Ghilzie, occupation of Cabul, actions of Khoord Cabul Tzeen, Jugdulluck, Khyber Pass (medal). In the Crimean War, he served as A.Q.M.G. to a division of the Turkish Contingent, and for a long time commanded a brigade in that force; was thanked in General Orders by Sir Robert Vivian, K.C.B., and Sir James Neill, K.C.B. (4th-class Medjidie and Turkish medal). He published a small drill-book for the Turkish Contingent. D.A.G. in New Zealand, 1860 to 1861, and was present at the actions at Mahoetalie, Matarooiko-riko, operations on the Waitara; was five times specially mentioned in despatches by Major-Gen. Sir T. Pratt, K.C.B., and received the Order of Companion of the Bath. Volunteered, and was appointed D.A.G. to the troops in New Zealand, under Sir D. Cameron, from 1863; was present in the assault and capture of Rangiriri (mentioned in despatches and promoted col. for his services). Was also in the campaigns in 1863, 1864, and 1865, in the Waikato, Turanga, and Wanganui districts, and was present at the action of Te Awamatu (mentioned in despatches); was present at Paterangia, Orahoe, Gate-pa-Nuhumaru (mentioned in despatches); second-in-command in the field campaign of Taranaki and Wanganui under Gen. Sir T. Chute; present at the assault of Otapawa and Waikoko, also in forced march round Mount Egmont (mentioned in despatches, 1866); was the only officer in New Zealand who served throughout the whole of the operations carried on under the three General officers who conducted the war from 1860 to its termination in 1866, during which time he was D.A.G. and senior officer on the Staff. Passed Staff College, 1859, was appointed Deputy-Judge-Advocate-General at Head-quarters, Aug. 1870, and held that office till March 31, 1882, during which time he was highly spoken of. He received the distinguished reward in 1875. Married Caroline, daughter of John le Marchant, Esq., of Melrose, Guernsey, by whom he left two sons, Denis, a lieut. in the East Lancashire Regt., and Walter, an acting sub-lieut. R.N.

Major-Gen. E. G. Clark, Retired List, Bengal S.C., late Deputy-Commissioner of Sultanpur, Oudh, died at Eastbourne on the 25th ult., aged 52. He served with the Nepaulese force in the Indian Mutiny campaign, from July, 1857, to April, 1858; he commanded the left column in the action of Chanda, and captured five guns; and was afterwards present at the siege and capture of Lucknow.

Amusements.

No novelties have been produced at any of the theatres during the week, and the holiday entertainments continue to be sufficiently attractive to render alterations of programme unnecessary. On Thursday afternoon, Mr. Augustus Harris gave at Drury Lane Theatre a morning performance of "Sindbad" to about 4,000 poor children, invited from the charitable institutions of the metropolis.

A farcical comedy, called "Our Regiment; or, Lance and Pennon," written by Mr. Hamilton, the adapter of "Moths," will be introduced to the public through a morning performance at the Vaudeville Theatre on Feb. 15.

Special entertainments, in aid of Lady Jane Taylor's Egyptian War Fund, were given at Hengler's Royal Cirque, Argyll Street, Oxford Circus, on Thursday afternoon and evening.

At the Gaiety Theatre, on Tuesday afternoon, Miss Le Thière had a miscellaneous entertainment associated with her benefit, Mr. and Mrs. Beerbohm Tree, Miss Geneviève Ward, Mrs. Kendal, and Mr. Hermann Vezin giving their services on the occasion. On Wednesday afternoon, at the same theatre, "Married Life" and "Uncle's Will" were performed, for the fund in aid of Lady Strangford's Cairo Hospital Fund, when Mr. Gilbert Farquhar, the well-known amateur, made a successful first appearance on the stage. On the following day, Miss Laura Villiers, daughter of Mr. Edwin Villiers, lessee of the London Pavilion, appeared for the first time in London as Iolanthe in "King René's Daughter," supported by Mr. Barnes as Count Tristan, and by Mr. W. Rignold as King René.

Throat Irritation.—Soreness and dryness, tickling and irritation, inducing cough and affecting the voice. For these symptoms use Epps's Glycerine Jujubes. In contact with the glands at the moment they are excited by the act of sucking, the Glycerine in these agreeable confections becomes actively healing. Sold only in boxes, 7½d, tins, 1s 1½d, labelled "James Epps and Co., Homœopathic Chemists, London." A letter received:—"Gentlemen,—It may, perhaps, interest you to know that, after an extended trial, I have found your Glycerine Jujubes of considerable benefit (with or without medical treatment) in almost all forms of throat disease. They soften and clear the voice.—Yours faithfully, Gordon Holmes, M.D., Senior Physician to the Municipal Throat and Ear Infirmary."

THE CRIMEAN AND EGYPTIAN ARMY.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—As a Crimean officer, I cannot permit a leading article in the *Standard* of January 11 to pass unnoticed, as it conveys a wrong impression on the public mind regarding the British Army in the Crimea and its Generals. It says it would be ungenerous to stigmatise to-day the administrators and Generals who placed the Army of the Crimea in such terrible straits from want of every necessary, and failed to take advantage of victories. Tel-el-Kebir is compared to the Alma, and it states that had the same qualities been present after the latter as were displayed at the former, the Allies would have given Sebastopol to our Army without loss of time. The Generals certainly deserve more consideration, as they had allies who were in many instances their stumbling-block, and Lord Raglan was not to blame for much apparent delay. When the Army landed at Old Fort in the Crimea, their first delay and grievance was occasioned by the French taking up the buoys for their ships which the British had laid the night previous for their own. They were thus the first to land, selecting their own safe position for the advance, with the fleets on one flank and the British Army on the other. Of course, they retained that position to the Alma, which at that battle certainly continued to give them great advantage. After that battle, the Division to which I belonged was halted on the heights and ordered to take off their packs for pursuit. They were then inspected by Lord Raglan and Gen. Canrobert, who often said in my hearing, "Magnifique!" clearly showing that he thought our division fit to proceed. In the course, however, of a few minutes, an order came cancelling that for pursuit, as the French would not accompany us. It was not, therefore, the English General who was tardy on that occasion to follow up the victory or take advantage of it. Had they pursued and lost 250 horses, as was done between Tel-el-Kebir and Cairo, more would have been said about it than there would be now; and when I consider that I stood one of 1,000 in my regiment for inspection before embarkation for the Crimea, I cannot help thinking that the Army of the present day is fortunate in having Reserve men to fall back on, when any fighting is required.—I am, &c.,

Crimea.

It is certain the Queen's Physician, Dr. Fairbank, has written strongly recommending Lentilla, or Tonic Daily Food. It cures indigestion, heartburn, constipation, liver and stomach complaints, &c., besides having such wondrous nourishing properties. Makes soup, puddings, porridge, biscuits, custards, &c. Tins, 1 lb., 1s 6d; ½ lb., 10d. Barrels, 28 lb., 30s; 14 lb., 16s. Of all Chemists.—Proprietor, H. J. Deacon, Beckenham, Kent.

NAVAL NOTES.

A torpedo course, lasting about two months, will be commenced on board the Vernon on Monday, April 9, at 9 a.m. Naval officers on half-pay are eligible, and any officer wishing to join is requested to make application to the Secretary of the Admiralty not later than the end of March, stating also whether he requires accommodation at the College.

Notice is given by the Accountant-General of the Navy that preparations are being made for the intended distribution of the tonnage bounty awarded for the slave dhow Bada Theeky, captured on November 26, by the London. The date of the intended distribution will be duly announced hereafter.

The following officers' deaths have been reported to the Admiralty since December 20, 1882 :—Com. Frank Rougemont, 1876; Staff Com. Richard T. N. Pearce, 1870; Chief Engineer John T. Goff, 1882; Gunners George A. Worthington, 1862, and J. Nodder, 1873; and Boatswain T. Cook, 1881. The following removals have been made from the Active List, since December 20, 1882 :—Fred. W. B. Maxwell Heron, 1871 (dismissed by court-martial); Assist-Pymr. R. H. Chapell, 1882 (resigned, to avoid court-martial); Gunner Maurice Fitzgerald, 1866 (dismissed service with disgrace by sentence of court-martial); Lieut. John A. Bartlett, R.M.L.I., 1881 (resigned); Chief Boatswain Henry Blake, 1875; and Boatswain Walter T. Daw, 1861 (pensioned).

The attention of officers on the Retired Lists desirous of being considered in the awards of Naval and Greenwich Hospital pensions is directed to the necessity of applying to the Secretary of the Admiralty for the forms as to services, claims, circumstances, &c., required to be filled up by candidates. These pensions are established for the purpose of affording relief to retired officers of long service who are old, infirm, "wounded, or disabled," and in poor circumstances; the periods of service, &c., required to render them eligible are shown at p. 625 of the Queen's Regulations and Admiralty Instructions of 1879.

The Council of the Royal United Service Institution have decided that the essay for which the gold medal will this year be granted is to be on a Naval subject—namely, "On an Outbreak of War, what is the Best Organisation for Distributing the *Personnel* of the Navy and of the Reserves among the Available War-vessels and among a Proportion of Merchant Vessels, as an Auxiliary to the Navy?"

Letters for outward bound ships are to be addressed as under :—Linnet and Thalia, to Singapore. For homeward bound :—Iron Duke, to Malta; Rocket, to Devonport (unless otherwise ordered); Seagull, to St. Vincent, Cape de Verdes—care of H.B.M.'s Consul; mail on Feb. 8. Fawn, to Devonport. Letters for the Orion and the Decoy to be sent to Alexandria, and for the Condor after Jan. 29.

The Swiftsure had several of her ship's company down with fever at Callao in December, and two men, named Harry Waller, private, R.M.L.I., and Walter Redmond, A.B., have succumbed to it. They were buried in the cemetery with naval honours. The others are progressing. The crew were looking forward to the time for leaving Callao. The weather there was very warm during the day, and very chilly at night and morning, with heavy dews.

Lieut. A. E. Rawnsley, who had been sent out by the Admiralty for the purpose of being tried by court-martial arising out of certain circumstances which had occurred prior to his being invalided from the Woodlark, was invalided from the Euryalus at Suez. It appears that this officer only got as far as Malta, at which place he was sent to hospital for treatment, and that, having sufficiently recovered, he has been again sent out by order of their Lordships for the purpose of answering the charges preferred against him. The general impression is that rather a dead-set has been made against this officer, and that, if only on account of his delicate health, he might have been permitted to return to England and be placed on the Retired List, or on half-pay, if their Lordships did not see fit to employ him again. He has been taken on in the Osprey from Malta, and took passage in the Tourmaline to Bombay, in which ship he will remain until the Woodlark and a sufficient number of ships have been assembled at Bombay to form a court-martial.

The under-named men have been awarded the medal for long service and good conduct :—E. Nicholls, serjeant, R.M.L.I, and T. Morton, sailmaker, of the Terror; W. Hodgetts, captain of the quarter-deck, of the Jumna; W. J. Sinclair, naval schoolmaster, of the Nelson; C. Winnicott, carpenter's mate, of the Flora; W. Bromley, carpenter's mate, of the Excellent; G. T. Robins, second-class cook, of the Duke of Wellington; J. Browning, leading seaman, of the Miranda; C. Randell, private, R.M.L.I., of the Victor Emanuel; J. Denton and J. Standing, commissioned boatmen, and R. Thomson, boatman, of the Coastguard.

Capt. John Fisher, C.B., late of the Inflexible, who, as announced in our last issue, received the Royal command to dine at Osborne, was, before leaving, decorated by her Majesty with the Egyptian war medal.

An appeal is being made to the friends of the Royal Naval School, New Cross, to provide a new organ, and to make some much-needed repairs and renovations in the chapel, tending to improve the performance of divine service. The present organ has been in use a great many years, and is not worth repair. The new instrument will cost about £500; but two new windows and the repair of another, with reseating and new lighting arrangements, are estimated to cost another £500. The appeal of the committee is being favourably responded to, the first list already reaching nearly £250. Mr. Alfred Eames has been appointed honorary secretary and treasurer of the fund.

It is intended to close the metal mills at Chatham Dockyard, hitherto used for the re-manufacture of iron, at the end of the present financial year, that branch of industry being ordered to be discontinued at Chatham. In future the iron required for use in Chatham Dockyard will be purchased from private firms.

STATIONS OF HER MAJESTY'S SHIPS IN COMMISSION.

[WITH THE DATES AND PORTS OF COMMISSION.]

Name.	Guns.	Men.	Class.	Commanding Officer.	When and Where Commissioned.	Station.

PUBLIC SCHOOLS AND ARMY EXAMINATIONS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—I do not think that the public are in a position to know of the means of our big public schools in passing candidates for the Royal Military Academy, Woolwich, and the Royal Military College, Sandhurst, because now the lists are published without, as formerly, the places of education of the successful candidates being printed with them. I, therefore, write to point out what I happen to know of the results of the last examination for Woolwich, as I think parents will be interested in learning that crammers are hardly necessary if their sons only make reasonable use of the advantages the public schools afford. Wellington College passed in five out of six sent up for examination. Sixteen have also passed in from Clifton, Cheltenham, Marlborough, Haileybury, Rugby, and Shrewsbury, making 21 from seven schools, or three a piece on the average. Besides these, I know of at least one successful boy from Charterhouse, and one may, therefore, assume that there are others, perhaps many, who have gone up and passed in direct from public schools not specified in any list. I am told, but I do not vouch for it, that three got in direct from Bedford School.—I am, &c., UBIQUE.

The ARMY AND NAVY GAZETTE exchanges with or receives the following Service papers abroad:—*L'Avenir Militaire; Bulletin de la Réunion des Officiers; L'Armée Française; L'Italia Militare; Rivista Europea; Rivista Militare; Memorial de Ingenieros; La France Militaire; Moniteur de la Flotte; Le Progrès Militaire; Der Veteran; Streffleur's Oesterreichische Militärische Zeitschrift; Jahrbücher für die Deutsche Armee und Marine; Militär Wochenblatt; Giornale d'Artiglieria e Genio; Organ der Militär-Wissenchaftlichen Vereine; Vedette; Deutsche Heeres Zeitung; Militärische Zeitschrift; Armeeblatt, Wien; Army and Navy Journal of New York; The American, Philadelphia; Revista Maritima Brazileira*; in addition to all the home and colonial professional periodicals and journals.

NAVAL NOTES.

The military authorities in British North America have brought to the notice of the Admiralty the great strategical value but defenceless condition of Vancouver's Island, and have strongly recommended that instead of abandoning the island as a naval depôt, steps should at once be taken to establish it as a first-class depôt, and to so fortify it that it would be able to resist the attack of a hostile fleet in case of emergency.

A memorial in granite and Sicilian marble, to the memory of the late Deputy-Inspector-Gen. George Birnie Hill, R.N., who died whilst serving in the Royal Naval Hospital, Malta, has been erected in the Naval cemetery there by his friends in the service, as a mark of esteem and respect.

The steam condenser chest and cylinder of the Opal, which exploded last week while being submitted to the cold-water test, has been repaired and re-tested, in the presence of the Chief Engineer of Sheerness Dockyard and a number of other officials, with satisfactory results, the requisite pressure of 60lb. being obtained without any leakage. The Opal was then subjected to a prelminary trial of her engines and machinery, and the result was also satisfactory. The Wye broke adrift during the trial, from the commotion caused by the Opal's screw, and injured her rudder.

By order of the Admiralty and War Office, nominal rolls are to be prepared of those officers and men of the Army and Fleet who are entitled to receive the bronze star which the Khedive has decided, with her Majesty's sanction, to have struck off to commemorate the services of the British troops in Egypt, and the issue of the decoration is expected to commence in the course of a few weeks.

Supplementary to the competitive trials with anti-fouling and anti-corrosive compositions which have been recently directed to take place, the relative merits of red lead and the compositions invented by Messrs. Hay, Professor Sims, and Lieutenant-Colonel Crease, R.M.A., are to be determined by practical test on board three torpedo boats, but dissatisfaction, says the *Portsmouth Times*, still continues to be expressed that the Admiralty do not throw open the trials to other firms.

The Lord-Lieutenant cannot complain of insufficient protection in Dublin. He is guarded on one side, says the *Globe*, by constables in uniform, on another by soldiers in mufti, in front by constables in plain clothes, and behind by soldiers in uniform. In addition, Marines are posted here and there along the route, and the Dublin public—now that the tables are being slowly turned upon the assassins—keep a sharp look-out all round. The result was surprising. Two men made a movement, as the Viceroy approached; the general public observed it and told the police, who hauled the men to the police-court, and forced them to confess the horrid truth that they were watching for the Viceroy—with a deliberate purpose—they were Marines.

A great disappointment is in store for Mr. H. M. Stanley on the Congo. We heard, says the *Globe*, about three weeks ago that he was waiting in ambush for M. de Brazza; and now we read the French gunboat Sagittaire has left for the Congo, but without M. de Brazza. The full wiliness of the manœuvre, however, will not appear until Mr. H. M. Stanley has opened fire with that wonderful native-killing elephant-gun of his upon the gunboat, and has thereby made a mortal enemy of King Makoko for life; for it is full to the brim of pretty presents from M. de Brazza to King Makoko.

The Gatling gun has, says the *Washington Post*, just passed through a series of experiments at the Navy Yard, under the direction of the inventor, Dr. Gatling, before a board of Naval officers:—"So destructive has its efficiency been made that it may almost be termed a peace preserver rather than a demolisher. The results obtained at the tests to which the improved gun has been submitted are almost astounding in their results. Single cases of 104 cartridges each were discharged in less than three seconds, and eight cases, or 832 cartridges, were fired in 42 seconds. Volleys of 30 cartridges were fired in six-tenths of a second, as incredible as it may seem, and over 6,000 rounds were fired in rapid succession, and with extraordinary success. The gun can be fired, the inventor claims, more than 1,200 times a minute, and its destructive power, whether on the field or behind walls, or in situations where any other field-piece could not be worked, is marvellous. It can be made to drop its balls beyond intrenchments with great accuracy, and at almost any distance within the range of modern gunnery. It can be so directed as to fire upward or backward, with equal facility, a distance of 3,000 yards. Dr. Gatling thinks his late improvements are as wonderful as the original gun was considered to be when first brought out."

Much anxiety seems to be felt (says the *Hampshire Telegraph*) as to the future of the Constructive Department of the Navy, now that Mr. White is about to vacate his post, and take up a more lucrative appointment in a private establishment. Mr. Barnaby, it is well known, is anxious to be relieved from the pressure of his arduous and trying duties, and it was thought that a suitable successor would have been found in Mr. White. The name of Mr. F. K. Barnes has since been mentioned as the Director of Naval Construction of the future. He has for some years held the important post of Surveyor of Dockyards, an office which, as the name implies, was established for the purpose of establishing a more intimate connection between the Dockyards and the Constructive Department of the Admiralty; and his constant visits to the several dockyards have afforded him an exceptional opportunity of becoming intimately acquainted with their local management. There are rumours, too, at Chatham, that Mr. E. C. Warren, Chief Constructor at that yard, is not unlikely to be given, before long, a seat on the Committee of Naval Construction.

MR. RICHARD JAMES WOOD,

AT THE OFFICE, 16 WELLINGTON STREET, STRAND, *and* NOT *to the* EDITOR *of the* ARMY AND NAVY GAZETTE.

The subscription to the paper is 7s. per quarter, or 28s. per annum, PAYABLE IN ADVANCE, *inclusive of postage to any part of the United Kingdom.*

To India, £1 12s. 6d. per annum.

The ARMY AND NAVY GAZETTE *can be obtained in Paris of our Agent,* Mr. J. W. S. NEAL, *English Stationer,* 248 *Rue de Rivoli, to whom Advertisements and Orders for the Paper may be sent.*

THE fact that there was a falling-off last year in the number of recruits who joined the Army is, of course, a significant one. What renders the decrease in numbers the more unaccountable is that we have lately been engaged in a popular war. Throughout the country demonstrations have been got up in honour of the returning troops, and all classes of the community have done their utmost to mark their appreciation of the devotion of those who fought under Lord Wolseley's command in Egypt. We should naturally have supposed that the Report of the Inspector-General of Recruiting for the year 1882 would have been an encouraging document. If, however, we are to judge from the information furnished by the *Times*, the reverse is the case; and it is, therefore, necessary to seek for an explanation of this unexpected state of affairs. In an article which appeared in the *Standard* on Saturday last, it is inferred that the decrease in the number of military aspirants is due to the measures introduced by Mr. Childers for raising the age qualification of recruits, and it is hinted that we should adopt one of two courses to meet the difficulty,—either lower the age of recruits from nineteen to eighteen years, or sacrifice the Reserve. We are in a position to express a pretty decided opinion, and we have no hesitation in saying that the unsatisfactory state of the recruit-giving market is wholly and solely due to one cause,—the unpopularity of our existing organisation with the classes which furnish the bulk of the rank and file. The party of progress has been so busily engaged in the work of demolition of recent years, that it has created a universal feeling of uncertainty throughout the service. Change, constant change, has been the order of the day for a period of twelve years. Nothing has been sacred to the reformer, who has been actuated by an irresistible desire to tear down everything that has come in his way. The result has been that officers and men have lost confidence. The service no longer offers the attractions it once did. What with general service, and all the other innovations of recent times, a man joining the Army now finds that he is nothing more or less than a tool in the hands of any Minister who may take office. The natural consequence is that the rank and file discourage their friends from adopting a career which they themselves have found to be associated with all manner of annoyances. As we have pointed out on many occasions, but have pointed out, we fear, ineffectually, the Army feels most keenly the interference of the War Office with its time-honoured traditions. We have before us as we write a letter from a well-known Staff officer engaged in recruiting service, in which we are told that the "reforms of the last few years have had a far more damaging effect upon recruiting than those holding office would suppose." We could bring forward any amount of evidence to endorse this officer's views. The reformers are so wrapped up in the soundness of the principles upon which they are working, that it is almost hopeless to expect them to listen to the voice of reason. They have assured us over and over again that it matters little or nothing to the men who enter the Army what regiments they serve in, or what uniforms they wear; that so long as they get all they want, they never give a thought as to the soundness of the policy of officials. No argument could be more fallacious. The rank and file of the Army is much more sensitive in these matters than some give it credit for being. In proof of this assertion, we may remark that on many occasions within the last twelve months we have questioned non-commissioned officers and men as to their ideas with regard to recent changes, and in every case our interrogations have met with the same response, viz., that the new order of things is viewed with marked disfavour. In view of the discontent, which we have no hesitation in saying is rampant throughout the Army, is it to be wondered at that soldiering should have become unpopular? We shall expect to be told, as we have been told so often before, that we represent only a small faction, and that matters will soon right themselves. Perhaps they will. It is, nevertheless, desirable that the public should know how we really stand. The increase in the age of recruits was a wise move on the part of Mr. Childers, and we should be sorry to see the old limit reintroduced by which any lad of sixteen or seventeen could get into the service, by representing himself as eighteen years of age. Even as it is, many of those who are passed into the ranks are far below the minimum of age qualification. By lowering the standard we might swell the numbers, but we should not increase efficiency in the slightest degree. Nor would it be well to adopt the other alternative which has been proposed, and sacrifice the Reserve. The only course open to Lord Hartington is to devise some plan for rendering the service more popular. The present rate of pay ought to be sufficient to attract men, and Mr. Childers has done so much to better the position and prospects of non-commissioned officers that it would be almost impossible to look for further advances in that direction. What is wanted is a settled military policy and an organisation which will make the regiment more of a home than it is at present. The system of transfers from one regiment or battalion to another may be a very nice arrangement for the War Office, but to the service it is most unacceptable. The best men enter the Army because they have a taste for soldiering. They like to choose their own particular battalions, and if they are allowed to join them they are quite satisfied. The General Service System frightens men, and has the effect of inducing many an eligible recruit to think twice ere "taking the shilling." Of course, the loafers who "go a-soldiering" in the hope of spending an idle life with the colours, do not mind, in many cases, what particular corps or battalion they are sent to, so long as they can manage to scrape through the preliminary ordeal. They become soldiers because they are driven to it by necessity, not from any natural love of the work. In the case of men of this class, general service may answer well. The better educated and more respectable men, who it was expected would flock to the colours in great numbers under short service, regard with marked disfavour the idea of being made general-service men, liable to be packed off anywhere, whether they wish to go or not. And from all we can hear, the Territorial System, instead of proving an advantage, is becoming a source of danger. So unpopular are Territorial regiments in some localities, that men will go miles away and enlist in other districts, rather than enter the ranks of their own county regiment. There are various reasons to be assigned for their doing this. In the first place, they prefer to be away from their relatives and friends; they may think that in a new locality they may be able to get employment in civil life before finally making up their minds to enlist; and, again, a relative or friend may have served in another regiment, and they may have a desire to serve in the same corps. These and many other causes, no doubt, militate against the smooth working of the Territorial System, which is producing results which we, but not its advocates, anticipated.

TOWARDS the close of the last Session of Parliament, we drew attention to the fact that the *Polyphemus* was a failure. We also reproduced an article we published when her keel was laid, commenting on her general design, and warning the Admiralty that success with such lines was impossible. These articles were copied by the daily papers. Arrangements were immediately made by the Admiralty to counteract the effect these disclosures would have upon the public mind. The simple question, "Is the *Polyphemus* a failure?" was forthwith asked in the House of Commons, when Mr. Campbell-Bannerman rose in his seat and denied the fact, stating that she had fully answered the expectations of her designers, and that she only required new boilers of an approved type, to be a perfect and thorough success. Since then, in fact last week, we announced our intention of publishing full details of the results of her steam trials. This was too much for the Constructor's Department. The reticence so long maintained by the Admiralty in regard to the performances of the *Polyphemus* was deemed no longer politic, and, it was determined, should be abandoned. The Admiralty attempted to take the wind out of our sails, and ward off the blow we were known to be about to strike, by themselves communicating some of the results obtained. But the chief defect they have carefully concealed. The "fuel question" they have avoided, as also that of stability. This is exactly what we anticipated. It was our desire to prove conclusively how the Admiralty "work the Press" to influence public opinion, that led us last week to publicly announce our intention of publishing the facts regarding the failure of the *Polyphemus*. We felt certain that, in so doing, we were setting a trap into which the Admiralty would be sure to fall. And we were right. For, in their anxiety to regain the confidence of the public, and re-establish the influence of official statements emanating from the Department, the Admiralty have rushed into print to forestall us, and, by a clever manipulation of the data at their disposal, have attempted to place the failure of the *Polyphemus* in such a light as to lead to the opinion being formed that, after all, this new torpedo ram is in reality no failure, but, on the contrary, a qualified success. The facts now disclosed, however, are very different from what was expected, after the statement of Mr. Campbell-Bannerman in the House of Commons; and as the present statement does not go the length of telling the whole truth, while leaving us the opportunity of supplying the missing link, and at the same time of exposing the trick attempted to be played by the Admiralty upon the public, we publish the whole facts, in the fullest confidence that the taxpayers will thereby learn to value Admiralty statements at their real worth. For it now appears that the statement made by the Admiralty through Mr. Campbell-Bannerman was false. That the Admiralty knew it was untrue, there can be not the slightest doubt; and the reason why the public have been deceived should be inquired into. The taxpayers would do well to look after their own interests a little more closely. They should commence by insisting on the Naval Administration being subjected to the strictest and most searching inquiry. The Admiralty should be called to account for having denied the accuracy of facts they now admit to have been true. They have even now tried to deceive the public, by omitting all mention of the "fuel question" in their communicated report to the *Times*. Things have, indeed, come to a pretty pass, when the word of a Member of Parliament, a paid servant of the country, can no longer be believed, nor the assurances of the Admiralty relied upon. How can the country place their trust in the Government, or believe in the veracity of the Admiralty? We assert that as little reliance can be placed in the Admiralty statement that the state and condition of the Navy is all that can be desired, as in that uttered in Parliament by Mr. Campbell-Bannerman, to the effect that the *Polyphemus* is no failure; and we deem an inquiry into the subject an imperative necessity.

THE recent reduction of the effective of the French Army has filled even the supporters of the Government with alarm. Years have been passed in organising the Army on new principles; a Parliamentary Committee is now engaged in reorganising it; service has been rendered compulsory; the Radicals contemplate forcing theological students to take up arms. The War Estimates are far away superior to what they were under the Empire. There are 19 Army Corps, an Army of Paris, independent divisions of cavalry, and independent battalions of rifles, and yet all this splendid and costly machinery seems to have gone to pieces. We gather from the French papers that in consequence of the late War Minister, General Billot, having sent 70,000 men home on furlough, that squadrons and companies have been reduced to a ridiculous effective. What most alarms all patriotic Frenchmen is to see the 6th Army Corps, which was recently commanded by General Chanzy, not only left without a chief, but thoroughly disorganised. A French military writer thus expresses himself:—"The information we have received from various quarters fully bears out what we said respecting the condition of the troops along the Franco-German frontier. The cavalry has especially suffered by the circular of January 5. The eight regiments échelonned in the garrison towns between Epinal and Verdun, passing by Luneville and Nancy, have been literally decimated. In the 18th Dragoons, for example, there remains only one trumpeter! The situation of the infantry is materially the same; but the Ministerial measure is more serious as regards the cavalry, now that the importance of that arm is understood, even in defensive warfare. The cavalry, in fact, is now considered so important, that it is contemplated giving the command of the 6th Army Corps to a Cavalry officer." The writer terminates by remarking that whereas the Germans have on their side of the frontier 43 battalions of infantry, 44 squadrons of horse, and 49 batteries of artillery, &c.; France has only 33 battalions of infantry, 43 squadrons, and 28 batteries. Before January 5, whereas the German battalions mustered 624 men, on an average those of France mustered only 488, an effective now considerably reduced. If we are to believe a Radical, some of the companies in the regiments quartered in Paris have been reduced to fifteen soldiers and some raw recruits, and one company is said to have fallen as low as seven men! It is curious to find Radicals, who, as a general rule, object to soldiers, police, &c., crying out against the manner in which the Army of Paris has been disorganised under the new Republican system, elaborated after so many years of labour.

The Channel Squadron, whose departure was delayed by the accident which occurred last week to the *Northumberland*, left Plymouth on Tuesday afternoon for Arosa Bay. The programme of the cruise is as follows:—February 9, Arosa Bay; February 17, Vigo; March 3, Lisbon; March 17, Madeira; March 31, St. Vincent; April 9, Port Prayu; April 15, St. Vincent; April 29, Madeira; or May 5, Gibraltar.

The Admiralty are continually breaking their own regulations. Why, in the face of the rule that no Commander can be appointed to a harbour ship who has not served for one year afloat, have they appointed Commander Bromley to the *St. Vincent?*

The Court of Inquiry which investigated the circumstances under which the *Northumberland* fouled the Russian brigantine *Secundus* found the officer of the watch to blame, but did not censure him. Why to blame? Both Captain Bosanquet, in command, and Captain Kelly, of the Steam Reserve, in charge of the ship during the steam trial, were on the bridge when the accident occurred. How is it possible, therefore, for their junior to be to blame? Even had he stood beside them, and never said a word, and let the Russian be run down, was not the steam flag at the masthead? If so, the officer of the watch had no longer charge, but Captain Kelly had. Why make a scapegoat of the junior?

Lord Alcester will return home overland, and will be met by the *Enchantress*, probably at Cherbourg.

The special gunnery course on board the *Excellent* comprises Captains C. G. F. Knowles, Sir Lambton Lorraine, Bart.; John F. G. Grant; H. J. F. Campbell, C.B.; B. F. Britten; A. D. Fanshawe; S. H. P. Dacres; Commanders C. V. Anson, G. A. G. Grey, W. Wilson, and G. H. Moore.

The Chinese and Japanese Governments appear to be still increasing their Naval strength, by the purchase of gunboats and modern vessels-of-war from European Powers, to replace their old war junks, which are fast becoming obsolete; so much so, that Russia has recently decided not to reduce her fleet in the North Pacific.

Mr. Maxwell Heron, late in command of the *Clyde*, has submitted to the Admiralty a sworn statement of facts and circumstances bearing on the *Clyde* scandal, with a view of inducing their Lordships to have the case reconsidered. The evidence brought forward now is important, and as the Admiralty have refused the application of Mr. Maxwell Heron, we shall, in justice to that officer, shortly publish his statement of facts.

The principal dimensions of the Dutch cruiser *Doggerbank*, building at Amsterdam, are as follows:—Length b.p., 265 ft.; beam, 42 ft.; depth in hold, 19 ft. 6 in.; draught, 20 ft. 6 in.; displacement, 3,300 tons; indicated horse-power, 3,000. She is built of iron, cased with wood. Her armament will consist of six $6\frac{3}{4}$-in. and four $4\frac{3}{4}$-in. Krupp guns, and she will also be supplied with Harvey and spar torpedoes. It is expected that she will attain a speed of fifteen knots per hour.

Vice-Admiral Lord John Hay visited the Admiralty on Tuesday, and afterwards left for Portsmouth, where his lordship embarked on board the *Lively*, for passage to Malta, to relieve Lord Alcester of the command of the Mediterranean station. Lieutenant the Hon. H. Tyrwhitt and Mr. Marcon, Paymaster and Secretary, accompany Lord John Hay.

Lord Alcester is to relieve Lord John Hay at the Admiralty, and will most probably succeed Sir Astley Cooper Key as soon as that officer vacates the post of First Sea Lord.

For want of the necessary funds, the Austrian Admiralty have of late years never been able to commission more than one, at most, two, ironclads at the same time, and even then they were restricted to short cruises from port to port on the Austrian coast of the Adriatic. That so gallant and enterprising a corps as the Austrian Naval officers have proved themselves to be, should feel disheartened at the few opportunities given them of acquiring experience in the handling of ironclad vessels is natural, and it is, no doubt, due to their representations to the Government on this subject that three ironclads will be commissioned this year. The vessels selected are the *Tegetthoff*, 7,390 tons, six guns, $14\frac{1}{2}$-in. armour; *Lissa*, 6,030 tons, twelve guns, 6-in. armour; and *Erzherzog Ferdinand Max*, 5,170 tons, fourteen guns, 5-in. armour.

It is rumoured that several Continental Naval Powers, who have for the last six or eight years been building their own torpedo boats, will shortly place some good orders with our well-known English builders, who will, however, do well to remember that these vessels will be used as "patterns" by foreign firms, though ordered by Government.

The incompetency of the Admiralty to keep pace with the times is shown in most details appertaining to the service. Why are carpenters appointed now-a-days to armourclads in course of construction, as they were in the olden days when our ships were built of wood? Then a carpenter to superintend the construction of the ship was necessary, but now, when all is iron and steel, would not an engineer be of more service?

The Admiralty would do well to explain why Commander W. F. S. Mann, who was appointed to the *Beacon* on August 7, 1882, and who was walking on Southsea Beach on the day the battle of Tel-el-Kebir was fought, has been granted the 3rd Class of the Medjidie; and also, as we have before asked, why Lieutenant E. G. Festing, appointed to the *Decoy* on August 7, has been granted the 4th Class of the Osmanieh? These officers were not present during the war, yet have been decorated by the Khedive through Admiralty selection, while officers who really have rendered good service both to Egypt and to England have been passed over, being even refused field allowance when landed for duty.

Mr. Barnaby is, we hear, a very clever young man. The Mr. Barnaby we allude to is not the Director of Naval Construction, but his son, the young gentleman who holds a high position in the well-known firm of Thorneycroft and Co. That firm does a good business with the Admiralty. It has lately been making experiments in screw propulsion on board the *Lightning*. Of course, the Admiralty could not recognise the exhaustive and valuable experiments of a similar nature made by Messrs. Yarrow and Co., and therefore must spend money on useless ones in the *Lightning*.

The German Admiralty have supplied the Hotchkiss machine-gun to their vessels in the following proportion:—Ironclads and large corvettes, six guns each; sloops and gun-vessels, four each; and gunboats, one to four each, according to size and class. The arm adopted by the German Government is the 37-millimetre revolving cannon, both the German Admiralty and War Office preferring shell to the small solid projectiles in use in our Navy. In fact, since the failure of the French Montigny in 1870, the Germans have an utter contempt for all kinds of mitrailleuses.

In most of the vessels-of-war now building on the Continent, the old system of large hatches and skylights is being adopted, so as to rid the gun-deck of smoke as quickly as possible.

Some explanation appears to be necessary with regard to the bursting of the condenser on board the *Opal* the other day; surely, it is not usual for an explosion to occur with a water pressure of 30 lb., or with any pressure at all, when the vessel contains nothing but water; if it is so, the testing of boilers by hydraulic pressure must be attended with more risk to those conducting the operation than is generally supposed to be the case. The *Opal's* condenser cannot, we presume, have been intentionally tested with air or steam; yet the accounts of the incident seem to point to the accidental presence of some more compressible substance than water.

The Danish ironclad torpedo-ram *Tordenskjoeld*, a vessel of 2,400 tons and 2,556 horse-power, is giving much trouble, as the torpedo gear has proved quite unreliable. It was copied as nearly as possible from that of the *Polyphemus;* and since the torpedo gear of that "hideous, misshapen monster" has failed, there is nothing to wonder at in the fact that the apparatus on board the *Tordenskjoeld* won't act.

A contractor some time ago sent in a tender to the Admiralty for a new magazine rifle with patent sights, but his offer was curtly declined. On going to the "Seat of Corruption," writes a correspondent, "he was told that the said patent sights were not quite right about the *tips!*" As the inventor was not in a position to "tip," he let the matter drop.

The coronation of the Czar of Russia may shortly be looked forward to.

Though no estimate of the number of Volunteer troops which will attend the Brighton review can be formed until the early part of next month, a good idea of the strength of the column which will make Hayward's Heath its starting-point on Good Friday, is afforded in the returns sent in to the Home District Office. Up to Thursday afternoon, applications for 3,484 officers and men of corps in the Home District had been received, and we understand that this large number, about 1,500 over that of last year, is likely to be considerably exceeded. The task of providing sleeping accommodation and rations for a column of 4,000 men is not an easy one, but as the energetic Assistant-Adjutant-General of the Home District (Colonel Methuen) has undertaken it, it need hardly be said that it will be well carried out.

Field-firing is being actively carried on at the Browndown ranges, and with generally good results. A section of 13 men, 1st Battalion 17th Regiment, volley-firing at a gun battery at 600 yards, made 48 hits in their 130 rounds; and at 800 yards, 17 men of the 61st Regiment, firing at a gun detachment, made 20 hits in 170 rounds. The practice at dummy-heads by the 73rd Highlanders resulted in 12 hits, out of 30 rounds fired.

The *Globe* has a paragraph on Volunteer discipline, in which it draws attention to what it calls the "slender thread on which the discipline of a Volunteer corps depends." Our contemporary's remarks give evidence of ignorance of facts, for the parade of the Volunteer regiment referred to was not an annual inspection, as the writer seems to suppose. The case against the 1st London Artillery—the regiment evidently alluded to—is bad enough, without its being made worse. It is in the highest degree unfair to blame the officers, non-commissioned officers, and men generally for what has occurred. The internal arrangements of this regiment have been for years past little short of a scandal. It is not to be wondered at that the Volunteers object to being made a laughing-stock. This is what the members of the 1st London Artillery have been for some time, and seeing that the blame in no way rests with the officers and men, but with those in authority over them, we consider it only an act of justice to endeavour to disabuse the public mind of any idea that the long-suffering members of the regiment are open to censure. They really deserve the greatest amount of praise for having stuck to their oars so long, and tried by every means in their power to pull the regimental boat into smooth water. It has been no easy task they have accomplished, and they merit the thanks of the whole Volunteer service for having taught a lesson in a quarter where the Volunteers are even still little understood, *i.e.*, among those whose duty it is to see discipline maintained, but who, either from ignorance or other causes, systematically refuse to act until matters are brought to a crisis, and they are absolutely compelled to do so.

A bugler in a rifle uniform was seen walking in the streets a few days ago. From his green jacket with scarlet facings, and from his wearing the medal for South Africa, it might be inferred that he belonged to, or had served in, either the 2nd or 3rd Battalion of the 60th; but there was no mark or device on any part of his uniform by which the Secretary of State for War, assisted by any number of his civilian officials, could tell whether that bugler belonged to the glorious old 60th, or to the Huntingdon, or the Royal Flint, or the 2nd Middlesex, or the Carlow, or the North Cork Militia!

The ex-War Minister in France, General Billot, who has preferred resigning his post to having anything to do with depriving innocent Princes of their swords, is the twenty-first child of a country gentleman in the Limousin. He was sent to St. Cyr, and has since fought his way up to his present rank. Made a prisoner at Metz, he refused to accept the capitulation, and made his escape into Belgium; from thence he went to Tours, where he obtained the command of the 18th Army Corps. The General has always been a Republican, but after the Franco-German War his rank was confirmed by the same Committee of Grades which confirmed that formerly held by the Orleans Princes, and he considers that they have as much right to their epaulettes as he has to his. General Billot, who is a Senator, made himself very popular in the War Office.

We referred last week to an association of officers of high standing and long experience in her Majesty's service in connection with the Volunteer Forces, and we are now able to state that it will very shortly be put before the public, in the form of "The Auxiliary Forces Uniform and Equipment Company, Limited." At present, we need only say that Major-General W. Manley Dixon, C.B., late Royal Artillery, will be the Chairman of the Board of Directors, bringing to that post his long and valuable experience as former Superintendent of the Royal Small Arms Factories, and that the list of patrons of the company includes the names of some fifty of the most influential commanding officers of Volunteer brigades and battalions. We do not wonder at their willing promises to support the company, calculated as it is to relieve them of the difficulties that have so long stood in the way of a satisfactory issue of clothing and accoutrements to their men. In addition to this, the company has all the elements of a great and successful commercial undertaking.

The French Government appear to have experienced considerable difficulty in filling up the vacancies left in the Cabinet. The post of War Minister was offered to no less than five Generals—Generals Campenon, Saussier, Dumont, Schmitz, and Delebeque—before it was finally accepted by General Thibaudin, against whose nomination serious objections have been raised. During the Franco-German War, a good number of French officers who had been taken prisoners affected to believe that their parole given to the Germans, who had broken their word by continuing the war after the fall of the Empire, was not binding. General Thibaudin, if we are to believe several French papers, was one of those officers whose mistaken notions concerning honour naturally entailed increased severity on the officers who did not break their parole. It is only fair to the new War Minister to say that he denies the charge brought against him. His version is that he was so badly wounded, that the Germans, thinking him unfit for further service, did not exact any promise from him. On recovering from his wounds, therefore, he immediately took up arms. It is not easy to see, however, why, if he had conducted himself in strict conformity with the rules of war, he should have assumed his mother's name, and have fought, on recovering from his wounds, as Commagny, and not as Thibaudin. Then he served with the Army of the Loire as a General of Division, whereas the Committee of Grades which sat after the war did not confirm him in that rank, but put him back to his former rank of Colonel. He did not become a General of Brigade again until 1877. As for the Ministry of Marine, it has been found more difficult to find a successor to replace Admiral Jauréguiberry than General Billot. In fact, as the two Ministers have resigned sooner than commit an unjust act, this difficulty is not to be wondered at.

Le Progrès Militaire has the following:—"Military Veterinary-Surgeons see with grave apprehension squadrons and batteries reduced to an average of fourteen old soldiers, alone capable of taking care of horses. These men have in consequence four or five animals to groom and exercise daily, in addition to the training of young horses to look after. Before long, they will be tired out. This unfortunate reduction of effectives may engender glanders in the Artillery and Cavalry, thus producing most serious effects. Contagious maladies, when spreading in a regiment, quickly carry off 25 or 30 horses; and in the present state of things, it is impossible to avoid foreseeing parallel mortality. 1,000 fr. (£40) per horse lost by contagion contracted from want of necessary care, will soon encumber the Budget with charges far more considerable than those necessary to maintain a normal effective."

The Duc d'Aumale, although he has been placed on the retired list, and can hardly hope for any active employment under the present French *régime*, will none the less feel deeply the blow dealt at him and the other Princes of his house. On leaving school he entered the Army, and when his father, Louis Philippe, was turned off the throne, he was Governor-General in command of the Army of Algeria. On learning what had happened in France, he recommended the colonists and the Army to accept the new order of things, handed over his command to General Cavaignac, and sailed for England, in company with his brother, the Prince de Joinville, whose Naval career was cut short. When the Empire fell, the Duke wished to fight for his country, but he was refused this permission by M. Gambetta. When the Franco-German War was over, both the Prince de Joinville and the Duc d'Aumale were elected Members of Parliament, and the law of proscription under which they had been banished was repealed. Having been appointed to the command of the 7th Army Corps, the Duc d'Aumale, after the dissolution of the Long Parliament, did not seek re-election. He determined to devote his whole time to his military duties, and while in command of the 7th Corps, which he brought to a high state of efficiency, he hardly ever left his head-quarters at Besançon, and his splendid residence of Chantilly was almost deserted. When he had completed his term of service with the 7th Corps, the Duke was appointed an Inspector of Army Corps, a post which has since been done away with. There were three of these Inspectors, the Duke, General Douai, and General Deligny. The two latter are dead. The post was abolished because it was supposed to be one of too much influence in the State. It had been borrowed, like many other military institutions, from Germany, where there are five Inspectors,—the Imperial Prince, Prince Frederick Charles, the Grand Duke of Mecklenburg, the Prince Royal of Saxony, and the Grand Duke of Baden. The Inspector, in addition to inspecting Army Corps, was a future Commander-in-Chief, and nothing would have been more grateful to the feelings of the Duc d'Aumale than to command an Army in the field, for he is every inch a soldier.

Some time ago we called attention to the 51st having been deprived, in official announcements, of the title of "King's Own Light Infantry," and being called simply "1st Battalion, South Yorkshire Regiment." This grievance has been since removed in a great measure, for in the *London Gazette* and in the body of the *Army List* the regiment now appears with its proper title, shared, of course, with its amalgamated battalion (105th). But in some of the outlying regions of our military "Bradshaw," among tabular statements in which the lamented numbers enable us to trace our disguised "line battalions," under their long, though "abbreviated," territorial titles, this regiment is still called the "South Yorkshire Regiment." We cannot see any reason for depriving one corps only of its old distinctions, nor for many other alterations which seem to be the work of "the Demon of Muddle."

The Paris correspondent of the *Standard*, writing on the crisis in France, said the other day:—"General Billot, speaking to the House, said as follows: 'Speaking from a military point of view, the Army of the Republic should, above all, be an army of law. The army,' he added, 'had a charter which could not be tampered with. The basis of that charter was the proprietorship of his grade by an officer.' M. Fabre replied, 'That he understood the difficulty of the position of the Minister of War, and observed that it could only be surmounted by a law not interfering with the principle that the grade was the property of the officer.'" We would commend these words to the Ministers of War of the reforming class, who think that they can treat English officers like so many chessmen for playing their own game of political professional advancement. They would do well to bear in mind that the French officers never purchased commissions under Government rules and regulations, but only served for them; whereas, the seniors officers of the English Army not only served for proprietory rights in their commissions, but paid for them in hard cash. The ambitious Mr. Childers has induced the Government to hunt hundreds of these officers out of the Army, and destroy their promotion, prospects, and careers, a most mischievous and dangerous precedent for any army.

There must be very few officers who have ever been quartered in the Northern metropolis who have not some pleasant recollections of the snug little Club in Queen Street, whose doors have always been open to the garrison. As it happens, it is the oldest military and naval club in existence, with the exception of the Senior, having been established in 1825, while the survivors of the great war were, of course, still very numerous, and when many of the most distinguished Scottish soldiers and sailors belonged to it. It was always great in old Indians, of both the military and civil services; and for more than fifty years, it continued to be a rendezvous where sociality and good fellowship—its motto is "Concordia"—flourished in a manner unknown in greater and more pretentious institutions of the kind. Latterly, the old Club has rather fallen upon evil days in one respect, though in one only. In a financial point of view, there are few Clubs so well off, while as regards comfort and all the appliances and belongings of a club, it was never in better trim. In fact, it only lacks an adequate supply of recruits of the classes by and for whom it was instituted. To this a variety of causes has contributed. All along it has had to contend with the superior allurements of its great neighbour in Prince's Street, which, consisting mainly of a rather incongruous mixture of noblemen and country gentlemen, with Edinburgh lawyers and wine-merchants, is admittedly considered the "first club in Scotland;" and as "John Bull loves a lord," and the *genus homo* labelled and portrayed by Thackeray endureth for ever, so the soul of many a Sandy will not rest in peace till he can boast of belonging to the same club with the Marquis of Glenscratch and the Earl of Inveryoukie. Moreover, Edinburgh is, now-a-days, crawling with clubs of divers sorts, which some military men even, rather oddly, seem to prefer. Then the changes which have taken place in the Indian service, and perhaps, as much as anything else, the all-absorbing attractions of London, these may all have tended to bring about the state of matters referred to. At any rate, the Club has of late had to seriously consider the necessity of dispensing with any "service" qualification, and becoming open to all. Surely it would be much to be regretted if it came to this. Scotland, as we know, is now, in common with other parts of the Empire, blessed with a Territorial Army, —strictly territorial, no doubt,—but it will say little indeed for the love of their cloth of Scotch officers, generally, and will be a sure proof of the decadence of Caledonia into a mere province, if the whole of that nation cannot maintain in its ancient capital its unique and old-established "Caledonian United Service Club."

It is sad to see the hundreds of soldiers who have been discharged from the Army on the completion of their 12 years' service with the colours and Reserve, unable to obtain work, starving and loafing about the streets of London and other large towns. The constant calling-out of Reserve men for trumpery little wars—like the recent one in Egypt—will greatly increase the difficulty of obtaining work. Six years with the colours is just long enough to spoil most young men for civil life and handicrafts, and not long enough to make them first-class soldiers. If there must be a large Reserve, without the legitimate method adopted on the Continent, viz., conscription, so be it, but six-year soldiers might be allowed to pass into the Reserve for 15 years, during which time they should be liable to be called out for big wars, and at the end of 21 years' total service, they should have their 1s. a day pension for life. This was the opinion of some of the most distinguished soldiers on the Reorganisation Committee in 1870, some of whom held that eight or nine years with the colours, and twelve years in the Reserve, with pension at the end, was the safest and best solution of the soldiers' question. But the Committee were tied down in their recommendations to a certain sum, beyond which they could not go; so the proposal for keeping good and highly-trained soldiers, available for war for 21 years, fell through. It is considered by many officers that, in the interests of the Army and the country, it was a great pity that the Egyptian affairs did not develope into a large war, in order that the Army might have been put to a heavy strain and real test.

The next move of the advanced military reformers comes from India, where it is now proposed to appoint commanding officers of regiments on "probation!" The independence of Lieutenant-Colonels commanding has, under the five-years' Act, been pretty well destroyed already, and the advantages and charms of regimental command reduced to the lowest points. This is really the last straw. Fancy the Royal Sussex Downs Bungay Fusiliers marching past royalty, commanded by "Probationer" Lieutenant-Colonel Fitz War Office Smith! All these senseless changes may bring about the time when field-officers will refuse the command of regiments, when there is constantly increasing worry and responsibility without any sensible increase of pay.

Lieut.-Col. R. C. Stewart, Madras Cavalry, has been appointed an hon. aide-de-camp to the Viceroy, and Lieut. St. Quintin, 30th Bengal N.I., is appointed an extra A.D.C.

Major-Gen. Gamble, C.B., returned to Barbadoes last month from Jamaica, and shortly after his arrival formally opened the United Service Home, in the presence of his lordship the Bishop, the chief justice, and the officers of the garrison. An entertainment was given to about 100 men from the different corps in the garrison.

The *Times* correspondent at Durban telegraphs:—"Cetewayo himself has throughout displayed the temper of a spoilt child, needing constant reproof, but amenable to severe admonition. Signs are not wanting that Cetewayo and John Dunn may square their differences. If so, Dunn may again become, as the King's chief adviser, the most influential personage in Zululand. Cetewayo is reported to have said at the installation, 'Dunn never killed any one; he only took other men's cattle. He spilt some blood in Sitimela's affair, but that we are all pleased with.' After the palaver was over, Sir T. Shepstone introduced Col. Curtis, Inniskilling Dragoons, who commanded the troops. This officer said:—'I have brought the King to his people. He has now to rule, and my work is ended. I hope a new order of things will result—union, order, and prosperity.' The visitors who accompanied the expedition testify to the excellence of the commissariat arrangements. General harmony prevailed among the several branches of the staff employed."

NOTES FROM ALDERSHOT.

(FROM AN OCCASIONAL CORRESPONDENT.)

Route-marching, when the weather has permitted, and the ordinary routine of regimental work, are all in the nature of military exercise in a general way that can be recorded of the week. A draft of the 26th Scottish Rifles (Cameronians), consisting of one serjeant, one corporal, 57 privates, one woman, and three children, proceeded from the Camp on Monday last to Portsmouth Dockyard, and embarked in the Jumna, for conveyance to India, to join the 90th, at Cawnpore. The mounted portion of the 24th Company, R.E., proceeded by march route to Shorncliffe on Monday. Surgeon-General J. Sinclair, M.D., Principal Medical Officer of the Division, having been ordered to Dublin to take up similar duties, Deputy-Surgeon-General J. Ekin, C.B., has assumed the duties of Principal Medical Officer from the 5th inst., as a temporary measure. The Principal Medical Officer inspected during the week the whole of the recruits who joined the command during the past month, also the men proposed for invaliding. Major-General Sir F. W. J. FitzWygram, Bart., commanding the Cavalry Brigade, has been granted leave of absence from January 26 to March 1. Fifteen surgeons from Netley have been ordered to proceed to Aldershot on the 1st prox., for a course of instruction in Army Hospital Corps drill. It is proposed to resuscitate the Officers' Whist Club, and a meeting of those interested was held at the Officers' Club on Wednesday. A board of officers assembled in the lines of the 87th Fusiliers yesterday (Friday), for the purpose of inquiring into and reporting upon the loss of articles of clothing, equipment, &c., by that regiment during the late campaign. Captain H. B. Rich, R.E., has been ordered here for duty. Lieutenant Anstruther, R.E., proceeds to Woolwich, temporarily, for duty. A detachment of the 87th Fusiliers, consisting of Lieutenant Wilbraham, one serjeant, one corporal, and 24 privates, proceed this day (Saturday) to the Royal Military College, Sandhurst, to be employed on the construction of field works, under the Professor of Fortification. H.R.H. the Field-Marshal Commander-in-Chief has approved of Quartermaster-Serjeant Staff Clerk G. Palmer being appointed Garrison Serjeant-Major at Aldershot from the 31st ult. H.R.H. the Duke of Connaught, K.G., has been nominated one of the stewards of the Spring Divisional Steeplechase Meeting. Lieutenant-Colonel S. H. Toogood, late R.A., has been appointed honorary secretary to the Divisional Races. It is announced that the Officers' Divisional Dramatic Club will give two performances of the plays, "Checkmate" and "The Happy Pair," in the Officers' Club, on the 20th and 21st inst. War games were played on Wednesday by the Royal Artillery, assisted by cavalry and infantry; and on Thursday, by the 3rd Hussars, assisted by Royal Artillery and infantry. In my notes of the 13th ult., I alluded to the questionable entertainment for mind and body provided in some of the camp canteens. Those remarks do not apply, however, to the Cavalry Brigade Canteen, which is one of the best in the command. There are no regimental cavalry canteens, only one for the brigade; and Sir Frederick FitzWygram takes more than ordinary interest in its management, often visiting it, to personally test the quality of the beer, groceries, &c., sold there. Shortly after assuming command of the Cavalry Brigade, he had a spacious concert-hall erected adjoining the canteen, which is nightly crowded with audiences fully appreciative of the first-class talent provided. The members of Lord Morley's Committee on Hospital Organisation visited Aldershot on Tuesday. All Commanding Officers of corps were ordered to meet the Committee at 12 noon, for the purpose of tendering evidence, if called upon. Reports on the Wallace spade have been called for, from regiments stationed here that have served during the recent operations in Egypt. This entrenching tool, which is also useful for many other purposes, is highly spoken of by all ranks. An Aldershot weekly publication waxes exceeding wroth in a recent issue, because the Volunteers have not chosen the vicinity of the Camp for the Easter-Monday Review. But more especially is it moved by a suggestion, which recently appeared in print, that if Aldershot were selected, the inhabitants "would make hay while the sun shone, and the Volunteers would be pretty freely bled." There is, perhaps, some little excuse for the double-leaded half column of "scathing scorn" aimed at the author of this simple phrase. Trade has been very dull in the town of Aldershot lately, and it is annoying to see a ripe plum of this quality drop so easily into other hands. It must be well known, at least in Military circles, that the invitation from the Aldershot Burgesses to the Volunteers was dictated by the loftiest patriotism, from no interested motives, and entirely for the good of the Volunteers alone. As to making them "bleed," the citizens of Aldershot are inexpressibly shocked at being represented as eager to work that slaughter upon the Citizen Army which ought only to be the mission of a sanguinary invader. Perhaps the Volunteers may select Aldershot for their manœuvres on some other Easter Monday. When that day arrives, it will be a red-letter one for Aldershot town, whether the sun shines or not. It would not be "a boon and a blessing," however, for the military population; the dwellers in the Camps would have nothing but hard work. The only redeeming feature would be the satisfaction of knowing that after one experience by our brave defenders, a return of the Volunteers to Aldershot would be more than problematical. The Royal Artillery have been experimenting during the week with the Weldon range-finder, under the supervision of the inventor. It is stated here unofficially that the Staff appointment of D.A.A.G. for Musketry will be abolished at an early date. A number of Militia officers will be examined here for Line commissions early in March next. It is diligently published in Division Orders from week to week, under the head of "Divine Service," that commanding officers are to facilitate the attendance of Jews at their Synagogue at 8.30 a.m. on Saturdays and holydays. Knowing that there is not a single Jewish soldier in the command, I am at a loss to understand the meaning of this needless solicitude on behalf of Jews. Is it to pave the way for the addition of a Rabbi to the list of Army Chaplains? In the division order mentioned, seven denominations are enumerated, including Jews. A famous Frenchman once said of us that, although unable to cook a "spud" properly, we had fifty religions. If so much trouble is taken concerning Jews, although none can be found wearing her Majesty's uniform, why not publish in the weekly Divine-service Order the whole fifty faiths spoken of, representatives of many of which are now serving here. I have reason to believe that there are at present in the Division two Shakers, a Quaker, at least three Latter-day Saints, and quite a company, up to war strength, of the Salvation Army, not to mention other sects. The members of these persuasions, by not being officially recognised, have surely reasonable grounds for complaint, seeing that such unnecessary fuss is made about a religious belief which is certainly not one of the fifty English religions spoken of by Voltaire.

MR. BARNABY AT BAY.

Mr. Nathaniel Barnaby, C.B., Director of Naval Construction, has at last been fairly overhauled, and forced to stand at bay. He last night delivered a lecture, at the Royal United Service Institution, on "Battle Ships." He calls his lecture "a forecast." Were he an angler, we should have called his throw "a clever cast," for there is no denying the fact that it was a "feeler," as cleverly and gently thrown to catch a prize as ever was salmon-fly or sucker of octopus. The lecture was extremely short, occupying not more than ten minutes. It was a recantation of faith. The question of "size of ship" was the one Mr. Barnaby tackled first. He quoted Signor Brin, ex-Italian Minister of Marine. But he "neither adopts nor challenges" the Signor's arguments. The consideration of "cost of individual ships" was then gone into by England's Chief Naval Constructor. This is a subject at which Mr. Barnaby is, or should be, *au fait*. He would not limit the cost of his constructions. We would. That is the only difference of opinion between us, on this point. Mr. Barnaby then proceeds to consider "what the battle ship should be for England," and what "it will be required to do." He advocates, we may say, "setting a thief to catch a thief," in arming merchant steamers to act as fast cruisers in time of war; but he deprecates all attempt at constructing men-of-war to rival these in speed. He has at last seen the folly of building monster ironclads, and the wisdom of the policy so many years advocated in the columns of the *Army and Navy Gazette*. What a pity Mr. Barnaby did not see this sooner! How many millions would he not have saved the taxpayers? Here is what the designer of the Inflexible now asserts is his belief:—"*The battle ship of large size is not only likely to become obsolete for the attack and blockade of ports, but also for another important service, viz., harassing the commerce of an enemy.*" Mr. Barnaby touched on the Navy of the United States, and that of France, devoting some fifty lines to this subject, which we have no need to quote. He then touched upon the ordnance question. He admitted, what we have so often asserted, that side armour will soon disappear; but he adheres to the "broadside principle," instead of acknowledging that the ram necessitates the "end on" plan of attack and defence. He also quoted a paper read by Captain Harris, R.N., last year, at the Institution (on which we have had an article in type for some weeks, but which we have been unable, through pressure of other matter, as yet to publish), on "Fast Cruisers;" and he concluded by placing before his audience the following five questions for discussion:—

> "1. Should England build ships greatly exceeding in speed, coal-endurance, guns, and armour, existing ships of the first class, regardless of size, and consequent cost? 2. Will not the enemy's ports require to be attacked and blockaded, notwithstanding the torpedo? and if so, what description of ship will be suited for this attack? 3. Ought regular ships-of-war to be built of sufficient power and speed to capture ships like the Servia and Alaska, and their larger and faster successors? or should we not rather look to the services of such ships for the work, endeavouring to fit them for it? 4. When the powers of the ram and the torpedo come to be tested in actual warfare between two Great Powers, what part may we expect to be assigned to the fast gun and torpedo ship, with protecting deck, and the merchant auxiliary, as a result of these contests? 5. Ought the battle ship of the first class to carry guns of the largest calibre which can be made and worked, or should we be content to allow the gun to progress slowly with the advance of the armour?"

Mr. Barnaby concluded his lecture with the following admission:—

> "I have wished in this paper to guard myself against the advocacy of a particular policy with regard to any of these questions. It is my duty to observe tendencies carefully, and as no discussion on such subjects can be profitable which does not take the elements tending to change of conditions into account, I have submitted them to you. When travelling along a badly-defined road in an unknown and difficult country, we may avoid errors and delays by getting on high ground, overlooking the minor features of the road along which we are passing."

Just so. The Director of Naval Construction, having been brought to bay, and seeing no means of escape provided for him within his own Department, where designing is at a stand-still from sheer want of the knowledge of the requirements of the Navy, has come down to the lower world he so much despises, and has condescended to ask the opinion of the officers of the Navy as to what they think should be "the ship of the future." Mr. Barnaby does not know. He fears to go on. He knows he is treading on dangerous ground, if he does. One step farther in the old course, and he may be lost. He sees his peril. He pockets his pride, and he endeavours to glean from the brains of others that which he cannot obtain within the Constructor's Department of the Admiralty. England's policy of Naval Construction has been reversed. Small ships are now to be the order of the day. But of what type? That is the question Mr. Barnaby would like to have settled for him.

SOLDIERS ON FURLOUGH.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—It is really high time that the authorities put a stop to the slovenly appearance of soldiers when on furlough. Lately I have seen several soldiers swaggering about the town in anything but a soldierly manner, and dressed most improperly. They had a dirty, unshaven appearance; no belt on, trousers turned up over their boots, forage-caps on back of head, and the ribbons hanging half-way down their backs. I can assure you I felt thoroughly ashamed of their style. A very objectionable fashion seems to have crept into the ranks of the Army; I refer to the way our soldiers are allowed to plaster their hair down in front into the resemblance of a fringe. I was in conversation lately with a late, well-known troop serjeant-major,—a soldier of the real old sort. I asked him what he thought of the soldiers of to-day. "Sir," said he, "they are only fit to part their hair in the middle, plaster it down over their faces, swagger up and down the streets, and rob foolish servant girls of their savings!" I do not endorse the serjeant-major's opinion, but I do think the mode in which the men are allowed to dress their hair most objectionable.—I am, &c.,

RESERVE OF OFFICERS.

SIR,—It is to be hoped that the authorities will take to heart your editorial remarks on the subject of the dress of soldiers on furlough, particularly at a time when so much is being written and said about the dress and turn-out of the Regular and Auxiliary Forces on the occasion of the Royal Review. I happened to be in a city of Somersetshire a few weeks ago, and there saw many soldiers on furlough,—Guards, Cavalry, Line, &c. (for Somersetshire sends many recruits to serve the Queen). With the exception of the Guards and Cavalry and one Marine Artilleryman, I did not see a soldier properly dressed. The Linesmen were very slovenly indeed, dressed in kersey frocks or great-coats, some wearing plain-clothes great-coats, and others with coloured woollen mufflers round their necks, none wearing waist-belts or gloves. They were not a pleasant sight to see in the High Street, contrasting, as they did, so very unfavourably with the smart Guardsmen and Dragoons taking their walks abroad in their clean belts and gloves and well-put-on uniforms. I do not say for a moment that all Linesmen turn out improperly dressed when on furlough, but a great many do; and the fact that in some regiments men are not allowed to take their waist-belts on furlough with them (for what reason, Heaven only knows) prevents their turning out smartly, and encourages a general carelessness in dress. If the authorities would issue an order that men on furlough must turn out in public dressed the same as when with their corps, such unsoldier-like spectacles as you describe, and I saw in Bath, would be, in a great measure, put a stop to; and I doubt not but that a higher class of recruit would be induced to come forward, for, after all, "fine feathers do something towards making fine birds."—I am, &c.,

STAFF OFFICER.

Referring to the permission recently accorded to the commandant of the Calcutta corps to admit West Indians, the *Indian Volunteer Gazette* says:—"At a recent parade we noticed several West Indians, decidedly of the negro type. As we cannot doubt their loyalty, they have every right to be welcomed, and prejudices must be sunk in favour of useful men."

The *Daily Telegraph* says:—"On an early day after the opening of the session, a further vote of money will be asked on account of the military and naval expenditure in Egypt; and it will also be proposed to grant annuities to Lord Alcester and Lord Wolseley, in support of their peerages. To this the Parnellites and Extreme Radicals may offer some opposition."

A Reuter's telegram from Berlin states that the appointment of the Prince of Wales as Honorary Colonel of the Pomeranian Hussar Regiment, No. 5, also known under the name of Blücher Hussars, has been gazetted.

"SAPO CARBONIS DETERGENS" is a physician's name for a remedy prescribed for the past quarter of a century for every variety of skin disease. The public have also adopted the same, as a preventive of small-pox, scarlet fever, and measles. Purchasers should see that the Latin brand is on every tablet, and WRIGHT'S COAL TAR SOAP on each wrapper, without which none is genuine.

REGIMENTAL TRAINING, 1883.

THE BRAZILIAN NAVY.

Brazil, with its huge area of three and a quarter million square miles, and a coast-line of 3,700 miles, has for some years past directed a good deal of energy towards the increase of its maritime strength. The country possesses at present an armoured fleet of some twenty vessels, of which ten are fairly serviceable for cruising and coast defence. Although apparently safe from attack, either by the North-American States or any coalition of its smaller South-American neighbours, the Government of the Empire has recently decided upon a large increase in its Naval armaments. According to a circular despatched on the 1st ult. by the Minister of Marine to the inspectors of the Naval Arsenals of Brazil, the Brazilian Navy is to be at once remodelled, with the embodiment of all modern improvements. The proposed additions to the Fleet are as follows :—Class A, two ironclads of the Riachuelo type, now building in England, of 5,000 tons' displacement and 6,000 tons indicated horse-power, 11 in. of armour, 14 miles speed, and 18 ft. draught, with an armament of four guns of heavy calibre, besides machine-guns; and capable both of seagoing service and coast and river defence in the estuary of the Prata. Next come two cruisers (Class B), with shell-proof decks, armoured along and below the water-line, drawing 18 ft. of water, and carrying guns capable of penetrating 14-in. plates at a distance of 1,100 yards; propelled by double screws, and with a speed of not less than 14 miles an hour. Class C consists of two monitors, armoured with iron and steel plates 10 in. thick—single turret—carrying two guns, with penetrating power of 14 in. at 1,100 yards; greatest draught, 10 ft.; minimum speed, 11 miles an hour, double-screws; artillery so mounted as to be capable of use at sea in any weather. Two gunboats for coast defence and operations in the great rivers, form Class D. They are to have a speed of 13 miles, at least, with a draft of 12 ft., and will carry one heavy gun and four smaller ones. Both these vessels are to be propelled by double-screws, and in common with the ships in Classes A and B are to have as little top-hamper as possible. Next come six gunboats (Class E), constructed specially for harbour defence and for operations along the rivers of the country. They are to have a minimum speed of 9 miles an hour, and a maximum draught of 6 ft. Each is to be armed with two guns of 4¾ in. calibre, mounted in the bow, parallel to the keel, and protected by shields from small-arm bullets and machine-gun projectiles. These boats are to be mastless. Class F consists of 4 gunboats for operations in the smaller rivers, and for special service. These vessels are to have a maximum draught of 4 ft. and a minimum speed of from 8 to 9 miles. They will carry two guns, with a calibre of 3½ in., mounted on swivels, one at the bow, the other at the stern, protected from small-arm bullets and machine-gun projectiles by steel plates or shields. The engines and boiler are to be protected by the coal bunkers, which, in the absence of coal, are to be kept full of a certain wood of great resisting powers, found in abundance along the shores of the Uruguay. In order better to guard the engine, especially when the bunkers are filled with wood instead of coal, plates of steel, one inch in thickness, are to be ranged vertically around it. In addition to the above vessels, there are to be constructed (Class F) twenty torpedo boats, of four kinds. Those of the first kind are to be capable of use in the open sea in any weather, and are to have a speed of not less than 20 miles an hour. Those of the second kind are to be for harbour defence, and to have a speed not less than 18 miles. Those of the third kind are to be adopted for service on board the larger ships of the fleet, and those of the fourth kind, will form part of the armament of the gunboats and smaller ironclads. In addition to the arms described in the details of each of the vessels mentioned, every one of them, including the torpedo launches, is to carry Nordenfelt machine guns of that calibre best adapted for the purpose for which it is intended, and each one is also to be equipped with as many of the rapid 2-inch shell-firing guns of the same maker, as the vessel is capable of carrying. With regard to the completion and delivery of the new squadron, it is proposed to distribute them in the following manner:—Two gunboats of Class E, together with the four of Class F, and five torpedo launches of the first and second kind respectively, are to be ready at the end of the first year, counting from June 1, 1882. Two more gunboats of Class E are to be delivered six months later; and at the end of two years—June, 1884—the two monitors of Class C, and one of the cruisers of Class B, are to be completed. In January, 1885, one of the gunboats of Class D, the remaining two of Class E, five torpedo-launches of the third kind, and five of the fourth kind, are to be added to the strength of the Brazilian Navy. In three years from June last, the first of the ironclads of the Riachuelo class (A), and the second gunboat of Class D will be ready for commission. In another six months the second cruiser of Class B will be delivered, and in four years, June, 1886, the second ironclad of Class A will complete the squadron. The whole of the vessels are to be built of iron or steel, the latter predominating; and the hulls in every case, except the torpedo-launches, will be covered with a double casing of wood, sheathed with copper below the water line.

LIST OF BRITISH AND FOREIGN IRONCLADS IN COURSE OF CONSTRUCTION.

Together with their displacement, indicated horse-power, number of guns, and thickest armour:—

THE "KHEDIVE'S STAR."

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—As I expect soon to be a recipient of the "Khedive's Star," I write to thank you for your most admirable suggestion regarding the colour of the ribbon for that decoration. Either of the colours you mention—green or red—would be very much more appropriate than blue—the one which I understand has been proposed—and particularly as the star will be worn alongside the English medal for the Egyptian Campaign, which is attached to a blue-and-white ribbon. I have a great respect for the Blue-ribbon Army and the cause which it represents, but in this instance I should prefer not having their colour. Hoping that your suggestion may be acted on, I am, &c., "EGYPT."

The Army.

3rd Dragoon Guards. The University of Dublin on the 6th inst. conferred the degree of Master of Arts on Lieut. MacFarlane.

7th Dragoon Guards. The regiment will embark at Alexandria at the end of the month, *en route* to England.

5th Lancers. Capt. Morland is a candidate for the appointment of adjt. of the Lancashire Yeomanry Cavalry.

9th Lancers. Lieut. the Hon. C. G. Lascelles is *en route* to India in H.M.S. Jumna.

20th Hussars. Lieut.-Col. Trench has arrived at St. etersburg, and taken up the duties of Military Attaché.

ROYAL ARTILLERY.

N Baty. 2nd Brig. embarks at Alexandria at the end of the month, *en route* to England.

Lieut.-Col. P. H. Heathcote has been appointed to the command of the Artillery at Quetta.

"Inquirer" writes:—"In Hart's *Army List* for Oct., 1882, I find that Francis Brinkley, a captain of the Royal Artillery, is on the Seconded List, as 'drill instructor to the Japanese.' To my knowledge, no such appointment has been held for several years past by the officer referred to. Since his engagement with the Naval Department of the Japanese Government expired, in 1877, he found employment as a teacher of mathematics in the Government College of Engineering, but for the last two years he has been editing an obscure local newspaper in Yokohama called the *Japan Mail*. I write to ask is such a career in accordance with the regulations applicable to the officers on the Seconded List, and is an officer under such circumstances entitled to promotion and a retiring allowance?"

Gen. S. E. Gordon, C.B., whose death occurred on the 5th inst., entered the service on June 19, 1844. In the year 1854, when serving as adjt. at Woolwich, he was selected by Col. Strangways, who was appointed to command the Royal Horse Artillery with the Army of the East, to be his adjt., and he proceeded to Varna. On Col. Strangways succeeding to the command of the Royal Artillery with the Army, Capt. Gordon was appointed his aide-de-camp. At the battle of the Alma, the two guns of Turner's battery, which did such good service at the top of the knoll, on the right of our position, on which Lord Raglan and the head-quarter staff were assembled, arrived without a sufficient number of gunners to man the guns, a portion of the detachment having been delayed in endeavouring to extricate an ammunition-waggon, one of the horses of which had been shot in the river. On observing this, Lieut.-Col. Dickson (now Sir Collingwood Dickson), Capt. Gordon, and Lieut. Walsham dismounted from their horses and served one of the guns, during which operation Lieut. Walsham was killed. Capt. Gordon accompanied his General on the flank march, and was present at the action at M'Kenzie's Farm. For his services during the war Capt. Gordon was successively made major and lieut.-col. On the Indian Mutiny breaking out, he accompanied his battery to India. Col. Gordon's brevet rank gave him the command of a column, which did good service in Oude. After the Mutiny, Col. Gordon was made the first brigade-major at the School of Gunnery. He then became Superintendent at the Royal Military Repository, then Chief Instructor at the School of Gunnery. He was next appointed Director of Artillery Studies, and, on becoming a Major-Gen., President of the Heavy-Gun Committee. He retired from active service last November.

2nd Queen's, Royal West Surrey Regiment. Capt. Collis, 2nd Batn., is *en route* to India in H.M.S. Jumna.

3rd Buffs (East Kent Regiment). Major Graham, 1st Batn., is about to retire.

5th Northumberland Fusiliers. Capt. Pennington, 2nd Batn., is *en route* to India in H.M.S. Jumna.

6th Royal Warwickshire Regiment. Capt. Doyne and Qrmr. Geoghegan, 2nd Batn., left England on Monday in the Jumna for India. Lieut. Newmarch, 2nd Batn., has been appointed A.D.C. to Gen. Sir Donald Stewart, Commander-in-Chief of the Indian Army. A clever burglary was effected at the officers' mess of the 2nd Batn. at Chatham on Thursday night, and nearly the whole of the plate carried away. There is no clue to the thieves, and the officers have offered a large reward for the recovery of the property.

8th King's (Liverpool Regiment). The 2nd Batn. left Meean Meer on the 10th ult. for Ranikhet, on relief by the 30th. Referring to the death of Capt. Whalley, the *Civil and Military Gazette* says:—"We regret to hear of the death of Capt. and Adjt. F. J. Whalley, King's (Liverpool) Regt., which occurred at Meean Meer, after a few days' illness, on Jan. 2. Capt. Whalley, who joined the Army in June, 1872, suffered from a severe attack of typhoid fever about a year ago, and, though a man of remarkably fine physique, seemed never to have thoroughly recovered from its effects. His loss will be mourned not only by the members of his own family and regiment, but by a large circle of friends."

9th Norfolk Regiment. Lieut.-Col. Roberts, 2nd Batn., has been granted leave from India to England for twelve months, on private affairs.

12th Suffolk Regiment. Lieut. Campbell, 1st Batn., is *en route* to India in H.M.S. Jumna.

14th West Yorkshire Regiment. Lieut. Schneider is *en route* to India in H.M.S. Jumna.

17th Leicestershire Regiment. Lieut. Cowper, 2nd Batn., *en route* to India in H.M.S. Jumna.

20th Lancashire Fusiliers. An exchange of battalions has been sanctioned between Lieuts. Owen and Deane-Freeman, the former joining the 2nd and the latter the 1st Batn. Lieut. Dunne, 2nd Batn., is *en route* to India in H.M.S. Jumna.

21st Royal Scots Fusiliers. Major Browne, 2nd Batn., is *en route* to India in H.M.S. Jumna.

22nd Cheshire Regiment. Lieut. Ramsay, 2nd Batn., is *en route* to India in H.M.S. Jumna.

23rd Royal Welsh Fusiliers. Major Tulloch, Capt. Griffith, and Lieut. Whiting, 1st Batn., are *en route* to India in H.M.S. Jumna, which left England on Monday last.

25th King's Own Borderers. Capt. Becker, 1st Batn., is *en route* to India in H.M.S. Jumna, which left England on Monday last. Lieut. A. S. Mulock, 1st Batn., died on board the Serapis, *en route* to India. He joined the service on Sept. 9 last, and was on his way to Dugshai, to take up duty with his battalion.

29th Worcestershire Regiment. Lieut. Aitken, a candidate for the S.C., has been appointed to the 19th Bombay N.I., on probation.

30th East Lancashire Regiment. The regiment arrived at Meean Meer on the 8th ult. from Ranikhet, and relieved the 2nd Batn. 8th. Lieut. Haynes is *en route* to India in H.M.S. Jumna.

40th South Lancashire Regiment. Major White is *en route* to India in H.M.S. Jumna.

42nd Royal Highlanders (Black Watch). A commission as lieut. has been conferred upon Serjt. T. Souter, 79th Highlanders, in recognition of conspicuous gallantry during the late Egyptian Campaign. He was specially commended in Gen. Lord Wolseley's despatches as having distinguished himself during the campaign, more particularly at the battle of Tel-el-Kebir. Lieut. Souter is the first non-commissioned officer who has at present been given a commission for services during the late war.

48th Northamptonshire Regiment. Lieut.-Col. J. Mancor, Major on the Retired Full-Pay List, died at his residence, 81 Angell Road, Brixton, S.W., on the 2nd inst., aged 77 years. He obtained his commission, July 5, 1844, and retired upon full pay, July 23, 1861.

ROYAL MARINES.

The Admiralty have notified that the Secretary of State for India approves of the under-mentioned officers being accepted as probationers for the S.C.:—Lieuts. F. H. N. Wilson, L. C. Peters, M. T. Shewen, Charles Chamier, and C. H. Macdonald, R.M.L.I.

Lieut. A. H. Kellie, R.M.L.I., embarked on the 5th inst. in H.M.S. Jumna, for passage to Bombay, to join the S.C.

The under-mentioned officers embarked in the steamship Assyrian Monarch on the 6th inst.:—Lieuts. J. Stamper and C. V. F. Townsend, R.M.L.I., and A. Orford, R.M.A., for passage to Port Said; and Lieut. E. P. Brittan, R.M.A., for passage to H.M.S. Monarch.

The under-mentioned officers R.M.L.I. have been ordered to be in readiness to embark in the ships mentioned against them, viz.:—Lieuts. F. J. Raitt, Warrior; J. M. Ransom, Defence; W. S. Mardall, Indus; and F. A. Robertson, Lord Warden.

Leave of absence has been granted as under:—Major E. V. Holbrook, R.M.L.I., six weeks; Major and Brevet Col. J. W. Scott, R.M.L.I., one month, in extension; Lieut. C. H. Kennedy, R.M.L.I., one month, in extension; Lieut. and Assist.-Gunnery-Instr. W. S. Cumming, R.M.L.I., one month; Lieut. and Adjt. W. Nichols, R.M.A., one month.

Capt. and Brevet Major W. Campbell, R.M.A,, has been appointed Instructor in Gunnery to the Royal Marine Artillery at Eastney, vice Anson, whose period of staff service has expired.

Capt. and Brevet Major V. D. Mathias, R.M.A., has been appointed Instructor in Musketry to the Royal Marine Artillery, vice Allen, whose period of staff service has expired.

Capt. S. H. B. Northcote, R.M.A., has relieved Capt. G. A. L. Rawstorne, R.M.A., in charge of the Derby recruiting station.

51st King's Own Light Infantry. Lieuts. Crawford and Hunt are *en route* to India in H.M.S. Jumna.

52nd Oxfordshire Light Infantry. Lieut. Gough has been appointed Aide-de-Camp to Brigdr.-Gen. W. Arbuthnot, commanding the Cavalry Brigade in Egypt.

53rd King's Shropshire Light Infantry. The annual regimental sports took place last month at Abbassiyeh, Cairo. The *Egyptian Gazette* says:—"The sports themselves were capital, and the assemblage comprised the very cream of European society in the capital, blended with a fair sprinkling of native ladies and gentlemen of the higher class. We noticed the carriages of H.H. the Queen Mother, of the Princess Fatma, the Princess Nazli, and many others. H.H. the Khedive arrived on the ground quite early in the afternoon—at about half-past 2—and remained until the end of the programme, conversing pleasantly nearly the whole of the time with ladies and gentlemen of his acquaintance. Among these were Lady Helen Blackwood, Lady Alison, the Misses Colvin, Sir Auckland Colvin, Sir Edward Malet, Col. Truell, Mr. Ornstein, Mr. Bell, of the *Times*, &c. The sports were held on the ground adjourning the Observatory, at the base of which an elegant marquee had been set out with refreshments. During the afternoon, the band and drums of the 53rd Regiment, under the direction of Mr. Murphy, the bandmaster, and Serjt.-Bugler Goodbody, played a choice selection of music. The Khedivial Hymn was played as his Highness left the ground, and the afternoon's amusement was brought to a conclusion with the National Anthem."

59th Regiment. We take the following from the 5 *and* 9, *Lillywhite's Gazette*:—"Since the demobilisation of the Army Reserve, and the embarkation of 70 men for India to join the 1st Batn., and the further transfer of 20 old soldiers of good character to the depôt at Burnley, the battalion has fallen to 180 below its establishment; this having been brought to notice, recruiting for the battalion has been opened in the following districts,—4th, 6th, 8th, and 40th, 20th, 22nd, 23rd, 47th, 53rd, 63rd, 38th, and 64th. It is rumoured in the garrison that the battalion is to move from Chatham in the spring, Jersey and Preston being named as probable destinations. We give the rumour for what it is worth. It may not be generally known that the late Brevet Major Powys, who died of cholera at Candahar during the late Afghan Campaign, and who was so well liked in the regiment, bequeathed in his will a legacy of £500 to the regiment, to be expended for the benefit of the non-commissioned officers and men of the regiment as might be decided by the three senior officers. Last year, it was decided by Lieut.-Col. Lawson, Lieut.-Col. Frampton, and Major Griffiths that the interest on the legacy, viz., about £20 annually, should be most appropriately expended in annual sports, to be styled the 'Powys' Regimental Sports,' the late Major Powys being a keen sportsman, and one who during his lifetime was the first to institute and take part in sports of any kind in the regiment."

60th King's Royal Rifle Corps. Lieut. Wells, 4th Batn., has been confirmed in the appointment of Aide-de-Camp to Lieut.-Gen. Hughes, C.B., commanding the Sirhind Division, Bengal Army.

61st Gloucester Regiment. The depôt arrived at Kurrachee on Dec. 30 from Mhow.

66th Berkshire Regiment. Capt. Pigott has assumed the duties of Deputy-Assist.-Adjt. and Qrmr.-Gen., Southern District, in succession to Major Brunker, 26th Foot.

70th East Surrey Regiment. Capt. Frodsham left England on Monday in H.M.S. Jumna for India, to join head-quarters.

74th Highland Light Infantry. The regiment embarks at Alexandria on Wednesday in H.M.S. Serapis, *en route* to England.

77th Middlesex Regiment. Major Forte is *en route* to India in H.M.S. Jumna.

78th Seaforth Highlanders. Lieut. Mackenzie is *en route* to India in H.M.S. Jumna.

81st Loyal North Lancashire Regiment. Major Lindoe is *en route* to India in H.M.S. Jumna.

88th Connaught Rangers. Mr. H. B. Delmé, of Cams Park, Hants, a Peninsular veteran, died at his seat on the 29th ult., having nearly attained the great age of 90 years. He entered the Army as an ensign in the 88th in 1811, and was promoted to a lieutenancy in 1812. He served with his regiment in the latter stages of the Peninsular War, under the Duke of Wellington, and took part in the battle of Vittoria, the repulse of the sortie from Pampeluna, and the battles of the Pyrenees, and afterwards in several of the engagements in the south of France. He served afterwards in the American War, being present in the action of Plattsburg and the passage of the Sarinac. Lieut. Delmé was decorated with the Peninsular War medal and six clasps, and was placed on the Retired List soon after the conclusion of the great war in 1816. He had thus been in receipt of a lieutenant's half-pay for nearly 67 years. He served as high sheriff of Hants in 1825.

90th Scottish Rifles (Cameronians). Major Brunker sailed for India on Monday in H.M.S. Jumna.

95th Sherwood Foresters, Derbyshire Regiment. Lieut. Campbell is *en route* to India in H.M.S. Jumna.

99th Wiltshire Regiment. Lieut. Davidson is *en route* to India in H.M.S. Jumna.

100th Leinster Regiment. Lieut. Mocatta is *en route* to India in H.M.S. Jumna.

1st West India Regiment. Lieuts. Hitchins and Errington are *en route* to India in H.M.S. Jumna, as probationers for the S.C.

Pay Department. Capt. W. L. Brockman, ordered to Bermuda, will be relieved at the 53rd Regimental District, Shrewsbury, by Capt. W. D. Graham, from the 100th Regt. Capt. J. Bromfield has been directed to take financial charge of the 1st Batn. 10th Regt. The following voluntary retirements are anticipated:—Majors Muskett and Briggs in April, and Marvin in May; and two retirements on the score of age, Burke in August and Timbrell in December.

Medical Department. Surg.-Major A. B. Robinson and Surg. C. Reid have been granted six months' leave from India to England, on medical certificate.

Veterinary Department. A correspondent writes:—"1st-class Vet.-Surg. J. Anderson, who was sent to Egypt with the Indian Contingent, takes exception in your recent issue to some remarks of yours on the inefficiency of the Indian Veterinary service, both in Afghanistan and Egypt. He states that in neither was the Veterinary service a failure, and 'he will not allow for a moment that the Veterinary arrangements were in any way defective in Egypt.' He further goes on to state that the British force deprived the Indian Contingent of four out of five Vet.-Surgs. sent from India. 'This,' to quote his words, 'can hardly be fairly charged to the Indian Government.' As regards Afghanistan, Mr. Anderson must have a very short memory; no one should know better than he does how miserably inadequate the number of Vet.-Surgs. were for the work they were called upon to perform. All the Vet.-Surgs., including Mr. Anderson himself, were loud in their complaints. Why, then, this extraordinary change of front? With regard to his charge that the British force took four of the five Veterinary officers sent to Egypt from India, it came about, I believe, in this way; and the public can judge whether it can be charged to the Indian Government or not. Some months ago, the Indian Government propounded a scheme for a local Veterinary service, and stated that they could dispense with 24 Vet.-Surgs. The reduction was in process of being carried out, when the Egyptian War broke out. To utilise these spare men, the Home Government asked for the loan of 12 of them, simply to save sending the same number from England. It turned out, however, that they could spare only four. These were accordingly sent, and taken on the home strength. The only Vet.-Surgs. which the Indian Government thought fit to provide for its contingent were two—Messrs. Anderson and Evans—and this for the veterinary care of some 5,000 animals, a number which would require 20 Vet.-Surgs.; and yet in the face of all this, Mr. Anderson asserts that the veterinary arrangements were in nowise defective! The consequence was, as might have been expected, the British force was called upon at once to afford help, to keep their cavalry horses from being decimated by disease, to keep rinderpest from their slaughter cattle, and to prevent the latter from spreading to the animals of the home force. Mr. Anderson will astonish every veterinary-surgeon who was there, when he boldly asserts, 'glanders could not have been introduced into Egypt from India.'

Even non-professional men will hardly be induced to believe that a number of horses will all at once contract glanders, the disease develope itself in a virulent form, and the horses be shot and buried, and all within a few days of landing, as was the case with the 6th Bengal Cavalry. Why, it was a matter of common notoriety on the spot that they brought the disease from India. There was a report, emanating from the regiment itself, I believe, that they had had glanders for years, and if I mistake not, it is forming the subject of an official inquiry at the present time. As regards the outbreak of rinderpest, the cattle were introduced by and for the Indian Contingent. Here, again, thanks to the vigilance of a veterinary surgeon of the British Force, the disease was detected and stamped out. Mr. Anderson, however it may suit his present purpose, will fail in doing a public service if he seeks to whitewash the Indian Government for its notorious neglect, and the inefficiency of its Veterinary service. It will not be by such means that a local Veterinary service, if such should be ever established, will achieve success."

The Auxiliary Forces.

MILITIA.

We are requested to state that the next literary examination of Lieutenants of Militia who are candidates for commissions in the Line will be held by the Civil Service Commissioners at the London University, Burlington Gardens, W. (by permission of the Senate), on Friday, April 13, and following days. Applications for permission to attend must be made in accordance with the instructions contained in the Regulations issued with Army Circulars, January, 1881, and are required to be forwarded by commanding officers not later than the 15th inst.

THE VOLUNTEERS.

London Rifle Brigade. Lieut.-Col. Lord E. P. Clinton, commanding, is going the right way to work to increase the good reputation which the London Rifle Brigade has always enjoyed. Recently he caused a letter to be sent to every member, indicating that he was not disposed to be the commanding officer merely in name, pointed out faults which he had observed, and with no desire to be "the new broom," suggested remedies which he considered necessary. Last Saturday evening there was a full muster of the regiment at the Guildhall, all the members being in full marching order. There was an impression that the parade was ordered for route-marching. Lord Clinton, however, turned the occasion to another purpose, and made a personal inspection of the equipment of every non-commissioned officer and man, and, in fact, "saw his regiment" for the first time. A little plain-speaking is evidently serving a good purpose. There are many persons, including the Duke of Cambridge, who would like to see such an addition to the number of the "brigade" as would give it the right to retain that designation, but under existing regulations numbers of eligible recruits are deterred from joining by the comparatively (to other sound and equally as respectable battalions) heavy preliminary expense. The regiment will proceed to Portsmouth, for a week's drill, on March 22.

2nd London Rifles. Among other much-needed reforms which are being carried out with a vigorous hand in this battalion, is that of complete equipment, and we are specially glad to see that by the exertions of Major Grene attention is being paid to the tunics, which are being made according to Army pattern, and with distinctive shoulder-straps. Evidently the interests of the regiment are not suffering from the continued absence of Lieut.-Col. Vickers.

12th Middlesex (Civil Service) Rifles. The bill of fare provided by the Amateur Dramatic Society, on Tuesday last, at St. George's Hall, was made up of the pretty comedy by Conway Edwardes, "Heroes," and Tom Taylor's comedietta, "To Oblige Benson." The performance, on the whole, was creditable. In the first piece, Miss Ethel Hope gave an intelligent rendering of the part of Miss Herries. If she had only suppressed her youthful appearance, her performance would have left nothing to be desired, though she had a difficult task set her in playing by the side of so experienced a lady amateur as Miss Woodzell, whose Mary Mason was throughout a most finished picture. That Qrmr. Trollope was excellent as Major-Gen. Sir Douglas Herries, K.C.B., goes without saying. Mr. Trollope is good in everything. Qrmr.-Serjt. Walks's Tom Croft was not dry enough. The other gentlemen, with practice and perseverance, may be able to do better next time.

20th Middlesex (Artists) Rifles. Lieut.-Col. Sir Frederick Leighton, P.R.A., distributed the prizes at the Criterion on Saturday last. In the course of his remarks, he alluded to the recent changes in the staff of the regiment. He regretted the retirement of Major Busk, who had served many years, and who resigned on account of pressing and increasing business engagements. Capt. Elmhirst, who had been acting adjutant for the last two years, had also retired from the service. Capt. Haggard (86th Regiment) had been appointed his successor. Sir F. Leighton said he wished to contradict a rumour as to the financial condition of the corps. That condition was sound and satisfactory, inasmuch as they had a balance at their bankers. The amount of capitation grant earned from the Government was £1,365 10s, the largest sum they had ever earned. There were 69 proficient officers and serjeants and 774 efficients. The recruits who had joined since Nov. 1 numbered 94, the per-centage of efficiency was 98·2, and the strength of the regiment 798, as against 771 last year. There had been a falling-off in the number of marksmen. There were only 78 this year, while in 1881 there were 99. As to the shooting he must impress upon the members of the battalion the importance of firing their class early in the year, not delaying until the showery days of autumn.

7th Surrey Rifles. The new head-quarters, situated at 71 Upper Kennington Lane, were formally opened by Lord Chelmsford on Monday evening. Lord Chelmsford, in the course of his remarks, congratulated the members upon having become possessed of such handsome and commodious head-quarters, and referred to the active part taken by Serjt. Ecoles in collecting the funds necessary for its purchase, and stated that a commission in the corps had been offered to him, in recognition of his services, an offer which, however, had been declined. He concluded by counselling the members to attend rigidly to their drill, which he admitted to be one of his hobbies, and finished by expressing the hope that increased comfort and accession of members would result from the acquisition of their new head-quarters. An assault-at-arms concluded the evening's entertainment.

"L. K." writes:—"In the *Gazette* of Jan. 9, I see two officers appointed to adjutancies of Volunteers, neither of whom are officers of the Territorial Volunteer battalions, although in the monthly *Army List* for January I find these Volunteer regiments classed as such, viz., the Volunteer Battalion of the Regimental District. The officers referred to are Capt. Haggard, 2nd Batn. Royal Irish Rifles, to the 20th Middlesex, or the Volunteer Battalion of the Rifle Brigade; also Capt. Ingram, 1st Batn. the Welsh Regiment, to the 2nd Staffordshire, or the Volunteer Battalion of the North Staffordshire Regiment. It is usual for these adjutancies to be filled by an officer from the Territorial regiments, but I presume in these cases there were no candidates; still, it appears to me, the subalterns of the regiments who have no candidates greatly lose by this. Cannot an officer be detailed as adjt. of the Militia or Volunteer battalions from the Territorial regiment? Or could not the senior subalterns of the regiment losing the adjutancy be transferred to fill the vacancy as capt. in the other regiment? The senior subalterns of the Rifle Brigade are senior to those of the Royal Irish Rifles, and those of the North Staffordshire to the subalterns of the Welsh Regiment. Why not, therefore, offer the vacancies to these subalterns, who have lost promotion by no officer in their own regiment accepting the Volunteer adjutancies?"

Col. the Hon. Paul Methuen, C.B., Assist.-Adjt.-Gen., Home District, is engaged in maturing the arrangements for the despatch of a column from London on Good Friday.

Friday's Gazette.

ARMY.

WAR OFFICE, Pall Mall, February 9, 1883.

The Gloucestershire Regiment—Lieut.-Gen. and Hon. Gen. J. W. S. Smith, C.B., to be Col., vice Gen. J. E. Goodwyn, C.B., transferred to the Welsh Regt. (Jan. 20).

The Welsh Regiment—Gen. J. E. Goodwyn, C.B., to be Col., vice Gen. Sir R. England, G.C.B., K.H., deceased (Jan. 20).

STAFF.

Major and Brevet Lieut.-Col. C. Grove, the East Yorkshire Regt., to be a Deputy-Assistant-Adjutant-General at Head-quarters, vice Lieut.-Col. W. R. Lascelles, the Rifle Brigade (the Prince Consort's Own), whose period of service in that appointment has expired (Jan. 31).

Capt. H. G. Newcome, Royal Artillery, to be a Brigade-Major for Royal Artillery with the Force in Egypt; Capt. A. O. Green, Royal Engineers, to be a Brigade-Major for Royal Engineers with the Force in Egypt (both dated Dec. 31, 1882).

EGYPT, 1882, *versus* CHINA, 1862.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—A letter, signed "Central India," which appeared in your last issue, commented upon the anomaly that the troops under Sir Hugh Rose were refused for the campaign of 1878 in Central India, an Order, offered by the Maharajah Scindia. Whereas the forces employed recently in Egypt are to receive a bronze star from the Khedive. This reminds me of a similar occurrence in China twenty-one years ago, before the age of telegraphs and special correspondents. In the spring of 1862, when our Army of Occupation, after the North China campaign of 1860, still held Tientsin and Taku Forts, troops were sent down to Shanghai in all haste to arrest the movement of the Taepings (rebels) on that city. Various walled towns were captured, and the country for some 30 to 40 miles round pacified. These operations occupied some weeks, and the Chinese Government, anxious to show their appreciation of the assistance rendered by the allied forces, French and English, proposed to give an Order, consisting of a gold dragon to the officers and one of silver to the non-commissioned officers and men engaged in the campaign. When the suggestion was laid before Sir Frederic Bruce, our Minister at Pekin at that time, he decided "that the time had not arrived when the services of the troops engaged in putting down the rebellion for the Imperial Government should be recognised," and it never did arrive. In both cases, our forces were engaged to assist an ally against his rebellious subjects; but for the Chinese affair our authorities never gave anything, although it would have been very easy and inexpensive to grant the China medal, with a clasp inscribed, "Taeping Rebellion," the force employed being small. But, I forgot, the Mutual Admiration Society did not exist in those days.—I am, &c., X.

CYPRUS DURING THE EGYPTIAN CAMPAIGN.

TO THE EDITOR OF "THE ARMY AND NAVY GAZETTE."

Sir,—Referring to the notice in the *Army and Navy Gazette* of Dec. 30, 1882, that nothing has been done to recognise the services of the Staff and Departments in Cyprus during the Egyptian Campaign, beyond the publication of a General Order and a letter from the Commander-in-Chief, it may not be generally known how great was the additional work devolving upon them. At one time, the Commissariat Department had orders to provide supplies for 17,000 troops, and worked indefatigably, early and late, to prepare for their reception. Troops were already on their way to Cyprus before the Fleet attacked the forts at Alexandria, and their successful attack gave to the English a base of operations which they would otherwise have found only in Cyprus. The change of base to Ismailia was facilitated by Cyprus being able to send supplies direct to the front in a few hours. Mules sent from Cyprus were, I believe, the only mules available for many days after the landing for the troops at Ismailia. When the 1,200 men who eventually formed the depôts arrived here, the strain upon the Medical Department, with a small staff, was unusually great. At one time, more than 100 men were in hospital, while a ship full of sick and wounded arrived from Ismailia. Many officers who went to Cyprus embarked from England under orders for Egypt. They were obliged to provide themselves with the necessary field kit, and like every one else went under canvas on arriving in Cyprus. Yet they were refused the advance of six months' field allowance, which those who landed in Egypt received. It may not be possible nor desirable that the Cyprus force should participate in any of the honours of the Egyptian Campaign, but considering the zeal with which all worked, it would be a gracious act if the six months' field allowance, which has been withheld, were granted to all the officers of the depôts, the Staff, and the Departments who were in Cyprus during the campaign.—I am, &c.,

Scrutator.

ARMY NOTES.

H.R.H. the Prince of Wales will hold a levée at St. James's Palace on Monday, the 19th inst.; and another on his return from Berlin, of which the date will be announced later.

The Duke and Duchess of Connaught and suite will leave London to-morrow evening for the Continent.

Gen. the Duke of Grafton arrived at Osborne on Saturday last, when her Majesty conferred upon him the honour of Knighthood, and invested him with the Riband and Badge of the Order.

In a notice published in the Punjab *Gazette*, the Lieutenant-Governor has placed on record his appreciation of the services of Colonel S. Black, the late Military Secretary to the Punjab Government. His honour says:—"Colonel Black's intimate knowledge of the Punjab Frontier and of the Frontier Force, and his matured experience in all questions, political as well as military, connected with his duties as Military Secretary, have been of the greatest assistance to the Lieutenant-Governors under whom he has served, and have been cordially acknowledged by each of them in turn. In 1881 he was made a Companion of the Star of India in acknowledgment of his valuable services, particularly during the Jowaki campaign of 1877, and the Afghan expeditions of 1879 and 1880. Sir Charles Aitchison records with pleasure his high sense of the valuable assistance rendered by Colonel Black to the Punjab Government during his tenure of the office of Military Secretary, a tenure which has extended over twenty years."

Major G. C. Sartorius, Bombay S.C. (Marine Battalion), has left Bombay to take up an appointment in Egypt under the new *régime*. Major Sartorius is a good Turkish scholar and a good linguist, and has, we believe, been studying Arabic for some time past with a view to Egyptian service. There are probably few officers better fitted for the work, and he has already had considerable experience of Turkish troops.

A new pattern shoulder-strap, consisting of an embroidered patch sewn on a plain shoulder-strap, has been introduced for garrison batteries of Royal Artillery.

The Viceroy's Cup and Championship of the Northern India Rifle Association have fallen again to Major W. Hill, 2nd Goorkhas, with the score of 747; Mr. Lamb, 40th Foot, only a single point behind, being second. This is the third time that Major Hill has won the championship. The medal for the best shot among the Rifle Volunteer Corps of the Bombay Presidency has been awarded to Colour-Serjt. W. Hilton, G.I.P. Railway Volunteers.

It is stated that Brigdr.-Gen. Blair, V.C., Political Resident, Aden, will continue to hold that appointment after attaining 55 years of age for such further period as he may be permitted under military rules to hold the command of the Aden brigade.

It is stated that no less than 40,000 boxes of time-fuzes which were manufactured at Kirkee in 1877, and which are now held in stock in the various arsenals in the Bombay Presidency, have been condemned by order of Government, at a loss to the State of nearly 15,000 rs.

The *Indian Volunteer Gazette* suggests, as a means of encouraging volunteering in India, that volunteers of, say, five years and upwards, with their families, should be allowed to take passage during the trooping season by troopship. Even if a free passage was not allowed, reduced rates might be fixed.

It has been ruled that British officers who cease to be probationers for the Indian S.C., and who, pending orders from the Horse Guards, are posted as supernumeraries to regiments in India, shall receive the Indian pay and allowances of their rank.

The announcement which has frequently been made by some of our Indian contemporaries, that the authorities have made up their minds to abandon Peshawur, is now declared to be premature. The question is still under consideration, but the weight of opinion, it is said, leans decidedly towards its retention.

The Secretary of State for War has agreed to dispense with the counter-signature of General officers commanding in India to bills for "extra duty" pay accruing to acting staff officers and non-commissioned officers on board ship, whilst on the voyage to India. This concession will, it is believed, save much unnecessary trouble.

The rules regarding last pay certificates of officers leaving India, not having been properly attended to, it has been ruled by Government that a discretionary power will in future be given to the Pay Examiner to enter on the certificates any retrenchment or claim it may be necessary to enforce as early as possible; but it is specially provided that no case is to be entered which from its nature should form the subject of a distinct communication with the India Office, or which may have arisen from some omission or irregularity on the part of the officer concerned, which could easily be settled before he leaves the country.

Active Service cannot wear out the teeth that are brushed night and morning with Rowland's Odonto, the purest and most fragrant dentifrice ever made. All dentists allow that neither washes nor pastes are as efficacious for polishing the teeth and keeping them sound and white as a pure and non-gritty tooth-powder; such Rowland's Odonto has aways proved itself. Ask any dealer in perfumery for Rowland's Odonto, and avoid spurious imitations, theirs being the only original and genuine Odonto.

EGYPTIAN WAR FUND,

NATIONAL SUBSCRIPTION FOR THE RELIEF OF THE FAMILIES OF THOSE KILLED, OR WHO HAVE DIED FROM DISEASE, AND ALSO OF THOSE SOLDIERS, SAILORS, MARINES, &c., WHO HAVE SERVED IN EGYPT, AND HAVE BEEN DISABLED BY WOUNDS OR SICKNESS.

PATRONS.
Her Most Gracious Majesty the QUEEN.
H.R.H. the Princess of WALES.
H.R.H. the Duchess of CONNAUGHT.
H.R.H. the Princess MARY ADELAIDE, Duchess of TECK.
H.R.H. the Prince of WALES, K.G., K.P., &c.
H.R.H. the Duke of EDINBURGH, K.T., K.P., &c.
H.R.H. the Duke of CONNAUGHT, K.G., K.P., &c.
H.R.H. the Duke of ALBANY, K.G., K.T., &c.
H.R.H. F.M. the Duke of CAMBRIDGE, Commander-in-Chief, K.G., &c.
H.S.H. the Duke of TECK, G.C.B.

The principles of application of the Egyptian War Fund are:—1st. To afford immediate assistance to the families of the killed on a scale which, though perhaps temporarily small, may yet prevent a great deal of suffering. 2nd. To afford such permanent assistance to the families of the killed, or to disabled men, by either direct aid to the sufferers, or grants of money to cognate institutions, as may seem best. All branches of the Service are eligible, the sole conditions being service in the Egyptian Expeditionary Force.

Subscriptions are earnestly requested. Remittances can be sent to Lady Jane Taylor, 16 Eaton Place, S.W.; or to Cox and Co., Craig's Court, S.W.

Applications for assistance to be made to the HON. SECRETARY, EGYPTIAN WAR FUND, New Buildings, Little Park Street, Queen Anne's Gate, London, S.W.

P. M. C.

ON account of Orders recently issued regarding Mess Expenditure, Messrs. PELLATT and CO. (formerly APSLEY PELLATT and CO., of Holland Street, Blackfriars—the original firm—established in the year 1759, by the father of the late Apsley Pellatt, Esq., M.P.), Falcon Glass Works and China Manufacturers, Manufacturers, by special appointment, to H.M. the Queen and the Royal Family, &c., Contractors to H.M.'s Government, the Lords of the Admiralty, the Indian Stores, &c., have decided on supplying all Regiments with their Manufactures on their wholesale-trade terms, which Prices are very much below those usually paid by Officers' Messes. This Firm have made Mess Contracting the speciality of their business for upwards of 150 years, and have, at the present time, upwards of 140 Regiments on their books, including the most prominent of H M.'s Service. For the past 18 months, Messrs. Pellatt and Co. have obtained the commands of every regiment giving their orders on arrival home from foreign service, without a single exception. On receipt of patterns from any Regiment, Messrs. Pellatt and Co. return estimates for the exact matching of goods. Several Regiments have favoured us in this way of late, many being Native Indian Regiments, and the estimates returned have always shown such a great saving, as to secure the future commands and greatest satisfaction of the Mess.—All Communications and Patterns should be sent to the Offices and Show Rooms, addressed,

PELLATT and CO., Falcon Glass and China Works, 17 St. Bride Street, Ludgate Circus, London, E.C.

Army & Navy Gazette.
LONDON, SATURDAY, FEBRUARY 10, 1883.

IT is one thing to propose a benefit society whi h shall hold out fair prospects to those who m y become members of it, and another to insure its s c cess. A fertile brain may originate a scheme wit a captivating title, but find, after a little experien e, that the structure is but a castle in the air. The Circular issued by Major Barker, late of the Ro al

Marines, proposing a "Retired Officers' Employment and Mutual Aid Society," to be maintained by voluntary subscriptions from officers in the Army, Navy, and Marines, by public subscriptions, by a Government grant, and by fees from those who may obtain appointments through the agency of the society, sets forth a scheme which, if practicable, would do for retired officers what the Army and Navy Pensioners' Employment Society and the Corps of Commissionaires do for non-commissioned officers and men. With the latter, however, it is much easier to deal than with officers. There is not very much difficulty in providing situations as clerks, as overlookers, caretakers, warders, doorkeepers, messengers, and such like, for steady men who have been proved as such during their military or naval training, many of whom write first-rate clerical hands, and are good accountants and book-keepers. For such men, there are hosts of firms who are ready to open their doors whenever vacancies occur, as, added to other qualifications, they feel sure of punctuality in attendance and observance of duties, engrained into the men by the routine of the service. With officers, however, the case is different. Few, except departmental officers, have had any experience in clerical work, or book or store keeping, and even these few, although necessity might compel them to knuckle down to the work, would look upon eight or ten hours' confinement daily at a desk as irksome in the extreme. Added to this, most business men have either those they have educated in their own offices waiting for promotion to the higher grades, or are prepared to give their patronage to a candidate brought forward by a brother merchant; but there are not many who are either so short of employés or have so scant a list of applicants, that they would be necessitated to call upon a mutual-aid society for candidates to fill any vacancy in their houses of business. There are hosts of retired officers constantly on the *qui vive* for employment in one form or another, to supplement the scanty pension they retain, or to replace the capital they have probably lost on commutation; and any society that could open a *bonâ fide* door through which these could better themselves, would earn the gratitude of many families who are now pinched to make both ends meet. If funds could be raised, it is very possible that a society such as that proposed could benefit some in assisting emigration, or in obtaining legal scrutiny and advice in matters of proposed business partnerships, or investments of money for those who have commuted their pensions, and who might thus be saved the risk of such luckless speculations as have already been the lot of many. But the question is, from whence are the funds to be derived, and are the sources suggested in the circular to be relied upon? There may be a few philanthropic officers in the service who would give their five or fifty-pound note to such a cause, and a few benevolent persons among the general public who might do the same; but it is feared that great pressure would have to be put upon any Government before a grant could be obtained; and without this capital, it is presumed the society could not be worked. If it is to be brought about at all, Major Barker must put his shoulder to the wheel, and do more than sow his circulars broadcast; he must urge Members of Parliament to work for a grant; and if he succeeds, he will open up a new vista for the numberless officers on the Retired or Half-pay Lists who are now seeking employment.

The Emperor of Germany this week held a Council of War, at which were present the five senior General Officers of the United German Army, including Counts Von Moltke and the Minister of War. Such a council has not been held since 1876. It lasted several hours, and even the Radical German Press refrain from commenting on what took place, "in the interests of the Fatherland." What does it mean?

The German officers at present serving with the Turkish Army have been promoted to the rank of Major-General by the Sultan. They have also been seconded in their regiments, by order of the Emperor of Germany. Herr Eugène Richter intends on an early date to ask the Minister of War, in the Reichstag, whether this will entitle the officers in question to all the emoluments conferred by the German Army Regulations, under such circumstances.

At no previous time did the history of our Army attract so much attention as now, when that history has been rudely broken. Never before were the records of the services of so many regiments being investigated and compiled or rewritten as now, when those regiments have been demolished. The regimental histories which have been published lately either break off abruptly and significantly at June 30, 1881, or end at that date with some comment that reads like a suppressed execration. There can be no plainer or stronger evidence of the determination of the officers of the Army generally to preserve the identity and to cherish the associations of those historic regiments which are being needlessly and wantonly altered almost beyond recognition

Various rumours have been current during the last fortnight that it was the intention of the War Office to admit Quartermasters into the Pay Department. This is a mistake, and it is difficult to know how the report arose. We are in a position to state, on very high authority, that there is no foundation for this statement. There has been no proposal on the part of the War Office to do so, and even if there had been, the idea would have been negatived by the authorities at the Treasury.

A vacancy occurs among the Aides-de-Camp to H.R.H. the Field-Marshal Commanding-in-Chief by the appointment of Colonel W. E. M. Reilly, C.B., to be Director of Artillery and Stores.

The names of four Veterinary Surgeons have, we understand, been submitted for promotion to first-class, in recognition of the services rendered by the department in Egypt, so that the claims of the officers of the Veterinary staff are not to be entirely overlooked, as is generally supposed. First-class Veterinary-Surgeons Brest and Walker would, we believe, also be recommended for promotion were it not that, owing to the extraordinary organisation of the department, there is nothing to give them, owing to the absence of an intermediate grade between first-class and inspecting veterinary-surgeon.

It has been officially announced that the Secretary of State for War has appointed Henry Robert Brand, Esq., M.P., to be Surveyor-General of the Ordnance.

We believe that the *Avenir Militaire* faithfully interprets the feeling of the French Army, when it condemns the idea of depriving princes of their rank because they are princes, and not because they have been guilty of any military offence. The *Avenir Militaire* also raises its voice against the specious argument that the princes did not obtain their rank in a regular way. According to the same authority, no less than 3,000 officers hold their commissions by the same title as the princes, that is to say, on a Parliamentary title, accorded on the recommendation of the Committee of Grades, which sat after the conclusion of the Franco-German War. It is said that the new War Minister, General Thibaudin, has determined to resort to a very arbitrary proceeding, should the Senate throw out the Pretenders Bill. He means, in that case, to place the princes on the Unattached List, or to deprive them of employment, although this is a measure only resorted to where officers have misconducted themselves or displayed incapacity, and this on the written report of their immediate chief. An officer deprived of employment cannot wear his uniform, unless when he goes to report himself to an Inspector-General, which he is obliged to do twice a year. He cannot change his place of residence without the permission of the War Minister. Altogether, his position is rendered so humiliating, that the princes will no doubt prefer honourable exile to degradation in their own country.

. Captain F. O. Barrington Foote, R.A., on return from active service in Egypt, has rejoined the staff of Major-General Radcliffe, Inspector-General of Artillery, as Aide-de-Camp.

In the *London Gazette* of the 6th inst., we were informed that "the promotion of Major J. A. Armstrong, Royal (late Bengal) Engineers, to the rank of Lieutenant-Colonel, for service in Egypt, which was notified in the *Gazette* of November 17, 1882, is cancelled, his name having been erroneously included, as he was not present in that campaign." What excuse can be offered for making so stupid a mistake, and taking nearly three months to discover and correct it? What compensation can be given to Major Armstrong for the mortification of being promoted for services in a campaign in which he took no part, and then having his promotion cancelled? It may reasonably be asked whether any one and if any one, who performed the services which were erroneously credited to Major Armstrong. The authorities have, in this case, taken the honourable course of acknowledging and correcting a palpable error. Honours have been granted to regiments with the same want of discrimination that has been shown in the cases of individuals, but the same course, that of correction, has not yet been taken.

Brevet Lieutenant-Colonel L. V. Swaine, C.B., Rifle Brigade, has taken up his appointment as Military Attaché at Berlin.

The senior officers who have been compulsorily removed from her Majesty's Army for age and non-employment, and many of whom have been ruined and reduced to the necessity of commuting portions or the whole of their pensions, may be surprised to learn that instead of receiving the exact sum of money noted in the War Office Commutation Tables for each age (next birthday) as commutation for each £100, they are sent before the Commutation Board, when they are examined by the Medical officer in attendance on the Board; and, moreover, have to sign a declaration, at the foot of which is printed the following penal clause:—

> "Extract from Act 34 and 35 Vict., cap. 36.—Sec. 9.—If any applicant for commutation under this Act wilfully make any false declaration in relation to any matter or thing required by any regulation made in pursuance of this Act, he shall be deemed to be guilty of a misdemeanour, and shall be liable, on conviction, to forfeit all claim to his pension or the value thereof, and to be imprisoned for any term not exceeding two years, with or without hard labour."

We believe that no insurance office takes such measures against applicants for insurance.

Major-General J. R. S. Sayer, C.B., now commanding the Belfast District, has been selected to succeed Lieutenant-General T. H. Pakenham in command of the Western District, on April 1 next.

The 1st and 2nd Life Guards will continue to bear "Dettingen" among their honours, unless the officers take the matter up themselves. It is no use expecting the War Office to take steps to rectify the error, and these two distinguished regiments will be held up to ridicule all through the service, for counting among their honours the name of an action to which they have no more claim than the regiments which were not in Egypt have to bear "Tel-el-Kebir."

An officer of rank, who has sons intended for the Army, writes as follows:—"This cramming is very expensive work,—about £200 a year. I do not think the grind to the boy and the parent is worth it. Where should we have been if we had had to pay these preposterous sums to crammers? By the time that I have crammed my lads into the Army, I shall have spent quite as much on them as putting them into the Bar, pulpit, or trade. The Army is a rotten profession, always was, and is worse than it ever has been. I cannot understand why 550 young fools go up to compete for 50 commissions. And what makes it more unfair to officers now is, that no end of serjeants get commissions now who never pass any examinations at all, except a regimental-school test and a very mild professional examination—merely qualifying examinations, requiring no special cleverness or talent. Either the serjeants make good officers without examinations, or they are equal to those who have been examined till they have no brains left. Brains that have been examined, I find from my knowledge of the Army, are not worth very much afterwards." Hereditary soldiers are to be put aside for the sons of "merchant princes," &c., who can afford to pay crammers. That is the long and short of the "Liberal" idea. But surely it is Purchase in another, and more objectionable form.

Surgeon-General J. Sinclair, M.D., Principal Medical Officer at Aldershot, has been appointed Principal Medical Officer in Ireland, vice Surgeon-General J. S. Furlong, M.D.

Colonel W. F. Butler, of the Ever-Victorious Staff, has written an article in the *Contemporary Review*, lauding the short-service system, and praising in no measured terms the young soldiers who lay in the sand at Kassassin, under the fire of the artillery—directed by trained artillerymen—for the first time since the Crimean War, in 1854! We crave leave to doubt the training of such wretched gunners as the Egyptians, who, firing with Krupp guns all day, scarcely ever hit either artillery, horses, or men, at average ranges. If the Egyptian artillerymen had been German, Russian, or French gunners, Colonel Butler might have made a point, but the shooting of the Egyptian artillery, both at Alexandria and Kassassin, was beneath contempt, from an artillery point of view; and therefore it proves absolutely nothing, as regards the courage and endurance of our troops. Has Colonel Butler ever heard of the attack on Lucknow by Lord Clyde, or the attack on Cawnpore by the Gwalior troops? There was some artillery fire there, much better directed than by miserable Egyptian so-called gunners. Did Colonel Butler ever hear of the battles—not Tel-el-Kebirs, but regular battles—between the Sikhs and English in 1845-6 and 1848-9, where thousands of men were killed by artillery fire on both sides? Would he compare for a moment the brave Sikh artillerymen, who fought their guns with skill and died sword in hand in their defence, with the dastardly Egyptians, who never stood fire, but ran away wholesale, before our men? Has Colonel Butler ever read of the battle of Maharajpore, in 1843, where the 39th and 40th Regiments lost 300 men and twelve officers each, in ten minutes, in charging the well-served batteries of the Regular Mahratta Artillery? Why should the line be drawn at the Crimea, in 1854? Is it because the reformers have never heard of anything further back in the glorious history of our old regiments; or because it suits their purpose better to forget really brilliant exploits, and laud up actions which no soldier in his sober senses could consider anything but small and trumpery skirmishes?

Major-General Sir Charles MacGregor, K.C.B., leaves England early in March for India, to resume his official duties as Quartermaster-General of the Indian Army.

The Navy.

WHITEHALL, February 3, 1883.

The Queen has been pleased to give and grant unto Lieutenant the Honourable Hedworth Lambton, R.N., her Royal licence and authority that he may accept and wear the Insignia of the Third Class of the Turkish Order of the Medjidie, which his Highness the Khedive of Egypt, authorised by his Imperial Majesty the Sultan, has been pleased to confer upon him, in recognition of his distinguished services before the enemy during the late campaign in Egypt.

ADMIRALTY, February 7, 1883.

The under-mentioned Engineers have been promoted to the rank of Chief Engineer in her Majesty's Fleet, with the seniority stated against their names:—Henry Gladstone Cocking (January 7), and Henry Laughrin (January 24).

The Rev. Ralph Venables Wilson, B.A., has been appointed a Chaplain in her Majesty's Fleet, with seniority of February 2.

ROYAL MARINE LIGHT INFANTRY.—Lieut. Archibald Henry Kellie has been appointed a probationer for the S.C. (February 5).

APPOINTMENTS.

Vice-Admiral—Lord John Hay, K.C.B., to be Commander-in-Chief of the Mediterranean station, vice Lord Alcester, G.C.B.

Commander—Edward B. Pusey, to the Hector, additional, for Coastguard, at Folkestone, vice Sargeant.

Lieutenants—William F. D. Walker, to the Boscawen, vice Hoskyns; Robert K. McAlpine, George L. B. Bennett, John S. de B. Yelloly, and James W. Litle, to the Dido; David E. G. Carmichael, to the Inflexible, vice McAlpine; Edward P. Chapman, to the Warrior, vice Bennett.

Sub-Lieutenant—Alfred E. A. Grant, to the Dido.

Staff Surgeon—Edward W. Doyle, to the Dido.

Chief Engineers—John Y. Mayston, to the Urgent, additional, for Jamaica Yard, vice Davies; Henry Scott, additional, to the Pembroke, for service in the Dolphin; Henry Benbow, to the Antelope, vice Spring, whose time has expired; William A. Harvey, to the Dido.

Surgeon—Charles W. Sharples, to the Dido.

Paymaster—George S. Goddard, to the Dido.

Assistant-Paymaster—E. L. J. Bridgman, to the Dido.

Engineers—James Leighton, additional, to the Pembroke, for service in the Wanderer, vice Scott; William G. Parsons, to the Seahorse, vice Leighton; Cornelius H. Steward, to the Dido; Samuel Aston, to the Hercules, vice Steward; William C. Hilder, additional, to the Terror, vice Taylor; Thomas Agnew, to the Valiant, for service in the Imogene, vice Hilder; David E. Smith, additional, to the Vernon, for service in the Vesuvius, vice Runnells, whose time has expired; William Rabbidge, additional, to the Asia, vice Soper; Frederick Worth, to the Jumna, vice Rabbidge.

Carpenter—Henry Boryer, to the Dido.

Assistant-Engineers—Edward J. Rutter, to the Valiant, vice Agnew; Henry A. Evans, to the Jumna.

Clerk—Francis R. Luke, to the Northampton, additional.

Assistant-Clerks—Henry Constantine and Ralph B. H. Moore, to the Northampton, additional.

Boatswains—M. Gould and C. H. Rowe, to the Dido.

Gunner—Thos. C. Bull, to the Dido.

COASTGUARD.

Chief Boatmen—Jeremiah Shea, Crosshaven station, to be chief boatman-in-charge, Robert's Cove station; James F. Balson, Tollesbury, to be chief boatman-in-charge, Yantlett Creek.

Commissioned Boatmen—Thomas Bailey, Reekham, to be chief boatman, Portland; George Ash, Dartmouth, to be chief boatman, Abbotsbury; John Scantlebury, Charlestown, to be chief boatman, Sidmouth; Edward Collis, Tuckton, to be chief boatman, Challaboro'; Thomas Sullivan, Fishersgate, to be chief boatman, Camber; William Webb, Padstow, to be chief boatman, Clovelly.

COCKCHAFER, Lieut. and Com. Gamble, returned to Plymouth on Monday from her cruise in the Channel, and will now proceed to her station.

ESPOIR, Lieut. and Com. Hill, returned to Plymouth on Monday from her cruise in the Channel, and will forthwith proceed to her station.

EURYALUS, Capt. Hastings, C.B., flagship of Rear-Admiral Sir W. N. Hewett, V.C., Commander-in-Chief of the East Indies station, was at Trincomalee on Feb. 2, and intended to sail the following day for a cruise in the Bay of Bengal, probably calling at Rangoon; would return to Trincomalee about Feb. 26. The Dryad left Trincomalee for Zanzibar on Jan. 29. The Ranger was to remain in the Bay of Bengal until relieved by the Tourmaline.

IRIS, Capt. Ernest Rice, left Malta on Tuesday for Sicily. Mails to Auguste.

IRON DUKE, Capt. St. John, left Malta on Feb. 7 for Plymouth.

MINOTAUR, Capt. Fellowes, flagship of Vice-Admiral Sir William Dowell, K.C.B., junior officer in command of the Channel Squadron, having in company the Northumberland and Achilles, left Plymouth Sound on Tuesday for the annual spring cruise, the Agincourt proceeding a few hours later.

NELSON, Comdre. James E. Erskine, A.D.C., in command of the Australian station, was at Hobart Town on Feb. 4.

PENELOPE, Capt. D'Arcy Irvine, C.B., flagship of Rear-Admiral Sir Anthony H. Hoskins, C.B., sent to Chatham from Harwich to be repaired, is likely to be detained longer than was originally expected, as the repairs to be carried out in her are of a rather extensive character. She will be fitted to proceed, as soon as completed, on her annual summer cruise with the men of the Naval Reserve.

SAPPHIRE, Capt. Fullerton, has made a preliminary trial of her engines.

SEAGULL, Lieut. Walter H. B. Graham (in command), left Simon's Bay on Tuesday last, homeward bound.

STORK, Lieut. and Com. Blennerhasset, on her voyage from Chatham to the West Coast of Africa, arrived between Drake's Island and the main on Monday afternoon, and went into Plymouth Harbour on Tuesday to make good a few slight defects, which will probably detain her about five days. On her passage down Channel, the Stork made a full-speed trial, which was very satisfactory.

SWIFTSURE, Capt. Aitchison, flagship of Rear-Admiral A. M'L. Lyons, Commander-in-Chief of the Pacific station, was at Callao up to Jan. 4, and was to leave on the 8th for Payta, Galapagos, Honolulu, and Esquimault. The Comus was on passage from Payta to Vancouver, and on arrival would perform the duties of senior officer on the coast of Peru. The Thetis was at Coquimbo on Dec. 23, doing duty as senior officer on the coast of Chili, and would return to England on being relieved by the Constance. The Mutine, which was on passage to Honolulu from Callao, would proceed to Esquimault after the arrival of the flag-ship. The Garnet was at Coquimbo on Jan. 23, and would proceed to England on being relieved by the Heroine. The Sappho, which was at Callao on Jan. 4, was to proceed to Panama on the 8th, and after the arrival of the mail, due on Jan. 23, was to meet the Commander-in-Chief at the Galapagos Islands, and accompany the Swiftsure to Honolulu and Vancouver. The Kingfisher was at Callao on Jan. 4, and would remain on the coast of Peru. The Rocket was at Coquimbo on Dec. 23, and was to continue her homeward voyage on Dec. 30.

TAMAR, Capt. Royse, passed Lisbon on Feb. 6, homeward bound.

TEMERAIRE, Capt. Nicholson, C.B., left Malta for Cephalonia and Corfu on Feb. 1.

THALIA, Capt. Brackenbury, has arrived at Aden, and left yesterday for Colombo.

NAVAL NOTES.

Lieut. G. H. Yonge, R.N., has addressed to us a letter on fog signals, similar to the one he has forwarded to other service papers, advocating compass-course fog signals. As this officer's letter has already appeared elswhere, it is needless for us to give it publicity. We make it a rule not to publish what are technically termed "circular letters." In the present instance, we may state that a compass has been invented to work both a steam whistle and a fog horn, thereby notifying, at regular intervals, the exact course the ship is on. When letters are addressed to the *Army and Navy Gazette*, and copies of the same are sent to other papers, the fact should be stated by the sender.

Mr. W. E. Hall will give a course of five lectures on "International Law," from 12 to 1 on Wednesdays, beginning on Wednesday, Feb. 14, at the Royal Naval College. Officers of all ranks in any department of the public service will be permitted to attend.

Late on Monday night, the Jackal, tender to the Clyde guardship, Warrior, left her moorings at Rothesay Bay, under sealed orders. Her destination was believed to be the Isle of Skye.

For being drunk and striking the master-at-arms, an able seaman named Joseph Ball, belonging to the Hercules, was tried by court-martial on Tuesday at Portsmouth, and was sentenced to six months' hard labour.

The members of the Royal Naval Club of 1765 dined together at Willis's Rooms, St. James's, on Tuesday, to commemorate the "Founder's Day" and the action of Sir John Duckworth off Domingo in 1816. Admiral of the Fleet the Hon. Sir Henry Keppel, G.C.B., filled the chair. Colonel Sir Gustavus Hume, K.C.B., was the guest.

Two of the unarmoured gun-vessels attached to the Steam Reserve at Chatham, the Frolic and Myrmidon, are in the shipwrights' hands at Sheerness Yard, being brought forward for commission.

Rear-Admiral T. Brandreth, Controller of the Navy, and Mr. H. Campbell-Bannerman, M.P., Under-Secretary to the Admiralty, visited Chatham this week, to hear further evidence with respect to the petitions sent in by the workmen for an increase in their pay.

The Conqueror last week made a successful trial of her engines at the measured mile, and returned to Chatham on Tuesday, for completion.

An accident, involving the death of two men and the narrow escape of another, occurred on board the Agincourt, flagship of Rear-Admiral Sir F. Sullivan, in Plymouth Sound, on Tuesday, just before leaving for her annual cruise. An inquiry subsequently held by the Saltash Coroner, before a jury composed of seamen serving on board the ship, elicited the following details:—At 8 o'clock in the morning, topgallant masts and yards were being sent up. The foretopgallant mast had been fidded, and all was proceeding as usual, when, without any warning, it suddenly snapped and fell to port, carrying the two deceased, M'Carthy and Gimblett, who were on the yards at the time. Both fell in the ship, one striking against the fore-and-aft chain and then bounding into the ship's side between the rigging and the netting. Gimblett fell on the hammock netting, and the stanchion penetrated his body, death being instantaneous in both cases. The men fell about a hundred and forty feet, the skull-fractures alone being sufficient to cause death. Lieut. Gardiner, who witnessed the accident, said the mast was supplied from Devonport Dockyard a few days ago. He saw no defect in it now, although experts might give a different opinion. No expert was called, and the jury returned a verdict of accidental death.

On Saturday, Rear-Admiral Sir F. W. Sullivan, second-in-command of the Channel Squadron, together with Capt. Carter, of the Royal Adelaide, and Capt. Fellowes, of the Minotaur, assembled on board the Northumberland in Plymouth Sound to hold an inquiry respecting the collision which took place between the Russian brigantine Secundus and the Northumberland. It will be remembered that the Secundus ran into the Northumberland while she was on her steam trial, carrying away three boats and a portion of the stern walk. Among the witnesses examined on Saturday were Capt. Bosanquet, of the Northumberland, and Capt. Kelly, of the Steam Reserve, both of whom were on the bridge at the time of the occurrence. Lieut. Carey, officer of the watch, was also called, as well as the look-out men. The court came to the conclusion that the mishap was due to an error in judgment on the part of the officer of the watch, but did not censure Lieut. Carey, as the ship was at the time on steam trial, with the regular flag indicating that fact hoisted at the main. The foreigner evidently did not understand the information afforded by the flag, and therefore did not give way. The Secundus is now in Hamoaze, and is to be thoroughly repaired by the dockyard authorities.

An Iowa newspaper, of Jan. 9, states that Major Stephens, lay reader at the Episcopal Church, was ordained a deacon by the Bishop of Iowa at the cathedral at Davenport, a week before Christmas. Major Nassau W. J. H. Stephens, retired from the Royal Marines in February, 1882, under the Order in Council of Nov. 29, 1881, and, having commuted, shortly afterwards emigrated to America, with the expressed intention of going into the Church.

The number of flag officers on the Active List having reached the maximum, according to the Circular of Aug. 5, 1875, viz., three admirals of the fleet, ten admirals, twenty vice-admirals (the Duke of Edinburgh as additional), and thirty-five rear-admirals, promotion from the Captains' List will only take place to meet retirements and death vacancies.

The name of H.R.H. Prince Albert Victor Christian Edward, of Wales, eldest son of the Prince of Wales, has been removed from the Active List of the Navy.

Speaking of Naval reforms, the *Hampshire Telegraph* thinks that,—"Another reform much needed in the Navy is that of doing away with the form of nominating Naval Cadets, which at present is vested in the Admiralty. Naval Cadetships should be thrown open to public competition. The training of junior officers is also in much need of alteration, to enable the service to keep pace with modern science. The Admiralty is far too conservative, and should be much more liberal in its views. Traditions of half a century ago are of little value now-a-days. And to appoint carpenters to armour-clads in course of construction, because a carpenter was always appointed to superintend the building of a wooden frigate or line-of-battle ship, is the height of absurdity. What does he know about metals, or their workmanship? Surely an engineer is the proper professional man to superintend the building of an ironclad, and not a carpenter."

The new armour-plated ship Mars, which has been ordered to be built at Chatham Dockyard, will be of such a peculiar shape that it has been found impossible to lay her keel down on any of the building-slips, so that it will be necessary to construct her in one of the docks. No visitors are allowed to enter the building in which the plans are being prepared.

The Admiralty supply the following addresses of detached ships:—Mediterranean—Letters for Orion and Decoy to be sent to Alexandria. Letters for Monarch and Falcon to be sent to Port Said. N.B.—Letters for Alexandria and Port Said may be sent on Monday, *viâ* Naples; Tuesday, *viâ* Marseilles; and Friday, *viâ* Brindisi (British packet). Beacon, Suez, care of H.B.M.'s Consul. Grappler, Gibraltar, *viâ* France, daily. Inflexible, care of H.B.M.'s Vice-Consul, Syracuse. Invincible, care of H.B.M.'s Consul, Naples. Iris, care of H.B.M.'s Consul, Augusta, Sicily. Bittern, Ismailia, *viâ* Port Said. Sultan, Gibraltar. Channel Squadron — Minotaur, Agincourt, Achilles, and Northumberland, care of H.B.M.'s Consul, Vigo, daily. East Indies—Dragon, Malta. Pacific — Letters for the Commander-in-Chief, with Swiftsure and Mutine, care of H.B.M.'s Consul, San Francisco, to be forwarded to Honolulu, every Tuesday, Thursday, and Saturday. Sappho, care of H.B.M.'s Consul, San Francisco; letters to be despatched same days as to Commander-in-Chief. See above. Miscellaneous—Jackal, Rothesay, Bute, N.B. Sylvia, Sandy Point, Straits of Magellan. Valorous, Devonport. Outward bound—Dart, Sydney, New South Wales. Linnet, Singapore. Homeward bound—Iron Duke, Devonport. Rocket, Devonport, unless specially addressed to Monte Video. Seagull, St. Vincent, Cape de Verdes, care of H.B.M.'s Consul; mail, Feb. 8. Fawn, Devonport.

The interests of the taxpayers, says the *Hampshire Telegraph*, are at stake, and should they desire to see the Navy efficiently and economically administered, they should insist on reforms being introduced, not only in the management of the Fleet, but both at the Admiralty and in our Dockyards. If it be true that civil servants of the Admiralty have been acting as agents for the contractors to the Admiralty; that, not content with founding Civil Service Stores, they are obtaining commodities direct from the purveyors to the Admiralty and dividing them amongst themselves; that manufacturers have to bribe dockyard workmen to ensure their inventions or machinery being fairly tried; that officers holding high commands traffic in live stock; that the clerical staff of the Admiralty is better paid than the professional staff of the Navy; that the Queen's Regulations and Admiralty Instructions are a dead-letter in the service, and that the Admiralty have approved of their assistant-secretary encouraging men to forward anonymous letters to the Admiralty, the time has surely arrived to introduce drastic Naval reforms.

The half-yearly meeting of the Committee of the Queen Adelaide Naval Fund has just been held, by permission of Mrs. Skyring, the foundress, at her apartments, Spring Gardens, for the purpose of awarding the usual grants. The chair was taken by Admiral G. Goldsmith, C.B., there were also present Admiral Sir E. S. Sotheby, K.C.B., Capt. Dawson, J. P. Stilwell, Esq., &c. Thirty applications for assistance from necessitous orphan daughters of Royal Naval and Royal Marine officers were considered. The sum of £118, the total amount at the disposal of the Committee, was awarded in grants of £3 to £10 to twenty-one of the most urgent cases. The educational fees of four Queen Adelaide pupils at the Royal Naval Female School were also voted. Many of the applicants to this Society are very aged, infirm, and in ill-health, with no income in some instances, and only £10 a year from the Admiralty Compassionate List in others. It is earnestly hoped that donations and annual subscriptions will be sent to the hon. secretary, Mr. W. A. Moore, Admiralty, S.W., or to the hon. treasury, J. P. Stilwell, Esq., 22 Arundel Street, W.C., to enable the Committee to give more adequate relief to the ladies whose distress compels them to seek assistance. There are no paid officers or office charges.

Surg.-Major L. Corban, M.D., who was in medical charge of the Duke of Cornwall's Light Infantry in Egypt, has published an account of his experiences, with a view to improving military sanitation in future campaigns.

EPPS'S COCOA.—GRATEFUL AND COMFORTING.—" By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.*—Made simply with boiling water or milk. Sold only in packets, labelled—" JAMES EPPS and Co., Homœopathic Chemists, London."—Also makers of Epps's Chocolate Essence.

The action " Burnaby *v.* Williams " is down for hearing before the High Court of Justice during the present sittings. It arises out of a complaint made to the Commander-in-Chief by Major-Gen. Owen Williams, M.P., lately commanding the Royal Horse Guards, that Col. Burnaby, now commanding that regiment, had sent for publication to the editor of a weekly newspaper a paragraph of a scurrilous nature reflecting upon him. Col. Burnaby applied to the authorities for a military investigation, which was refused, as being inapplicable to the circumstances of the case, that Gen. Williams was not upon full pay, and, therefore, not amenable to the Horse Guards. Hence Col. Burnaby's resort to the civil tribunal.

ROYAL NAVAL SCHOOL, NEW CROSS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—With reference to the letter of your correspondent "Ubique," in your number of Feb. 3, it may be mentioned that during the twelve months last past three boys only have been sent up from this school for the Royal Military Academy, Woolwich, and all passed at their first trials. This strongly confirms the truth of your correspondent's statement.—I am, &c., JAMES WHITE, Head Master.

Royal Naval School, New Cross, Kent, S.E.

Sir F. Roberts has been holding a camp of exercise near Palaveram during the present month, at which all the troops in and near Madras were put through their facings.

MARRIAGE.

TUFNELL—MCMICKING.—On the 3rd inst., at St. Paul's Church, Knightsbridge, by the Right Rev. Bishop Tufnell, Canon of Chichester, assisted by the Rev. J. Baden Powell, M.A., Major Edward Tufnell, Royal Irish Regiment, to Catherine, third daughter of Gilbert McMicking, Esq., of Miltonise, Wigtownshire, and 55 Prince's Gate.

DEATH.

DUKE.—On January 13, at Meerut, N.W.P., the result of an accident at polo, Surgeon-Major William A. Duke; deeply regretted.

Advertisements.

WANTED, COMPANION to a GENTLEMAN, wishing to Travel in Canada for a year or two. Must have experience of travel and knowledge of sport. Age, about 30. —Apply, by letter only, to " A. M.," 36 Bury Street, St. James's.

WANTED, an OFFICER, who has Retired, or is Retiring, from the Navy or Army, to be TRAINED in the MANAGEMENT of a FLOURISHING BUSINESS. He must not be over 32 years of age, of great energy, perseverance, and of business habits, possessing tact and good temper. Should he give satisfaction, this may lead to a good position. Full name, rank, and address required, name of ship or regiment, and how employed during service, and copies only of three or four testimonials.—Address, " YOUNG OFFICER," Sell's Advertising Offices, 167 Fleet Street, E.C.

WANTED, IMMEDIATELY.—MESSMAN for Officers' Mess, Royal Marines, Gosport.—Apply, by letter, in first instance, with copies of testimonials and stating terms, to PRESIDENT, Mess Committee.

HER MAJESTY'S LEVÉES and DRAWING-ROOMS.— Regulation Court Suits, Diplomatic, Naval, and Military Uniforms, for all ranks, in good quality, for HIRE, or made to order, at NATHAN, Army Outfitters, 17 Coventry Street, Haymarket.

PATRONISED BY HIS LATE R.H. PRINCE ALBERT.

COWVAN'S CANTON STRAP,

OR FOUR-SIDED RAZOR SHARPENER.

For Grinding, Setting, Strapping, and Finishing Razors, Penknives, and Surgical Instruments. To all who value ease and comfort in shaving, this Strap will be an invaluable acquisition. The bluntest razor or penknife may be instantly restored to its primitive keen edge.

Prices, 5s 6d, 7s 6d, and 9s 6d. Cowvan's Razor Paste, 6d and 1s per packet.

Warehouses—31 and 32 Berners Street, Oxford Street, W.; and 93 and 95 City Road.

IN CONSEQUENCE OF IMITATIONS OF

LEA AND PERRINS' SAUCE,

Which are calculated to deceive the Public,

LEA and PERRINS beg to draw attention to the fact that each Bottle of the Original and Genuine

WORCESTERSHIRE SAUCE

Bears their autograph signature, thus—

LEA and PERRINS'.

GENERAL SIR HENRY DE BATHE, BART.
THE EARL OF ELLESMERE.
VICE-ADMIRAL H.S.H. PRINCE LEININGEN, G.C.B.
COLONEL SIR ROBERT LOYD-LINDSAY, V.C., K.C.B., M.P.
GENERAL LORD WOLSELEY OF CAIRO, G.C.B., G.C.M.G.

COMMITTEE.

(Nominated by the Patrons.)

The Club is started as a Grill Club, and to enable its Members to obtain for their own home consumption, Wines, Spirits, and Liqueurs, at the actual wholesale cost price.

This last is an entirely new feature, the advantage of which must be apparent to every wine consumer.

All working expenses, &c., being covered by the Annual Subscriptions, Members will through the Club obtain for their own home consumption, Wines, Spirits, and Liqueurs at actual wholesale cost price, as invoiced to the Proprietors.

Thus, any Member consuming, say, only £20 worth of Wine per annum will, in addition to enjoying the advantages of a good Club, virtually receive back his subscription by the saving of the profit he would otherwise have paid to the supplier in the ordinary course of trade. To large consumers the gain will be proportionately greater.

Special arrangements will be made for the supply of Naval and Military Messes.

For Rules, Application for Membership, &c., apply to

CHARLES A. PRITCHARD, Secretary, (pro tem.)
Temporary Offices, 20 Regent Street, Waterloo Place,
London, W.

ARMY AND NAVY CO-OPERATIVE MEMBERS ARE SUPPLIED AT

BENETFINK & CO.'S

ELECTRO-PLATE, CUTLERY, and FURNISHING IRONMONGERY GALLERIES, which are the MOST SPACIOUS and COMMANDING in the WORLD, COVERING an AREA of OVER 60,000 SQUARE FEET.

DISCOUNT (AS PER PRICE LIST) TO MEMBERS OF THE

ARMY and NAVY STORES, CIVIL SERVICE SUPPLY ASSOCIATION, CIVIL SERVICE CO-OPERATIVE SOCIETY, &c.

CATALOGUES GRATIS.

BOW CHURCH FURNISHING GALLERIES, OPPOSITE BOW CHURCH,
85, 86, 89, 90, 107, & 108 CHEAPSIDE, LONDON.

ARGOSY BRACES.

For **RIDING,** *For* **BICYCLING,** *For* **TRAVELLING,**
For **ROWING,** *For* **HUNTING,** *For* **POLOING,**
For **WALKING,** *For* **SHOOTING,** *For* **TUG-OF-WAR.**
For **TENNISSING,** FOR EVERY-DAY LIFE.

THE ARGOSY BRACES are for sale by every Hosier and Outfitter throughout **EUROPE, INDIA,** and all **BRITISH POSSESSIONS.**

They will wear longer than any other Suspenders, and as they contain no india-rubber, are particularly suitable for hot climates.

The characteristic feature of these Braces consists in the employment of pulleys and cords instead of the fixed attachment at present in use. The effect of this is that the strain varies with the movement of the body, and never becomes excessive on any one part. The advantage is obvious. These Braces may always be worn with comfort, and buttons are not pulled off. Insist on having only the **ARGOSY BRACE.**

Kept in three sizes: No. 1, Boys; No. 2, medium Men's; No. 3, large Men's. Prices from 1s 6d (advancing 6d per pair) to 8s 6d.

*** Be very careful to get the right size, when perfect comfort is guaranteed. Size of waist required.

Retail of every Hosier and Army Outfitter throughout the Civilised World, or of

J. E. KILLICK and CO., 137 Strand, London, W.C. (opposite Gaiety Theatre).

ROYAL UNITED SERVICE INSTITUTION.

LECTURE, FRIDAY, February 16. The Chair will be taken at Three o'clock. Captain N. L. WALFORD, R.A., on "The Effects of the Bombardment of the Forts of Alexandria, and the Lessons to be Learnt Therefrom." To be followed by a Discussion.

By Order of the Council,
BOUGHEY BURGESS, Captain, Secretary.

ADMIRALTY.
MEDICAL DEPARTMENT of the NAVY,
44 Spring Gardens, S.W., January 1, 1883.

AN EXAMINATION of CANDIDATES for COMMISSIONS to fill TWELVE VACANCIES in the MEDICAL DEPARTMENT the ROYAL NAVY will be held at the University of London, Burlington Gardens, by permission of the Senate, on MONDAY, February 19, 1883, and following days, at 10 o'clock.

Candidates are to attend at this Department at 11 o'clock on Thursday, February 15, for Preliminary Examination as to their fitness for the Service.

The forms to be filled up by Candidates will be supplied on application to this Department, and should be returned as early as possible.

JOHN W. REID, M.D., Director-General.

ENTRY of ENGINEER STUDENTS in Her Majesty's Dockyard at Portsmouth, with a view to their being trained for service afloat as Engineer Officers in Her Majesty's Navy.

A Competitive Examination of Candidates to fill Twenty-five Vacancies will be held by the Civil Service Commissioners in April next, in London, Edinburgh, Glasgow, Aberdeen, Dublin, Belfast, Cork, Leeds, Bristol, Liverpool, Newcastle-upon-Tyne, Portsmouth, and Devonport. Candidates must not be less than 14, nor more than 16 years of age, on May 1, 1883.

For Revised Regulations, apply to the Secretary to the Civil Service Commission, London, S.W.

By command of their Lordships,
G. TRYON.

Admiralty, S.W., January 1, 1883.

YOUTH'S FINE SILVER, flat crystal glass, 25s.
LADIES' GOLD LEVERS, in exquisitely chased cases, 70s.
GENTLEMEN'S GOLD LEVERS, engine-turned cases, 80s.

The Rev. Robert Cass, Settle, Yorkshire, writes, February 19, 1880:—The Lady's Gold Lever Watch received from you for 70s, in size, workmanship, and beautiful appearance, resembles a watch usually sold at £10. It gives entire satisfaction."

From Mr. J. J. Harris, Schoolmaster, 2-18 The Royal Irish Regiment, Aldershot, September 22, 1880:—"I am very much pleased with everything I have had from your Company. The watch (25s) has proved to be an excellent one, and is a marvel of cheapness. It is fully equal to, or indeed superior to, many I have seen purchased by Regimental Clubs for treble the money."

These Watches are frequently sold for treble the money. Cheques or P.O. payable to

Mr. A. PERCY, VYSE STREET, BIRMINGHAM.

On receipt of which, any watch will be registered post free to any part of the United Kingdom, and for 2s 6d per watch extra to any part of the postal world.

DR. J. COLLIS BROWNE'S

ORIGINAL AND ONLY GENUINE. **CHLORODYNE.**

From SYMES and Co., Pharmaceutical Chemists, Medical Hall, Simla, January 5, 1881.
To J. T. DAVENPORT, Esq.,
33 Great Russell Street,
Bloomsbury, London.

Dear Sir,—We embrace this opportunity of congratulating you upon the wide-spread reputation this justly esteemed medicine, Dr. J. Collis Browne's Chlorodyne, has earned for itself, not only in Hindostan, but all over the East. As a remedy of general utility, we much question whether a better is imported into the country, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are happy to say, are now relegated to the native bazaars, and, judging from their sale, we fancy their sojourn there will be but evanescent. We could multiply instances *ad infinitum* of the extraordinary efficacy of Dr. Collis Browne's Chlorodyne in Diarrhœa and Dysentery, Spasms, Cramps, Neuralgia, the Vomiting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Choleraic Diarrhœa, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power. We have never used any other form of this medicine than Collis Browne's, from a firm conviction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, as we are of opinion that the substitution of any other than Collis Browne's is a deliberate breach of faith on the part of the chemist to prescriber and patient alike. We are, Sir, faithfully yours, SYMES and Co., Members of the Pharm. Society of Great Britain, His Excellency the Viceroy's Chemists.

DR. J. COLLIS BROWNE'S CHLORODYNE is a Liquid Medicine which assuages Pain of every kind, affords a calm, refreshing sleep without Headache, and invigorates the Nervous System when exhausted.

DR. J. COLLIS BROWNE'S CHLORODYNE.

Dr. J. C. BROWNE (late Army Medical Staff), discovered a remedy to denote which he coined the word CHLORODYNE.

The General Board of Health, London, report that it acts as a charm, one dose generally sufficient.

Dr. Gibbon, Army Medical Staff, Calcutta, states:—"Two doses completely cured me of Diarrhœa."

DR. J. COLLIS BROWNE'S CHLORODYNE rapidly cuts short all attacks of

COUGHS, ASTHMA, COLDS,

BRONCHITIS,

EPILEPSY, SPASMS, COLIC,

PALPITATION, HYSTERIA, and is the true Palliative in

NEURALGIA, GOUT, CANCER,

TOOTHACHE, RHEUMATISM.

GREAT SPECIFIC for

DIARRHŒA,

CHOLERA, DYSENTERY.

IMPORTANT CAUTION. The immense sale of this remedy has given rise to many unscrupulous imitations.

N.B.—Every bottle of genuine Chlorodyne bears on the Government stamp the name of the inventor,

DR. J. COLLIS BROWNE.

Sold in Bottles, 1s 1½d, 2s 9d, 4s 6d, by all Chemists.

Sole Manufacturer,

J. T. DAVENPORT,
33 Great Russell Street, W.C

THE VERSMANN'S

PATENT

GERMAN MOSS LITTER.

This Litter is specially prepared from a moss-peat found in Germany, and introduced into this country by the Patentee, Dr. VERSMANN, Ph.D. After a most severe and extensive trial in public and private stables, cowsheds, and kennels, it is pronounced by the highest practical and scientific authorities to be the best and cheapest litter known.

ITS ADVANTAGES ARE:

1. Cheapness, it being not more than one-half the cost of straw.
2. Absorptiveness, as absorbing all the urine, and rendering drains and flushing of stables unnecessary.
3. Prevention of decomposition and generation of bad odours.
4. Affording an excellent soft and elastic bed, particularly agreeable and beneficial to the feet and limbs of horses.
5. Horses do not eat it as they do straw litter. therefore they do not require to be racked up or muzzled to prevent indigestion or broken wind.
6. It is easily managed in the stable, and doe not soil or stain horses.
7. It has a wonderful influence on the growth of the hoofs and in maintaining the feet in health.
8. It is extremely portable, being compressed into bales weighing each about 3 cwt., ¾ cwt. to 1 cwt. being sufficient to litter a horse for a month or six weeks.
9. It is not inflammable, and therefore offers but little danger from fire.
10. It is essentially a sanitary litter.
11. The manure is much more valuable than that of straw, and occupies considerably less space.

It will be found of immense advantage to Veterinary Infirmaries, in Stud Farms, Dairies, Kennels, &c.

Address—

The Versmann's Moss Litter Company,
LIMITED.
63 QUEEN VICTORIA STREET, LONDON, E.C.

CAUTION.—Proceedings will be taken against persons infringing the Company's patent.

KEATING'S COUGH LOZENGES.—Convenient to keep handy in the pocket.

KEATING'S COUGH LOZENGES.—Are universally recommended by the Faculty.

Testimonial (Original may be seen).

DEAR SIR,—Having tried your Cough Lozenges in India, I have much pleasure in testifying to their beneficial effects in Cases of Incipient Consumption, Asthma, and Bronchial Affections. So good a medicine ought to be known to be appreciated. I have prescribed it largely with the best results.—"W. B. G.," Apothecary, H.M.'s Indian Medical Service. Sold in tins, 1s 1½d, by all Druggists.

HOLLOWAY'S PILLS.—HALE CONSTITUTIONS.—When the human frame has become debilitated, from the effects of exposure, excesses, or neglect, then these Pills will work wonders. If they be taken according to the lucid directions wrapped round each box, Holloway's Pills exert the most exemplary tonic qualities, in all those cases of nervous depression in which the vital powers have become so weakened that the circulation has been rendered languid and unsteady. They improve the appetite, strengthen the digestion, regulate the liver, and act as gentle aperients. The Pills are suited to all ages and all habits. A patient writes:—"Your Pills, to be valued, require only to be known. During many years I sought a remedy in vain, was daily becoming weaker, when your Pills soon restored me."

ROYAL INDIAN ENGINEERING COLLEGE, Cooper's Hill, Staines.

This College has been recently placed on a new basis, and the advantages afforded by it as a training institution for those who purpose adopting the Civil Engineering profession in India or elsewhere, are now offered to all persons desirous of following the course of study pursued there.

A number of Students, not exceeding 60, will be admitted to the College in September, 1883. Candidates for admission must, on July 1, 1883, be over 17 and under 21 years of age, and must give satisfactory proof of their having received a fair general education.

The Secretary of State for India will offer 13 appointments in the Indian Public Works Department for competition among the students entering the College in September, 1883, at the termination of their prescribed three years' College course, that is, in the summer of 1886. The Secretary of State for India will further offer two appointments in the Indian Telegraph Department among the same students after two years' course of study, that is, in the summer of 1885.

In the event of there being more candidates for admission than the College can receive, the preference will be given to qualified candidates according to dates of application for admission.

For all further particulars, apply by letter only to the Secretary, Public Works Department, India Office, S.W.; or to the President, Royal Engineering College, Cooper's Hill, Staines.

JULAND DANVERS, Secretary,
Public Works Department.
India Office, October 25, 1882.

MILITIA COMPETITIVE EXAMINATION ONLY.—A Few Candidates desiring special individual attention are Prepared by Major COWPER, assisted by an Officer of equal experience, who has taken high honours in Surveying, &c. At the last Four Examinations (the average sent up for each being 3·75), Pupils passed 1st, 10th, 21st, 30th, 33rd, 34th, and 37th on the List.—10 Clifton Villas, Maida Hill, London, W.

JOHN HANES, Manager,
Store Warehouses, Baker-Street Bazaar, W.

J. AND W. TOLLEY'S
EXPRESS RIFLES.

·360 bore DOUBLE EXPRESS... ... ... £20
·450, ·500, and ·577 bore DOUBLE EXPRESS £25
If fitted with Tolley's Patent "Giant-Grip" Action, specially designed to prevent the SLIGHTEST MOVEMENT at the moment of discharge. The strongest action extant ... £28
An inspection of above invited.

The shooting of our Rifles is under the personal supervision of a member of the Firm, and is not deputed to any subordinate, AS IS USUAL IN MOST CASES. By this means we are enabled to guarantee to our customers Rifles with a figure of merit that cannot be beaten.

[Extracts.]

From Capt. J. E. B., 45th Regiment: "I yesterday fired with the rifle without raising the back sight from 25 to 200 yards, and almost every shot struck its fellow, with the other barrel."

B. W. W., Assam, India:—"I must certainly give you credit for the splendid weapon that you have built me."

Capt. F. W. M., Mysore:—"I have never had a rifle (and I have had all kinds) which has given me such satisfaction."

Lieut.-Col. W. A., 22nd Regiment:—"The Express Rifle gives me perfect satisfaction."

Lieut. C. W. D., 92nd Highlanders:—"I have fired with it, and find it very accurate and well balanced."

C. F. SHOT GUNS, Hammer or Hammerless, £13 13s, £15 15s, £17 17s, £20, £25, and £30.

We are constantly receiving a supply of above from our manufactory in Birmingham, at our London address, where one of the principals can at any time be seen.

ARMY EXAMINATIONS.—Captain W. H. JAMES, F.G.S., P.S.C., late R.E., and the Rev. Dr. FROST, LL.D., 19 Lexham Gardens, W., formerly at 28 Kensington Square, W., PREPARE Gentlemen for the Army, *viâ* WOOLWICH, SANDHURST, and the MILITIA. A Special Class for the STAFF COLLEGE. Captain James passed from the Staff College in 1877 with honours, first in mathematics, &c. During the past fifteen years, over 500 Pupils have passed from this Establishment. Fifty-two successes last year, eighty this year. In the recent WOOLWICH Examination four passed, viz., 4th, 17th, 22nd, 27th, and a fifth pupil qualified, out of seven sent up.

LIEUTENANTS of MILITIA.—At the March Military Competitive Examination, EIGHT obtained commissions, viz.:—Richards (4th), Grant (12th), Wimberley (14th), Cass (28th), Shadwell (30th), Woodwright, Legge, Vignoles (Cavalry).

At the last Examination (September) TEN passed, viz.:—Holland (2nd), Blewitt (8th), Whiffin (14th), Gorman (19th), M'Mahon (20th), Morris (25th), Barthorp (28th), Cochrane-Baillie (33rd), Edwards (36th), another was 41st, and Goodair, 42nd, received a cavalry commission.

At the April Further Literary Examination, Three passed, viz.:—4th, 37th, 86th. This October Four passed, viz.:—5th, 10th, 14th, 26th, being all sent in on both occasions.

STAFF COLLEGE Successes:—1881: 1st, 4th, 16th. 1882: 1st, 7th, 10th, 15th, 22nd, 23rd, 26th.

Captain JAMES prepares Officers for the Promotion Examination. No failure up to date, and 46 have passed since December.

ARMY EXAMINATIONS.—Special Preparation, by JOHN GIBSON, M.A. (First-class Classics, Camb., 1874, formerly Master at Westminster), assisted by Two Resident University Graduates and Visiting Professors. In June, 1882, out of 4 Pupils sent up, 2 passed, and a third scored over 4,100 marks at his first trial. In November, 1882, out of 4 Pupils sent up, one took the 14th place on the list, and another scored over 4,300 marks. All the Pupils sent up were First trial Candidates, and 2 of the successful ones had only read 2 months with Mr. Gibson; the other, 4 months. In the last 2 Preliminary Examinations, 5 passed, out of 7 sent up.

N.B.—The next Preliminary Guide, containing the Answers to the Questions set in the February Examinations, will be published about the middle of February. Address, Bromley, Kent.

MATHEMATICS.—A Cambridge Wrangler VISITS and RECEIVES PUPILS in London; teaches by Correspondence; and supplies, on moderate terms, Solutions of the most Recent Examination Papers, including Sandhurst, Woolwich, I. C. S., London B.A., and B.Sc.—G. HEPPEL, M.A., 180 The Grove, Hammersmith.

THE ROYAL ACADEMY, Gosport.
PATRONS.
Her Most Gracious Majesty the Queen.
His Royal Highness the Prince of Wales.
His Royal Highness the Duke of Edinburgh.
His Royal Highness the Duke of Connaught.
His Royal Highness the Duke of Albany.

A Class will be formed in January for special preparation for the next Examination for Naval Cadetships.—Rev. EDWARD BURNEY, M.A., Head Master.

ARMY, *viâ* Sandhurst, Woolwich, or Militia.—PROSPECTUSES, together with reliable Information of Tutors recently successful, sent (gratis), by Messrs. ASKIN, 38 Sackville Street, London, W. References kindly allowed to the Chaplain-General to the Forces and others.

ARMY EXAMINATIONS.—PREPARATION in FRANCE by B. ARNETT, M.A., Cantab., J. J. RIX, B.A., Cantab., and F. BREITENSTEIN. Rigeard, Chartres, France.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS., 28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Four Open Scholarships or Exhibitions gained in 1881.—Address Rev. E. BARTRUM, Head Master.

ARMY EXAMINATIONS.—Dr. KAIM and H. ZOBEL, in conjunction with Captain GREENE, assisted by able and Experienced Masters, PREPARE CANDIDATES for Woolwich, Sandhurst, the Militia Competitive Military Examinations, and the Staff College.

The Pupils are received in the Families of the Principals, which will be a Special Advantage to those wishing to practise French, German, and Italian conversation.

Highest references; amongst others, Major-General Sir Evelyn Wood, V.C., K.C.B., Colonel the Hon. P. Methuen, C.B., Scots Guards, Assistant-Adjutant-General, Horse Guards.

For particulars, apply to H. ZOBEL, Poulton House, Hampton, Middlesex.

GROSVENOR SCHOOL, Twickenham.

BOYS receive thorough PREPARATION for Woolwich and Sandhurst, and pass DIRECT. Special arrangements for very young boys. Healthy neighbourhood, good table, public-school tone. Strongly recommended by many Officers high in the Service, to whom reference is permitted. Head Master, the Rev. L. MURRAY D'ORSEY, M.A.

ARMY EXAMINATIONS.—The Establishment formerly conducted by Dr. LAUMANN and Mr. ELDERTON at Fulham, is now carried on by the latter at MANOR COURT, Hanwell, where pupils are prepared for the above Examinations. Average number of pupils, 10; average number passed per annum, 8.

INDIAN and COLONIAL.—SONS of GENTLEMEN RECEIVED, by the Rev. W. FRASER, M.A., Vicar of St. Stephen's-by-Saltash, one of the most healthy and picturesque parts of the West of England. Only six pupils received. Every care and attention bestowed upon their education and health. In all respects treated as one of the family. Terms, from Seventy Guineas, including extras.

KELLY COLLEGE, Tavistock, Devon. ELECTION of FOUNDATIONERS.

FOUR VACANCIES. Priority, after Founder's Kin, to Sons of Deceased Naval Officers. Examination, March 20.—Apply to the HEAD MASTER.

MILITARY EDUCATION, GERMANY.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

University Candidates for Sandhurst are received as non-resident pupils. In this competition two candidates (the only ones sent up) have passed into Sandhurst during the past year; Mr. W. A. Grant taking fourth place in July, and Mr. G. Barton-Smith second place in December.

In addition to the University candidate, two other pupils passed on the general list at the recent Sandhurst Examination,—Mr. C. D. Radcliffe (tenth place) and Mr. H. Marwood.

Mr. B. Smith, on this occasion, made the highest score in Mathematics, and Mr. Radcliffe highest marks in German, as well as second highest in Freehand Drawing, out of 440 candidates up for Examination.

Special arrangements made for officers studying for the Staff College or other Military Examinations.

MILITIA COMPETITIVE EXAMINATION.

The standard originally fixed for this Examination having been much raised in September, 1881, no results previously gained should be taken into account in considering the successes obtained by Militia pupils. Since the date named, there have been three competitions. At these trials Colonel WILKINSON and Lieutenant-Colonel SHAW have secured 24 COMMISSIONS for their pupils, although they have only prepared and sent up a very limited number for Examination. The names of all successful pupils have already been published.

Also, at the October Literary Examination, Lieut. C. J. Stanton took 4th place on the list.

The results obtained at other Examinations bring the general score up to FORTY-EIGHT SUCCESSES, achieved by pupils in the last 16 months; during that period the number of pupils on the strength of the establishment, resident and non-resident, has always been limited to 60.—Address, DARMSTADT, GERMANY.

SANDHURST, WOOLWICH, C. S., MILITIA, &c.—The Rev. A. PRITCHARD, M.A. Oxon., assisted by his Brother, Professor PRITCHARD (late R.M. Academy, Woolwich), and a large Staff of resident Assistant-Tutors, PREPARES for any of the above.

The next Term will commence Jaunary 3, 1883.

For particulars of all this year's successes and previous ones, address Rev. A. PRITCHARD, Hill Lands, Wargrave, Henley, Oxon.

OXFORD RESPONSIONS, and all UNIVERSITY MATRICULATIONS.—VACANCIES caused by successes last week at Oxford Responsions.

Address, Rev. A. PRITCHARD, Wargrave, Henley, Oxon.

MILITARY COMPETITIVE for MILITIA OFFICERS.—The Rev. A. PRITCHARD, who is assisted by a retired Field Officer of 8 years' experience as a Garrison Instructor, has, during the year 1882, gained five Commissions with the 14 Candidates who went up from him.

For particulars of marks, places, &c., address Rev. A. PRITCHARD, Wargrave, Henley, Oxon.

LIEUTENANTS of MILITIA desirous of competing for Line Commissions can be received by the Rev. WALTER BAKER, M.A., at Batcombe Rectory, Evercreech, Bath. They will be thoroughly prepared in all Military Subjects by Major Dickens (late 11th Foot), Staff-College Graduate, formerly Assistant Royal Engineer, S.E. District, and Colonel Palmer, late R.A., formerly Instructor at the R.M.A., Woolwich, and two of whose pupils obtained special mention from the Examiners at the last September Examination.

Great individual attention is given, as few pupils are taken, and each comes under actual *vivâ voce* instruction for 6½ hours a day. Since the introduction of the Military Competitive, out of Thirty-nine Lieutenants of Militia sent up, Twenty-four have been successful, several taking high places in the list. There are opportunities for healthy country amusements and games, a cricket and football ground, lawn-tennis courts (grass and asphalte), a private billiard-room, &c., and in all other respects a liberal and gentleman's establishment is kept.

A Large Staff of Experienced Tutors, all resident, assist in preparing for the Qualifying Examinations, and for the Sandhurst and Woolwich Competitions.

References to parents of successful pupils.

NAVAL CADETS, ASSISTANT CLERKS
HOPE HOUSE, SOMERSET PLACE,
SOUTHSEA.
Principal—Mr. T. H. VICKERY.

In addition to the general course of study pursued at this long-established School, Pupils are specially prepared for the Examination required for the above.

At the late Competitive Examination in June, for Assistant-Clerkships in the Royal Navy, THREE of the Five successful competitors were Pupils of this Establishment, taking First, Third, and Fourth places. And THREE passed the test of qualification.

TO ARMY TRAINERS and MILITARY STUDENTS.

The undersigned offers his services in PREPARING LIEUTENANTS of MILITIA for LINE COMMISSIONS, and Officers of Volunteers and Militia for Promotion Examinations, under G.O. No. 20 of 1882.—Apply to Colonel W. J. STEWART, care of Messrs. H. S. King and Co., 45 Pall Mall, S.W.

KINGSLEY COLLEGE,
WESTWARD HO!
HEAD MASTER—Rev. F. HEWSON WALL, LL.D.
VISITING COUNCIL.
Vice-Admiral Sir Wm. M. Dowell, K.C.B.
Robert Ellis, Esq., M.R.C.S., &c.
Rev. Roger Granville.
General W. N. Hutchinson.
Colonel Kennard, M.P.
Major-General Molesworth, R.H.A.
Sir George Stucley Stucley.
Rear-Admiral A. T. Thrupp.
Secretary, Ambrose Berkeley Wall, Esq., R.N.

THE REV. Dr. POLLOCK RECEIVES a Few RESIDENT PUPILS, to prepare for Sandhurst, Woolwich, and the Universities. At last Sandhurst Examination, a Pupil obtained 5,136 marks.—Neville Hall, Middleham, Bedale, Yorkshire.

ARMY.—LINE and MILITIA.
IMPORTANT to STUDENTS.

Captain DUMARESQ DE CARTERET BISSON, M.A., Author of "Our Schools and Colleges" (graciously recognised by the Queen and H.R.H. the Commander-in-Chief), sends, free by post, a selected List of Prospectuses of all the most SUCCESSFUL ARMY TUTORS, and gives his Counsel on Military and Civil-Service Education free of charge. Reference kindly permitted to the late Secretary of State for War.—Address, Captain BISSON, No. 3 Berners Street, London, W.

ARMY,
CIVIL SERVICE, UNIVERSITIES,
PUBLIC SCHOOLS.

MESSRS. BISSON, BORMAN, and CO. send, free of charge, PROSPECTUSES of the most SUCCESSFUL TUTORS for Woolwich, Sandhurst, Military Competitive, Staff College, Home and Indian Civil Services, Universities, Public Schools, &c.—3 Berners Street, W.

ARMY EXAMINATIONS, &c.—In the late Examinations, Mr. WATKINS, late Scholar, Christ's College, Cambridge, passed Messrs. Plomer, Panton, Carpendale, Brownlow (U.C.), and Voyle (I.C.), for Sandhurst, and Mr. Cronin took honours at the Academy; Mr. Brett qualified for Woolwich.

Twenty-two other Pupils have taken high places past year for the above, the Universities, Student Interpreterships, and Militia Examinations, Military and Pass.

A Class for Staff College.

Address, 90 Kensington Park Road, W.

LIEUTENANTS of MILITIA.—A COURSE of INSTRUCTION, including Fortification, Surveying, Tactics, Army Discipline Act, Drill, Queen's Regulations, &c., given by Major DAUBENY and A. PINHEY.—Apply to A. PINHEY (late R.A.), Burlington House, Spring Grove, Isleworth, W.

WOOLWICH, SANDHURST, and MILITIA.—Mr. S. H. WINTER PREPARES PUPILS for Military and other Examinations. More than 200 of his pupils have passed, many of them taking very high places.—Connaught House, the Common, Woolwich.

SANDHURST, WOOLWICH, and LITERARY EXAMINATIONS for MILITIA OFFICERS.—Candidates for the above Examinations are PREPARED by Mr. G. M. HICKS, M.A., who receives a limited number. Thorough teaching and individual attention. List of recent successes on application.—5 South Row, Blackheath, S E.

MR. ST. JOHN BOULTBEE, the Priory, Croydon (late Captain Massie and Boultbee), assisted by a Staff of Graduates of the Universities of Oxford and Cambridge, RECEIVES a Limited Number of Pupils to PREPARE for the Competitive Examinations for Sandhurst, Woolwich, and for the Militia. The number of Pupils is limited to TWELVE. Five Pupils out of Six were successful at the last Sandhurst Examination (July, 1882).—Terms, References, and other information, sent on application.

ARMY TUITION, WEST of ENGLAND.—H. A. JAMES, B.A. Cambridge, and A. J. DE H. BUSHNELL, M.A., Oxford, have been nine years engaged in preparing Candidates for the Woolwich and Sandhurst Entrance and the Militia Literary Examinations. Since June, 1873, for Military Examinations alone, 91 Pupils have completed their preparation at Hillcourt. Of these, 76 have passed. The number in the house is limited to 15.—For terms and references, apply to HENRY A. JAMES, Hillcourt, Marle Hill, Cheltenham.

MADAME ISABEL BIZET MICHAU receives LADIES and GENTLEMEN for PRIVATE INSTRUCTION in the Valse, Highland Schottische, &c., by previous appointment, at her Residence, 59 Baker Street, Portman Square. The Young Ladies' Classes at Kensington and Baker Street are held as usual.

ARMY EXAMINATIONS.

MR. J. WINDER, M.A., Cranworth House, Eastbourne, Sussex, PREPARES TEN PUPILS for Woolwich and Sandhurst. At recent Examinations Candidates prepared by Mr. Winder obtained 6th and 22nd places for Woolwich, and 20th and 27th places for Sandhurst.

MILITARY COMPETITIVE EXAMINATION.—Lieutenants of Militia PREPARED, at 37 Cambridge Gardens, W. At the last September Examination, the following, out of Twelve sent up, were successful:—

C. H. Farquharson	5th	J. F. Campbell	23rd
J. E. Cullinan	12th	C. L. Crutchley	31st
C. W. Garraway	16th	B. T. Mahon	38th

—Apply to D. C. FEENY, B.A.

LIEUTENANTS of MILITIA, Candidates for Line Commissions, are PREPARED by Lieutenant-Colonel COATES, Reserve of Officers, formerly of the Royal Military Academy, Woolwich, and Acting Brigade-Major at the Cape.

Colonel Coates has had much experience in coaching, and was, until quite lately, instructing at a large Army Coaching Establishment. His fees are about one-third less than those usually charged; and as he limits the number of his Pupils to Four, great individual attention is insured.—Apply to Colonel COATES, Shepton Mallet, Somersetshire.

ROYAL SCHOOL for DAUGHTERS of OFFICERS of the ARMY.
Patron—Her Most Gracious Majesty the QUEEN.
Chairman—Major-General J. T. BOILEAU, R.E., F.R.S.

The Daughters of all Officers in her Majesty's Army, inclusive of the Royal Marines, and of officers who have sold out or otherwise retired from the Service, provided those children were born prior to such retirement, are eligible. The ages of admission are from 10 to 15. Each donation of £5 5s entitles to one life vote. Each subscription of 10s 6d entitles to one vote at all elections during the year. Further CONTRIBUTIONS to meet the current expenses are earnestly solicited by the Committee.

By order, G. W. FORSTER, Secretary.

ELEMENTARY TREATISE ON PHYSICS,

Experimental and Applied, for the Use of Colleges and Schools.

Translated and Edited from Ganot's *Eléments de Physique* by E. ATKINSON, Ph.D., F.C.S., Professor of Experimental Science, Staff College, Sandhurst. Tenth Edition, Revised and Enlarged; with 4 Coloured Plates and 844 Woodcuts. Large crown 8vo, price 15s, cloth.

⁂ In the Present Edition, the Fresh Matter has increased by about Twenty-five pages the size of the book as it stood in the Last Edition. The new matter includes Twenty-four Additional Illustrations.

NATURAL PHILOSOPHY FOR GENERAL READERS AND YOUNG PERSONS.

Translated and Edited from Ganot's *Cours Elémentaire de Physique* by E. ATKINSON, Ph.D., F.C.S., Professor of Experimental Science, Staff College, Sandhurst. Fourth Edition; with 2 Coloured Plates and 471 Woodcuts, Crown 8vo, price 7s 6d, cloth.

"It may be safely asserted that no book on Physics has had a more deserved popularity during the past fifteen years among teachers and pupils than Dr. Atkinson's 'Elements of Physics,' now in the tenth edition. The reason for this is very obvious. Basing his work on Ganot's well-known treatise, Dr. Atkinson, by well-chosen additions and amplifications of his own, strove to produce a good book, and abundantly succeeded. Improvements on old methods, and new discoveries, have, in like manner, found place from time to time in each successive edition."—*Philosophical Magazine.*

TEXT-BOOKS OF SCIENCE, MECHANICAL AND PHYSICAL,

FOR THE USE OF ARTISANS, AND OF STUDENTS IN PUBLIC AND SCIENCE SCHOOLS.

MILLER'S ELEMENTS of CHEMISTRY, Theoretical and Practical, Part I., *Chemical Physics.* Sixth Edition, Revised, with Additions, by H. MACLEOD, F.C.S. With 274 Woodcuts, 8vo, 16s.

MILLER'S ELEMENTS of CHEMISTRY. Part II., ***Inorganic Chemistry.*** **Sixth** Edition, Revised throughout, with Additions by C. E. GROVES. With 376 Woodcuts, 8vo, 24s.

MILLER'S ELEMENTS of CHEMISTRY. Part III. Fifth Edition, Revised, and for the most part Rewritten, by H. E. ARMSTRONG, F.R.S., and C. E. GROVES, F.C.S. The Chemistry of Carbon Compounds, or Organic Chemistry: *Hydrocarbons, Alcohols, Ethers, Aldehides,* and *Paraffinoid Acids.* With 20 Woodcuts, 8vo, 31s 6d.

A DICTIONARY of CHEMISTRY, and the Allied Branches of other Sciences. Edited by HENRY WATTS, F.R.S., F.C.S. 8 vols. medium 8vo, £12 12s 6d.

THIRD SUPPLEMENT, completing the Record of Chemical Discovery to the Year 1879. Part II., completion, price £2 10s, recently published.

"We are not aware of any work of reference in any language, covering the whole extent of chemical and chemico-physical science, which can be placed on a level with Mr. Watts's Dictionary."—*Journal of Science.*

"This work is so well known, and so generally appreciated from the previous volumes, that probably the highest commendation that could be given to that now issued is to say that it fully maintains the character it has already secured, and this can unquestionably be said with the fullest justification."—*Mining Journal.*

"The English language is not rich in lexicons of science; we would point to this work as a model upon which others might be framed. To the practical analyst, this work must prove of the utmost value—to the philosophical investigator it must, as a record of all former labours, be a great gain—and to the student who is true to his studies, it will prove an ever-ready guide. Our manufacturers know the value of chemistry, and are many of them experts in the special branches of the science which bear on their particular industries. They require to know the latest discoveries, and to keep them as it were in stock, until the march of improvement renders it necessary to apply them. This Dictionary places them in possession of these desiderata."—*Athenæum.*

The ELEMENTS of MECHANISM. By T. M. Goodeve, M.A., Lecturer on Applied Mechanics at the Royal School of Mines. New Edition, Rewritten and Enlarged, with 342 Woodcuts, crown 8vo, 6s.

No. 1,203.—Vol. XXIV.] SATURDAY, FEBRUARY 10, 1883. [REGISTERED FOR TRANSMISSION ABROAD.} GRATIS.

EGYPTIAN NOTES.

(FROM AN OCCASIONAL CORRESPONDENT.)

Cairo, January 30, 1883.

It is notified that, as illness cannot any longer be attributed to service with the Army in the field, the usual stoppages will be charged against all men admitted into hospital from January 10, inclusive.

Lieut. A. D. Pixley, King's Royal Rifle Corps, is removed to the 2nd Battalion of his regiment.

The *William Burkett* takes home four officers, eight serjeants, and 182 rank and file; total, 194.

Leave of absence is granted to Brigade-Surgeon D. Birnett from January 13, 1883, to date of his re-embarkation for Egypt; and to Surgeon-Major Warren, to travel up the Nile, from January 30 to March 5. Duties of Staff Surgeon will be taken by Surgeon-Major Connolly.

H.M.S. *Serapis*, due at Alexandria February 7, will embark Royal Irish Regiment for Malta. H.M.S. *Tamar*, due at Alexandria February 17, will embark Shropshire Light Infantry for Malta.

All Reservists now in Egypt will leave for England per s.s. *Lusitania*.

Captain Humphrey, Welsh Regiment, and Lieut. G. C. P. Williams Freeman are attached temporarily to Military Police.

The following invalided officers proceed to England per *Carthage*:—Lieutenants Ranken, Scots Rifles; Turner, Berks Regiment; Gardiner, Highland L.I.; and Macleod, Cameron Highlanders; and Surgeon Pope, A.M.D.

Deputy-Surgeon-General Manley, V.C., C,B., will proceed to England per *Carthage*. Brigade-Surgeon Lofthouse will officiate as Principal Medical Officer, Alexandria.

The following officers are at present in hospital at Cairo:—

Name and Regiment.	Disease.	Date of Entry.
Capt. Cantley, S. Staffordshire ...	...Ague	...Jan. 23, 1883
Lieut. Thatcher, Shropshire ...	...Fever S.C.	...Jan. 23 "
Lieut. Aspinwell, 7th Dragoon Guards...	Diarrhœa	...Nov. 22, 1882
Capt. Mowbray, Royal Highlanders	...Phthisis, Pul.	...Jan. 2, 1883
Capt. Griffiths, Highland L.I. ...	...Cong. of Lungs...	Jan. 9 "
Lieut. Scott Elliot, Cam. Highlanders...	Enteric Fever ...	Jan. 11 "
Capt. Alsopp, Royal Artillery ...	...Enteric Fever ...	Jan. 14 "
Pymr. Stirling, S. Staffordshire	...Bronchitis	...Jan. 16 "
Lieut. Burney, Berks	...Enteric Fever ...	Jan. 19 "
Lieut. Bald, Royal Highlanders...	...Infm. of Glnds...	Jan. 24 "

THE POLYPHEMUS.

When the late Mr. Ward Hunt announced some years ago, in the House of Commons, that drawings had been prepared for a vessel of an entirely novel type, which would be immediately laid down at Chatham, there was quite a flutter of expectation in Naval circles. The public, too, were attracted by the air of mystery which permeated the First Lord's announcement, that he was not at liberty to go into particulars. At last the world was informed that the vessel in question would not mount a single gun, properly so called, but would depend upon the ram and the torpedo for offensive purposes, while her speed would be such as would enable her to take refuge in flight, in the event of her encountering a more doughty opponent, or being overpowered by numbers. At last a description of her lines was made public. Then the *Army and Navy Gazette* protested against the public money being spent on constructing a craft whose very design ensured her failure. But our warning was unheeded. Nevertheless, as the uncouth structure gradually rose upon the stocks, our words came home to many; and when, with all due pomp and ceremony, it was sent afloat, with the appropriate name—for a monstrosity—of Polyphemus, there were not a few who loudly expressed their hope that they might not have to go to sea in it. Since her completion, the Polyphemus has undergone a series of trials of speed, which have proved anything but satisfactory, while her torpedoes have refused to act under the only circumstances in which, from such a vessel, they could be effectively discharged. Some of the causes which led to these failures may have been unavoidable, but others were assuredly not so; and while the "hideous, misshapen monster"—Virgil's description of the original Polyphemus certainly applies—is pensively pursuing its course to its native place, there to undergo such rearrangement or reconstruction as may be deemed advisable, it will be well to consider some of the points in which this strange naval production has broken down. That there should, at the present day, be any difficulty in constructing boilers to stand a given pressure, seems almost incredible; yet some blunder has apparently been made in this respect, for the pressure has been lowered from 125 lb. to 70 lb. on the square inch, and some new-fangled plan has been introduced for "mixing-up" the water in the boilers by means of a fan, driven by a small supplementary engine. The general idea is, that when heat is applied to water a natural process of circulation goes on, which it is as impossible to prevent as it is unnecessary to stimulate; and if the boilers of the Polyphemus have been so ingeniously constructed and placed as in any degree to counteract this law of nature, surely this fact in itself indicates some want of skill in their designer; but however this may be, the necessity of reducing the pressure by no less than 55 lb. in brand-new boilers is a significant fact which cannot easily be got over. Supposing, however, that this difficulty be overcome, and that boilers of a different type give the necessary speed—some 18 or 19 knots—will the Polyphemus then be a success as regards her steaming powers? By no means, unless her coal capacity is at the same time very largely increased, for, with her present supply, she could only maintain her highest speed for 24 hours, which is equivalent to saying that she would be cleared out at the end of a single action, even though her bunkers were full when she steamed out to meet the foe, and could never venture on a second unless there should happen to be a coaling station close at hand. But perhaps it is intended that the Polyphemus should only fight under these conditions, —somewhat difficult ones, it must be admitted, to ensure. At present she cannot cruise, she cannot accompany a fleet, she can only remain in harbour, and dare not venture out, lest she should have to run from the enemy, and, while running, be burned-out and captured. A very pretty state of things, indeed; "entirely in accordance with the ideas of her designers," we suppose the Admiralty will still assert. Again, as regards her weapons of offence. Supposing the Whitehead torpedo to be in itself all that could be desired, what means has the Polyphemus of discharging it in such a manner that it will strike its intended victim? It can be discharged from five submerged tubes, one right ahead and two on either side, and the idea, presumably, is that as the vessel rushes at her utmost speed through the enemy's squadron she will be able to fire a couple of torpedoes from either side with deadly effect. All this sounds very well, but unluckily it cannot be carried out. The torpedoes, when discharged from the broadside tubes at any greater speed than nine or ten knots, refuse to go, or rather they go where they are not wanted, for they become twisted, and may, by good luck, go to the bottom—as two have recently done in the Solent—but it is quite possible that they may pursue a circular course and, running a muck among the British squadron, finally return to blow the Polyphemus herself out of the water. They may also hang in the tube and explode alongside, thus sinking the Polyphemus, instead of her enemy. The bow tube would also be useless under such circumstances, as the torpedo would obviously be over-run before it could get clear of the stem, when the Polyphemus would be hoisted by her own petard. In order, then, to discharge her Whitehead torpedoes with effect, the speed of the ship must be reduced to that of a slow ironclad, with the almost inevitable result that the Polyphemus would be speedily disabled, if not sunk, by the guns or rams of her opponents, or possibly by one of the very weapons which she is herself supposed to employ to such good purpose; unless, indeed, her somewhat problematical powers of flight should judiciously be called into requisition in good time, and prove equal to the occasion, in which case she might "live to fight another day." That this difficulty could not have been foreseen, it is very hard to believe. The experiments with the Actæon and Glatton, at moderate speeds, should have afforded sufficient warning; and, being foreseen, why was the construction of a costly vessel permitted, whose efficiency would depend entirely upon the successful application of this very plan? It is almost certain that the difficulty cannot be overcome; and the Captain of the Polyphemus is thus left to choose between fruitlessly throwing away his torpedoes or exposing his vessel to almost certain destruction, on the chance of launching them successfully. As regards the Whitehead torpedo itself, it is extremely doubtful whether it is a sufficiently reliable weapon to be made the sole means of offence for a vessel of the size of the Polyphemus. True, some wonderful shots are often made at practice, and enthusiasts are wont to exclaim that it will "do anything but speak." This phrase, however, admits of a certain amount of ambiguity in rendering, seeing that, of the eight or nine Whitehead torpedoes which have been fired in earnest, every one has, at the critical moment, been dumb. A good many others have been distinguished chiefly by their eccentricities; while one instance is on record in which a fish torpedo, impatient of delay, escaped from its crew on being placed in the port, and, burrowing with business-like determination, buried its sharp snout in the wooden bottom of a foreign man-of-war. It is also related—and it ought to be true—that the foreign Captain subsequently apologised for "being in the way!" With these facts in view, who will assert that the Whitehead torpedo, with its nice adjustments and liability to injury on the least approach to rough handling, can be relied upon to perform its task in the heat of action? With regard to her design, the Polyphemus presents, as need scarcely be mentioned, some very remarkable features, though what are the peculiar advantages which pertain to this form has never been satisfactorily explained. The disadvantages have often been demonstrated in our columns. High speed, combined with light draught, are important features, it might well be supposed, in a vessel of this kind, and must have presented themselves to her designer in that light; yet the Polyphemus cannot lay claim to any special advantages in respect of speed, her indicated horse-power per ton of displacement being considerably in excess of that in the Mercury, a vessel which has done 18½ knots for six consecutive hours. One of the most remarkable devices which has been adopted in this "hideous, misshapen monster" is that of ballasting her by means of a series of twelve iron blocks, placed in a recessed keel, and capable of being dropped singly at will, in the event of one or more compartments becoming waterlogged. A writer in *Iron*, describing the Polyphemus in 1879, says:—"The utmost effect of the dropping of the ballast will be to enable the vessel to float 12 to 14 inches lighter." A glance at the midship section will, however, convince most people that her stability would be endangered by such a proceeding to an extent which no filling of compartments could possibly compensate; the iron ballast, in fact, takes the place of the leaden keel on a modern yacht, and, without it, there are not a few who believe that the Polyphemus would display an alarming tendency to float —or sink—bottom up, as her form would naturally lead one to suppose. It would be interesting to know what are her maximum and vanishing angles of stability, both with and without the keel ballast. As to the ram, its value in a vessel of this description is a question which is certainly open to discussion; indeed, it has been asserted by high authorities that no vessel with a displacement under 3,500 tons or so could possibly be made an efficient ram, and there does not appear to be any sufficient reason for making an exception in favour of the Polyphemus, though her steel frames and cellular construction may do something for her. As regards accommodation, of course, where the "cigar" form is adopted, it must suffer accordingly, and if the counterbalancing advantages were apparent, this would not perhaps be a matter of very great moment. As it is, however, it only furnishes an additional reason why the Polyphemus should never have been built. Here, then, is a vessel —to sum up her peculiarities—intended to travel at a high rate of speed, which she can only attain, if at all, at the cost of a heavy expenditure of fuel, of which she carries a very limited supply; armed with a weapon of untried efficiency, which she cannot use to the best advantage, and of a form which combines an almost total absence of natural stability, with a deep draught of water, and many inconveniences of stowage; and this is the vessel which is forced upon the Navy as one of the requirements of modern Naval warfare. This, too, is the vessel Mr. Campbell-Bannerman has stated in the House of Commons to be no failure. And this is the "hideous, misshapen monster" we warned the Admiralty against constructing the moment her lines and dimensions were made known. We then said she would prove a failure. And a failure she has now been proved to be. The Admiralty endeavour to shift the blame to the shoulders of Sir George Sartorius, whose conception she is. But was not the Polyphemus designed in the Constructor's Department of the Admiralty, and was she not said to embody all the ideas of the gallant Admiral? Does she do so? We doubt it.

Reviews.

◆

Egypt. By Baron de Malortie. (William Ridgway.)

[CONCLUDING NOTICE.]

The reign of Mehemet Tewfik Pasha may be divided into three parts,—before, during, and after the crisis. Called to take his father's place under circumstances as painful to a son as to a true patriot, he resigned himself to the tutelage of England and France. Baron de Malortie points out very forcibly the immediate effects of our dualism in Egypt:—

> "Though apparently approving the Anglo-French Control, and willing to let the two Powers act as the delegates of Europe, it is sheer nonsense to suppose the other great Powers, especially Italy, would accept a position debarring them from all share in the Control. The Cabinets of Berlin and Vienna may not have looked on Egypt as a field for immediate and direct operation, but more as the arena whereothers would have to tilt. Prince Gortschakoff's well-known quotation, 'La Russie se recueille,' applies equally to Egypt. Russia plays a waiting game, and is in no hurry to precipitate matters. Italy, with the craving of all young Powers for extension, for colonies, for influence, felt more than any other the secondary position allotted her at Cairo. With undoubted immediate interests—for, next to the Greeks, she has the largest foreign colony in Egypt—the Dual Control was to her a fresh humiliation, after finding herself already thwarted at Tunis. It cannot, therefore, be doubted that from the first the agents of the other Powers welcomed with secret satisfaction any obstacles thrown in the way of England and France."

With such divergent interests, and with intrigues in every direction, the question naturally arose,—What was Tewfik to do? In the midst of all this imbroglio, this clashing of interests, England had not only given her consent, but had encouraged the Egyptian Ministers in their endeavours to equalise the position and charges of foreigners and natives; but France threw various difficulties in the way of those vital reforms, which had in Lord Granville a most earnest advocate. Having at some length dwelt upon these petty rivalries, with the object of explaining how and why the French Controller was forced by circumstances out of his legitimate and administrative groove, the author proceeds to examine into the origin of the military movement, and its later development into the so-called national agitation. Its first appearance on the political stage was in February 18, 1879, when 400 out of 2,500 ill-used officers made a demonstration against Nubar Pasha and Mr. Rivers Wilson into the Ministry of Finance, claiming their heavy arrears. Baron de Malortie justifies this movement, as a natural consequence of the flagrant wrongs inflicted on men whose bread was dependent on their profession, and who had no other means of keeping a family:—

> "What [he asks] would English officers say, if, without 24 hours' notice, they found themselves stripped of their well-earned half-pay, without bread for wife and children, if respectful petitions remained unnoticed, and if the only answer they could get would be, 'There is no money for you, it is all wanted for the *foreign contractors* of the Submarine Tunnel scheme?' I, for one, fully sympathise with the 2,500 Egyptian half-pay officers, who were not only deprived of the needful, but were additionally outraged by festivities given with the money of Egypt."

As soon as Ismail was no longer at the head of affairs to exact submission, three of the colonels in command of regiments, Arabi, Ali Fehmi, and Abdelal, started a systematic opposition to the War Office. The author protests against their conduct, as opposed to all notions of a disciplined army, inasmuch as they ignored their superior officers, and insisted upon transacting business direct with the War Office. After the commission of several acts of violence, the Khedive was forced to dismiss his Minister of War, and appoint Mahmoud Pasha Sami in his stead. Tranquillity was then restored, and on the following day the mutinous colonels were reinstated in their regiments, and made their submission to the Khedive. The author proceeds to show how from that day forth the influence of the Army went on increasing, and how its increased ascendancy showed itself in a practical shape. In September, 1881, the want of a good understanding between the Khedive and his advisers had strengthened the hands of the Colonels, and matters were drawn to a crisis on the 10th of that month, when the disorganisation and want of discipline in the Army had assumed increased proportions. The Colonels, seizing their opportunity, made fresh demands, and the Khedive again yielded, Cheriff Pasha consenting to reassume office at the instance of the Notables. In writing of this *émeute*, Baron de Malortie considers that Lord Granville did not pay sufficient attention to it, whereas it should have been regarded as one of the most important phases of the Egyptian crisis. He thus describes the events of that day:—

> "There was not much of a Cromwell in Arabi, when he stood, pale and trembling, before Tewfik in Abdin Square; not much of a fearless tribune, when he sheathed his sword at 'Effendina's' bidding; and had Tewfik followed the spirited and manly advice of Mr. Colvin, had he arrested Arabi *conspicuo omnium*, or cut him down, as it was his right, there would have been an end of all mutinies, and one hardly dares to think what might not have been spared to us all. It was only by yielding needlessly, at a moment when he might have reconquered his lost prestige by a bold move, that he raised the rebel Colonel on a popular pedestal."

Having briefly discussed the current events of the time, social as well as political, and introduced a very interesting personal sketch of Mehemet Tewfik, Baron de Malortie takes us down to the crucial moment, when the despatch of the Fleets had become an accomplished fact. Great excitement existed, and the very men who only a few days before had threatened the Khedive with abdication, and even with death, were now prostrate before him, seeking his advice, and bargaining for advantageous conditions for themselves, regardless of their unfortunate subordinates. When, however, the news reached Cairo that there were *not* 20 ironclads, that there were *no* Turkish ships, and that the Sultan was ever protesting against an Anglo-French naval demonstration, a change came o'er the spirit of their dreams, and they lost not a moment in altering their attitudes. At this portion of his narrative, the author devotes many pages to an exhaustive description of the events which marked this eventful crisis. In perusing it, no reader can fail to find deep interest, and at the same time to derive sound information on all important matters connected with the strange campaign which has been recently concluded in Egypt. In bringing his observations to a conclusion, Baron de Malortie forecasts the future of Egypt in these emphatic words:—

> "As long as the international highway to India is not endangered, Egypt must be allowed to manage her own affairs. Nay, when there is no longer the fear of a recurrence of a military dictatorship, England will take care that there is an end also to foreign interference. This mission she will accomplish, for her faith is large in time, and that which shapes it to some perfect end."

Six Months in the Ranks; or, the Gentleman-Private. New edition. (Smith, Elder, and Co.)—Since fashion, recklessness, or necessity has induced so many young men of education and position to seek their fortunes among the rank and file of the British Army, many books, varying in interest and merit, have been written on the subject of the daily life of the English soldier. The present one may be regarded in two aspects. As a series of pictures of military life, it is well and smartly written; but its realism and truth are much marred by the importation into the narrative of amorous tobacconists and scoundrel sons of Peers, which give it in parts the appearance of a weak melodramatic novel. The writer's experience of the Artillery officer, too, must have been either very unfortunate or fallacious, for no one who is acquainted with the *personnel* of our Scientific Corps can imagine the commander of a depôt knowing nothing of his men, devoted exclusively to cricket as a hobby, and assisted by officers whose one thought appears to have been the most slovenly and perfunctory performance possible of very easy work. At the same time, the merits of the book are considerable, and the author has certainly hit the right nail on the head in his criticisms on the modern recruiting system, and its numerous blots, which, by the direct encouragement of desertion and re-enlistment, go far to make the Army a hunting-ground for some of the worst vagabonds of the country. The system of stoppages also is vigorously attacked, and there is doubtless a great deal of truth in the assertion that the annoyance and irritation caused by them are a pregnant cause of the more serious military offences.

The February number of *The Railway Engineer* is rendered exceptionally interesting by an article on "The Channel Tunnel," which has been prepared with evident care, and will serve well to explain to unprofessional as well as other readers some facts connected with this important undertaking. It may be considered premature to approach a subject which is at the moment under the consideration of a Parliamentary Committee, but the writer of the article in question fully explains the circumstances which he considers justify him in departing from the usual course. We strongly recommend both sides, the Tunnelers and the non-Tunnelers, to read this article attentively, inasmuch as it will afford them, independently of what opinions they may individually entertain on the subject, a good deal of useful information as to the nature of the project, as well as to the position it occupies at the present time. There are several other useful articles in the current number of *The Railway Engineer.*

The philosophy of advertising is a subject which will command the attention of mercantile men, particularly at a moment when the "circular" worry has invaded our offices and houses. The treatise now published by Mr. Henry Sell (167 Fleet Street), whose *Newspaper Register* presents some interesting facts connected with the establishment and progress of the leading London journals, is full of useful matter, well calculated to initiate the reader into the mysteries of "advertising."

Messrs. F. May and Co. (159 Piccadilly) have published a new number of *The British and Irish Press Guide*, which also serves as a dictionary and handbook for advertisers. There is no occasion to mention in detail the numerous advantages it offers to the public, as they must long since have become universally known. We may, however, say that some novelty is introduced each year, which lends the publication additional value.

THE ARMY MEDICAL SCHOOL, NETLEY.

The winter session (the 45th) of the Army Medical School at Netley was brought to a close on Monday, when the prizes were delivered to the successful students by Sir Ralph W. Thompson, K.C.B., Permanent Under-Secretary of State for War. Dr. Longmore read the following correspondence which had passed between the several departments relative to the examinations and their results:—

Marks gained by Surgeons on probation in the Medical Department of the British Army at the close of the Netley examination. The order of position of these gentlemen is not affected by marks they have gained at the Netley examination, February, 1883:—

	Netley Marks.		Netley Marks.
1. *W. G. Macpherson	2,951	9. J. R. Stuart	1,868
2. R. J. Shaw Simpson	2,897	10. Th. Ricketts-Morse	1,974
3. F. W. Reid	2,220	11. W. B. C. Deeble	2,030
4. E. V. A. Phipps	2,425	12. J. M. Prendergast	1,488
5. V. E. Hunter	1,820	13. R. P. Bond	2,049
6. A. Baird	2,130	14. G. T. H. Thomas	2,045
7. T. O. H. Hamilton	2,147	15. G. M. H. Colman	1,793
8. D. Semple	2,260		

* Gained the Montefiore Medal and a prize in Pathology.

INDIAN MEDICAL SERVICE.

List of Surgeons on probation in her Majesty's Indian Medical Service who were successful at both the London and Netley examinations. The final positions of these gentlemen are determined by the marks gained in London added to those gained at Netley, and the combined numbers are accordingly shown in the list which follows (Feb. 1883):—

	Combined Marks.		Combined Marks.
1. *A. W. D. Leahy	5,798	5. J. Crimmin	4,637
2. †W. W. Webb	5,420	6. R. E. S. Davis	4,592
3. ‡R. R. Weir	5,418	7. H. K. Fuller	4,563
4. W. H. Burke	4,924	8. W. H. Neilson	4,505

* Gained the Herbert Prize and the Montefiore second Prize.
† Gained the Martin Memorial Gold Medal and a prize in Pathology
‡ Gained the Parkes Memorial Bronze Medal.

Sir Ralph Thompson then handed the prizes to the successful students, and very briefly addressed the young students, whom he complimented highly on the creditable manner in which they had acquitted themselves in the competition, which, he need hardly tell them, was now one of a very severe character. Referring in a few words to Lord Morley's Committee of Inquiry into the Organisation of the Army Medical Department, he said that all the evidence given went to show that the medical officers individually had done all that could be desired of them, and they deserved great praise. It was by no means an inquiry into conduct, but simply into organisation, and it was a right thing that the Medical Department should take stock, as it were, of every experience gained in successive wars, so as to continually be improving for future efforts. The very fact of such an inquiry of itself showed the importance of efficient medical organisation in reference either to armies in the field or on home service.

A special meeting of the members of the Committee, under the presidency of Lord Morley, for the Organisation of Hospitals in the Field and Army Hospital Corps, was held on Tuesday in the Board-room of the Army Medical Department at Aldershot, when all the commanding officers of regiments and corps in the garrison will be examined.

Under the authority of her Majesty's Government, it is notified that officers of the Staff Corps and Indian Armies will be allowed to compete for entrance to the Staff College, Sandhurst, under the regulations laid down in Part I., Section 9, of the Queen's Regulations and Orders for the Army, provided that they shall have completed five years' service in all, exclusive of all furlough or leave of absence except privilege leave.

It has been ruled that British officers serving with native cavalry regiments may be attached to a regiment of British cavalry for the purpose of undergoing a course of instruction in equitation. Should there be no British cavalry regiment at the station where the officer is serving, he may be sent, at his own expense, to the nearest station where a riding-school is available. Full staff salary will be passed for a period of four months, provided no extra expense will be thereby caused to the State.

HOW TO AVOID THE INJURIOUS EFFECTS OF STIMULANTS.—The present system of living—partaking of too rich foods, as pastry, saccharine and fatty substances, alcoholic drinks, and an insufficient amount of exercise—frequently deranges the liver. I would advise all bilious people, unless they are careful to keep the liver acting freely, to exercise great care in the use of alcoholic drinks, avoid sugar, and always dilute largely with water. Experience shows that porter, mild ales, port wine, dark sherries, sweet champagne, liqueurs, and brandies, are all very apt to disagree; while light white wines, and gin or old whisky largely diluted with soda water, will be found the least objectionable. ENO'S FRUIT SALT is peculiarly adapted for any constitutional weakness of the liver; it possesses the powers of reparation when digestion has been disturbed or lost, and places the invalid on the right track to health. A world of woes is avoided by those who keep and use ENO'S FRUIT SALT, therefore no family should ever be without it. CAUTION.—Legal Rights are protected in every Civilised Country. Examine each bottle, and see the Capsule is marked "ENO'S FRUIT SALT." Without it, you have been imposed on by worthless imitations. Sold by all Chemists, price 2s 9d and 4s 6d. Directions, in Sixteen Languages, how to Prevent Disease. Prepared only at ENO'S Fruit Salt Works, Hatcham, London, S.E., by J. C. ENO'S Patent.

COLLISION BETWEEN H.M.S. FLY AND THE AMERICAN SHIP SEA WITCH.

H.M.S. Fly, Com. John Hope, has been run into by an American merchant ship, named the Sea Witch, when about 200 miles from Singapore. The Fly was under steam and the Sea Witch under all plain sail, close-hauled, with a very light wind blowing at the time. The senior lieutenant was on watch, when, at 4.40 a.m., on Oct. 30, the collision took place, the Sea Witch striking the Fly abaft the main rigging. The side of the Fly was stove in above the water-line, her foreyard was carried away, as well as much gear, and eleven of her iron frames were much bent. The Sea Witch carried away her own bowsprit and damaged her bows considerably. Capt. Hope at once took the merchant vessel in tow, and brought her into Singapore, but as there was some difficulty found there in regard to making good the necessary repairs, the Fly was ordered to Hong Kong, where she arrived on Dec. 8. The dockyard at once took her in hand, and it was expected when the mail left on Christmas Day, that she would be ready for sea again about the end of January. The repairs will cost about £800. The authorities in Singapore declined to interfere in regard to the question of damages, on the ground of the Sea Witch being a foreign ship, and of the collision having taken place in the high seas, none of the courts there were held to have jurisdiction in the matter. It was therefore decided by all concerned to go to arbitration, when both ships were found to have been in the wrong, and the Admiralty were condemned in damages and costs. It appears from the accounts we have received of this affair that the decision of the arbitrators was most one-sided, and that the arbitrator appointed on behalf of the Admiralty to assist the harbourmaster acted more as counsel for the American ship than on behalf of the Fly. On the other hand, the masters of the American merchant service, who acted for their compatriot as arbitrators, behaved in a most straightforward and honourable manner throughout. By order of Admiral Willes, a court-martial subsequently assembled at Hong Kong on Thursday, Dec. 21, to try Lieut. Knowling on a charge of "by default hazarding H.M.S. Fly." The court found the charge proved, and sentenced him to be reprimanded. It is hoped on board the Fly and at Hong Kong that this will in no manner be allowed to injure the prospects of this officer in the service, as, taking all the circumstances of the case into consideration, the Hong Kong *Daily Press* considers that the American ship was most to blame. By all accounts, Lieut. Knowling is a most promising, zealous, and energetic young officer, and we think a court of inquiry would have been a fairer mode of investigating the case than the one adopted, as then the officers composing the court could have more fully expressed their opinions in their finding, stating how far they considered the officer of the watch to blame, whereas in a court-martial such a charge could only be proved or disproved. The general opinion in Hong Kong is that, had the case been tried in an Admiralty court instead of by arbitrators, the Fly would have been cleared of all blame, as the evidence all went to prove the American ship to have been in the wrong when she put her helm down and luffed right up into the Fly. We believe the arbitrators and the court-martial considered Lieut. Knowling to blame for having attempted to cross a sailing ship's bows when he could just as easily have passed under her stern, the Fly being at the time under steam. Com. Hope was exonerated of all blame.

MILITIA TRAININGS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—I observe, under the title of "Militia Training," a letter from a correspondent signing himself "Dee." As an old supporter of your journal, I trust you will allow me a little space to reply. I am not aware what experience your correspondent has had, but of the Artillery Militia he, by his statements, certainly appears to know very little. After an experience of some twelve years, of which about some two have been spent with the Regular Forces, after hearing the reports and opinions of inspectors of Auxiliary Artillery with whom I have served, and after seeing several regiments, I am pleased to be able to state that the Artillery Militia as a force is certainly one of, if not the most, efficient branches of the Auxiliary Forces. This curious picture of the instructor of artillery, and the regiment mentioned by your correspondent, is, I am certain "singular." I do not doubt that this case exists. The remedy is simple. Let the colonel remove the man. I have no doubt there is some other officer very anxious to take his place, and to do his work thoroughly. Because one man is bad, it is no reason for justification for charging all men with being so. When these appointments were raised in 1875, the regulations prior to being allowed to proceed to Shoeburyness to qualify for them were strict. No officer who was not already well up in drill, and showed a special aptitude for instructing others, and was likely to carry out the duties satisfactorily, was to be recommended to the War Office to attend the School of Gunnery. The War Office made their selection from the reports on the candidates sent up to them. Only six were allowed to attend at one time; two from each country. The course of instruction was such that if an officer took any interest in his work, he should be thoroughly up to his duties, the instruction being the same as given to officers of the R.A. in the short course, with a portion of that given to the long course, and some special additions suited to the requirements of an instructor. This course included drill of every description, from the 9-pounder to the 12-inch, from elementary repository to erecting 60-ft. sheers and using the box-beam; it was comprehensive enough, and several officers were perfectly acquainted with the whole of it. Officers who passed the examination were granted first-class certificates, and these only were qualifications for the post of instructor of artillery. The question of men passing being suitable as instructors should be carefully considered. Three essentials are necessary,—a thorough knowledge of the drill, devotion to it, and patience. It is the same in all professions,—a man may pass high in the work, but a lack of some other quality may prevent him shining. Instructors are frequently appointed too young; they have not ballast, as I may term it, for their position; they think more of the spurs, &c., which are useless to them, and their guns than they do of their work, but the gilt soon wears off the gingerbread, and they improve as they get older. That some instructors of gunnery exist who now know little and do less, I do not doubt, but this is the case in all employments. Examinations once passed, the result obtained, little trouble is taken to keep the work up. Men become slack if not kept up to it by a love of it, or being stirred up by their superiors. If a colonel sees his instructor of gunnery is not up to his work, he should tell him of it, and require him to improve or give it up. Man is the same in all states of life; it is natural, I think, with him to do no more than he is obliged to. I know regiments in which the instructor of artillery has no easy time. I quote the work of one,—7 to 8 a.m., instruction to non-commissioned officers; 10 to 12, 2 to 4, gun and repository drill. Frequently, the practice is compelled to take place as early as 7 a.m., and not terminate till about 7 p.m. The practice-ground was at one time four miles from head-quarters; the instructor of gunnery had to walk it, no horse allowance; this for six days, and, in addition, did his tour of duty. This is, I believe, not at all an isolated case. The question of the efficiency of instructors of gunnery should be insured by the officers inspecting. Some do, others do not, but take it for granted. I know a case in which, after all the officers had been through their work, the instructor of gunnery was required to go through the whole gun and mortar drill carried out by the regiment, did five different shifts, and was asked to explain portions of the ammunition, and the care of magazines. If this style of test was made at every inspection, your correspondent would see no reason to complain of the instructors of artillery, and such a man as he mentions would cease to exist. That some Artillery regiments do too little gun-drill is, I am sorry to say, a fact. But why? Because the colonel does not like it. Artillery is not a drill to be done in brigade, but by detachments, and therefore they cannot exercise the same extensive command in the same way as they can at infantry drill. That artillery drill will be more practised in the future is certain, aad that the faults, as observed by your correspondent, will be removed, I am sure; and I trust that he will be able ere long to acknowledge that the state of affairs he pictured does not represent the true condition of a class of officers and a force which has hitherto earned a good reputation for its real, quiet, and unassuming efficiency. I must apologise for trespasing so far on your valuable space, but as you are always open to any remarks in support of those who merit it, I have ventured to exceed the usual limit.—I am, &c.,

Un Artilleur.

Sir,—Your correspondent, "One Who Knows," has misquoted my letter; I never mentioned adjutants at all, my remarks applied to instructors of artillery. So far from my being ignorant, and my remarks not being founded on fact, I may tell you that I am an old Linesman, am now in the Militia, and have been in more than one Militia regiment; and I must repeat that I consider a Militia training one of the greatest shams I know of. Setting-up drill in the Militia I have never seen. Musketry I certainly have seen; but it was a farce. At all events, it was not like the musketry I was taught at Hythe. If the form of attack to which "One Who Knows" refers is a Militia sham-fight, then I, too, have taken part in such an engagement, and it was a scene of disorderly confusion. I am looking forward to the authorities making a sweeping change in the constitution and training of the Militia; for if no such change is made, I would rather resign my commission than spend the short time of training in such unsoldierlike exercise, as, amongst others, that degrading and humiliating occupation of marching through the town for swagger purposes, in which I am every year forced to join. One small matter more, as a proof of the accurate knowledge of the "One Who Knows." If he will take the trouble to inquire, he will find that in artillery brigades the field-officers and adjutants wear the sabretache on all parades.—I am, &c.,

Dee.

THE ARMY MEDICAL DEPARTMENT.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—I am sure the great bulk of Army Doctors, like myself, must feel ever thankful to you for your continued attempts to curb down the disciples of the Aldershot school, who have apparently preferred to subordinate the professional part of their duties to what they delight to consider more important, viz., the military command, uniform, spurs, drill, sword exercise, &c. This "combatant fever" is highly infectious, and like cholera, capable of importation. And I regret to observe that its importation into India is beginning to bear evil fruit. You, perhaps, know that in India the deputy-surgeon-generalships are equally divided between the two services (Indian Medical Service and the Army Medical Department), and that it is most distasteful and revolting to the former service members, who are regimental officers (each native regiment having its own doctor) to receive from them what some deputy-surgeon-generals of the Army Medical Department are pleased to call "department orders" (trying to ape regimental, brigade, and division orders). In these orders, the wearing of uniform in the hospitals is promulgated, as if that would render a man a better physician, surgeon, or accoucheur. All this sort of thing is very disgusting, to men of the Indian Medical Service, more particularly. This sort of thing is one of the curses which drive the best men from military to civil appointments, where military uniform may be laid aside for good, except for State occasions, such as levées. Now, every one knows well that uniform is in the way, for a physician cannot very well stoop down to examine the chest with tight jacket, trousers with straps thereto, spurs, nor can a surgeon perform comfortably a surgical operation when dressed up as a dragoon. In India, the doctor generally likes to take a little drive, or walk, or ride, before going to the hospital, for the sake of preserving his health; and now, owing to Aldershot-school doctrines, he cannot.—I am, &c.,

A Disgusted Army Doctor.

Sir,—As you have so strenuously advocated the attaching of Medical officers to regiments as of yore, and as your advocacy has earned the thanks of hundreds of Medical officers who cannot, by regulations, publicly acknowledge the same, and as the experience of the last campaign urgently demonstrated the fact as to the necessity for the same, let me appeal to my brother officers to frankly and honestly yield to what would now be so palpably to the true interest and welfare of the service. That the appointment to a regiment, battery, or detachment of a senior medical officer would be an advantage, was clearly shown in the case of the Duke of Cornwall's Light Infantry, when the commanding officer was able—to the astonishment of the Divisional General—to march on Kassassin, 670 strong, producing, as his proof, the certificate of the medical officer as to their "being fit." On inquiry at the office at Ismailia, although there was a large force detained there, awaiting transport, &c., consisting of the 19th Hussars, two batteries of Artillery, Sappers, and the 63rd Regt., their sick were all treated by their respective medical officers. That such a charge should be given to experienced officers, there can be no doubt, as in those cases at the front, from whence so many unnecessary cases were sent, it was found to be principally by the young medical officers, inexperienced; and besides which, he cannot, from his limited knowledge of the service, be of that assistance to the commanding officer, who, naturally, has frequently to seek support from his medical adviser. If you will look over the Medical Blue-books, 1879 and 1880, you will find in both the Transvaal and Zulu Wars how meritoriously the medical officers posted to regiments behaved; and thoroughly able they were to cope with their respective charges. But how was this done? Simply from the fact that Surg.-Gen. Woolfryes had to split up a field hospital into eight segments, each segment, so to say, a regimental hospital. Surg.-Gen. Holloway, in the Transvaal, was driven to do the same, each detachment having its medical officer and field equipment; while the Director-General, in his most praiseworthy report of the Afghan War, says,—"Each field hospital was divided into sections, corresponding with the several brigades, and so equipped as to accompany each brigade to which it was attached. These sections were again to be sub-divided into sub-sections, for the purpose of affording aid to small parties of troops" (or, in other words, to regiments). Now, Sir, with all these facts before us, the experience of all our wars, which are small wars—Abyssinia, Ashantee, Persia, &c.—have we not had experience enough? Will it not be admitted that the officer commanding a regiment and his medical officer, when ordered out on service, would be prepared with all their requirements? Would not the one consult the other as to this and that, and would not their united exertions and responsibilities be a sufficient guarantee of success? Would not the stores, equipment, and requirements embark with them, and would the commissariat officer and medical officer dare to march without them, on landing at any given point? The order would then be given, such or such a regiment to sail or march with its equipment, and we should not have ships with fifty doctors on board, and Staff and stores all left behind, as was done with the Carthage and Courland. How was it Drs. Faught, Harvey, Beattee, Fergusson, &c., were able to land at Ismailia with the Indian Force, as fit as possible, with all their stores? Who can deny that they were not ten times as efficient as we were? What regiments are there who always most willingly furnish every aid to a medical officer? "The bandsmen of the 58th and 3rd, 60th Rifles, were practised in stretcher-drill," says Surg.-Gen. Holloway, while Sir Charles Pearson says "he had cooking taught in his regiment." What could be better? Further, we are told that when the 3rd, 60th Rifles, were not engaged, although under fire, the medical officer assisted the medical officer of the 58th, who were engaged, and this would always happen on returning to the appointment of officers to regiments. We have far too practical and clever a man in our new Director-General, that it is, I am sure, quite unnecessary for me to point out these advantages; but it is for us to unanimously support with cheerfulness the efforts it is believed he is making for the good of the service. The comments made by Surg.-Major Corban, I regret, are much out of place regarding the breaking of the soldier's tooth over eating biscuit, and the advisability of white bread being issued. We know all that, the issue of the drachm might in some men's views have been an advantage, but to my mind where dysentery and dysenteric symptoms were prevailing, I imagine they were better without it, particularly so in those cases where "head symptoms" showed themselves. The carrying of bullet forceps, &c., on a newly arranged belt, would not be acceptable or necessary, but the equipping of panniers, and detention of trivial cases in a regiment, I do advocate.—I am, &c.,

Active Service.

A THRIFTY CORPORAL.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—It may interest some of your readers to know that the next-of-kin of Corpl. D. McCristol are entitled to £518 18s. 4d. This is the largest "Unclaimed Soldiers' Balance" recorded since the passing of the Regimental Debts Act, 1863. May I ask your powerful aid towards obtaining newspaper publicity, instead of *London Gazette* publicity, for news of this very valuable kind? I wonder how many soldiers' widows and orphans consult the official journal for news of a "windfall." Few, if any, judging by the amount of the annual "Crown windfall," from these unclaimed balances.—I am, &c.,

Edward Preston,
(Author of "Unclaimed Money.")
1 Great College Street, Westminster, Feb. 3.

Memorial Brasses.—Messrs. John Hardman and Co., who pay special attention to Military Brasses, have lately executed for her Majesty the Queen several important works for St. George's Chapel, Windsor. Designs are prepared for approval, with estimate of cost.—Offices, 13 King William Street, Charing Cross.

Tuesday's Gazette.

◆

ARMY.

WAR OFFICE, PALL MALL, February 6, 1883.

5th Dragoon Guards—Lieut. J. A. Whitla, from the Royal Inniskilling Fusiliers, to be Lieut., vice W. G. H. Stirling, transferred to the 6th Dragoon Guards.

Grenadier Guards—Lieut. C. G. E. J. Manners, from the Royal Warwickshire Regt., to be Lieut., vice J. F. Bagot, seconded.

LINE BATTALIONS.

The Royal Fusiliers (City of London Regiment)—Lieut. A. H. Daunt is placed on temporary half-pay on account of ill-health.

The King's (Liverpool Regiment)—Capt. E. Hanstock has been seconded for service as a probationer for the Army Pay Department (Jan. 30).

The Norfolk Regiment—The second Christian name of Lieut. W. H. Besant is "Hervey," and not "Henry," as hitherto stated.

The Suffolk Regiment—Lieut.-Col. H. P. Pearson has been appointed to command a Batn.; Major H. M. Lowry to be Lieut.-Col., vice Col. G. F. Walker, placed on half-pay (both dated Sept. 7, 1882). The promotion to the rank of Major of Capt. J. C. R. Glasgow is antedated to Sept. 7, 1882, in succession to H. M. Lowry. Capt. O. Williams to be Major, vice C. Hely, whose promotion has been cancelled (Oct. 11, 1882).

The Prince Albert's (Somersetshire Light Infantry)—Qrmr.-Serjt. Edward George Lee to be Qrmr., vice R. Matheson, posted to the 3rd Batn.

The Bedfordshire Regiment—Qrmr., with the hon. and relative rank of Capt., D. McCartney retires on retired pay, with the hon. rank of Major.

The Cheshire Regiment—Lieut.-Col. and Col. H. E. Watson retires on full-pay, with the hon. rank of Major-Gen.; Lieut. A. L. Ussher is placed on temporary half-pay, on account of ill-health.

The King's Own Borderers—Lieut. A. C. P. Haggard to be Capt., vice F. H. T. Curtis, retired (Jan. 31).

The East Lancashire Regiment—Lieut. M. W. Battye, Adjt., to be Capt., vice J. Stoyte, promoted (Jan. 8).

The Duke of Cornwall's Light Infantry—Capt. L. B. Beaumont retires from the service, receiving a gratuity, with permission to retain his rank and wear the prescribed uniform.

The Duke of Wellington's (West Riding Regiment)—Lieut. W. Seton to be Capt., vice Brevet Major H. Burton, retired (Jan. 1).

The Northamptonshire Regiment—Lieut. H. C. Pritchard, from the 2nd West India Regt., to be Lieut., vice A. Bowers, who exchanges.

The Princess Charlotte of Wales's (Berkshire Regiment)—Capt. T. Harris to be Major, vice T. Murphy, retired (Jan. 8).

The King's Own Light Infantry (South Yorkshire Regiment)—Lieut. M. W. Bayly resigns his commission.

The Highland Light Infantry—Serjt.-Major Thomas Litster to be Qrmr., vice D. Swanson, retired.

The Royal Irish Rifles—Lieut. the Hon. A. F. G. Hay, from half-pay, to be Lieut., vice M. A. Tighe, appointed a probationer for the S.C.

Princess Louise's (Argyll and Sutherland Highlanders)—Capt. W. Prevost to be Major, vice G. L. O'Sullivan, seconded (Dec. 15, 1882).

The Rifle Brigade (The Prince Consort's Own)—Supernumerary Capt. H. J. Fergusson to be Capt., vice W. T. Peacocke, resigned (Jan. 10).

2nd West India Regiment—Lieut. A. Bowers, from the Northamptonshire Regt., to be Lieut., vice H. C. Pritchard, who exchanges.

Staff—Col. A. H. W. Williams, R.A., to be Col. on the Staff, to command the Royal Artillery at Aldershot, vice W. E. M. Reilly, C.B., R.A., who has vacated that appointment (Feb. 1); Lieut. J. F. Bagot, Grenadier Guards, to be Aide-de-Camp to the Right Hon. the Marquis of Lorne, Kt., G.C.M.G., Governor-General of the Dominion of Canada (Nov. 1, 1882).

Chaplains' Department—The Rev. P. F. Raymond, M.A., to be Chaplain to the Forces of the Fourth Class (dated Jan. 4, 1882, such antedate not to reckon towards promotion, precedence, or increase of pay prior to Jan. 8, 1882, and not to carry any back allowances).

Medical Department—Surg.-Major R. Turner, M.D., from half-pay, to be Surg.-Major, vice A. R. Hudson, M.B., granted retired pay (Jan. 16).

Army Hospital Corps—Lieut. of Orderlies H. Copping to be Qrmr. (dated July 1, 1881, such antedate not to carry back pay as Qrmr. prior to Jan. 16).

BREVET.

The promotion of Major J. A. Armstrong, Royal (late Bengal) Engineers, to the rank of Lieut.-Col., for service in Egypt, which was notified in the *Gazette* of Nov. 17, 1882, is cancelled, his name having been erroneously included, as he was not present in that campaign.

MEMORANDUM.

The under-mentioned Lieut.-Cols. of the Bengal S.C. to be Cols.:—W. G. Waterfield, C.S.I. (Oct. 3, 1882); F. P. Luard (Oct. 12, 1882).

RESERVE OF OFFICERS.

Capt. J. F. Mackay, Edinburgh (City) Artillery V.C., to be Lieut.

MILITIA.

WAR OFFICE, PALL MALL, February 6, 1883.

ROYAL ARTILLERY.

2nd Brigade, Scottish Division—Lieut. C. J. H. Hogg resigns his commission.

INFANTRY.

3rd Battalion, the Royal Scots (Lothian Regiment)—Capt. S. B. Moore, 2nd Batn., to be Adjt., in succession to Major R. C. Dudgeon, who has been placed on a retired allowance (Jan. 26).

3rd Battalion, the Queen's (Royal West Surrey Regiment)—Walter Martineau, gent., to be Lieut.

3rd Battalion, the Northumberland Fusiliers—Capt. and Brevet Major H. Kilgour, 1st Batn., to be Adjt., in succession to Major J. L. Vincent, whose period of service in that appointment is about to expire (Feb. 15).

3rd Battalion, the Norfolk Regiment—Capt. J. Campbell resigns his commission.

3rd Battalion, the Devonshire Regiment—Lieut. W. A. S. J. Graham resigns his commission; John Maunder Gill, gent., to be Lieut.

4th Battalion, the Devonshire Regiment—Lieut. E. F. John, Viscount Exmouth, resigns his commission.

3rd Battalion, the Suffolk Regiment—Lieut. R. B. Graham to be Capt.

3rd Battalion, the Prince Albert's (Somersetshire Light Infantry)—Lieut. B. S. P. Tomlin resigns his commission.

3rd Battalion, the Prince of Wales's Own (West Yorkshire Regiment)—Capt. W. G. F. Cockburn, retired pay, to be Capt.

3rd Battalion, the Leicestershire Regiment—Walter John Need, gent., to be Lieut.

4th Battalion, the Royal Irish Regiment—Lieut. A. G. Lloyd resigns his commission.

3rd Battalion, the Princess of Wales's Own (Yorkshire Regiment)—Major W. E. Cadman is granted the hon. rank of Lieut.-Col.

3rd Battalion, the Lancashire Fusiliers—Lieut. R. Cohen resigns his commission.

3rd Battalion, the Royal Welsh Fusiliers—Charles Willding-Jones, gent., to be Lieut,

3rd Battalion, the Gloucestershire Regiment—Lieut. K. O. Burne resigns his commission.

3rd Battalion, the Duke of Wellington's (West Riding Regiment)—Lieut. A. R. Birdwood resigns his commission.

4th Battalion, the Essex Regiment—Cecil Hodgson Colvin, gent., to be Lieut.

3rd Battalion, the Queen's Own (Royal West Kent Regiment)—E. J. Wingfield-Stratford, Esq., late Ensign and Lieut. Scots Fusilier Guards, to be Capt. (Feb. 7).

4th Battalion, the Queen's Own (Royal West Kent Regiment)—Lieut. E. N. Curteis resigns his commission.

3rd Battalion, the Duke of Edinburgh's (Wiltshire Regiment)—Lieut. A. W. Gordon resigns his commission.

3rd Battalion, the Prince of Wales's (North Staffordshire Regiment)—Lieut. G. W. H. Tudor to be Capt.

3rd Battalion, the Gordon Highlanders—Capt. and Hon. Major C. L. Hay to be Major; Lieut. H. W. K. Erskine to be Capt.

2nd Battalion, the Queen's Own Cameron Highlanders—Lieut. C. Marjoribanks resigns his commission.

3rd Battalion, the Royal Irish Rifles—The under-mentioned Lieuts. resign their commissions:—W. B. Bowyer-Smijth and P. Finlay.

YEOMANRY CAVALRY.

WAR OFFICE, PALL MALL, February 6, 1883.

Leicestershire—George Richard Penn, Viscount Curzon, to be Lieut. (supernumerary).

East Lothian—Lieut. A. Houston-Boswall resigns his commission.

Staffordshire—Edward Challinor, gent., to be Lieut.

VOLUNTEERS.

WAR OFFICE, PALL MALL, February 6, 1883.

ARTILLERY.

1st Caithness—Lieut. W. Ross resigns his commission.

1st Cinque Ports—Lieut. W. A. G. Taylor resigns his commission.

RIFLE.

2nd Ayrshire—Lieut. T. Gemmell to be Capt.

5th Cheshire—Lieut. D. Gibb resigns his commission.

2nd Derbyshire—The under-mentioned Lieuts. resign their commissions:—W. D. Glossop and H. R. P. Lomas.

1st Edinburgh (the Queen's City of Edinburgh Rifle Volunteer Brigade)—The under-mentioned gentlemen to be Lieuts. (supernumerary):—Archibald Anderson and George Balfour Marshall.

1st Fifeshire—James Dall Connel, gent., to be Lieut.

1st Forfar (Dundee)—Lieut. J. Fleming to be Capt.

2nd Forfar (Forfarshire or Angus)—Lieut. A. Dickson to be Capt.

Galloway—Lieut. J. B. Anderson resigns his commission.

4th Lanarkshire (Glasgow 1st Northern)—The under-mentioned gentlemen to be Lieuts.:—John Muir Playfair and Daniel Lusk Young.

5th Lanarkshire (Glasgow 2nd Northern)—The under-mentioned Capts. resign their commissions:—R. Reid and A. R. Rae.

6th Lanarkshire—The under-mentioned officers resign their commissions:—Capt. R. L. Brown and Lieut. P. Kemp.

19th Lancashire (Liverpool Press Guard)—Capt. C. E. Paynter resigns his commission.

2nd London—Lieut. W. L. Beauchamp resigns his commission.

10th Middlesex—Capt. G. B. Longstaff resigns his commission.

11th Middlesex (Railway)—Lieut. J. Lewis resigns his commission.

15th Middlesex (the Customs and the Docks)—Capt. and Hon. Major T. H. Sheppy resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement. Capt. R. Adams resigns his commission.

1st Midlothian (Leith)—James Scott, gent., to be Lieut.

3rd Monmouthshire—Lieut. F. M. B. Ashwin resigns his commission; Hon. Assist.-Surg. R. Smythe to be Surg.; Acting Chaplain the Rev. J. Wilson resigns his appointment.

1st Northamptonshire—Hon. Assist.-Surg. R. W. Watkin resigns his commission; Acting Chaplain the Rev. C. Daymond, M.A., resigns his appointment.

1st Pembrokeshire—Capt. F. E. Trower, 2nd Batn. the Derbyshire Regt., to be Adjt., in succession to Major J. H. S. Seagram, whose period of service in that appointment has expired (Jan. 19).

1st Perthshire—Major J. M'Nab to be Lieut.-Col. (Jan. 10).

2nd Perthshire (Highland)—Acting Chaplain the Rev. J. A. Honey resigns his appointment.

2nd Renfrewshire—Thomas Andrew Dickson, gent., to be Acting Surg.

1st Volunteer Battalion, the Prince Albert's (Somersetshire Light Infantry)—Acting Surg. R. J. H. Scott to be Surg.

1st Volunteer Battalion, the Prince of Wales's (North Staffordshire Regiment)—Lieut. W. E. Stamer resigns his commission.

1st West Riding of Yorkshire—The promotion of Capt. R. B. Parker to that rank, notified in the *London Gazette* of Oct. 20, 1882, is postdated to Nov. 2, 1882.

3rd West Riding of Yorkshire—Capt. E. E. S. Schuyler, 1st Batn. the Prince of Wales's Own (West Yorkshire Regt.), to be Adjt., in succession to Major L. G. Brooke, Connaught Rangers, transferred to the Adjutancy of the 4th Batn. Princess Victoria's (Royal Irish Fusiliers) (Jan. 1).

3rd Volunteer Battalion, the Duke of Wellington's (West Riding Regiment)—Capt. E. P. Arnold-Forster to be Major.

MEMORANDUM.

Her Majesty having been graciously pleased to approve of the 1st Surrey Artillery Volunteer Corps being amalgamated with the 1st London (City) Artillery Volunteer Corps, and of the new Corps being designated the 1st (City of London) Artillery Volunteer Corps, the following officers have been transferred from the 1st Surrey Artillery Volunteer Corps to the 1st (City of London) Artillery Volunteer Corps, and will be considered to have received commissions of the same rank and date as those previously held by them in the 1st Surrey Artillery Volunteer Corps, dated Jan. 26, 1883:—Hon. Col. and Col. H.S.H. the Duke of Teck, G.C.B.; Lieut.-Col. W. Hope, V.C.; Capts. W. T. Jones, J. W. Bird, C. H. Coles, H. J. Dwelly, G. B. Haly, A. G. C. Stollery, P. E. Murphy, H. V. Stow, and J. N. Stephens; Lieuts. W. B. Murley, R. Perkins, S. W. T. Tyler, C. Bell, J. P. Clayton, E. Atkinson, G. J. Nutt, F. H. Hall, J. Stollery, J. C. Bird, W. H. Bolt, E. C. Henning, and W. Nicholls; Qrmr. W. T. Purkiss, Surg. V. Ambler, M.D., and Surg. F. W. H. Ramsay; Acting-Surg. E. L. T. Smith, M.B.; Vet.-Surg. J. Elmer; Hon. Chaplain the Rev. W. B. Hawkins, M.A.

(Where not otherwise specified, the foregoing commissions and announcements bear date February 7, and the current year must be understood.)

ESPIONAGE IN THE NAVY.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—In recent issues of the *Army and Navy Gazette* and other publications, it has been alleged that the Admiralty have, through their Assistant-Secretary, sanctioned and encouraged the forwarding of anonymous letters by the respective ships' companies in commission. Until an official circular or other perfectly reliable evidence confirms the correctness of their assertions, I shall refuse to believe that the officers who occupy the chairs of Hawke and St. Vincent will condescend to risk their reputation by such a questionable proceeding. The bare suspicion of such an occurrence is sufficient to make the founders of our maritime greatness lie uneasy in their graves. Imagine the stern, old Earl St. Vincent directing his private secretary (probably a follower through many a hard-fought day) to inform Ship's Corpl. Jenkins that his complaint shall be immediately attended to! Much may be alleged against the system of private reports in any form; but, dangerous as they are in the hands of certain commanding officers, the Admiralty are doubtless under the impression that their position ought to debar them from improperly sullying the character and blasting the prospects of a deserving officer. Indeed, there are occasions when these returns may enable a judicious captain to bring under the notice of My Lords qualities which otherwise would remain unnoticed and uncared for. It is impossible to over-rate the damaging influence which an organised system of espionage would cause in the ranks of the Navy at a time when, owing to the abolition of corporal punishment, the necessity for a straightforward course has become indispensable to discipline. The honour of an unpopular officer could by the system be impeached by a conspiracy amongst the unprincipled minority which occasionally form a portion of the crew of a modern ship-of-war, and although the charges might fail to be substantiated, the scar would remain for ever. There are few who have passed through the service who are not cognisant of charges of this nature, the mentioning of which makes men shudder, I have not waded through the minutes of the Clyde scandal, but as I understand the question, the unfortunate commander not only refused to forward the letter of the ship's corporal, but actually disrated him for alleged disrespect. A commissioned officer has permission, should his captain decline to forward a letter, to forward it on his own responsibility, and it is only logical and reasonable that the lower ranks of the service should enjoy a similar privilege. But, in supporting the gunner by disrating his junior, the ship's corporal, Com. Heron was not only following the precedent set by the Admiralty in many well-known cases, in which the juniors, though in the right, went to the wall. This is a very different matter from encouraging men of a low stamp to become informers against their superiors, a mode of proceeding which the high sense of honour entertained by the Navy as a whole renders unnecessary. If the reports which are widely circulated about "tips" have a foundation in fact, the presumed suggesters of the offensive order will act wisely by closely looking into the condition of the dirty linen near home, but it is only to be expected that in no instance will the shadow of a dishonourable action rest on the head of any member of the military or civil branches of the public service. The latter have not much to complain of, so far as emoluments are concerned. Similar language is scarcely appropriate in speaking of the military branch, yet here, as elsewhere, extreme competition enables the employer to command the market.—I am, &c., CAPTAIN, R.N.

Amusements.

◆

The metropolitan observance of Ash Wednesday has been marked by the usual anomalies. The customary anniversary dinner in aid of the Benevolent Branch of the "Dramatic and Musical Sick Fund," was given at Willis's Rooms under the presidency of the Right Hon. the Lord Mayor, supported by the Sheriffs and Under-Sheriffs, and followed by a smoking concert, to which many well-known vocalists and actors contributed songs and recitations. The theatres and music-halls north of the Thames were all closed, but the Crystal Palace and music-halls on the Surrey side were opened as usual. There was no performance at the Gaiety Theatre in the Strand, but the manager gave two representations of burlesque at the Prince's Theatre, Manchester. The Moore and Burgess Minstrels, exiled for the day from St. James's Hall, gave their varied entertainment at the Dome, Brighton, and many popular actors accepted "starring" engagements for Wednesday night in the provinces. At the Royal Albert Hall, the "Messiah" was performed, with Madame Lemmens-Sherrington, Madame Patey, Mr. Maas, and Mr. F. King as solo vocalists. At St. James's Hall, a Sacred Concert was supported by Miss A. Williams, Madame Antoinette Sterling, Mr. E. Lloyd, Mr. Santley, and Mr. Griffin.

At the GAIETY has been revived Mr. Reece's three-act burlesque drama of "The Forty Thieves," originally produced at the same house in December, 1880. Little change has been made in the cast, which includes Miss E. Farren, Miss Kate Vaughan, Miss C. Gilchrist, Miss Phyllis Broughton, Miss Howard; and Messrs. Edward Terry, Wyatt, Henley, Warde, and Kinghorne. During the six weeks' run of the preceding extravaganza of "Valentine and Orson," the receipts are officially declared to have reached £6,800.

At TOOLE'S THEATRE the programme has been varied by a revival of Mr. H. J. Byron's three-act domestic drama of "Dearer than Life," first brought out at the QUEEN'S THEATRE, Long Acre, in January, 1868. Many things have happened since then, and a reference to the original cast would pleasantly show the advancement made by certain members of the company then working hard to obtain honourable recognition. It should not be forgotten that as Bob Gassett, Mr. Henry Irving showed how artistic treatment would give value to even the most unsympathetic part. Mr. Toole, of course, resumes his famous assumption of the industrious tradesman, Michael Garner, whose happiness is, for the time, wrecked by the criminal misconduct of his only son, and his mingled pathos and humour are now even more forcibly displayed in this embodiment than formerly. Miss Marie Linden, a young actress of manifest intelligence, made a favourable first appearance as Lucy Garner, and the present cast comprises Miss Eliza Johnstone as Mrs. Garner, Mr. John Billington as Uncle Ben, Mr. E. D. Ward as Charles Garner, and Mr. H. Westland as the insidious profligate, Bob Gassett.

At the ADELPHI, Mr. Buchanan's new play is in active rehearsal, and will be produced on March 10. In the meantime, the few structural alterations required by the Board of Works are being so adroitly carried on that it will not be necessary to suspend the nightly performances.

Mr. Maskelyne at Easter will present Psycho at the EGYPTIAN HALL as an automaton thought-reader, and fulfil his promise of revealing to the audience the mode by which he has accomplished the remarkable feats associated with his fame as an exposer of the mundane origin of certain "spiritualistic" marvels.

Mr. Clifford Harrison, son of the late Mr. William Harrison, who, with Miss Louisa Pyne, laboured so earnestly in the cause of English opera, has announced a course of recitals at the STEINWAY HALL, Portman Square, for four successive Tuesday afternoons, dated Feb. 20 and 27, and March 6 and 13.

"SPECTACLES: THEIR USE AND ABUSE," a Pamphlet by Henry Laurance, F.S.S., Oculist Optician, should be read by all suffering from weak and defective vision; valuable and special instructions are given to those using and requiring Spectacles. It shows how sight is seriously injured by the indiscriminate purchase of Spectacles without regard to their proper adaptation, and traces more cases of blindness and defective vision from this than any other cause. Sent post free. Mr. Henry Laurance, F.S.S., Oculist Optician, personally adapts his Improved Spectacles at his residence, 3 Endsleigh Gardens, Euston Square, daily (Saturdays excepted), 10 to 4. Sir Julius Benedict writes:—"I have tried the principal opticians in London without success, but your spectacles suit me admirably. The clearness of your glasses as compared with others is really surprising." Dr. Bird, Chelmsford, late Surgeon-Major W.E.M., writes:—"I could not have believed it possible that my sight could have been so much improved and relieved at my age, 82. I can now read the smallest print, although suffering from cataract on the right eye." Similar testimonials from Ven. Archdeacon Palmer, Clifton; the Rev. Tidd Pratt, Bracknell, Berks; Rev. O. Thorpe, Peckham; Rev. Mother Abbess, Mill Hill, Hendon; Lieut.-Gen. Macmullen, Brentwood, &c.

Printed and Published for the Proprietors, at the Office, No. 16 Wellington Street, Strand, London.—SATURDAY, February 10, 1883. Letters on business and Remittances should be made to Mr. RICHARD JAMES WOOD.

MR. RICHARD JAMES WOOD,

AT THE OFFICE, 16 WELLINGTON STREET, STRAND, *and* NOT *to the* EDITOR *of the* ARMY AND NAVY GAZETTE.

The subscription to the paper is 7s. per quarter, or 28s. per annum, PAYABLE IN ADVANCE, *inclusive of postage to any part of the United Kingdom.*

To India, £1 12s. 6d. per annum.

The ARMY AND NAVY GAZETTE *can be obtained in Paris of our Agent,* Mr. J. W. S. NEAL, *English Stationer,* 218 *Rue de Rivoli, to whom Advertisements and Orders for the Paper may be sent.*

ON Military matters, the *Times* is generally supposed to speak under the influence of official inspiration, and we must confess that when we find a leading article in its columns devoted to Army Reform, we always look upon it as a kind of feeler, and the prelude to still further changes to come. There was one of these articles in the *Times* of the 6th inst., and we wish that time and space would have allowed us to notice it before. We are fully aware that all argument upon the subject is thrown away, for the whole thing, as regards Army Reform, is a foregone conclusion. We cannot, however, allow misstatements to pass unchallenged. Unfortunately, Military papers are not very generally read by the public, which forms its ideas upon matters relating to the Army from what it reads in the daily press. The latter, however, only opens its columns to one side of the question. Even should the voice of criticism be heard, the apostles of the new creed at once say, "Do not listen to these old grumblers; they hate change, and they are behind the times. Their antagonism to a system that they fail to understand is due entirely to prejudice." But we claim for the views of those who have spent between twenty and thirty years in intimate connection with our Regimental system, at least as much consideration as is given to the opinion of those who have spent the greater portion of their military career away from their regiments; and, moreover, we assert that the country is entitled to a free discussion upon subjects affecting the Army, so that all sides of the question may be heard. Little encouragement, however, is given to officers of experience to speak out, for they think—and they may be pardoned for so thinking—that if they do speak, and say anything against the working of our new system, they will be put down, as belonging to a class of Military officer impatient even of the slightest change, and that, consequently, their chances of future preferment will be extremely small. Now, let us take the article to which we have alluded. It is asserted, "Those of the older school of Military officer who seem fated to remember nothing of our old administrative failures, and to learn nothing from our new successes, are well pleased to believe that the stage of finality in Army reform has been reached." Ye gods! Where is the memory of the writer in the *Times?* Has our recent success in Egypt blotted out entirely all recollection of our disasters in the Transvaal? Has he forgotten Amajuba Hill? The "older school of Military officer" remember well our old failures. In many instances, they were stamped upon his mind by too much bodily suffering to be easily forgotten; and by the light of a past, and often bitter, experience, he judges the present; and he sees, notwithstanding our recent success, that our Military house is, as yet, very far from having been put in order. Far from being "well pleased that the stage of finality in Army Reform has been reached," he hopes that the country will never rest satisfied until the damage done by bungling reformers has been remedied, and the country given a thoroughly good, practical Army, instead of a thoroughly theoretical one. It is not fair to say that the Army wants to be left alone. It does not care how much it is "worried by Liberals and Conservatives," so long as good is obtained; but it strongly objects to humbug, and the cry of peace, when there is no peace. The article in the *Times* is a mild apology for the present failure of recruiting under the Short-service system, and we are inclined to think that its object is to prepare the public mind for a return to eighteen years as the age for enlistment, instead of the present limit of nineteen. We do not for a moment advocate a return to the old system of long service, but we doubt if there was any more difficulty in obtaining recruits then than now, and for this reason,—a fewer number were required; and we maintain that whether a success or not, the present system of Army organisation is very much more expensive than the old, both as regards men and money; for we require more trained soldiers to do the same amount of work than formerly, and a greater number of recruits to fill up the gaps made in the ranks of the Regular Army by the constant drain to the Reserves. The article also, we think, is intended to pave the way for a change in our present Cavalry regimental system, which, it says, failed under the necessities of the late campaign. It intimates that the problem is not difficult of solution, the remedy suggested being that we should have recourse to the very system which has so signally failed with the Infantry of the Line. It farther says, "The deficiencies in the outgoing battalion were simply and instantaneously supplied, by sending the requisite number of efficient soldiers from the battalion remaining in the United Kingdom." This is utterly false, and either the writer is ignorant of his subject, or he must be accused of wilfully endeavouring to throw dust in the eyes of the public. We admit that in theory the argument of the *Times* was justified, but in practice it was not, for the simple reason that half the regiments which took part in the Egyptian Campaign had their linked battalions already abroad, and when they embarked for active service they were completed by men from the Army Reserve, and, in many instances between 300 and 400 youths were left behind, either on account of want of age, or want of physique, or both. The Cavalry cannot possible be worse off now than the Infantry, under the new system, which deputes to a home battalion with only 410 privates the duty of keeping the Indian battalion of 900 strong up to its strength, as well as its own ranks. At the present moment, we could name in one command alone at least six regiments which, having sent out drafts at the beginning of the year, could not put 200 men on parade, and half of these would be under a year's service. The *Times* maintains that the Army has suffered long and seriously from unfit commanding officers. We will not deny this; but in recent times, have all the specially selected officers borne themselves without reproach? If the old system is to be supplanted by favouritism, then give us back the old, with all its faults. Are our Generals now any better than those who fought in the Peninsula, at Waterloo, in the Crimea, or the Indian Mutiny? Are our soldiers of to-day any better, or even as good, as those who at Inkerman kept at bay and finally repulsed more than five times their number? Would the men who carried the heights of the Alma have been thrust down from the strong position on Amajuba Hill, by any odds that the Boers could have brought against them? We will not theorise as to what would have happened, had Turks been behind the trenches at Tel-el-Kebir, instead of a mass of half-hearted and not over well-drilled or disciplined Egyptians; but was our transport so much better organised in Egypt than in the days of the Crimea? If it was, why were our horses allowed to die from starvation, and our men to suffer from both hunger and thirst? The fact is that the country scarcely possesses now an Army worthy of the name, for the home battalions are only nurseries for those abroad; and, with the exception of the Guards, a regiment is never seen, out of India. But, as we have already said, arguments are of no use. Army reform upon present principles is a foregone conclusion, for those branches still untouched, and anything that may be said in opposition is put down to the prejudice of what the *Times* calls the "older school of Military officer." The Military mind, it would appear, is doomed to premature decay. An officer now is thought to have passed his intellectual meridian at the early age of forty, but the man who rules the nation may retain all his faculties to twice that age.

WHEN Sir E. J. Reed condescends to write with less malevolence, his opinions and experience will command more attention from his countrymen than they do at present. For reasons which it is impossible to analyse, he has always essayed to promote discord between Engineers, and those whom he somewhat contemptuously terms, the "epauletted class." It is evident that, in office or out of office, this feeling is ever present to his mind; and to gratify it, he has adopted a course prejudicial to the best interests of the service. At a period when, from a combination of circumstances which probably will not again occur, a very large amount of power was seized by his Department, it was exercised in a manner the evil effects of which are felt to this day by the country generally. To introduce the unwise and impolitic measures which were subsequently rescinded by his successor, he spared no one who stood in his presumed path of reform, and most unwisely, we had almost said childishly, a great number of deserving men individually, young clerks on the threshold of official life, were summarily ejected on a small pension, and the experienced heads of Departments had pressure brought on them to enforce retirement. All this ruthless work has been undone, but the sufferers will long remain an unnecessary burden on the taxpayers. The object of these changes was to eliminate from the Dockyards all who were in any way connected by feeling with the Naval element, and to substitute in their place a number of mechanics, the whole to be subject to the authority of the Master Shipwright, who was created, in addition, Storekeeper and "Engineer." Had these gentlemen, in lieu of lagging behind the times as mere constructors of wooden ships, paid the slightest attention to engineering, it is evident that in lieu of being thus patronised by their new superior, one of their number would have filled his office, and Sir E. J. Reed been spared the opportunity of domineering over a set of officers who, whatever deficiency they might show in mechanical science, were certainly gentlemen. We can assure all who are interested in the welfare of engineers, that there is not the slightest wish on their part to assume executive command. From our own experience, they are, in times of trouble, only too glad to accept the assistance of those whom the great reformer would so summarily shunt from the ranks of the Navy. We have always maintained that the action of the Admiralty towards Engineers, and to all who are not of their own class, has invariably been marked with a want of liberality and exclusion deeply wounding to those who, for the lack of representatives, are compelled to chew the bitter cud of discontent in silence. Take, for example, the last circulars on the entry of Naval and Engineer Cadets into the service. It is a matter of certainty that in many instances brothers will join the respective lines, and on the threshold a cause of estrangement and antagonism is at once patent to both; they start on different roads for life. One feels that all the honours of a great profession are not beyond his reach; the other, that at five-and-twenty he will probably be sleeping in a hammock, and performing his toilette on his chest. It is impossible that such a singular disparity can long be permitted to exist, in this levelling age, in any public service, and the sooner the Admiralty acknowledge the fact, the easier their task will become. Our wish is to render strict justice to all classes of officers, as we have in this instance to Engineers, but we warn them not to be induced to imagine their services are indispensable. Engine-driving and engine-designing are two very different parts of the profession, and it is no reflection on the present Engineers of her Majesty's service to assert that there are hundreds in the Merchant Navy who, with slight training, could fulfil their not over-arduous duties. It is a question of money only. On the other hand, we doubt very much that the untrained executive of the latter service could efficiently perform the functions which constitute the daily duties of the modern Naval officer. By this we do not mean to impugn the skill of the merchant officer as a general navigator and seaman, but in pilotage, in handling and disciplining large bodies of men, in gunnery, and in diplomacy, he would certainly prove inferior to those of the Royal Service. We quite agree with Sir Edward Reed in believing that the burdens of the non-effective list are seriously affecting the purchasing power of the Estimates. It is easy to point out a certain defect, but the remedy is often difficult to devise. The retirement scheme of 1870 most unwisely offered a premium to a very large number of young officers to take their talents elsewhere, and in many instances, fixed the compulsory age at a time when a well-preserved man is not only in his mental, but in his bodily prime. We constantly hear officers sighing over the ruin of their hopes by this enforced idleness, at a time when severe competition and want of training for the duties of civil life render it difficult to procure the most humble employment. Not unfrequently, their future hinges on an interval of a few days or weeks, but the law, as it stands, admits of no alteration in favour of the individual. Seamen, from their numbers, press heavier still on the national exchequer. At thirty-eight, the majority retire with a gratuity, and roughly speaking, an annuity of £38; or if they elect when young to serve in the Coastguard and obtain charge of a station, treble that amount at fifty-five. Here again, the majority are compelled to cease active service at a period when they are comparatively as well able as they ever were to perform the necessary duties of their office. We have thus clearly pointed out the manner in which the non-effective estimates are trenching on the vote for matériel, but leave it to those who are interested to decide in what manner, if at all, the pruning-knife can be successfully applied. We incline to the belief that our ships are too few, and their cost too great. Decrease the cost, and increase the number of ships in commission. Then more officers would be employed, and promotion would not be stagnant. It is but justice to the critic to state that he boldly proposes an increase in the Naval Estimates, and we frankly acknowledge that if his suggestion is not adopted, we see no other method of keeping the Fleet thoroughly effective. National expenses will, like those of a household, increase, in defiance of our anxiety to keep them at a certain level. Who can change the inevitable? We are not one of those alarmists who periodically cast their eyes across the Channel, and see danger looming in every dockyard of our once great rival. France has nothing to fear from the ambition of this country, but much to apprehend from her enmity. Even if the respective ironclad fleets were numerically equal, they only constitute one of many factors which a naval war will certainly call into play. The majority of seamen will concur with the *Times* in believing that stout hearts and skilful seamanship, rather than an inch or two of additional armour, will decide the fate of the naval battle of the future, and this opinion only echoes the sentiments of those who claim from experience a right to be heard on the subject. The torpedo, and certainly the ram, have done much to multiply the advantages of armour. At a high rate of speed, the blow from a mass weighing 10,000 tons must prove irresistible, shearing through the thickest plating as a knife does the rind of a melon. At no remote period, excessive armour will be discontinued, except, possibly, near the water-line. Sir Edward Reed, following the lead of his former associates, falls back on the steamers of the Mercantile Marine to supply the most pressing want of the times,—a cruiser fleet. Although greatly superior to the unseaworthy squadron that he designed for a similar purpose, with ships so deficient in sailing, in steaming, and in steering powers as to render their crossing the Atlantic a doubtful problem. It is doubtful whether an untrained officer of the "epauletted class" would have committed a more grievous error of construction. In one particular we agree with him, the danger to which slow steamers and sailing ships will be exposed from the extemporized ships of an active enemy. On remote stations, where our own would necessarily have to guard a very large area, the risk of capture will render ordinary insurance an impossibility. Having exhausted our arguments on this head, and illustrated them by accomplished facts, it will serve no purpose to resort to a repetition. At the same time, we cannot believe that the nautical element of the Admiralty seriously entertain the proposal of conversion, save and except as a mere makeshift, during the construction of legitimate ships. There is not, as Sir Edward Reed infers, the slightest chance of wearing out our ironclads by keeping them in commission. The adage of wearing out or rusting out applies to ships, as well as to men, and from the condition of many sets of boilers in the Reserve, it is evident that in a financial sense there is not much gain derived by adopting the last-named alternative. We do think that the solemn parade of our obsolete Channel and Reserved Fleets causes a very large expenditure, without producing much practical good, but at the same time, if seamen are not accustomed to the exercise of their profession in some shape during peace, their shortcomings would tell against them in war. The fact is, we require more training ships. It will serve no purpose to dwell on the prominent part which other nations are taking in maritime affairs. A universal combination against England is, owing to the political situation of Europe, an impossibility; and it is not likely any nation will attempt to attack us single-handed, if an efficient fleet of light ships is ready to guard the highways of our commerce.

FRANCE lies in the throes of a political agony. Distorted and enfeebled by the spasms to rid herself of the pain which tortures her, she can rely on the skill of no one capable of grasping the diagnosis of her malady, and of raising her from prostration. She is, in verity, the modern Andromeda, bound in chains to the rock of revolution and anarchy, and there is not a modern Perseus within the length and breadth of her borders to shield her from that latest dragon, which is scaled with a liberty called Communism, with a social regeneration known by its vocabulary of crazy jargon, with a materialism having no limit to an arrogant self-sufficiency and no appeasement of a pernicious voracity for self-exaltation, with a fraternity and an equality ever seeking to disturb public tranquillity, and to violate the chastest precepts of public morality. But the sickness of France comes, too, of a military incident. Conceiving himself to be the rightful holder of the sceptre of the Emperor Napoleon I., Prince Napoleon Bonaparte composed and straightway pasted upon the walls of Paris a document setting forth, in seditious inferences, the imbecility or incapacity of the Republican form of government in France, and extolling by similar insinuations the sanity and intellectual vigour of himself and of his kindred. On those fortuitous grounds of birth and descent, and on theories of equally doubtful mental excellence, he laid claim to the supreme control of things, and to the investment of his own person with the Imperial purple shot with the ancestral bee. Such is, briefly, the interpretation given of the notorious document which has consecutively thrown two or three Cabinets out of office, and has placed the President of the Republic in a position of anything but augustness. It may eventually turn out to be one of danger. In times of trouble, a ruler should have a strong hand and a judgment free from acts of precipitation. But the President, in the present instance, has not been the absolute master of a judiciousness of conduct unhampered by haste; and, in a pliant moment, while putting together the parts of one of his Cabinets, he chose a certain General Thibaudin to fill the post of Minister of War. Now, the story goes—and a story fairly substantiated—that General Thibaudin was taken prisoner at Mayence in 1870 by the German troops during the war with France, and was released on parole. Propelled by an unlucky motive, General Thibaudin broke his parole, and falling back on the use of Commagny, his mother's maiden name, resumed active service under the French colours. There arises a doubt of this breach of honour. But the official record at Berlin states that the words of his declaration are:—"I pledge my word of honour not to make any attempt to escape, to send and receive any correspondence solely through the military authorities, and not in any way to abuse the permission granted me to move freely about within the limits prescribed." In addition to this declaration, and in proof of the validity of the charge preferred, the following warrant was issued by the Royal Government at Mayence on December 14, 1870:—"The French prisoner of war, Colonel Thibaudin, of the 76th Regiment of the Line, born at Moulin-en-Gilbert, escaped from here secretly, by violation of his word of honour. All civil and military authorities are requested to be on the look-out, and in the event of his capture to deliver him up to this Government." The indignation of Germany is roused, and the leading organs of the Press vent their anger in no guarded language; but the Government semi-official *Gazette* confines itself to a temperate condemnation of the appointment of General Thibaudin to the Ministry of War, by an ordinary expression of regret. It hints that the President of the Republic should not so far have lent himself to offend the possible sensibility of a neighbour, who cordially desires the continuance of peace; and that Germany was justified in looking for the observance of courtesies which ought to regulate the conduct of one nation to another, with the same kindly punctiliousness as one person maintains the amenities of private life towards another person. And what is the end which the President of the Republic is straining himself to reach? Is it to pander to revolutionary vindictiveness, or to popular dullness? His policy is already cinctured with grave internal anxieties. Can it be war? Instigated by a temperament plunging her into irremediable faults before to-day, France may hanker for the delivery of the retaliatory blow which shall restore Alsace and Lorraine to the catalogue of her provinces. Ready at any point for a second hecatomb, in the lapse of barely more than ten years, Germany is, nevertheless, reluctant to unsheathe the sword. The Emperor, bearing lightly the burden of fourscore years, is still sensible of the weight of an Imperial diadem. "Remember that thou art a man!" was always sounding in the ear of the Roman Cæsar; but the German Cæsar needs not the voice of admonition to assure him that "the battle is not to the strong," no more than the race is to the swift. He recollects too vividly that 1,003,490 of his subjects crossed the frontiers of their native land into the territories of France, and that 129,000 of them never returned. For his pains, he captured 333,341 French soldiers, 107 flags, 7,441 cannons, and 855,000 stands of arms; and, by the adroitness of his Chancellor, he secured hundreds of millions of money. The soldiers are once again in France, the flags have rotted, the cannons have gone out of use by improvements in artillery, the stands of arms have rusted to a rifle, and the money, huge as was its heap, has slipped out of the fetters of his commercial obstructiveness into the gentler keeping of foreign thrift, and has increased under the wiser influence of foreign labour. The retempting Germany to strike a note of discord in the midst of European harmony is at best impolitic. Were the Princes of the House of Orleans the treasonable Pretenders that the partisans of M. Gambetta would have them to be, how easily could the loyalty of the French Army to kingly rule be ranged against the continuance of the Republic? The Army has a profound regard for the Duke d'Aumale, one of its Generals, and in him it recognises all the qualities of a distinguished officer, and of an upright, thorough French gentleman. The Duke may stand apart, and sacrifice his own interests to the paramount necessities of the State, be it Imperial or be it Republican, but the Army would not share in his unselfishness. The disquietude of France under the Presidency of M. Grévy offers an ample pretext for the interference of the Duke d'Aumale, and the Army would not be slow to admit and confirm the equity of the pretext. For thirty years France has been steeped in misery, and it needs but little exhortation to make her turn to a member of the House of Orleans for a master. Smarting—as it does smart—under the nomination of General Thibaudin to the Ministry of War, the Army gratefully remembers the magnanimous acts of the Duc d'Aumale while he was Governor-General of Algeria, in 1848. To tamper with edged tools does not include the proverb that, "The prudent man looketh well to his going;" and, hence, the President of the Republic should ponder how the absence of circumspection may jeopardise the happiness and safety of his country, as well as tarnish the reputation of himself.

We are authorised to state that Vice-Admiral H.R.H. the Duke of Edinburgh has no desire to dispose of his reversionary interest in the Grand Duchy of Saxe Coburg and Gotha, nor has he any intention of entertaining further proposals on the subject.

The "Newman Testimonial Fund" has now reached nearly £450, but this sum is not nearly enough to enable the promoters to carry out the original idea with which the fund was started. It is, therefore, to be hoped that further subscriptions will be forthcoming to perpetuate the memory of one of the most popular officers who has for many years adorned the commissioned ranks of the Navy.

A Committee, of which Mr. Swainson formed part, sat some years ago to consider the best means of curtailing the expense incurred by the Admiralty in its administration of the Navy. One of its recommendations was that the post of Secretary to the Admiral Superintendent of Reserves should be given to a retired Paymaster, at a salary of half-a-guinea a day, for six working days per week. When the Duke of Edinburgh was offered the command of the Reserves, his Royal Highness made it a condition of his acceptance of the post that his Staff should be increased, instead of decreased. He demanded the appointment of a Post Captain, to represent him in Spring Gardens during his absence when inspecting the Reserves, and also an Assistant-Paymaster to act as his private or travelling secretary. These appointments were made, and the wisdom which dictated them is to be found in the efficient state to which his Royal Highness brought his command. Now, however, the civilian element in Whitehall would abolish these appointments; but, we are glad to hear that Rear-Admiral Sir Anthony Hoskins has strenuously opposed any reduction of his Staff, even recommending that Mr. Whitehouse, though retired, be continued at his post, that the country may not be deprived of this officer's thorough knowledge of the organisation and requirements of the Naval Reserve.

The Contract Department of the Admiralty appears to study more the interests of its Contractors than those of the Navy. Quite recently, an order was issued for the survey of 5,000 yards of superfine No. 1 Navy blue cloth and 60 bales of serge, delivered by the contractors at the Deptford Victualling Yard. The usual number of Naval officers were ordered, in accordance with the custom of the service, to survey these stores for the Admiralty, prior to their being accepted and paid for. The surveying officers rejected the whole delivery, owing to the cloth and serge being under weight, of bad colour, and in no respect up to the terms of the contract, or according to sample. The Admiralty, however, decided against the surveying officers, and informed them that, as the contractors had agreed to deduct 2½ per cent. from the price of the goods, the cloth was to be passed. At the same time, they ordered the serge to be resurveyed, directing the surveying officers to pass and accept as many of the bales as possible. The effect of this is, that this inferior cloth and serge now becomes the standard as to quality for next year's samples. Formerly, good cloth and serge, of most durable texture, were supplied by the Admiralty to the Navy, but, under the corrupt system which has been gradully growing up at Whitehall, the quality of the stores supplied by contract has been deteriorating, while the price charged to the Navy has been raised. In this manner, the petty officers, seamen, Marines, and boys of the Fleet suffer great loss, through the avarice of their civilian rulers.

The taxpayers owe a debt of gratitude to the Right Hon. W. H. Smith, for pointing out most clearly why the Naval service is starved, why its lists are stagnant and promotion dead, why ships are few and why seamen are scarce. During the present Administration, the Civil Service Estimates have been increased by three millions sterling to augment the pay of those who do mere clerical work, while the Naval and Military Estimates have been cut down, and fewer combatant officers employed. This is solely due to the political influence wielded by the Civil servants of the Crown. Should a Naval Lord of the Admiralty or a General at the War Office dare to attempt to bring in a reform which would in any way reduce the Civil establishments, or curtail the emoluments of a few Civil servants, those whose interests are threatened at once openly threaten to bring all the thunders of the House of Commons upon the devoted heads of the combatant reformers, and rush out of their offices, exclaiming, "I'll go straight to the Member for Brummagem!" Pressure is then brought to bear upon the Ministry, and as every vote counts and none can be spared, the Civil Servants retain possession of the official wires, and remain the wirepullers at the Admiralty. Such a state of things cannot be tolerated much longer. Sooner or later, it will have to be abolished, and the sooner the better.

One of our finest ironclads, when on her measured-mile trials in Stokes Bay, some years ago, only avoided running over a yacht by putting the helm hard over, at the imminent risk of going ashore before her way could be stopped. Would the "steam cornet" have had any weight with the jury, had a coroner's inquest unfortunately supervened? Assuredly not.

The Lieutenants are the backbone of the Navy. At the present moment, hundreds of these officers, after having devoted the best years of their life to the service of their country, hoping, as it were, against hope, that promotion would be theirs as each new year came round, have at last realised the heart-rending fact that they can never, by any possibility, rise higher in the service than their present rank. Why? Because the members of the Board of Admiralty have promoted their own relations and friends, as soon as these had served their sea-time. This brought the junior Lieutenants on to the Commanders' List, and the junior Commanders on to the Post-Captains' List. In this manner, the senior ranks of the service have been filled with junior officers, while the junior ranks remain crammed with officers their senior in the service. Surely the country will not tolerate such an iniquitous system much longer? The members of the Board of Admiralty have now full power to study their own interests first and the public good last. They also have the will to do so. Let the will remain, but the power be taken away. Then we shall no longer see an Admiral holding on to a seat at the Board like a drowning man to a straw,—not to do good to the Service, because he has abundantly demonstrated since he has been in office that he is neither legislator nor organiser, but to advance his own private interests. By holding on, he may be promoted, and then his half-pay will be increased by several hundreds a year. He will then, in fact, receive as much half-pay as do some twenty lieutenants. So much for at all times studying one's own interests, and having interest. Merit is of no value. An officer may now expose his life in action, contribute most appreciably to the success of a campaign, be mentioned in despatches, and yet get nothing. But the Admiral who stays at home is made a G.C.B.; his friends, the young Captain, Commander, and the Lieutenant, his cousin, or the relation of a friend or political supporter—officers who have not seen a shot fired during the war, who never reached the scene of operations until all was over—are most probably decorated with many orders, if not promoted. And such is Admiralty administration! Can it be wondered at that incalculable injury is thereby being wrought in the Navy? But what is the most astonishing of all is, that the British taxpayer should stand by and allow this to go on, professing to believe the statements which emanate from the "lying tongues" let loose by the Admiralty to deceive the public, rather than the truthful but unpalatable statements of those whose sole object in the world is to increase the efficiency of the Navy, and thereby prove true the old English motto, "The noblest motive is the public good." We do not write this without reason. We have at this moment before us a file of war correspondence. Therein we note the names of many Naval officers who distinguished themselves during the war. What have they received? Nothing! Take, for example, Lieutenant Thompson. The special correspondent of a leading daily paper, writing from Cairo on September 30, says of this officer, in his report of the great fire:—"Lieutenant Thompson, R.N., sat unperturbed in a hot corner, wielding a hose, and though shells were bursting right and left, stuck to it gamely, eventually succeeding, in conjunction with others, in cutting off the communication with the passenger station, which was saved by almost a miracle." This officer, like many other workers, such as Lieutenants De Sausmarez and Barlow, have received nothing. Favourites, or men whose family interest is of use to the powers that be, have come out of the war with three or more decorations. Surely all this muddle must be due to error and oversight, and not to intentional partiality for friends and relations? If so, it is easily remedied, and should at once be set right.

The torpedo and shipbuilding branches in the German Navy form quite distinct departments, which hold no direct communication with each other. The former designs the torpedo apparatus and gets it approved at head-quarters, when suddenly down comes, to the constructor's department, the order for the immediate introduction of the under-water launching-gear into ten large ships-of-war (as was lately the case). The consternation of the German Naval Constructors on such occasions can be better imagined than described, especially as the torpedo apparatus is generally designed with but little consideration for the lines of the ship for which it is intended. The cost of arming the above ten vessels with torpedoes is 125,000 marks each.

Nothing is farther from our thoughts than to intentionally misstate facts. Last week, a correspondent wrote:—"I saw Commander Mann on Southsea Beach on the day the battle of Tel-el-Kebir was fought." This week, the same officer writes:—"I find I was wrong as to dates, and that Commander Mann actually carried stores in the *Beacon* before Tel-el-Kebir was fought; but he did not arrive until all active service, so far as the Navy was concerned, was over." We find, however, that Commander Mann got out in time to take part in the seizure of the Suez Canal, although he was only appointed to the *Beacon* on August 7, and did not leave England until August 11. But he and Lieutenant Festing are decorated, when officers who were under fire during the whole war get nothing. That is what we complain of, while heartily congratulating these gallant officers on their good luck.

Arrangements are being made at the United Service Club for entertaining Admiral Lord Alcester at dinner, on his return to England, in recognition of his services in Egypt.

German Naval men who have had opportunities of going on board some of the latest additions to the Chinese Navy, cannot refrain from expressing their surprise at the evident predilection of the Chinese Government for complicated machinery. From all accounts, the officer who may be blessed with the command of one of these vessels will certainly hold a position as yet unknown in any service, viz., one in which he will be perfectly free from envy. "One large engine-room" is the best description that can be given of them, as almost every modern naval invention has found a place on board. For instance, electric light and telegraph, steam, hydraulic, and hand-power boat-lowering gear, torpedo apparatus, steam winches, pumps of almost every kind, and many other complicated contrivances, too numerous to mention. If German officers turn pale at the sight of such clock-work, what must be the feeling of a Chinese captain with a comparatively undisciplined crew? The Chinese Government is, therefore, wise in trying to get British officers to command their ships.

The *Western Morning News* has inserted the following paragraph, which appears to emanate from official sources:—"The *Army and Navy Gazette*, in a note on the *Northumberland* collision, contends that at the time of the accident, Captain Kelly, of the Steam Reserve, was in charge, and not the officer of the watch, because the steam flag was flying at the mast-head. The writer of this paragraph in a 'service' paper must be lamentably uninformed as to the conditions under which steam trials in commissioned ships are made. The captain of the Steam Reserve is only responsible for the navigation of the ship until she is clear of the port, after which his duties are entirely associated with the working of the engines. The ship is then, for navigating purposes, entirely in the hands of her own officers, and the officer of the watch was in charge when the collision occurred. Hence he was held to blame." In reply, we again state that the officer of the watch was wrongly held to blame. Captain Kelly, of the Steam Reserve, had nothing whatever to do with "the working of the engines" The Engineer officers of the Steam Reserve are responsible for that. But Captain Kelly, as executive head of the Steam Reserve, is responsible for the safety of the ship until, after the trial, the Steam Reserve authorities hand her over to her own officers. If Captain Kelly's duties "are purely associated with the working of the engines," his proper place would be in the engine-room, and not on the bridge, where his presence would interfere with the navigation of the ship, and confuse both the officer of the watch and the Captain of the ship. It stands to reason that as long as a ship is in the hands of the Steam Reserve, she cannot, by any stretch of imagination, be in the hands of her own officers. It is a question, however, whether the charge of the ship had been officially given over to the officer of the watch or not. If not, he was not to blame.

It was reported some weeks since by German papers that the North Sea Squadron of Evolution would put to sea with only their lower masts standing. This report, which was generally discredited at the time, turns out to be correct. The reason given for this somewhat unusual arrangement is, that the officers and crews are to be accustomed to the management of the ships, guns, &c., under the same conditions in which they would have to proceed to sea, in case of war, for instance, with Russia. Though called the North Sea Squadron, as hailing from Wilhelmshaven, it will, no doubt, cruise for several weeks in the Baltic, and there pick up the ironclads of the *Sachsen* class. It is, of course, natural that the German Government should wish to attribute the fitting-out of a second Ironclad Squadron to general causes, and thus the report which lately appeared in the *Army and Navy Gazette* relating to the *Sachsen*, *Bayern*, and *Wurttemberg* has been contradicted, as the vessels were only to be commissioned for the purpose of making trial trips. High time, considering they were launched in 1877 and 1878!

Lieutenant W. M. M. Edwardes, 74th Highland Light Infantry, has been granted the Victoria Cross, for leading the way into a battery at Tel-el-Kebir, killing an Egyptian, and getting himself knocked insensible and nearly killed. Lieutenant Edwardes, from all accounts, is a most gallant officer, and well deserves the Cross; but it appears to us that Lieutenant Lang, who, by his cool-headed courage, undoubtedly saved a number of lives by bringing the action of Shaluf to a speedy close, is a still more fitting object for the reward in question.

It has been decided that the payment of the Staff of 24 regiments of Middlesex and City of London Volunteers is, from April 1 next, to be carried out by the Paymaster, London Recruiting Depôt, St. George's Barracks, Charing Cross.

Sir R. Biddulph, K.C.M.G., Governor of Cyprus, is now the senior Colonel of Artillery for promotion to Major-General's rank. The next vacancy will, however, be absorbed.

The India papers announce the arrival in that country of Colonel H. Brackenbury, C.B., who arrived in Bombay by the *Bokhara* on January 23, to assume command of No. 7 Battery, Cinque Ports Artillery. But the *Standard* stated a fortnight ago that Colonel Brackenbury was still in England. There appears to be a glorious uncertainty with regard to this officer's movements. It is quite true, we believe, that Colonel Brackenbury was to have gone to India in the *Bokhara*, but he did not; and our Indian contemporaries have, therefore, been led into error.

A General officer calls our attention to a point in connection with the wearing of medals and Orders in plain clothes. He says, that the decorations of the Bath and other Orders are worn by civilians in their full dress, which is also the full dress of most retired officers.

A correspondent points out, in support of our argument that young men wishing to enlist desire to select the regiment in which to serve, that "a few days ago between 20 and 30 recruits offered themselves at Bedford, for the Huntingdonshire Regiment (late 31st), and were told they could join for the Bedfordshire (16th) only, on which they every one of them left the barrack square. The 31st, in the old days, obtained always their best recruits from Huntingdon. Many regiments were also recruited by the sons of men who had served, or were serving. These no longer enlist, because they object to being transferred to other regiments." It is the same cry all over the country.

We believe that had Mr. Childers remained at the War Office, the promises held out to the officers of the Army Pay Department would, ere this, have been fulfilled. It is now hinted that the concessions asked for by the officers are only to be partially granted, and have been arranged by the present Accountant-General so as to offer a bait to combatant officers to leave their regiments to become Paymasters, and without any consideration for officers who have been in the pay service between thirty and forty years. It is the evident desire to fill the Department with officers on the "quantity *versus* quality" principle, with a result with which the authorities ought by this time to be fully aware. It is our firm conviction that in any reorganisation of the Department, no scheme will give satisfaction to the public or to the officers concerned that does not provide for one of their own body as a representative at the War Office, and a liberal increase in the numbers of the Chief Paymasters. We have in the interests of the service so frequently urged the necessity for something being done in this direction, that we trust before the Warrant is finally drafted, Lord Hartington will decide on following in the lines of his predecessor, and give a full measure of satisfaction to over 300 officers.

The following General Order with reference to recruiting has just been specially issued:—"Officers commanding corps, regiments, battalions, or divisions, or batteries of Royal Artillery, are always to appoint at least one non-commissioned officer as an ordinary Recruiter, to receive any recruit who may offer himself at Head-quarters, and every eligible recruit who so offers himself is to be enlisted. Officers commanding will also take care that the particulars as to bringing-money are fully known by all soldiers under their command, as well as by those going on furlough, or transferred to the Reserve. The officer commanding a regiment of Cavalry can enlist men for his own regiment, if it be under establishment. The officer commanding a battery of Artillery can enlist men for Royal Artillery, and post them to his own battery, if it be under establishment, except in the case of Horse Artillery, when previous reference must be made to the Deputy-Assistant-General, Royal Artillery. The officer commanding a battalion of Infantry can enlist men for his own regiment, provided it is not closed to recruiting; this information can always be obtained from the officer commanding the depôt of the regiment. Officers commanding can always enlist recruits for general service (Infantry). After medical inspection and attestation, they should be sent to the officer commanding the nearest Regimental District, for final approval and appointment. Similarly, recruits can also always be enlisted for the Royal Artillery, and sent in the same way to the officer commanding the nearest Artillery Division Depôt. In the event of eligible men wishing to oin any corps other than those mentioned, special authority can be applied for from the Adjutant-General, on Army form B, 203.—By command, WOLSELEY, A.G."

A correspondent last week called attention to the new fashion of soldiers parting their hair in the middle, and plastering it on their foreheads in small curls. This practice, of which our correspondent justly complains, seems to have originated in the Foot Guards, for every man of these regiments we have seen lately has had his hair thus arranged, regardless of the shape of his head or the cast of his features. Men of other corps are now adopting this unbecoming and effeminate fashion. Are our soldiers afraid of looking too manly? If so, their apprehensions are quite groundless. Most of them cannot help looking like boys, but they need not try to look like girls. Officers now, unlike their men, generally wear their hair of a length, or rather of a shortness, which we used to see only on prisoners and tooth-brushes.

We strongly recommend those of our readers who are in town to pay a visit to Humphrey's Hall, Knightsbridge, where the Egyptian War Exhibition is being held on behalf of the Egyptian War Fund. The Exhibition will be open throughout the ensuing week.

THE ROYAL MILITARY ACADEMY.

The Duke of Cambridge on Tuesday presented commissions for the Royal Artillery and Royal Engineers to the largest number of cadets who have at any one time passed out of the Royal Military Academy at Woolwich, as many as 52 having gone through the qualifying examination, and received the necessary certificates of efficiency. His Royal Highness was met at the Arsenal Railway Station by Gen. the Hon. E. T. Gage, commandant of the district, and reached the Academy at 11 o'clock. A Royal salute was fired from the Greenhill battery. The Duke was accompanied by Lord Wolseley, Adjt.-Gen. to the Forces; Gen. Sir Beauchamp Walker, Director-Gen. of Military Education; Gen. Sir Charles Arbuthnot, Deputy-Adjt.-Gen., R.A.; Gen. Reilly, A.D.C., Director-Gen. of Artillery; Gen. Sir Lintorn Simmons, Gen. Owen, Gen. Willis, and other officers of rank and distinction. Gen. Browne, Governor of the Academy, received the Duke of Cambridge, and the gentlemen cadets, who were drawn up in line on the parade, gave the usual salutes, assisted by the Royal Artillery band. A march past and some drill followed. The Director-General of Military Education first read his report, which stated that in consequence of the second class having been commissioned last summer, to meet a dearth of officers, the present first class, which was then the third, had lost one term of instruction. It had, however, been decided that the marks of the class passed over should be credited as if gained, in proportion to the general results, and, the examination having been reduced in scope and severity, none of the cadets composing the class had failed to obtain the modified standard. The examiners' remarks appended to the report were generally satisfactory, but the subjects of Italian and Spanish were pronounced superficially studied, owing, probably, to the shortened term; and in chemistry and physics the marks were unusually low. Sir Beauchamp Walker explained that Italian and Spanish were voluntary subjects, and expressed his opinion that the taking-up of such subjects often led to results which were manifestly incommensurate with the time deducted from other subjects. Gen. Browne, Governor of tha Academy, then stated that the 52 cadets composing the examination class were well qualified, by general conduct and efficiency, to receive her Majesty's commissions in the Royal Artillery and Engineers. These cadets had all joined the Academy in March, 1881, and by the accelerated promotions before mentioned, had undergone a course of only two years' study, leaving the institution with an average age of 19 11-12 years. The behaviour of the class had been excellent throughout, and had been shared generally by the whole of the cadets, to whom, as well as to the staff of the establishment, the altered course of study had necessarily been attended with additional labour and difficulty. The successful cadets were then called forward to receive her Majesty's commissions, two of those entitled by precedence to enter the Royal Engineers electing to enter the Royal Artillery. The following was the list, as read out by Col. Barker, the Assistant-Director-General of Military Education:—

FOR THE ROYAL ENGINEERS.

	Marks.		Marks.
George A. W. Stone	44,692	William R. Brown	36,589
John W. Pringle	39,469	Charles F. Mould	34,870
James R. B. Serjeant	39,185	T. F. B. Renny-Tailyour	33 546
Herbert V. Kent	38,531	Charles S. Rose	31,882
Eyre Houston	37,020	Walter A. G. O Meara	31,801
Burdett F. Morony	36,714	Edward D. Haggitt	31,772

FOR THE ROYAL ARTILLERY.

Charles E. Baynes	33,663	Henry H. Flood	26,534
William A. Macbean	32,391	H. C. St. G. Molesworth	26,242
Malcolm S. C. Campbell	31,331	Henry R. Cook	26,010
Francis R. Drake	29,917	James L. F. Shepherd	25,512
C Cunliffe Owen	29,629	St. John A. D. Muter	24,827
Walter H. Robinson	29,012	William A. Perssé	24,733
Walter L. Davidson	28,868	Corblandt G. Mackenzie	24,447
Richard W. Breeks	28,771	Lewis G W. Milles	24,393
George F. Herbert	28,676	Gerald E Galbraith	23,797
Christopher G Oldfield	28,590	Lawrence C. Gordon	23,415

The cadets were then presented by Col. Marsh, R.E., Secretary of the Academy, to receive prizes from the hands of his Royal Highness. The Duke of Cambridge, addressing the cadets, said he was much gratified at hearing such good reports of their proficiency and conduct, especially with regard to the class now leaving the Academy, who had done themselves credit, set a worthy example to those who would follow, and helped to create in the outer world a favourable opinion of the Academy. Reports of misconduct naturally led to suspicions that there must be something wrong with the system; but when a number of cadets like those now leaving left with the unqualified praise of the Governor, they not only evinced a proper military spirit, but stamped afresh the high reputation of the institution which they had assisted to maintain. He warmly congratulated the senior under-officer, Mr. Stone, on heading the list of successful cadets, and also upon gaining the two chief rewards of merit and other prizes awarded for studies. He trusted that future occasions of this kind would enable him to speak in similar commendation; and he was satisfied that under the command of his gallant friend, Gen. Browne, and the staff of professors and masters, the business of the Royal Military Academy was being carried on pleasantly and satisfactorily. He had made allowances for certain defects in this examination, due to the disadvantageous circumstances which had been explained; but in listening to some of the examiners' remarks on the comparative failures in certain subjects, he had made the mental observation that the cadets were prone to indulge in too many subjects. They would find it better to limit themselves to such as they could manage, and particularly to guard against too much ambition in the matter of languages. Some men were very apt at languages, and it was only right and natural that they should employ their special intellect to bring them to the front; but those who did not feel that they had a direct calling for the pursuit of languages should confine themselves to one or two. He believed that French and German would carry them through any part of the world. If they knew Spanish and Italian, of course they would be so much the better, but not if they were acquired at the sacrifice of other subjects of greater importance. The general course prescribed for the Academy should certainly be looked to first and thoroughly by every cadet, and then, if there were time and opportunity, other and special subjects might be taken up, so long as they could be profitably pursued, without prejudice to other requirements. He merely threw out this hint for the consideration of the cadets who were coming after; and to those who were going away into the Army, he would only say that he hoped they would continue to act as well, and set as good an example, when officers, as they had while in the Academy. He wished them success in their career, and, in conclusion, informed them that, although it had been reported that there were not vacancies enough to find them all immediate employment, and that some 10 or 12 of them must expect to wait for a little while, he was now in a position to state that, at the end of their leave of absence, they would all, without doubt, find themselves commissioned officers serving her Majesty. The Duke afterwards witnessed a ride of the cadets in the Royal Artillery Riding School, and returned to London.

THE VICTORIA CROSS.

WAR OFFICE, February 13, 1883.

The Queen has been graciously pleased to signify her intention to confer the decoration of the Victoria Cross upon the under-mentioned officer, whose claim has been submitted for her Majesty's approval, for his conspicuous bravery during the battle of Tel-el-Kebir, in Egypt, on Sept. 13 last, as recorded against his name:—Lieut. William Mordaunt Marsh Edwards, 2nd Batn. the Highland Light Infantry, for the conspicuous bravery displayed by him during the battle of Tel-el-Kebir, on Sept. 13, 1882, in leading a party of the Highland Light Infantry to storm a redoubt. Lieut. Edwards (who was in advance of his party) with great gallantry rushed alone into the battery, killed the artillery officer in charge, and was himself knocked down by a gunner with a rammer, and only rescued by the timely arrival of three men of his regiment.

WAR OFFICE, February 16, 1883.

The Queen has been graciously pleased to signify her intention to confer the decoration of the Victoria Cross upon the under-mentioned soldier, whose claim has been submitted for her Majesty's approval, for his conspicuous bravery during the recent campaign in Egypt, as recorded against his name:—Private Frederick Corbett, 3rd Batn. the King's Royal Rifle Corps. During the reconnaissance upon Kafr Dowar, on Aug. 5, 1882, the Mounted Infantry, with which Private Corbett was serving, came under a hot fire from the enemy, and suffered some loss, including Lieut. Howard-Vyse, mortally wounded. This officer fell in the open, and there being then no time to move him, Private Corbett asked and obtained permission to remain by him, and though under a constant fire, he sat down and endeavoured to stop the bleeding of this officer's wounds, until the Mounted Infantry received orders to retire, when he rendered valuable assistance in carrying him off the field.

QUARTERMASTERS AND THE PAY DEPARTMENT.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—Kindly permit me to offer a few brief observations upon some remarks which appeared in a paragraph in your journal of the 3rd inst., respecting the admission of quartermasters to the Army Pay Department. The tenor of these remarks cast a very serious reflection upon the integrity of quartermasters as a body. To question the integrity of any man, especially that of an officer whose commission from her Majesty bears a distinct attestation to his trustworthiness, is a most grave undertaking, and one which inflicts the greatest mental agony when directed against a man possessing even the ordinary amount of self-respect. The quartermaster is, generally speaking, unfortunately the butt of many, the associate of few, and the friend of none Handicapped in every respect, few can realise the obstacles with which he has to contend in the daily race of life. Now, it may be Gospel, but it certainly is not human nature, to present the left cheek for the blow when the right one has been smitten. Hence, smarting under a deep sense of injury, I cannot refrain from protesting against the allegations contained in your journal. Let a list of paymasters promoted during the present century from among the quartermasters, with information respecting the manner in which they acquitted themselves in the higher positions, be placed side by side with a similar list of paymasters promoted from other classes, and the result of comparison may, perhaps, inspire considerable surprise and dismay in the minds of those who are in the habit of considering dishonesty inseparable from the "ranker." Is it fair, I ask, to pronounce judgment upon a class, on the *ab uno disce omnes* principle? As well might it be said that all Irishmen are assassins, because a few despicable fanatics redden their hands in the blood of the innocent.—I am, &c.,

J. MCGUINESS, Capt.,
1st North Staffordshire (late 64th) Regt.

Athlone, Feb. 12.

Sala Pasha has been named Chief of the Intelligence Department of the Egyptian Army.

The Army.

1st Life Guards. When the spring moves take place, the regiment will proceed from Hyde Park to Windsor.

2nd Life Guards. The regiment will move in the spring from Windsor to Regent's Park Barracks.

Royal Horse Guards Blue. The regiment will leave Regent's Park for Hyde Park Barracks when the spring movements take place. Lieut. S. J. H. Harter died at Naples on the 10th inst., aged 25 years. The deceased, who was son of the Rev. G. G. Harter, of Cranfield Court, Bedfordshire, entered the Army, Dec. 8, 1877, and was transferred to the regiment from the 5th Dragoon Guards, July 27, 1881.

1st King's Dragoon Guards. We have reason to believe, says the *Irish Times*, that Col. R. J. C. Marter, King's Dragoon Guards, will shortly vacate the command of his regiment in India and return to England, there being a desire on the part of the military authorities to provide him with suitable employment on the Staff of the Army. Col. Marter was some years ago on the Staff at Aldershot, and did so well as to justify the belief that he would be a success if called upon to carry out the duties of even greater responsibilities than those of his former position.

7th Dragoon Guards. Capt. Rough arrived home from Egypt on Wednesday in the troopship Lusitania.

6th Dragoons. A correspondent writes:—"The troops from Egypt having in part returned, it will do good to direct notice to the troops in Natal, viz., the 6th Dragoons and 1st Batn. the Welsh Regt. (late 41st). They have now been two years in Natal, and yet there is no sign of their wives joining them! They have undergone far greater hardships than those of the Egyptian Expedition, and what recompense have they received from Government? The married men are keeping two homes, and provisions and everything else being very expensive, it is time Government gave them a change,—to Nova Scotia, or India, for they are well deserving of such consideration. There are many good soldiers leaving, claiming their discharges or purchasing them, heartily sick of the treatment which is dealt out to them. Such a length of time has elapsed since peace was proclaimed in those parts of her Majesty's dominions, where is the necessity of detaining these men from all that is dear to them?"

9th Lancers. We learn from India that Capt. Lord William Beresford, V.C., whilst hunting in the Moorshedabad District on the 14th ult., fell from his horse and broke his collar-bone.

10th Hussars. Brevet Lieut.-Col. Combe, deputy-assist.-qrmr.-gen. on the Indian Establishment, has been appointed an assist.-adjt.-gen., vice Major Ford, R.A., including the time already passed by him in the Qrmr.-Gen.'s Department. Lieut. the Earl of Airlie has arrived home from India, on leave of absence.

19th Hussars. The Cairo correspondent of the *Times* telegraphs on Wednesday:—"The 19th Hussars were to-day paraded before Lord Dufferin at Helouan, and received medals from Lady Dufferin. Afterwards Lord Dufferin, addressing them, said that the troops had gained as much honour by their peaceable and orderly conduct in Cairo as on the field of Tel-el-Kebir."

ROYAL ARTILLERY.

A "Lieutenant-General" writes:—"You give an extract in your issue of the 3rd of two remarkable instances of officers who were promoted for service in Egypt, one of whom it is said was stationed at Suez, and, therefore, not a participator in any of the hostilities; and the other was not only never in any engagement, but was actually never in Egypt at all! Will you allow me, as a corollary to the above, to mention the case of an officer who not only did serve in Egypt, but who performed such good and meritorious service in the front as to elicit the highest commendation of his own superior officers, and who has received no further recognition of his services than the bare mention of his name in despatches, sharing in all other respects the honours of the campaign with his subaltern, who, from the force of circumstances, was left behind at Ismailia? The officer I allude to was in command of a battery of garrison artillery. Three of his guns, 25-pounders, with indomitable resolution on his part, and with the indefatigable exertions of his men, he brought into action at Kassassin. There he poured so well-directed a fire into the enemy's position that he silenced two of his batteries in succession. At Tel-el-Kebir, from the nature of the attack, it was impossible for him to get his guns into action; but, again, by dint of the greatest labour he brought them well up to the front. His was the only battery of garrison artillery that reached the front, and during the action in which it was engaged he was the only officer with it. One word more. This officer's friends have had the mortification of seeing him passed over by the promotion of an officer junior to him in the same service as himself, and who, however well he performed the duties required of him, never, I believe, took part in any of the engagements, from first to last. I content myself with this bare recital of facts, forbearing to utter a word of comment thereon."

In consequence of the expiration of the tenure of appointment of Lieut.-Col. F. Eteson, half-pay, late 3rd Buffs, on the 25th ult., the Government of India have appointed Major H. J. E. Ford, assist.-adjt.-gen., to be the first assist.-adjt.-gen. at Army Head-quarters, to complete his five years, including the time already passed in the department.

ROYAL ENGINEERS.

The *Irish Times* says Major H. Trotter, C.B., who was some time since called to Constantinople to act as Military Attaché, will, we understand, continue in the appointment, Lieut.-Col. J. D. H. Stewart, C.M.G., 11th Hussars, to whom the appointment was first offered at the suggestion of Lord Dufferin, preferring to remain in Egypt, where he is now employed with the Army of the Soudan as special Military Attaché.

Gen. Sir H. D. Harness, K.C.B., Col.-Comdt., died on Saturday, at Barton End, Headington, Oxford. He was a son of the late Mr. John Harness, M.D., Commissioner of the Transport Board, and was born in the year 1804. He entered the Army as a 2nd lieut. in the Royal Engineers in 1827, became capt. in 1843, lieut.-col. in 1855, and was promoted to the rank of col. in 1862. He served in the Indian Mutiny as lieut.-col. commanding the Royal Engineers, taking part in the operations at Cawnpore against the Gwalior Contingent, the siege and capture of Lucknow, and the subsequent engagements in Rohilkund and Oudh. (mentioned in despatches, thanked by the Governor-General in Council, C.B., and medal and clasps). In June, 1877, he was appointed col.-commandant Royal Engineers, and promoted to the rank of lieut.-gen., and in the following October was placed upon the Retired List as a General. He was advanced to a Knight-Commander of the Bath in 1873. Sir Henry Harness, who was one of the Governors of Wellington College, married, in 1828, Caroline, daughter of Mr. Thomas Edmonds, of Cowbridge, Glamorganshire.

The Cairo correspondent of the *Standard* telegraphs:—"Col. Warren is now engaged on the prosecution of Professor Palmer's murderers. It appears from their revelations that the lives of Professor Palmer and his companions might have been saved at the last moment, had money been forthcoming to bribe their captors. No choice was given to the victims as to whether they would be shot or would leap from the precipice. They were all led to the brink of the cliff and shot; but Professor Palmer and Capt. Gill fell over the precipice while still alive. Five Bedouins were chosen for the actual commission of the murder. There is no doubt that the conviction and execution of the murderers will be owing to the admirable and energetic manner in which Col. Warren has carried out his task."

The 25th Company embarked in H.M.S. Assistance at Portsmouth on Wednesday, for Ireland.

Grenadier Guards. The spring changes of quarters are now arranged. The 1st Batn. moves from the Tower to Chelsea, the 2nd Batn. from Chelsea to Wellington Barracks.

Coldstream Guards. Col. Wigram and the officers of the 2nd Batn. kindly invited the boys of the Duke of York's School to Chelsea Barracks on Friday last, to witness an amateur performance of "Mrs. Robinson Crusoe." The burlesque was capitally acted, the scenery good, the dresses bright and charming. The boys thoroughly enjoyed the performance, and at its conclusion gave three cheers for Col. Wigram and the officers of the Coldstream Guards. Prior to the curtain rising, the boys' band played a selection of Scotch airs. The 1st Batn., at Windsor, is under orders to take over quarters at the Tower of London.

Scots Guards. The 1st Batn., at Wellington Barracks, proceeds shortly to Windsor. The 2nd Batn. remains at Wellington Barracks till the autumn, when it proceeds to Dublin in the place of the 3rd Batn. Grenadier Guards, which has been serving at that station since the departure of the troops for Egypt last August.

6th Royal Warwickshire Regiment. Capt. Forbes, 2nd Batn., has been appointed station Staff officer of the Pachmarhi Hill Depôt.

8th King's (Liverpool Regiment). "Kingsman" writes:—"As I see a paragraph in your last issue referring to the 51st Regiment being deprived of their ancient title in official announcements, I trust that your love of fair treatment and fostering *esprit de corps* will enable you to find me space in your next number for the following facts with regard to my own corps,—a regiment which, I beg to remind you, is considerably senior to the one whose similar cause you have already advocated. We were raised in the year 1685, to protect the King (James II.) in Monmouth's rebellion, when eight of our companies were formed in Derbyshire, one in Hertfordshire, and the tenth in Middlesex, the rendezvous of the regiment being at Derby. We then held the distinguished title of 'The Princess Anne of Denmark's' Regiment, in honour of the King's second daughter, the future Queen of England. On the accession of Queen Anne, in 1702, our title was naturally changed, in her honour, to 'The Queen's' Regiment; and shortly after the accession of King George I. it was, for a like cause, altered to 'The King's' Regiment. Under this distinguished name, coupled with our old numeral, we fought and soldiered away under various skies from 1716 till 1881, when the above extraordinary appellation was vouchsafed to us. Considering that we are one of the oldest regiments of the Line, and that our history since 1685 is one we may well be proud of, it is hard to understand what we have done to merit our depôt being permanently established at Warrington, which is an excessively dirty manufacturing town in Lancashire, and also that the far from euphonious title of 'The Liverpool Regiment' has been forced down our throats, vice 'The King's.' I venture to hope that the authorities will return to us our rights, and that in official documents, at any rate, we may be known as 'The King's' alone, instead of, as if by magic, having become the property of a large town in the North of England, which town, together with its county, the regimental history is in no manner associated with."

10th Lincolnshire Regiment. An exchange has been permitted between Capts. Meyrick, 1st Batn., and De Hoghton, 2nd Batn.

13th Somersetshire Light Infantry. Lieut. West, 2nd Batn., has been granted leave from India to England for six months, on urgent private affairs.

17th Leicestershire Regiment. Capt. Mayne, 2nd Batn., has been granted leave from India to England for 15 months, on private affairs.

18th Royal Irish Regiment. The 2nd Batn. has arrived at Malta from Egypt, in H.M.'s ships Serapis and Tamar.

23rd Royal Welsh Fusiliers. The 1st Batn. had arrived at Dum Dum from Chakrata when the mail left India.

29th Worcestershire Regiment. Mr. E. Bovill, formerly of the regiment, died at Gosport on the 9th inst. aged 88 years.

33rd West Riding Regiment. Major Jerrard has been appointed Deputy-Assist.-Adjt.-Gen. at Morar, in succession to Major Wynen, 39th Regt., whose tenure of appointment expired on the 23rd ult.

35th Royal Sussex Regiment. Col. Hackett and Capt. Cafe arrived home from Egypt on Wednesday in the troopship Lusitania.

38th South Staffordshire Regiment. Lieut. Moloney arrived home from Egypt on Wednesday in the steamer Lusitania.

41st the Welsh Regiment. See 6th Dragoons.

42nd Royal Highlanders (Black Watch). Lieut. Lord A. Kennedy arrived home from Egypt on Wednesday in the troopship Lusitania.

46th Duke of Cornwall's Light Infantry. Lieut.-Col. Sterling, Coldstream Guards, presided a few evenings ago at the annual dinner of the Devon and Cornwall Chamber of Agriculture at Plymouth, and responded for the Army. Col. Sterling was in Egypt, and he denied that the Army that went to Egypt was composed of boys. Only picked, seasoned soldiers went out. With regard to the Egyptian Campaign itself, great *éclat* had been attributed by certain writers to one particular body of men; but, notwithstanding both newspaper and official reports, he could tell them that the first line of men did not carry the entrenchments, but that the Cornish Regt. passed through them, and carried the entrenchments for them; and what was more, Col. Richardson, of the 46th, was upon the top of the entrenchments, leading his troops on, before the troops of the first line had reached the entrenchments. In the face of false accounts, he thought it necessary to say this much.

ROYAL MARINES.

Major C. W. Carlyon, Portsmouth Division, has been permitted to retire, at his own request, under the Order in Council of Nov. 29, 1881. The retirement of Major Carlyon brings Major St. A. St. John on the 16s. list, and promotes Capt. Cyril Frampton to Major.

Major H. H. Kelly, R.M.A., has been appointed Pymr., vice McArthur. A vacancy is thus created for the post of Staff Capt., and Capt. R. C. Allen will obtain his majority.

The following named gentlemen have been appointed (Feb. 1, 1883) lieutenants in the corps of Royal Marines, and attached to the divisions noted against their names:—Messrs. Ernest Edward Chown, Walter Erskine Binney, Cunliffe McNeile Parsons, Charles Louis Shubrick, Donald Baker, and Richard James Saumarez, to the Portsmouth Division; Kenneth James Buchanan, Arthur Lewis Harries, Bernard Lucien Hubbard, David Mercer, and Thomas Henry O'Brien, to the Plymouth Division; James Rainey Goddard, Herbert St. Leger Curteis, William Hugh Munro Warrand, and Cecil Henderson, to the Chatham Division.

53rd King's (Shropshire Light Infantry). The regiment has arrived at Malta from Egypt, in H.M.'s ships Serapis and Tamar.

54th Dorsetshire Regiment. Major Phibbs has been granted leave from India to England for twelve months, on medical certificate.

55th Border Regiment. Lieut.-Col. J. Palmer, formerly of the regiment, died at Great Torrington on the 7th inst., in his 90th year. The deceased was the last surviving son of the late Very Rev. J. Palmer, Dean of Cashel.

60th King's Royal Rifle Corps. Lieut.-Col. Charley, 4th Batn., has been granted leave from India to England for fifteen months, on urgent private affairs, and Lieut. Brodie for six months, on medical certificate. The *Irish Times* says:—"It will gratify not a few to learn that her Majesty, having been made acquainted with the reward given by the Commander-in-Chief to Serjt. Danvers, the utmost it was in his power to bestow, of £5 and a good-conduct medal, has been pleased to order the substitution for this inadequate acknowledgment of his gallantry of a badge of merit, and a sum of £10 per annum for life."

61st Gloucestershire Regiment. Lieut. Archdale has been appointed Staff officer of the Purundhur Sanatorium.

65th York and Lancaster Regiment. Col. Warren completed five years' service in command of the regiment on Thursday, and will shortly be placed upon half-pay.

72nd Seaforth Highlanders. An exchange has been sanctioned between Lieut. Burne, 1st Batn., and Lieut. Jameson, 2nd Batn. Lieut. Burne proceeds to India, with the draft which embarks about the 3rd prox.

74th Highland Light Infantry. The military authorities at Devonport are making preparations for the arrival of the head-quarters and service companies from Egypt in H.M.S. Serapis. The two companies of the 82nd Regiment in Plymouth Citadel returned to Raglan Barracks on Wednesday, to rejoin head-quarters; the 33rd Company, Royal Engineers, quartered at Millbay Barracks, have to move into Raglan Barracks. The 74th is to occupy the Citadel and Millbay Barracks. Lieut. Garland arrived home from Egypt on Wednesday in the troopship Lusitania.

77th Middlesex Regiment. At the examination, held throughout India and Burmah, of officers of the Royal Artillery, Royal Engineers, Cavalry, and Infantry of the Line, on Oct. 16 last, Lieut. and Adjt. Barnardiston passed as distinguished in all four subjects of examination, viz., "Military Law," "Field Fortification," "Military Topography," and "Tactics."

86th Royal Irish Rifles. Lieut. Formby has proceeded from Calcutta to Cuttack to join the 32nd Madras N.I., to which regiment he has been attached as a probationer to the Madras S.C.

92nd Gordon Highlanders. H.R.H. the Field-Marshal Commanding-in-Chief has approved of Lieut. Stewart being appointed A.D.C. to Gen. Sir D. M. Stewart, G.C.B., Commander-in-Chief of the troops in India. Lieut. Wright arrived home from Egypt on Wednesday in the troopship Lusitania.

96th Manchester Regiment. Major Newbigging has been granted leave from India to England for six months, on private affairs. Capt. Moores has been appointed adjt. of the Convalescent Depôt at Deolallee.

97th Royal West Kent Regiment. Lieut. Maunsell arrived home from Egypt on Wednesday in the troopship Lusitania.

98th North Staffordshire Regiment. Major Roper has been appointed commandant of the Mount Aboo Sanatorium, Bombay, vice Major Douglas, 29th Foot.

Rifle Brigade. Lieut.-Col. Percival, 4th Batn., has taken over charge of the Darjeeling Hill Depôt from Col. Roberts, 9th Foot. Qrmr. Hone, 4th Batn., has been granted leave from India to England for six months, on private affairs.

Commissariat and Transport Staff. Assist.-Comies.-Gen. W. A. Dunne and W. A. Richardson, Capt. and Deputy-Assist.-Comy.-Gen. E. Burrell, Deputy-Assist.-Comy.-Gen. McCombe, and Qrmrs. W. Collett and J. F. Cossey, arrived home from Egypt on Wednesday in the troopship Lusitania.

Pay Department. During the past month, the following changes of stations, appointments, and promotions, &c., have taken place:—Major Chauncy, from the 2nd Batn. Coldstream Guards, to 22nd Regimental District, Chester; Major Feilden, from the Cape, to Coast Brigade, Royal Artillery, Woolwich; Major Davis, from Unattached List, to 1st Regimental District, Glencorse; Major Treffry, from 58th Regt., to Unattached List; Major Whittington, from Unattached List, to 20th Regimental District, Bury; Capt. M. J. Sawyer, to 2nd Batn. 12th Regt.; Assist.-Pymr. Beardmore, from 22nd Regimental District, to the 66th Regt. Two officers have joined on probation, Capts. J. K. McCausland and G. C. Bayly. Promotion—Capt. F. Robertson to be staff pymr. (Jan. 1), vice Major C. Skrine, granted the hon. rank of lieut.-col. on retirement. Appointments—Capts. L. O. White, from the 22nd Regt., and G. C. Fuller, from the 3rd Hussars. Death—Capt. W. D. Caudwell, on Jan. 2. There are now 25 regiments, two cavalry and 23 infantry, without paymasters. We regret to hear that Capt. C. B. Griffith, Pymr. 74th Regt., remained in hospital at Cairo, being too ill to accompany the regiment home. Major Spiller, Pymr. 19th Hussars, has taken over financial charge of the 74th Regt., for the passage home. Capt. King, on probation for the department, has taken charge of the pay-office, 19th Hussars, from Major Spiller. Capt. W. H. Mortimer, Pymr. 75th Regt., has been admitted into hospital at Cairo, consequent on an attack of inflammation of the lungs. Capt. P. A. Robinson, Pymr. 2nd Batn. 18th Royal Irish, and Capt. A. Gleig, 53rd Regt., have proceeded with their respective regiments to Malta.

Medical Department. Surg.-Gen. R. Gilborne has been appointed principal medical officer at Aldershot. Surg.-Gen. Sir J. Hanbury, K.C.B., late senior medical officer to the troops in Egypt, has been appointed to the principal medical charge of the Woolwich and Home Districts, succeeding Deputy-Surg.-Gen. A. Young. Surg.-Major C. A. Maunsell, M.D., and Surgs. P. J. McQuaid and T. Moynihan arrived home on Wednesday in the troopship Lusitania. The following postings of Medical officers have been ordered in India:—Surgs.-Major Wilson and Maturin to Morar; O'Reilly, to Meean Meer; and Roche, to Meerut. Surgs. Molloy and Kirkwood, to Peshawur; Blood and Butt, to Meerut; Watson, to Lucknow; Cox, to Calcutta; Reade, to Rawul Pindee; Egar and Barnes, to Meean Meer; Asbury, to Morar; and Sawyer, to Allahabad. Surg.-Major A. Duke was killed at Meerut on the 13th ult., by a fall from his horse whilst playing polo. The *British Medical Journal* says:—"Mr. J. Spencer Wells, President of the Royal College of Surgeons, in his Harveian Oration on Wednesday, said, that in relating the story of the gallant conduct of Surg. Landon, who had laid down his life unrepiningly in the care of the wounded at Majuba Hill, it would be a source of interest and gratification to the medical profession and to the people at large to know that the Queen had been so deeply interested in the details of this noble conduct, that she had directed a minute report of the facts, which had been laid before her by command, to be placed in her private archives."

The Auxiliary Forces.

MILITIA.

Cheshire Regiment. Col. the Hon. T. G. Cholmondeley, who had commanded the 3rd Batn. (late 2nd Royal Cheshire) since Oct. 1, 1852, and retired last month, died at Abbots Moss, Northwich, Cheshire, on the 9th inst., aged 64 years. The deceased was greatly respected throughout the regiment. He served formerly in the 43rd Light Infantry, from which he retired as captain.

"X. Y." writes:—"It is surely to be hoped that before the drill season, a full head-dress will be made regulation for officers in Militia regiments now made battalions of Highland Line corps. Whether it be feather bonnet, helmet, or shako, something should be settled. It cannot be expected that we should attend full-dress parades or go to Court in the shabby little glengarry cap, which is the undress head-gear of privates in the Line."

THE VOLUNTEERS.

"A Volunteer Officer" writes:—"It is to be hoped that the next statement of the Secretary for War in moving the Army Estimates may bring the Volunteers into closer connection with their territorial regiments. I am unable to call to mind any public utterance of the new Secretary for War which could lead one to form an idea as to his views on this question. But whatever they may be, you would be doing a real service to the Volunteer Force and the country, if you would continue your powerful advocacy in favour of such a movement. At present, the connection exists simply in name."

With only two exceptions, all the corps which have received permission to form the columns for the march on Brighton have readily acquiesced in the commissariat arrangements proposed for the occasion. Col. the Hon. Paul Methuen, C.B., has again visited Cuckfield, Hayward's Heath, Lindfield, Burgess Hill, and other places where the halt will be called on Good Friday, and entered into contracts for the supply of dinner that night to over 3,000 Volunteers, and a substantial breakfast on the following morning before resuming the march. Col. Methuen has been engaged three days in perfecting the arrangements. The complete returns of the regiments wishing to take part in the review are due at the War Office to the Qrmr.-Gen. of the Forces, Lieut.-Gen. Sir A. J. Herbert, K.C.B., on the 5th prox., before which no trustworthy estimate can be formed of the total strength of the force which will be assembled on the Downs on March 26.

THE CLYDE COURT-MARTIAL.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."
